<sup>a)</sup> Reported data; comprise enterprises employing over 9 persons.

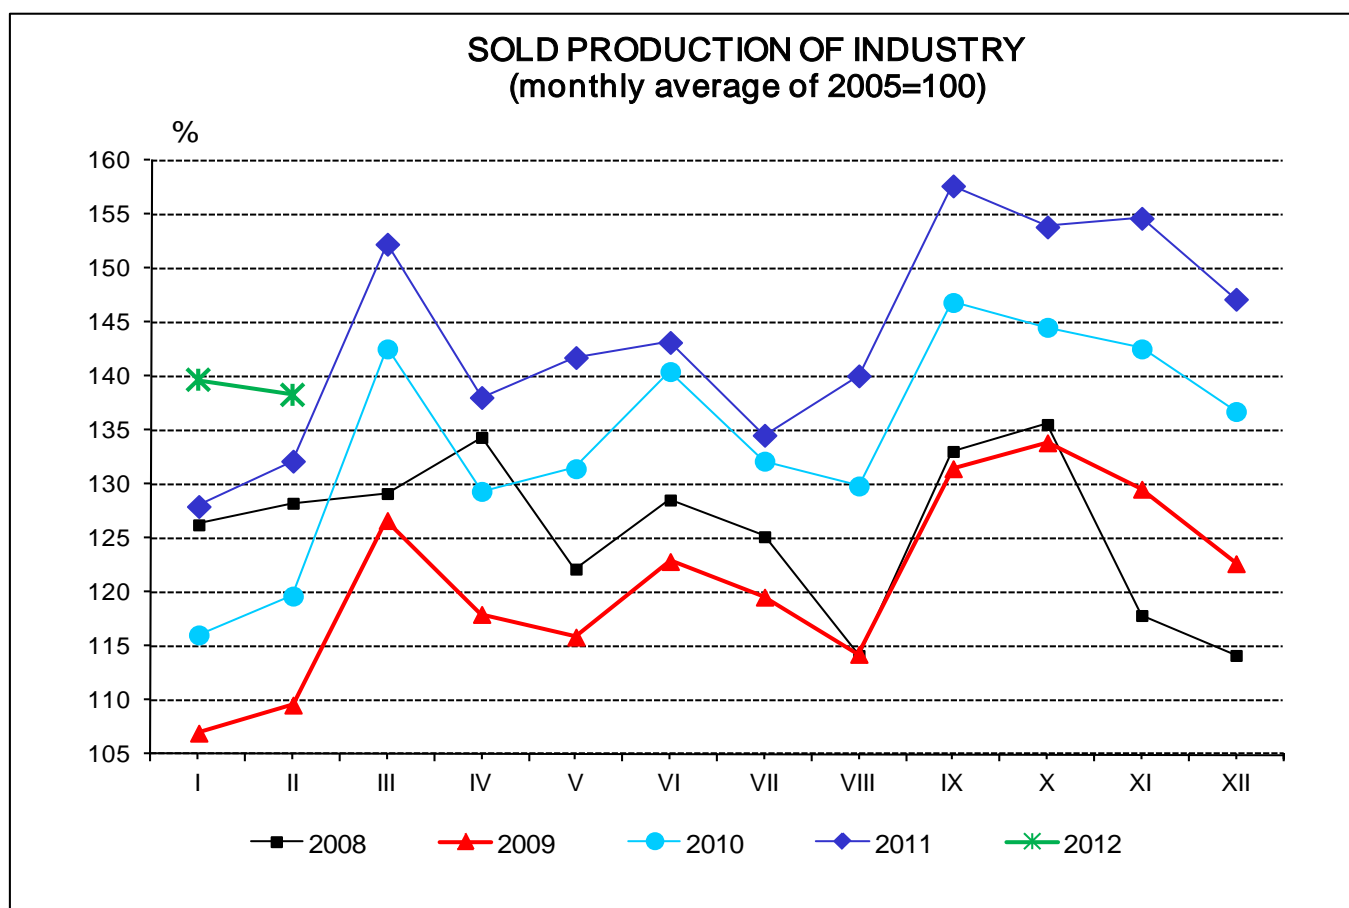

<sup>b)</sup> Data including final information on production and prices in January and reported data – in February.

According to the preliminary data **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in February of 2012 was by 4.6% higher than in the previous year, but lower by 1.0% than in January of 2012. After eliminating the seasonal factors, sold production of industry reached the level higher by 6.0% than in the corresponding month of the previous year and lower by 1.3% than in January of 2012.

As compared to February of 2011, an increase in sold production was reported in 26 (out of 34) industry divisions, among others, in manufacture of metal products – by 14.8%, manufacture of chemicals and chemical products – by 14.8%, manufacture of machinery and equipment – by 9.4%, manufacture of paper and paper products – by 8.0%, manufacture of electrical equipment – by 7.7% and manufacture of food products – by 6.0%. A drop in sold production of industry, as compared to February of 2011, was recorded in 8 divisions, among others, in mining of coal and lignite – by 7.9%, in manufacture of other non-metallic mineral products – by 6.8%, manufacture of furniture – by 1.8% and manufacture of coke and refined petroleum products – by 1.1%.

In the period January-February of 2012 sold production of industry was by 6.9% higher than in the corresponding period of the previous year.

Indices of sold production of industry in comparison with an average monthly level in 2005 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in February of 2012 by 12.0% higher than a year before, and by 5.5 % lower than in January of 2012. After eliminating the seasonal factors, construction and assembly production reached the level by 13.3% higher than in the corresponding month of the previous year and by 2.0% lower than in January of 2012.

In relation to February of 2011, an increase in production was recorded in all divisions of construction, including in entities specialising in civil engineering – by 27.0%, in entities dealing mainly with specialised construction activities – by 16.8%, and in entities whose basic type of activity is the construction of buildings – by 0.5%.

In comparison to January of 2012, an increase in production was recorded in all divisions of construction. In entities whose basic type of activity is civil engineering the drop amounted to – 8.9%, in entities dealing mainly with specialised construction activities – 4.7%, and in entities specialising in the construction of buildings – 3.4%.

In the period January-February of 2012, construction and assembly production was by 23.7% higher than in the corresponding period of 2011.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005 are presented in the graph below:
