<sup>a)</sup> Reported data; comprise enterprises employing over 9 persons.

<sup>b)</sup> From 2009 onwards data are presented in accordance with Polish Classification of Activities (PKD 2007), compiled on the basis of Statistical Classification of Economic Activities in the European Community (NACE Rev.2). Data may not be fully comparable to the one previously presented according to the PKD 2004 (NACE Rev.1.1).

<sup>c)</sup> Data including final information on production and prices in the period I-VIII and reported data – in September.

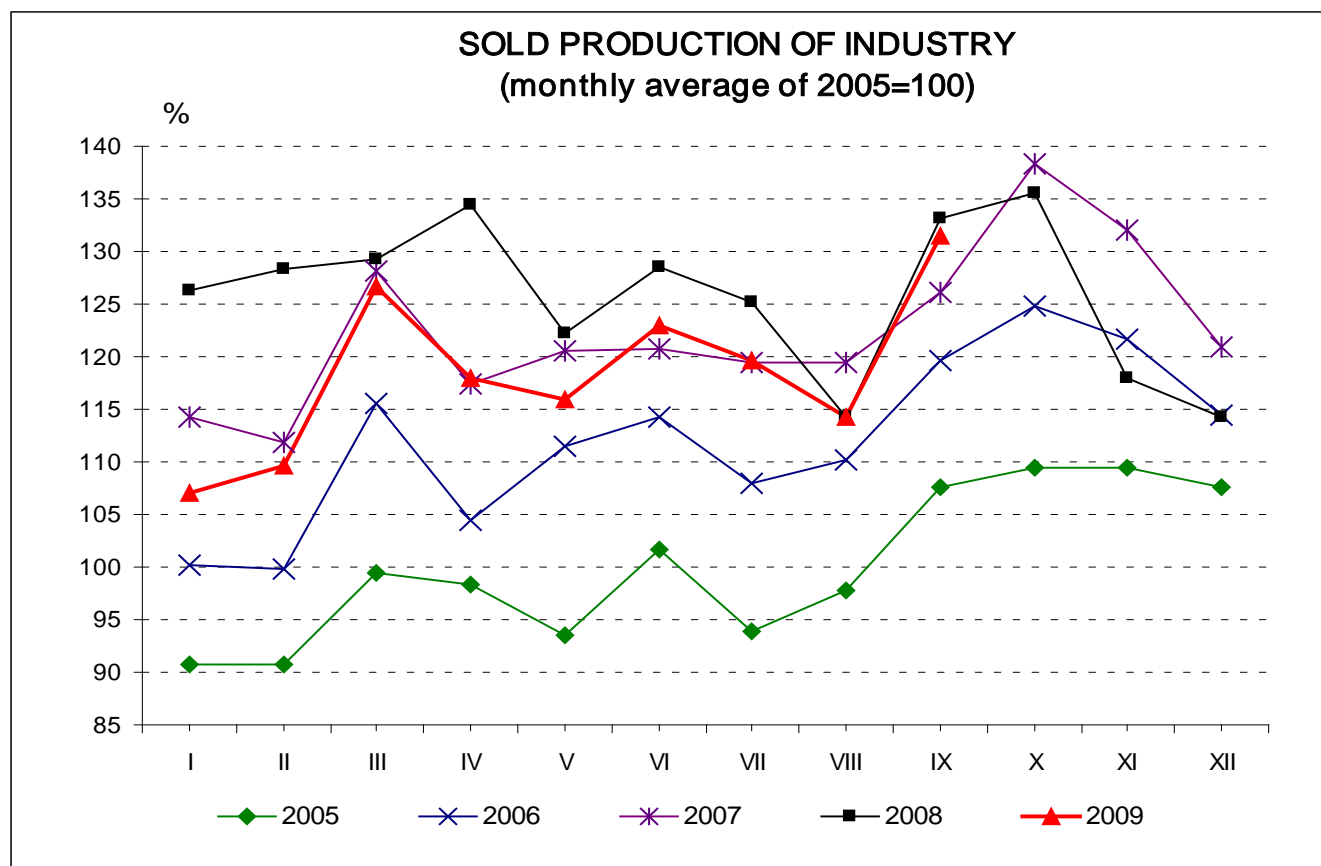

\* Reported data updated by final price index.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in September of 2009 was by 1,3% lower than in the previous year and by 15,0% higher than in August of 2009. Having eliminated the influence of seasonal factors, sold production of industry reached the level lower by 2,1% than in the corresponding month in the previous year and was by 0,9% higher than in August of 2009.

As compared to September of the previous year, a drop in sold production was reported in 17 (out of 34) industry divisions, among others, in manufacture of basic metals – by 12,9%, manufacture of motor vehicles, trailers and semi-trailers – by 10,4%, mining of coal and lignite – by 10,3%, manufacture of metal products – by 9,4%, manufacture of machinery and equipment – by 6,8%, manufacture of coke, refined petroleum products – by 4,2%. An increase in sold production of industry, as compared to September of the previous year, was recorded in other divisions, among others, in manufacture of computer, electronic and optical products – an increase by 15,8%, manufacture of beverages – by 15,7%, manufacture of paper and paper products – by 11,2%, manufacture of food products – by 5,6% and manufacture of electrical equipment – by 4,1%.

In the period January-September of 2009 sold production of industry was by 6,0% lower than in the corresponding period of the previous year.

Indices of sold production of industry in comparison with an average monthly level in 2005 is presented in the graph below:

According to the preliminary data, **the construction and assembly production** (in constant prices), including investment and repair works, carried out domestically by construction enterprises employing more than 9 persons was in September of 2009 by 5,7% higher than in the previous year and by 6,1% larger than in August of 2009. Having eliminated the influence of seasonal factors, the construction and assembly production reached the level by 7,1% higher than in the corresponding month in the previous year and by 1,0% lower than in August of 2009.

As compared to September of the previous year, the production grew in entities the basic activity of which is civil engineering – an increase by 28,8%. However, a drop was reported in entities mainly involved in specialized construction activities (among others, demolition and site preparation, building installation activities, building completion and finishing) – by 7,0% and construction of buildings – by 5,9%.

In comparison with August of 2009 an increase of production occurred in all construction divisions and amounted to: 7,2% - in entities the basic activity of which is civil engineering, 6,1% – by entities realizing construction of buildings and 4,1% - carrying out specialized construction activities.

In the period January-September of 2009 the level of the construction and assembly production carried out was by 4,7% higher than in the corresponding period of the previous year.

Indices of the construction and assembly production in comparison with an average monthly level in 2005 is presented in the graph below:
