## 

Index numbers of industrial and construction-assembly production in real time (constant prices) were:

Specification	VI		$\mathbf{I}\text{-}\mathbf{V}\mathbf{I}^{b)}$	VI
	previous month = 100	corresponding period of previous year = 100		monthly average of 2010 = 100
INDUSTRIAL UNITS				
Total	99.9	101.7	104.3	112.3
mining and quarrying	103.7	94.9	93.5	93.1
manufacturing	99.9	102.1	106.0	116.7
electricity, gas, steam and air conditioning supply	97.3	100.8	94.3	83.2
water supply; sewerage waste management and remediation activities	103.4	102.4	102.2	116.3
CONSTRUCTION UNITS				
Total	116.9	108.0	109.8	108.7

<sup>&</sup>lt;sup>a)</sup>Reported data; comprise enterprises employing over 9 persons.

 $<sup>^{</sup>b)}$ Data including final information on production and prices in May and reported data – in June.

According to the preliminary data, **sold production of industry** in constant prices (in enterprises employing more than 9 persons), in June of 2014, was by 1.7% higher than in the previous year (when an increase by 2.8% was recorded) and by 0.1% lower than in May of 2014. After eliminating the seasonal factors, sold production of industry reached the level higher by 2.1% than in the corresponding month of the previous year and by 0.4% than in May of 2014.

As compared to June of 2013, an increase in sold production was reported in 20 (out of 34) industry divisions. In most of them, however, the growth was slower than recorded a month before, which could be associated with weakening sales growth of industrial production for export. In June 2014, an increase in production was observed, among others, in manufacture of furniture – by 10.2%, manufacture of basic metals – by 9.1%, manufacture of products of wood, cork, straw and wicker – by 8.5%, manufacture of computer, electronic and optical products – by 6.7%, manufacture of motor vehicles, trailers and semi-trailers – by 4.4% and manufacture of metal products – by 4.0%. A drop in sold production of industry, as compared to June of 2013, was recorded in 14 divisions, among others, in mining of coal and lignite – by 13.5%, manufacture of coke and refined petroleum products – by 6.9%, manufacture of chemicals and chemical products – by 6.7%, manufacture of other transport equipment – by 5.6%, manufacture of pharmaceutical products and manufacture of electrical equipment – by 3.1% in both.

In the period January-June of 2014, sold production of industry was by 4.3% higher than in the corresponding period of the previous year which saw a 0.4% decrease.

Indices of sold production of industry in comparison with an average monthly level in 2010 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in June of 2014 by 8.0% higher than a year before (against a decrease by 18.3% of June 2013) and by 16.9% higher than in May of 2014. After eliminating the seasonal factors, construction and assembly production reached the level by 8.7% higher than in June of the previous year and by 2.7% in comparison to May of 2014.

Compared to June 2013 an increase in production was recorded in entities specializing in civil engineering – by 24.7% and in entities dealing mainly with specialised construction activities – by 14,2%. There was a decrease in production in entities whose basic type of activity is the construction of buildings by 12,1%.

In comparison to May of this year an increase in production was noted in entities whose basic type of activity is civil engineering – by 39.0% and in enterprises performing specialised construction activities – by 15.7%, while a decrease in entities carrying out mainly work connected with the construction of buildings – by 3.1%.

In the period January-June of 2014, construction and assembly production was by 9.8% higher than in the corresponding period of the previous year, when a decline was observed by 21.5%.

Indices of the construction and assembly production, in comparison with an average monthly level in 2010, are presented in the graph below:
