^{a)} Reported data; comprise enterprises employing over 9 persons.

^{b)} Data including final information on production and prices in November and reported data – in December.

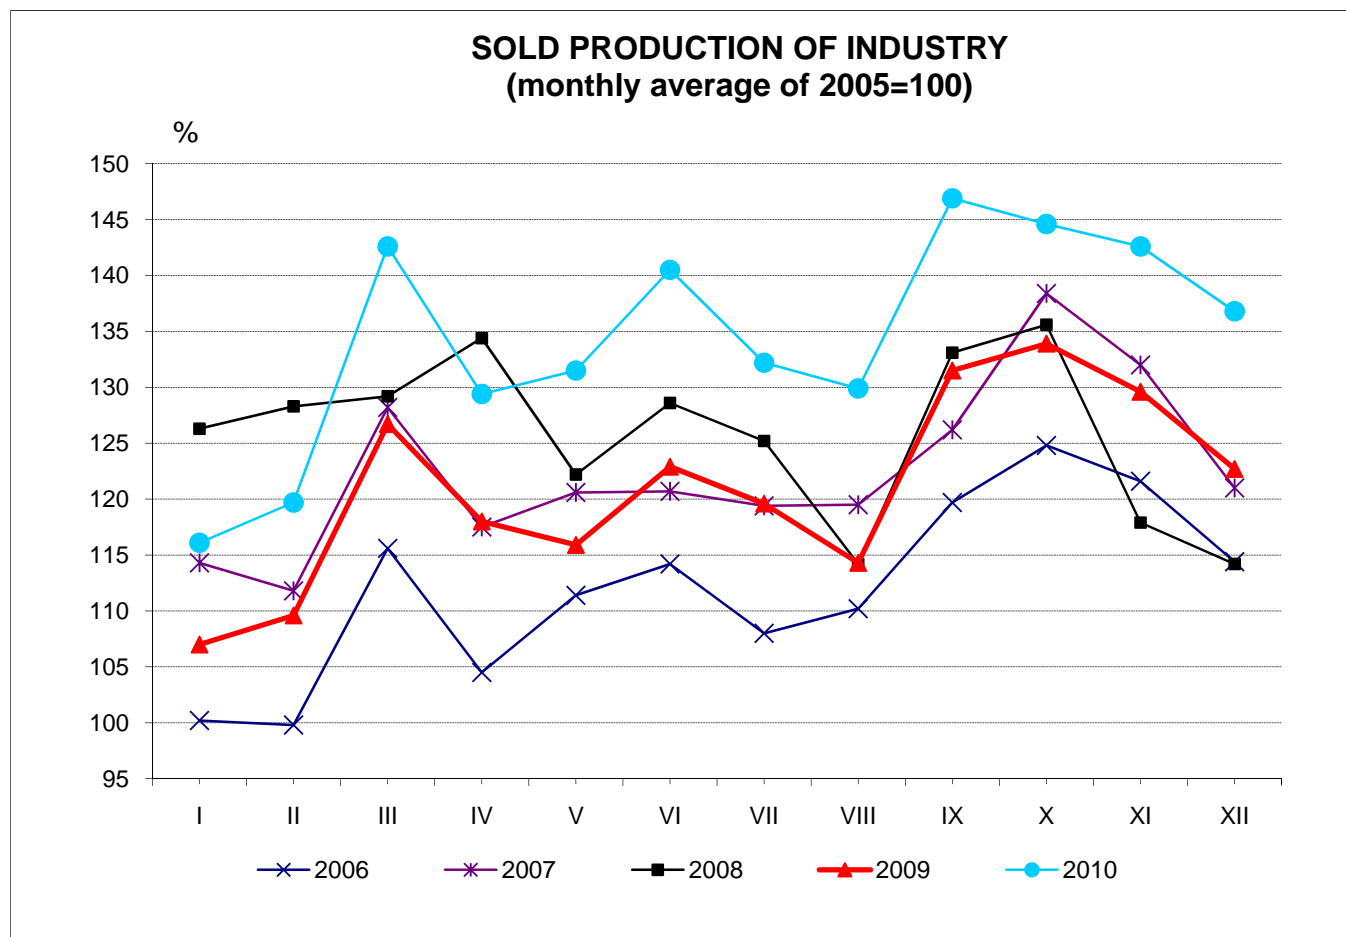

* Reported data updated by final price index.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in December 2010 was by 11,5% higher than in the corresponding month of the previous year, but lower by 4,1% than in November 2010. Having eliminated the influence of seasonal factors, sold production of industry reached the level higher by 11,5% than in the corresponding month of 2009 and was by 0,6% higher than in November 2010.

As compared to December 2009, an increase in sold production was reported in 26 (out of 34) industry divisions, among others, in, manufacture of computer, electronic and optical products – by 30,5%, manufacture of metal products – by 27,0%, manufacture of electrical equipment – by 23,3%, manufacture of rubber and plastic products – by 16,7%, manufacture of products of wood, cork, straw and wicker – 16,4% and manufacture of motor vehicles, trailers and semi-trailers – by 15,2%. A drop in sold production of industry, as compared to December 2009, was recorded in 8 divisions, among others, in, mining of coal and lignite – by 16,7%, manufacture of tobacco products – by 15,3% and manufacture of beverages – by 9,6%.

In the period January-December 2010 sold production of industry was by 9,8% higher than in the corresponding period of 2009.

Indices of sold production of industry in comparison with an average monthly level in 2005 is presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair works, carried out domestically by construction enterprises employing more than 9 persons was in December 2010 higher both in comparison to December of previous year – by 12,3% and November 2010 – by 38,8%. Having eliminated the influence of seasonal factors, construction and assembly production reached a level by 13,7% higher than in the corresponding month of 2009 and by 1,1% in comparison to November 2010.

In relation to December 2009, an increase was recorded in entities engaged mainly in construction works connected with construction of buildings – by 29,6% and specialised construction works – by 11,0%. In entities carrying out mainly works connected with civil engineering production decreased by 2,1%.

In comparison to November 2010, an increase of production occurred in all construction divisions and amounted to: in enterprises the basic activity of which is construction of buildings 59,7%, in entities realizing specialised construction works 30,3%, and in enterprises carrying out construction works connected with civil engineering 24,0%.

In the period January-December of 2010 the level of the construction and assembly production was by 3,5% higher than in the corresponding period of the previous year.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005 is presented in the graph below:
