^{a)} Reported data; comprise enterprises employing over 9 persons.

^{b)} Data including final information on production and prices in August and reported data – in September.

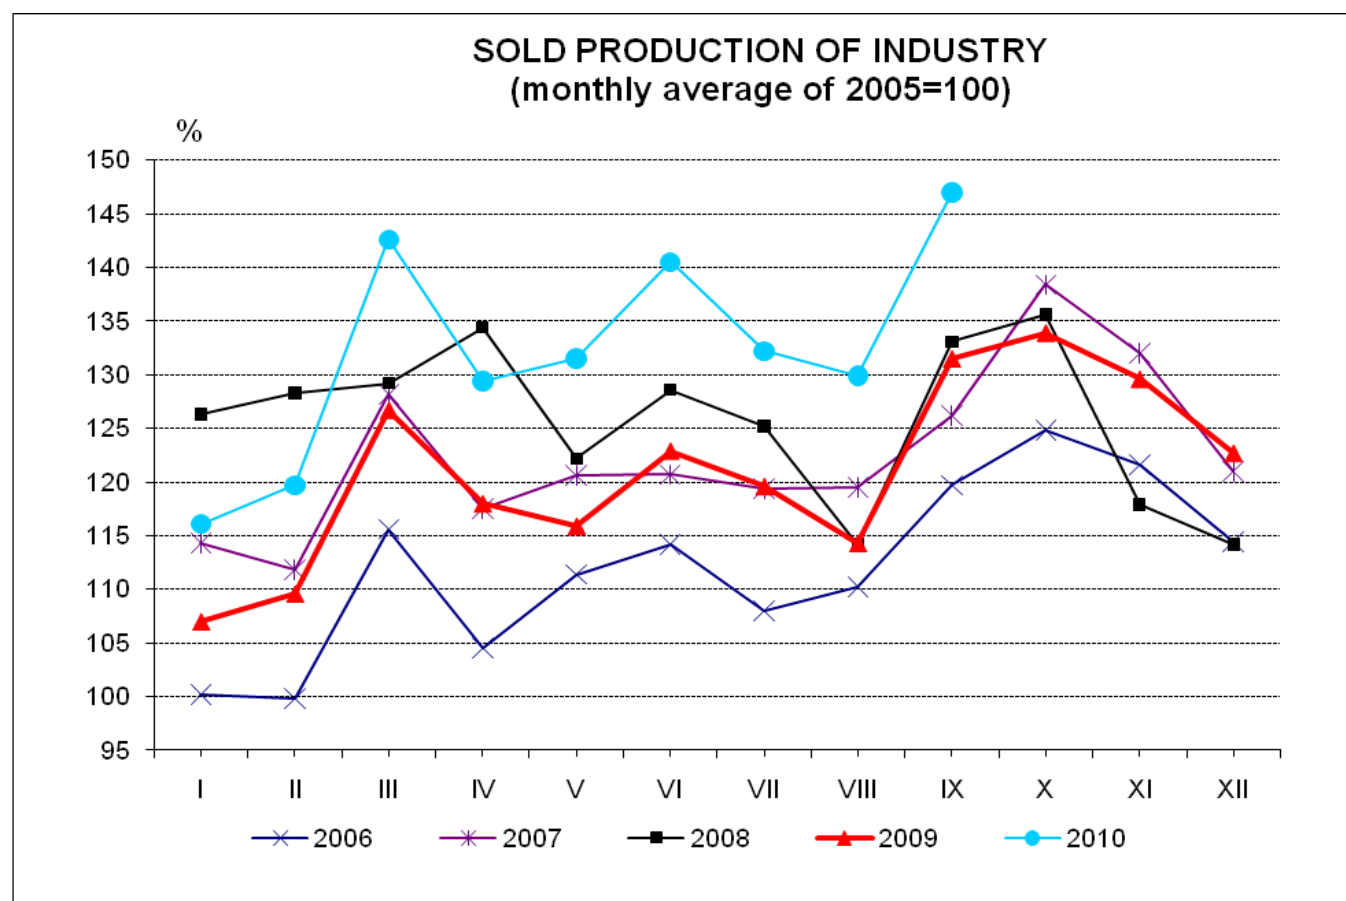

* Reported data updated by final price index.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in September 2010 was by 11,8% higher than in the corresponding month of the previous year and by 13,2% higher than in August 2010. Having eliminated the influence of seasonal factors, sold production of industry reached the level higher by 12,1% than in the corresponding month of the previous year and was by 0,4% higher than in August 2010.

As compared to September 2009, an increase in sold production was reported in 28 (out of 34) industry divisions, among others, in, manufacture of computer, electronic and optical products – by 40,3%, manufacture of chemicals and chemical products – by 40,1%, manufacture of metal products – by 23,8%, manufacture of other non-metallic mineral products – by 22,3%, manufacture of electrical equipment – by 19,8% and manufacture of motor vehicles, trailers and semi-trailers – by 16,0%. A drop in sold production of industry, as compared to September 2009, was recorded in 6 divisions, among others, in, mining of coal and lignite – by 14,5% (by the reason of organizational changes to a great extent – two coal mines taken over by energy company), manufacture of beverages – by 7,8% and manufacture of furniture – by 2,8%.

In the period January-September 2010 sold production of industry was by 10,7% higher than in the corresponding period of the previous year.

Indices of sold production of industry in comparison with an average monthly level in 2005 is presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair works, carried out domestically by construction enterprises employing more than 9 persons in September 2010 was by 13,4% higher than in the previous year and by 11,0% than in August 2010. Having eliminated the influence of seasonal factors, construction and assembly production reached the level by 9,0% higher than in the corresponding month of the previous year and by 2,9% in comparison to August 2010.

In relation to both September of the previous year and August 2010, an increase in the level of conducted works was recorded in all construction divisions. In comparison to September of the previous year, an increase amounted to: in entities engaged mainly in construction works connected with construction of buildings 21,4%, in enterprises the basic activity of which is specialised construction activities 14,3%, and in entities engaged mainly in civil engineering 5,4%.

In comparison to August 2010, a growth of production in enterprises the basic activity of which is civil engineering amounted to 17,8%, in entities realizing construction works connected with construction of buildings 8,9% and in enterprises carrying out specialised construction activities 3,2 %.

In the period January-September of 2010 the level of the construction and assembly production was by 1,5% lower than in the corresponding period of the previous year.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005 is presented in the graph below:
