^{a)} Reported data; comprise enterprises employing over 9 persons.

^{b)} Data including final information on production and prices in April and reported data – in May.

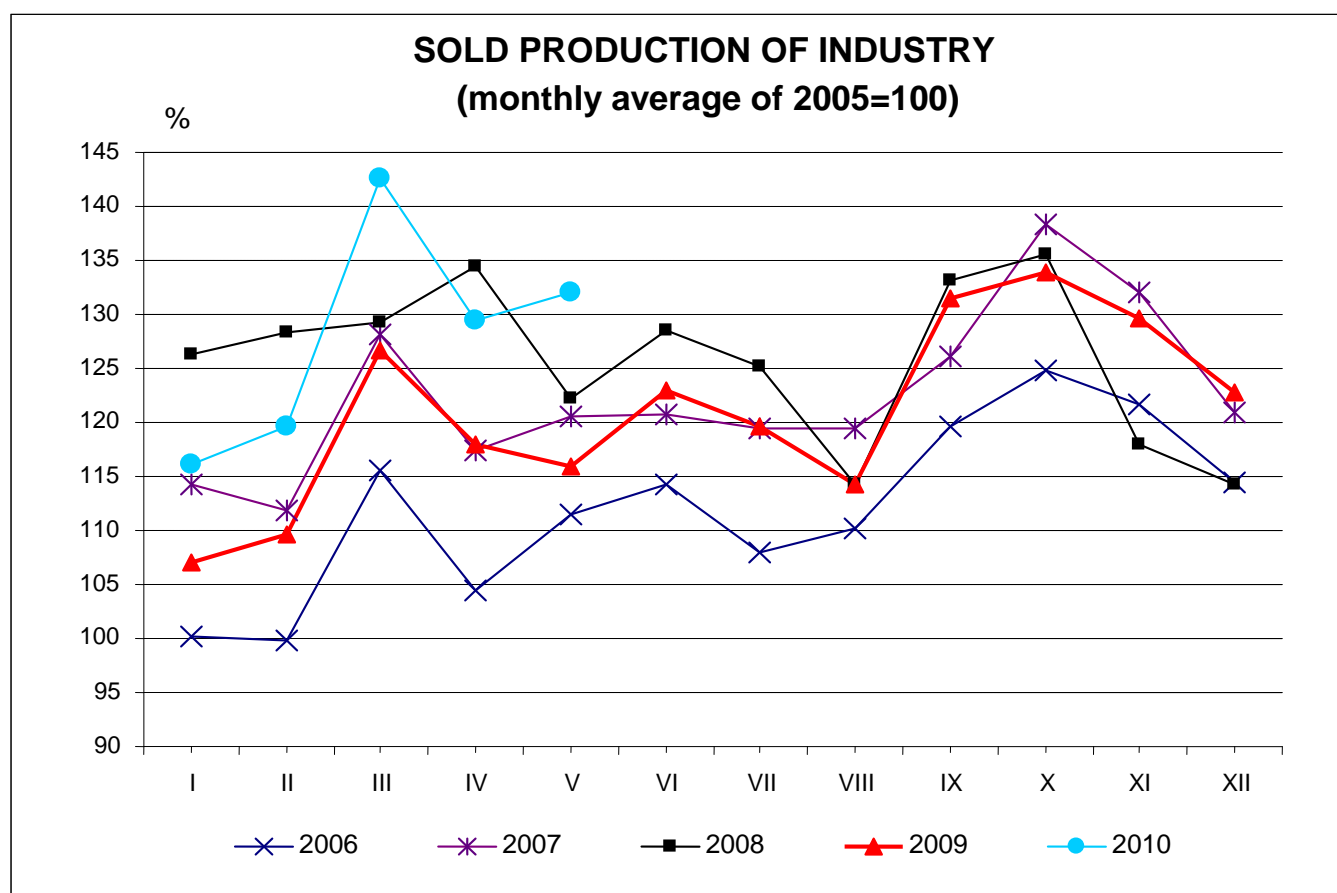

* Reported data updated by final price index.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in May 2010 was by 14,0% higher than in the corresponding month of the previous year and by 2,0% higher than in April 2010. Having eliminated the influence of seasonal factors, sold production of industry reached the level higher by 10,9% than in the corresponding month of the previous year and was by 3,4% higher than in April 2010.

As compared to May 2009, an increase in sold production was reported in 25 (out of 34) industry divisions, among others, in, manufacture of computer, electronic and optical products – by 95,4%, manufacture of chemicals and chemical products – by 32,0%, manufacture of basic metals – by 21,7%, manufacture of paper and paper products – by 21,6%, manufacture of motor vehicles, trailers and semi-trailers – by 16,0%, manufacture of metal products – by 14,7%. A drop in sold production of industry, as compared to May 2009, was recorded in 9 divisions, among others, in, manufacture of beverages – by 15,7%, manufacture of machinery and equipment – by 6,8%, manufacture of furniture – by 3,8% and mining of coal and lignite – by 2,3%.

In the period January-May 2010 sold production of industry was by 10,1% higher than in the corresponding period of the previous year.

Indices of sold production of industry in comparison with an average monthly level in 2005 is presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair works, carried out domestically by construction enterprises employing more than 9 persons was in May 2010 higher by 2,3% than in the previous year and by 17,6% than in April 2010. Having eliminated the influence of seasonal factors, construction and assembly production reached the level by 3,4% lower than in the corresponding month of the previous year and by 3,7% higher in comparison to April 2010.

As compared to May of the previous year, a growth of production was recorded in entities mainly involved in construction works connected with construction of buildings – by 12,5% and in entities mainly carrying out specialised construction activities (among others, demolition and site preparation, building installation activities, building completion and finishing) – by 5,6%. In enterprises mainly involved in construction works connected with civil engineering production was lower by 11,3%.

In all construction divisions since February 2010 a growth of production is observed compared to the previous month. In May an increase amounted to: in enterprises the basic activity of which are construction works connected with civil engineering – 24,2%, in realizing construction works connected with construction of buildings – 19,6% and in carrying out specialised construction activities – 5,7%.

In the period January-May 2010 the level of the construction and assembly production was by 8,7% lower than in the corresponding period of the previous year.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005 is presented in the graph below:
