Statistics in Transition (SiT) is an international journal published jointly by the Polish Statistical Association (PTS) and the Central Statistical Office of Poland (CSO/GUS), which sponsors this publication. Launched in 1993, it was issued twice a year until 2006; since then it appears – under a slightly changed title, Statistics in Transition new series – three times a year; and after 2013 as a regular quarterly journal.

The journal provides a forum for exchange of ideas and experience amongst members of international community of statisticians, data producers and users, including researchers, teachers, policy makers and the general public.

STATISTICAL REVIEW – EDITION 2019

(Polish-English version)

quarterly edition

time of publication – March, June, September, December

Index 19 579/01-04

Vol. ca. 130 pages, size: 166 x 238 mm

Price: PLN (paperback) 15,00

For several decades The Statistical Review has enjoyed a great reputation in the scientist community and has played a formative role in the development of statistics and related fields. The periodical is addressed to and widely read and respected by a wide audience of researchers, teachers, students and practitioners of statistics, econometrics, operations research, mathematical economics and related fields in Poland. Along with reviewed scientific articles, the quarterly publishes also reports from conferences and scientific seminars, book reviews and profiles of prominent academics. The quarterly is the leading source of information about theoretical and empirical results in econometrics and statistics. It is also helpful for university teaching, especially at the master and doctoral level.

International comparison

Statistical Yearbooks

COMBINED NOMENCLATURE EDITION 2019

(Polish version)

annual edition

time of publication – December

Vol. ca. 690 pages, size: 210 x 290 mm

The Combined Nomenclature is the goods classification used within the EU for the purposes of foreign trade statistics. It is also used by Directorate General „Taxation and Customs Union“ of the European Commission. The Combined Nomenclature is a development of the Harmonized Commodity Description and Coding System (HS). It is introduced annually by a regulation of the European Commission based on Council of the European Communities, Regulation No 2658/87 of 23 July 1987, on the tariff and statistical nomenclature and on the Common Customs Tariff. The CN is updated and published annually from 1 January to 31 December of the year following publication. It is used in statistics and records of foreign trade and is used for customs purposes (SAD, customs tariff).

PRODCOM LIST EDITION 2019

(Polish version)

annual edition

time of publication – December

Vol. ca. 220 pages, size: 210 x 270 mm

PRODCOM list is a list of groupings of industrial products for which data are collected from individual business entities. The PRODCOM list is issued on the basis of Council Regulation (EEC) No 3924/91 of 19 December 1991 on the establishment of a Community survey of industrial production (OJ of the EC No L 374/1). The list is introduced annually by the Commission Regulation of the European Union with a period of application from 1 January of the year of introduction. The PRODCOM list included in the PRODPOL nomenclature used for product research in Poland ensures comparability of data on an international scale.

PRODPOL NOMENCLATURE FOR ANNUAL SURVEY FOR 2018

(Polish version)

annual edition

time of publication – January

Vol. ca. 410 pages, size: 210 x 270 mm

PRODPOL nomenclature for the annual survey for 2018 is a list of industrial products and services covered by annual product survey for 2018.

PRODPOL NOMENCLATURE FOR MONTHLY SURVEY IN 2019

(Polish version)

annual edition

time of publication – January

COINCIDENT AND LEADING COMPOSITE BUSINESS CYCLE INDICATOR, BUSINESS CYCLE CLOCK 2019

(Polish version)

quarterly edition

time of publication – March, June, September, December

The current work on experimental statistics involves analysis of business cycles based on composite (synthetic/aggregated) indexes providing synthetic descriptions of fluctuations throughout the economy. The coincident (COINC) and leading (LEAD) aggregated business tendency index have been estimated. The coincident (simultaneous) index reflects the current business tendency, while the leading business tendency index shows the future business tendency at a specific time in advance. The business cycle clock (a graph of business cycle phases) is a tool that facilitates the analysis of the business cycle. It is a graphic presentation of the place of various economic variables (aggregated or simple indices) in the business cycle. Its primary purpose is to illustrate the phenomenon in a mid-term time perspective. The clock is an illustration in the form of a coordinate system.

Statistical information

By: voivodships, regions, socio-economic groups, size of household, quintile groups, biological type of household, disability of persons, class of locality, level of education of the reference person.

Statistical surveys methodology

METHODOLOGICAL REPORT. SOCIAL ASSISTANCE BENECIARIES

(Polish version)

one-time publication

time of publication – March

The publication presents the methodology of statistical survey “Social assistance beneficiaries”, which is entirely based on administrative data sources. Hence, a lot of space was devoted to the description of concepts and typologies specific to the social welfare system, which in some places are significantly different from those used in public statistics.

The data set used in the study is created during the administrative procedure preceding the decision on granting social assistance benefits.

METHODOLOGICAL REPORT. NURSERIES AND CHILDREN’S CLUBS

(Polish version)

one-time publication

time of publication – March

The methodological report consists of the methodology of the study in the field of institutionalised care for children under the age of 3. It includes the description of subjective and objective scope of the study, the organisation and methods and the definition of principal notions, the appropriate tool of the study and the modes of data publication are presented. The questionnaire form including the guidelines and list of variables occurring in the study have been attached to the report.

The aim of the study is to describe the methodology of the research into associations, foundations, business and professional associations as well as faith-based charities. The study begins a series of publications devoted to the description of statistical survey methods in the area of the social economy. This publication is devoted primarily to research topics conducted by the President of the Statistics Poland and accomplished on statistical forms of the Statistics Poland with symbols SOF-1, SOF-4 and SOF-5. The publication presents the methodology and organization of these surveys and describes the applied research tools.

ENVIRONMENT STATISTICS

Condition and protection of the environment

Statistical analyses

ENVIRONMENT 2019

(Polish-English version)

annual edition

time of publication – November

ISSN 0867-3217

Index 19 380/00

Vol. ca. 200 pages, size: 210 x 270 mm

Price: PLN (paperback) 28,00

It contains a synthetic presentation of a comprehensive set of results of statistical surveys, the functioning sub-systems of the National Environmental Monitoring and administrative sources characterising the state, hazards and protection of the environment in 2016 compared to previous years. Data concerns the natural conditions and individual components of the environment, the issues related to waste, radiation and noise, the activities aimed at protecting and controlling the environment, the economic aspects of environmental protection, including investment outlays and material effects, as well as current costs.

By: regions (selected data), voivodships, subregions, powiats, areas with a large scale of hazards, hydrographic regions, regional water management boards, forestry organisational units, objects and areas of special natural values protected by the law, and health resorts, as well as water and wastewater management, air pollution and protection, waste, investment outlays and current costs related to environmental protection by sections, divisions, groups and classes (in specific cases) of PKD 2007, international comparisons.

Statistical analyses

GREEN ECONOMY INDICATORS IN POLAND 2019

(Polish and English version)

published every 2 years

time of publication – December

The publication presents indicators to assess the state of green economy in Poland. They are included in the four core areas: natural asset base, environmental and resource productivity of the economy, environmental quality of life as well as economic opportunities and policy responses. The report is complemented with context indicators, which are a source of basic information about the socio-economic situation of the country.
