Possessing benefis rights	490.2	439.9	406.0	425.8	420.4	358.9	340.5
Unemployment rate in %	20.4	19.4	18.9	19.0	19.2	18.0	17.6

Compared to the previous quarter, at the end of September 2005, an increase in the number of the unemployed was observed only in the Podkarpackie Voivodship (by 1.1%), whereas a decline in the number of the unemployed was observed in other voivodships. The highest drop took place in voivodships: Pomorskie (by 4.2%), Dolnośląskie (by 3.9%), Wielkopolskie (by 3.7%), and Łódzkie and Małopolskie (by 3.2%). Compared to September 2004, unemployment

decreased in all voivodships, the most significant decline took place in voivodships: Dolnośląskie and Lubuskie (by 9.3%), Wielkopolskie (by 8.8%), Opolskie (by 8.4%) and Pomorskie (by 8.2%).

The **unemployment rate** at the end September 2005 comprised 17.6% of the economically active civilian population¹⁾, it was by 0.4 lower than in the II quarter of 2005, and by 1.3 point lower than in September 2004. There was still observed a very high territorial differentiation of unemployment. The highest unemployment rate was observed in voivodships: Warmińsko-Mazurskie (27.2%), Zachodniopomorskie (25.2%), Lubuskie (23.7%) and Kujawsko-Pomorskie (22.1%). The lowest unemployment rate characterised voivodships: Małopolskie (13.6%), Mazowieckie (13.9%), Wielkopolskie (14.5%) and Podlaskie (14.8%).

In the III quarter of 2005, there **were registered** 758,0 thous. unemployed persons in the labour offices, i.e. by 71.1 thous. persons more than in the same period of 2004. The highest number of the newly registered was observed in September (281.7 thous.), while the lowest - in August (230.2 thous.). Over the III quarter of 2005, the highest increase in unemployment was observed in voivodships: Śląskie (by 85.1 thous persons), Mazowieckie (by 80.1 thous.), Dolnośląskie (by 67.0 thous.), and Wielkopolskie (by 64.5 thous. persons). The majority of the newly registered constituted women, their share in the total number of the newly registered in the labour offices amounted to 51.1%.

Among the total number of the newly registered unemployed persons in the III quarter - 536.9 thous. comprised re-entrants to the unemployment rolls of the labour offices (the last year they comprised 469.6 thous. persons), while 268.1 thous. of the newly registering comprised persons who had never worked before, their percentage share amounted to 35.4% (in the previous year the respective figures were: 242.9 thousand persons and 35.4%). Persons aged up to 25 years constituted 42.7% of the total number of the newly registered over the presented period. The number of persons dismissed due to company reasons amounted to 14.6 thous. persons, i.e. 1.9% of the total number of the newly registered (the year ago it was 19.0 thous. and 2.8% respectively). Among the persons newly registered in September 2005 - 38.5% lived in rural areas (last year – 37.1%).

¹⁾ Unemployment rate was calculated as percentage share of the unemployed in the total number of economically active population.

In the III quarter of 2005, the number of people **removed from unemployment** rolls of the labour offices amounted to 825.3 thous. persons (it was 787.2 thous. people in the previous year). The highest number of people (304.9 thous.) were removed from unemployment rolls in September, while the lowest in August – 255.9 thous. persons. More persons than the last year were removed from unemployment rolls due to undertaking a job; nevertheless it remained the main reason of leaving unemployment; 350.7 thous. of the unemployed (i.e. 42.5% of the total number of persons removed from unemployment rolls of the labour offices) received jobs, while in the previous year it was 345.5 thous. unemployed persons (43.9%). The non-subsidized jobs (including seasonal ones) took 309.6 thous. persons, while the subsidized (i.a. intervention and public works) – took 41.1 thousand persons. In the III quarter of 2005 - 269.5 thous. of the unemployed persons did not confirm their readiness to take a job, which comprised 32.7% of the total number of the unemployed removed from unemployment rolls (in the previous year it was respectively 277.4 thous. persons and 35.2%). Among the other reasons for removing from unemployment rolls should be mentioned: beginning training or traineeship with the employer – 106.2 thous. (in the previous year it was 91.0 thous.), voluntary resignation from a status of the unemployed – 36.0 thous. persons (in the previous year 31.5 thous.), acquisition of rights for the retirement pay or pension – 5.7 thous. persons (as compared to 7.3 thous. in the previous year).

re-registered persons	527.0	414.2	469.6	579.6	539.1	436.4	536.9
Total number of the unemployed persons removed from unemployment rolls	600.4	774.2	787.2	698.4	620.4	825.5	825.3
in which:							
received jobs	308.8	417.9	345.5	292.3	288.0	404.0	350.7
in which:							
subsidized	52.6	76.4	30.9	38.4	36.4	59.5	41.1
non-subsidized	256.5	341.5	314.6	254.0	251.6	344.5	309.6

Among the **persons whose situation on the labour market was specific** belong, among others, the long-term unemployed persons. Their share in the total number of the registered amounted at the end of September 2005 to 66.8% (1.843.0 thous. persons). Persons aged up to 25 years constituted 22.6% of the total number of the unemployed (624.7 thousand persons), while persons aged over 50 – 15.9% (438.0 thous. persons).

Without occupational qualifications were 13.7% of the registered persons (379.3 thous.); 3.4% were single parents (94.4 thous), while 2.7% constituted disabled persons (75.1 thous. persons).

In the presented period, due to the aid offered by labour offices, 16.6 thous. persons took intervention works (last year – 17.6 thous), 15.7 thous. persons were employed in public works (as compared to 10.6 thous. of the last year).

The majority of unemployed persons remaining on the register rolls of the labour offices comprised persons **previously working**. At the end of September 2005, this population comprised 2.078.3 thous persons (i.e. 75.3% of the registered unemployed persons), as compared to 2.235.8 thous. persons (75.3%) in September 2004. Among this group 119.6 thous., i.e. 5.8%, lost their jobs due to company reasons (the last year the respective figures were 154.6 thous., i.e. 6.9%).

At the end of the III quarter of 2005, there were 2.419.6 thous. persons who did not **possess the rights to unemployment benefit**, which comprised 87.7% of the total number of the registered unemployed, (in the previous quarter it was respectively 2.468.4 thous. and 87.3%; in the III quarter of the previous year the respective figures amounted to 2564.9 thous. and 86.3%). Among this group of the unemployed 42.2% constituted people living in rural areas.

In the III quarter of 2005, the employers submitted 260.2 thous. **job offers** to the labour offices (22.3 thous. were from the public sector), i.e. by 41.4 thous. more than the last year. Among all offers, 21.7% concerned traineeship, 9.0% - on a job training, 2.3% were addressed to the disabled persons, while 3.4% - to the persons who completed education within the last 12 months. At the end of September, labour offices had job offers for 39.8 thous. persons (7.9 thous. comprised offers not undertaken for a period exceeding one month).

Tabl. 3. Job offers**During the reference period**

Specification	2005								
	months								
	01	02	03	04	05	06	07	08	09
	in thousands								
Job offers	56.3	62.8	73.0	84.1	72.2	83.5	82.0	84.4	93.9
in which:									
public sector	13.8	16.5	19.5	23.5	17.2	18.8	18.2	18.9	21.1
private sector	42.4	46.3	53.5	60.6	55.0	64.8	63.8	65.5	72.8

The data at the end of September 2005, indicate that 398 enterprises **declared dismission within the short period** of 26.0 thous. of employees, in which from the public sector – 4.5 thous. persons (the last year the respective figures were 599 enterprises, 26.5 thous. employees, in which – 9.0 thous. persons from the public sector).

The unemployed by sex, age and educational level

The majority of the unemployed population constituted women. At the end of the III quarter of 2005, the share of women in the total number of the unemployed amounted to 54.6% and was by 1.3 point higher as compared to the same quarter of 2004. The highest percentage share of women in the total number of the unemployed was observed in voivodships: Wielkopolskie (58.9%), Śląskie (57.6%), Opolskie (by 57.1%) and Kujawsko-Pomorskie (56.5%).

The youths still remain a group mostly affected with unemployment. At the end of the presented period, the largest group among the unemployed constituted persons aged 25 - 34 years. Their number amounted to 769.0 thous., while their share in the total number of the unemployed decreased as compared to the previous quarter by 0.2 point and amounted to 27.9%. A slightly less numerous group comprised unemployed persons aged 24 years and less (23.4%), in the same period of the previous years their share amounted to 25.4%. Jointly, the unemployed in both these age groups constituted over a half of the total population of the unemployed, i.e. 51.3% (in the previous year it was 53.0%).

The highest percentage share of the unemployed aged between 25 and 34 years in the total number of the unemployed was observed in voivodships: Podkarpackie (31.5%), Lubelskie (31.2%), Świętokrzyskie (29.8%) and Kujawsko-Pomorskie (28.8%), while the lowest one was observed in voivodships: Opolskie and Podlaskie (by 26.1%) and Dolnośląskie (26.3%).
