PREFACE

The Trade and Services Department of the Central Statistical Office hands in to you another edition of the “Real Estate Turnover” compilation. The study presents the results of the survey conducted annually since 2003 for real estate purchase/sale transactions.

This compilation contains information characteristic of real estate turnover in 2011, i.e. data concerning the quantity and value of transactions made, the areas of properties sold as well as the average measures reflecting the specificity of purchase/sale transactions. For the purposes of this study, properties have been divided into the following categories: premises, buildings, land properties and built-up properties. Data are presented in the territorial profiles, in the breakdown by turnover form and by types of properties comprising the object of transactions.

Information presented in the publication has been prepared on the basis of statistical data from the Registers of Prices and Values of Real Estate, which are kept by the starosts and cities with powiat status.

The entire compilation has been divided by categories of properties. Each category is provided with analytical part including commentary and descriptive and graphic presentation of data as well as tabular part. General notes as well as methodological notes covering description of sources of information and basic definitions shall help interpret the results presented herein.

We would like to express our gratitude to all persons and institutions for their suggestions, which might contribute to the development and enrichment of this publication next edition.

GENERAL NOTES

1. Data included in the publication refer to **the territorial division of 1 January 1999**, taking into consideration the Nomenclature of Territorial Units for Statistics (NTS), introduced by the Regulation of the Council of Ministers of 14 November 2007 (Journal of Laws No. 214, Item 1573, with subsequent amendments).
2. **Relative numbers (indicators, interest)** were calculated mostly on the basis of absolute data expressed with higher precision than indicated in the tables.
3. Due to data rounding, the sums of components might in some cases be slightly different from given values "in total".
4. While converting the number of transactions per 10,000 inhabitants, the population as of 30 June 2011 was assumed.
5. **Average transaction prices**, as presented in the publication, were obtained as a quotient of the values and areas of real estate sold.
6. Descriptive price characteristics, e.g. variation range, arithmetic mean, median or variation coefficient, supplement the information on average transaction prices. **The median** is the numerical value of a given feature, above and below which there is an equal number of observations. **Standard deviation constitutes** the measure of variability of the feature analysed and informs us about how specific cases differ on average from the arithmetic average. **The coefficient of variation** is a relative measure of variability and forms the ratio of the standard deviation from the arithmetic mean of the feature analysed. It tells us what percentage of the arithmetic mean value constitutes standard deviation.

Znak (x)	= wypełnienie pozycji jest niemożliwe lub niecelowe not applicable

METHODOLOGICAL NOTES

I. Data scope and sources

1. This publication provides data characterising the real estate turnover in 2010. In particular, it includes information on the number and transaction values of the real estate purchase/sale, on the area of real estate sold, and on the average transaction prices, divided by:
 - premises
 - buildings
 - built-up properties
 - land properties
2. Data included in the publication was compiled on the basis of information obtained from Registers of **Prices and Values of Real Estate**, kept by powiat starosta offices and mayors of cities with powiat status, and using the data derived from notarial deeds. Presented data was compiled on the basis of information from 377 out of 379 powiats and cities with powiat status.
3. The survey covers transactions concluded on the free market, resulting from the sales preceded by a tender, or from non-tender sales, where the State Treasury, a gmina, a powiat, a voivodship, or a natural or legal person, holding the ownership or joint ownership title, mortgaged real estate or joint mortgaged real estate title, can act as the seller.
4. Only those purchase/sale transactions of properties are observed, which were concluded during the period under survey and were registered in the Register of Prices and Values of Real Estate before the date of data transfer to the Central Statistical Office.
5. The real estate **value** comprises all and any elements of the real estate purchased/sold under the notarial deeds produced.

II. Definitions of basic terms

1. A **notarial deed** is understood as a document confirming the conclusion of a legal transaction, drafted entirely by a notary, then read out to the parties and signed by all persons concerned (Act of 14 February 1991 – Notarial Law).
2. A **real estate purchase/sale transaction** is understood as selling or purchasing real estate by concluding a legal transaction, under which the ownership title to the said real estate is being transferred.
3. **Real estate** covers all parts of land constituting separate ownership (land), and buildings, or parts of buildings, permanently connected with the ground, provided that they constitute separate ownership from the land under any specific provisions. Three types of real estate are distinguished:
 - retail real estate
 - building real estate
 - land property
4. **Retail real estate** refers to residential or business premises, including a garage forming part of a building, provided that it constitutes separate ownership. Retail real estate is established under the Act of 24 June 1994 on the Ownership of Premises.

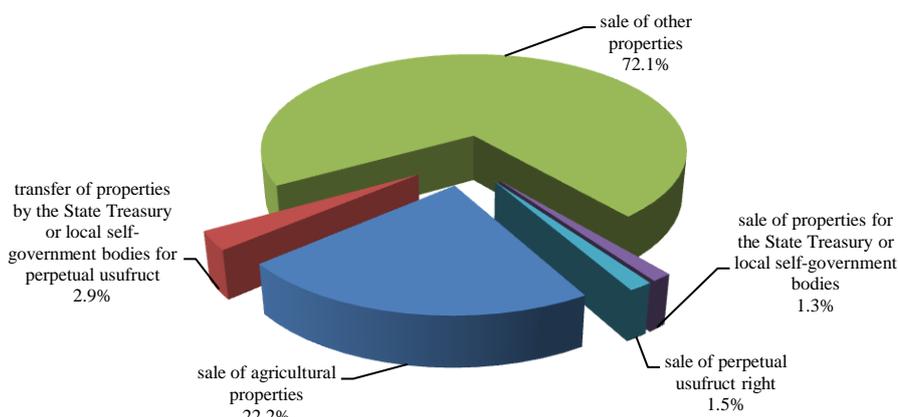

5. **Building real estate** is a building and other facilities permanently connected with the ground, provided that they constitute separate ownership from such land under any specific provisions.
6. **Land property** is land with any component parts, excluding buildings and premises, provided that they constitute separate ownership. If a land and mortgage register is kept for the land property, then the land constitutes separate real estate from any other real estate held by the same owner.
7. **Premises** (an independent residential apartment or premises designated for other purposes) refers to a room or set of rooms separated with durable walls within the building dedicated to the permanent stay of persons, which together with the auxiliary rooms serve the purpose of fulfilling their housing needs or which are used according to their dedication for the purposes other than residential ones.
8. **An independent residential apartment** is a residential apartment, in relation to which the starost has determined, in the form of a statement, the compliance with the requirements mentioned in Article 2, Section 2 of the Act of 24 June 1994 on the Ownership of Premises; the definition is applied accordingly also to the independent premises used according to their dedication for the purposes other than residential ones.
9. **A room** is a premise in a dwelling, separated from other premises with fixed walls from the floor to the ceiling, with an area not smaller than 4 m², and with direct daylight, i.e. with a window or a French window in an external wall of the building; kitchens are also considered rooms as long as they fulfil the above criteria. Corridors, halls, bathrooms, toilets, larders, verandas, porches, storerooms, etc. are not considered rooms, irrespective of their area and lighting.
10. **A building** is a covered constructed structure, together with built in systems and technical facilities, used for permanent purposes, adjusted to house persons, animals, or to protect items; a shed is considered a specific kind of a building, which is a structure built on the ground, not surrounded by walls from all sides, or even not having any walls at all.
11. **Residential buildings** are constructed structures in which at least one half of the overall space is used for residential purposes; these include single-family buildings, buildings with two dwellings, multi-dwelling buildings and collective accommodation buildings, e.g. social assistance houses (without medical care), employee boarding houses, boarding schools, school dormitories, student dormitories, care and education centres, homeless shelters, etc.)
12. **Non-residential buildings** are constructed structures in which more than half of the surface area is used for non-residential purposes.
13. **Industrial buildings** are buildings dedicated for production purposes for all types of industrial activity, e.g. plants, workshops, production halls, slaughter houses, breweries, assembly plants, film companies, etc.
14. **Commercial buildings** include commercial centres, department stores, independent shops and boutiques, fair, auction and exhibition halls, covered markets, petrol stations, service stations, pharmacies, etc.
15. **Office buildings** are buildings used as the workplace for office activity, or other administrative activity, e.g. banks, post office, city, gmina, self-government, ministry offices, administrative premises of various economic entities, as well as conference and congress centre buildings, court and parliament houses.

16. **Land built-up with residential buildings** refers to land not used for agricultural and forest production, dedicated for residential buildings and functional equipment connected with residential buildings (farmyards, access roads, passages, adjacent playgrounds, etc), as well as adjacent gardens.
17. **Built-up agricultural land** refers to land dedicated for residential buildings, and other buildings and facilities serving the purpose of agricultural production (not excluding fish production), as well as agricultural and food processing (boiler plants, storerooms, garages, cotes, barns, sheds, granaries, inventory buildings, storage and manoeuvre area within the built-up land, etc.), and land occupied by adjacent gardens within agricultural farms.
18. **Agricultural land** covers arable land, adjacent gardens, permanent crops, including orchards, meadows and pastures, as well as other arable land.
19. **Forest area** refers to land of a compact area of at least 0.10 ha, covered by forest vegetation (wooded area) – trees, bushes and undergrowth – or temporarily devoid of forest vegetation, and:
 - a) designated for silviculture production,
 - b) constituting nature reserves or forming part of a national park; or
 - c) registered as a nature monument,as well as land connected with silviculture, designated for the purpose of forest management: buildings and structures, devices for water drainage, spatial division lines in forests, forest roads, areas under electricity power lines, forest nurseries, wood stockpiling areas, and forest car parks and tourist facilities.
20. **Woody and bushy land** refers to land covered by forest vegetation with an area smaller than 0.1 ha, including also field clusters of trees and bushes not classified as forests, peat bogs, areas covered by natural wicker and bushy forms of willow; land adjacent to surface waters and covered by trees or bushes, constituting a biological protection zone for watercourses and water containers; ravines and gorges covered by trees and bushes not classified as forests; stone and rubble deposit sites covered by trees and bushes; park-type clusters of trees and bushes, not equipped with facilities and structures serving recreational and leisure purposes.
21. **Perpetual usufruct** is a property right which may be established on the real estate owned by the State Treasury and self-government bodies on the principles set out in Articles 232-240 of the Civil Code, and in Articles 27-35 of the Act of 21 August 1997 on Real Estate Management.

I. INTRODUCTION

According to notarial reporting conducted by the Ministry of Justice on the Ms-Not24 form, over 1.5 million notarial deeds were concluded in 2011, in which approx. 401 thous. of deeds concerned real estate purchase/sale transactions. Notarial deeds regarding real estate sale transactions included: sale of agricultural properties, sale of other properties, transfer of properties by the State Treasury or local self-government bodies for perpetual usufruct (with the sale of a premise or a building), sale of properties for the State Treasury or local self-government bodies as well as sale of perpetual usufruct right.

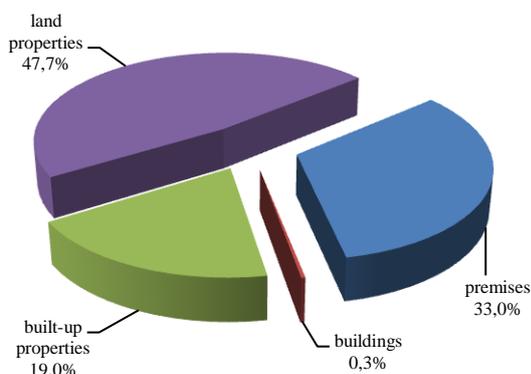

Quantity structure of notarial deeds concerning real estate purchase/sale transactions in 2011

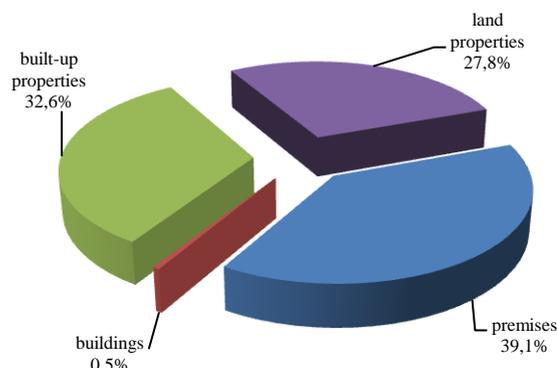

According to data received from the Registers of Prices and Values of Real Estate, approx. 285 thous. of real estate purchase/sale transactions were registered with their turnover value amounted to approx. PLN 49 bn. Transactions registered in the Registers of Prices and Values of Real Estate which form the grounds for this compilation, constitute approx. 71.0% of the number of notarial deeds recorded by the Ministry of Justice.

Almost half of the total number of transactions concerned land properties (approx. 48.0%), 33.0% premises, 19.0% built-up properties and 0.3% buildings. The sale value of premises accounted for 39.1% of total value of real estate turnover. The share of sale value of built-up properties amounted to 32.6%, while with respect to land properties it amounted to 27.8%.

Quantity structure of purchase/sale transactions of properties by type in 2011

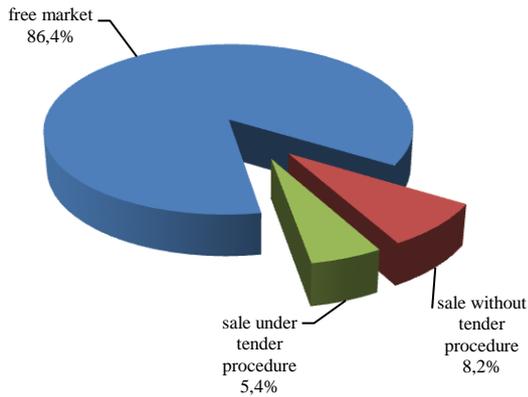

Value structure of purchase/sale transactions of properties by type in 2011

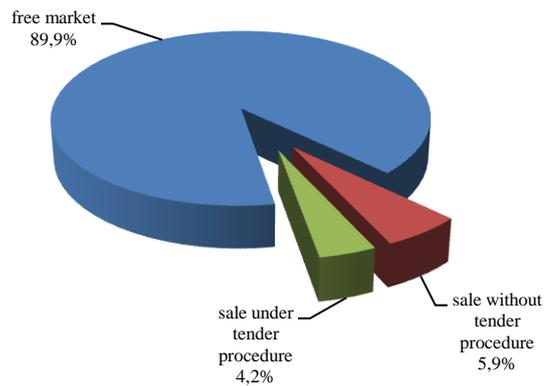

In 2011 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 86.4% and 89.9% of all transactions.

Quantity structure of purchase/sale transactions of properties by turnover form in 2011

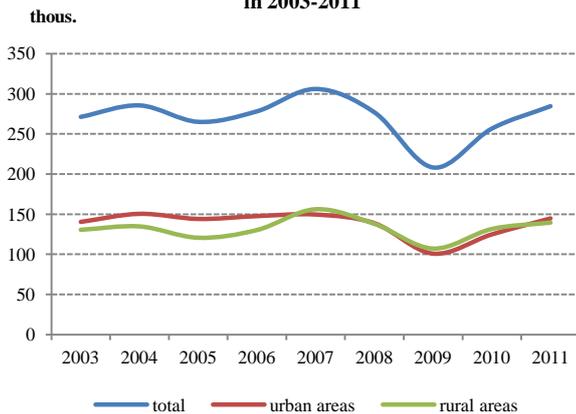

Value structure of purchase/sale transactions of properties by turnover form in 2011

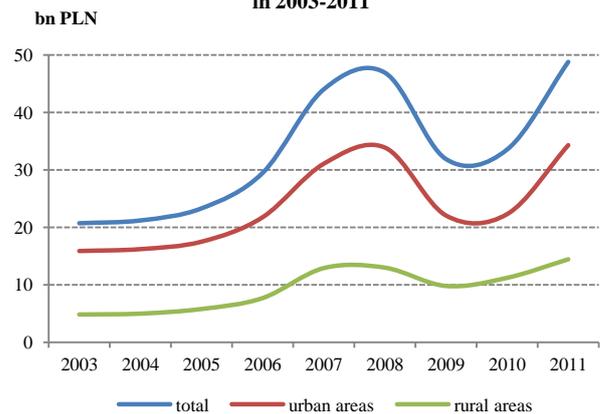

The number of real estate purchase/sale transactions registered in 2011 was of almost 11.0% higher in relation to 2010, whereas the value of transactions increased by over 45.0%. It was caused by, among other things, changes in the structure of sold properties (in particular larger share of the sales on the free market and larger share of the sales in urban areas compared to the previous year) and significant increase in the average cadastral area of the built-up agricultural land in relation to the preceding year.

Number of purchase/sale transactions of properties in 2003-2011

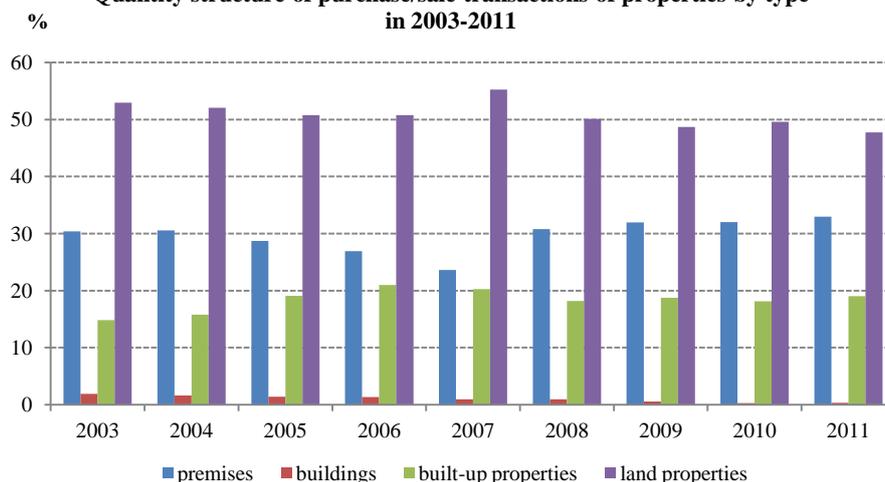

Value of purchase/sale transactions of properties in 2003-2011

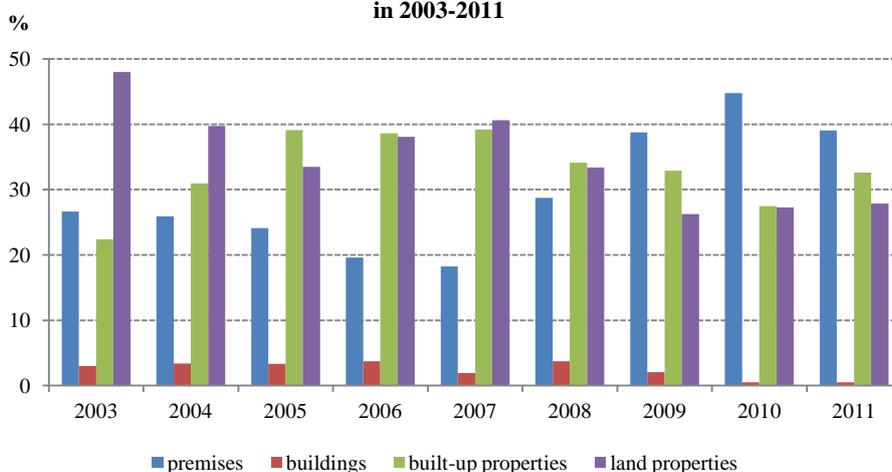

Since 2008 no significant changes in the quantity structure of real estate purchase/sale transactions by their particular types were observed. In the years 2008-2010 a significant increase of share of premises was observed in total value of transactions made (of approx. 27 percentage points in 2010 in relation to 2007), with simultaneous decrease of share of purchase/sale transactions value for built-up properties (of approx. 12 percentage points in 2010 in relation to 2007). In 2011 the opposite trend was observed. The share of purchase/sale transactions value for premises decreased of almost 6 percentage points in relation to the previous year, whereas the share of purchase/sale transactions value for built-up properties increased of approx. 5 percentage points. The share of purchase/sale transactions value for building and land properties developed at similar level as in 2010.

Quantity structure of purchase/sale transactions of properties by type in 2003-2011

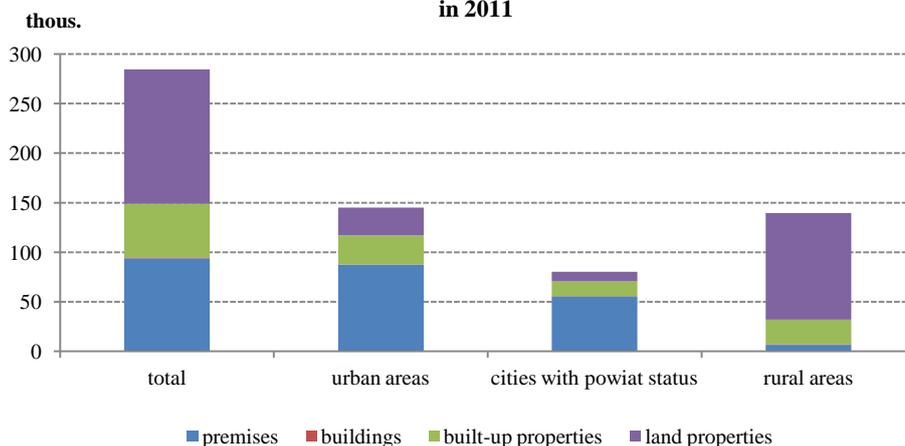

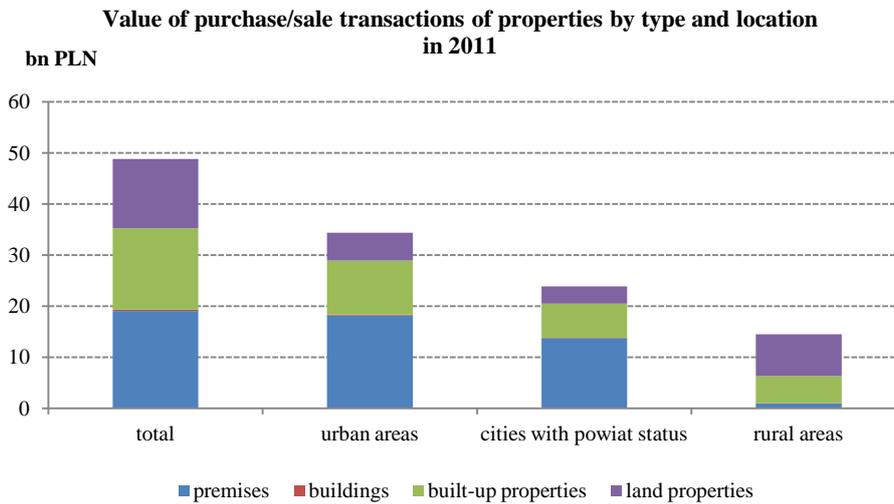

Value structure of purchase/sale transactions of properties by type in 2003-2011

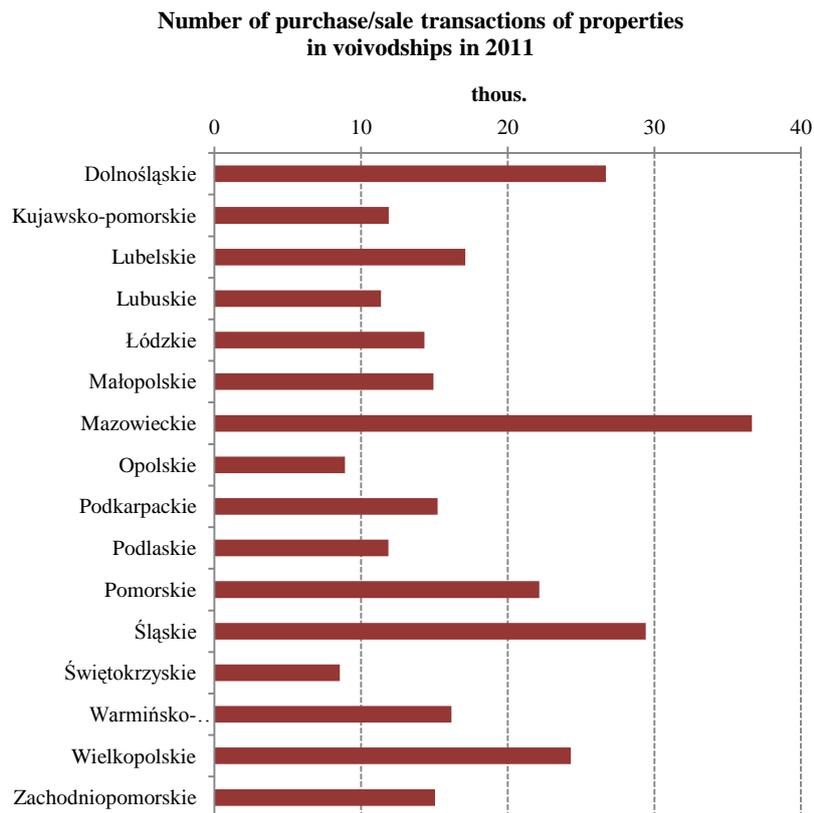

Analysing the real estate market in terms of territorial division, it should be stated that in 2011 the number of transactions was evenly allocated between urban areas (50.9%) and rural areas (49.1%). However, in terms of value, 70.4% of the real estate turnover referred to cities or towns. In urban areas, the objects of the majority of transactions were premises (60.2% in terms of quantity and 52.9% in terms of value). Land properties were, however, the most frequent objects of real estate purchase/sale transactions made outside city borders (77.2% in terms of quantity and 56.4% in terms of value).

Number of purchase/sale transactions of properties by type and location in 2011

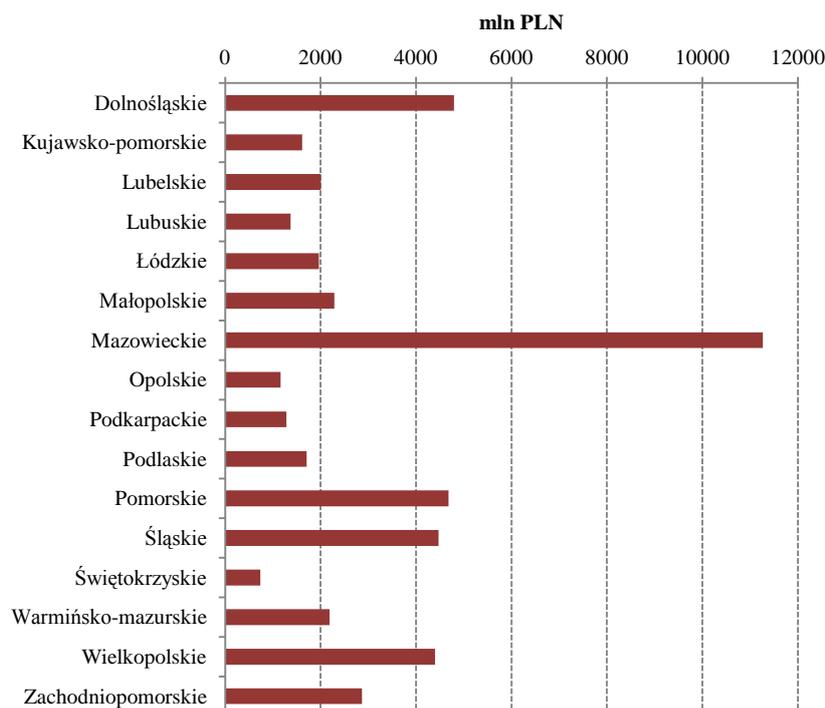

The highest number of purchase/sale transactions of properties was made in Mazowieckie, Śląskie and Dolnośląskie Voivodships. The value of transactions made in Mazowieckie Voivodship accounted for over 23.0% of total value of transactions in Poland. The lowest real estate turnover, both in terms of quantity and value, was recorded in Świętokrzyskie and Opolskie Voivodships.

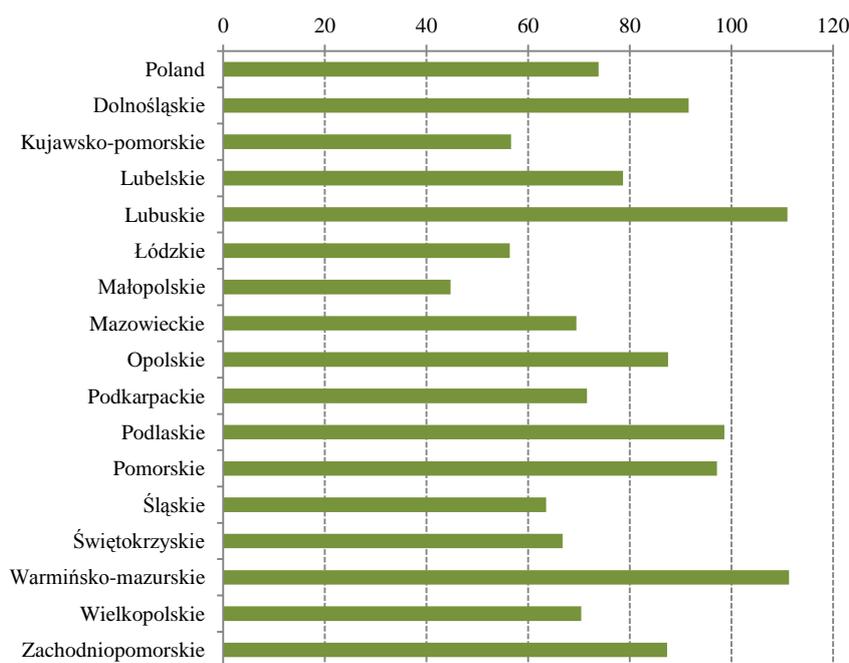

**Value of purchase/sale transactions of properties
in voivodships in 2011**

The number of purchase/sale transactions of properties per 10,000 inhabitants was much diversified. The range of this indicator at the voivodship level in 2011 was from approx. 45 transactions in Małopolskie Voivodship to approx. 111 transactions in both Warmińsko-Mazurskie and Lubuskie Voivodship. Apart from these voivodships, the highest indicators characterized Podlaskie and Pomorskie Voivodships.

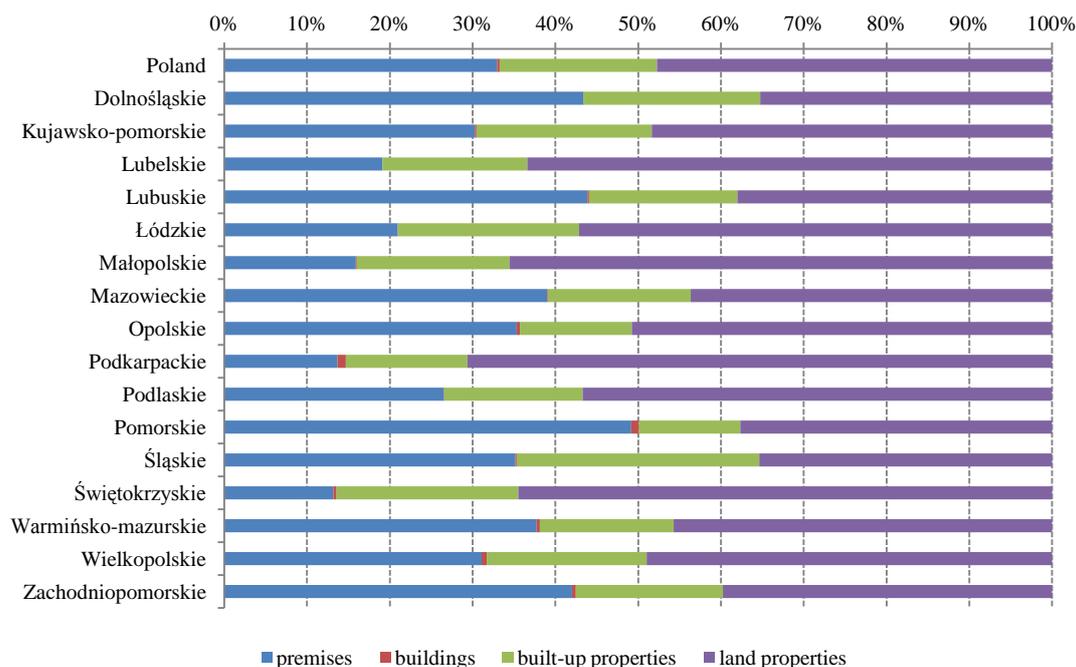

**Number of purchase/sale transactions of properties per 10,000
inhabitants in 2011**

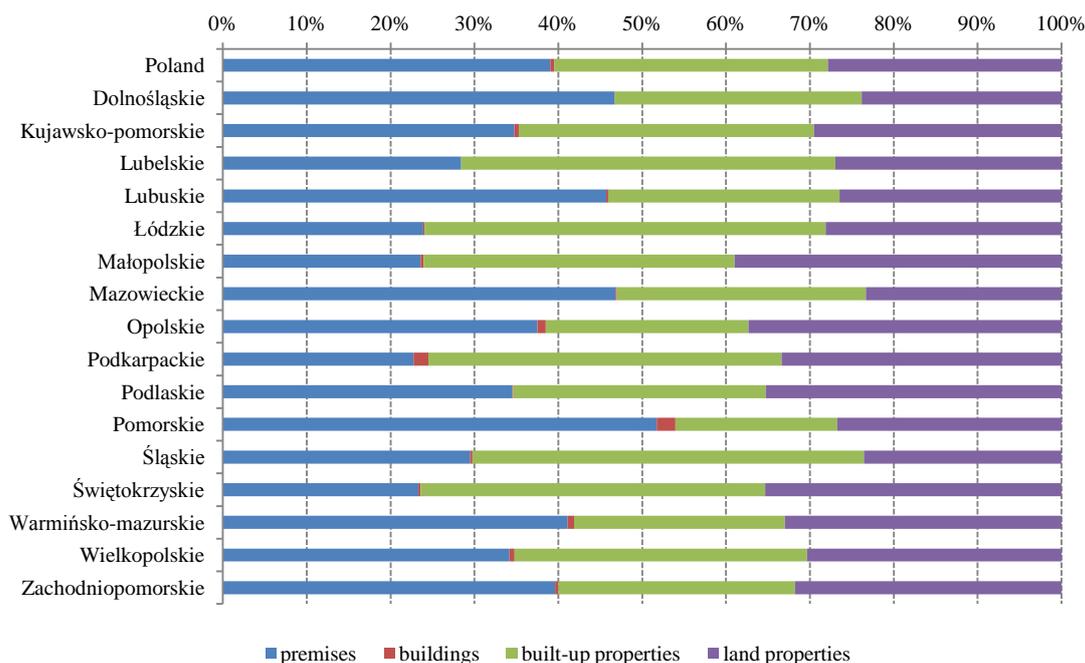

Voivodship markets are considerably diversified not only in terms of the intensity of purchase/sale transactions, but also in terms of the structure of real estate sold. In terms of quantity of purchase/sale

transactions made, land properties turnover prevailed in most voivodships. The highest share, above 60.0%, was recorded in Podkarpackie, Małopolskie, Świętokrzyskie and Lubelskie Voivodships. Considering the value of transactions in seven voivodships (Dolnośląskie, Lubuskie, Mazowieckie, Opolskie, Pomorskie, Warmińsko-Mazurskie and Zachodniopomorskie) premises turnover prevailed, while in next seven voivodships (Kujawsko-Pomorskie, Lubelskie, Łódzkie, Podkarpackie, Śląskie, Świętokrzyskie and Wielkopolskie) built-up properties turnover prevailed and in two remaining voivodships (Małopolskie and Podlaskie) the highest share in the value structure of transactions made accounted for land properties.

Quantity structure of purchase/sale transactions of properties by type in voivodships in 2011

Value structure of purchase/sale transactions of properties by type in voivodships in 2011

II. PURCHASE/SALE TRANSACTIONS OF PREMISES

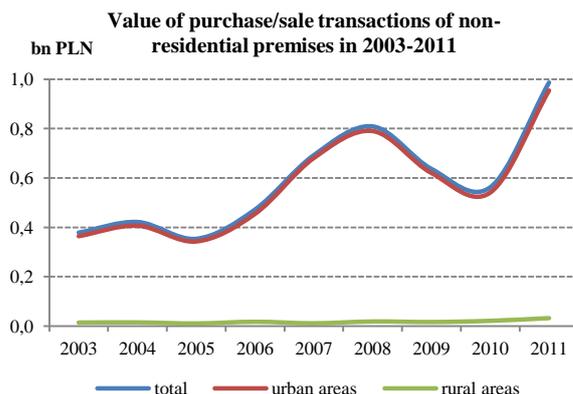

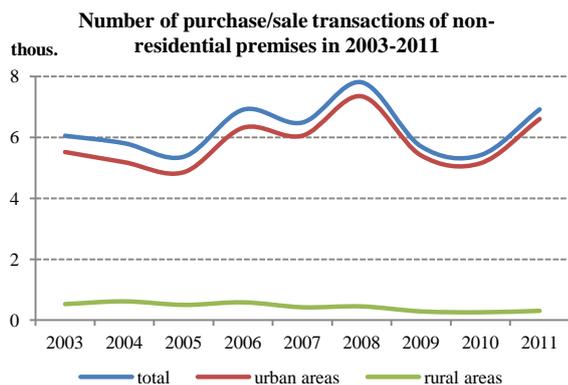

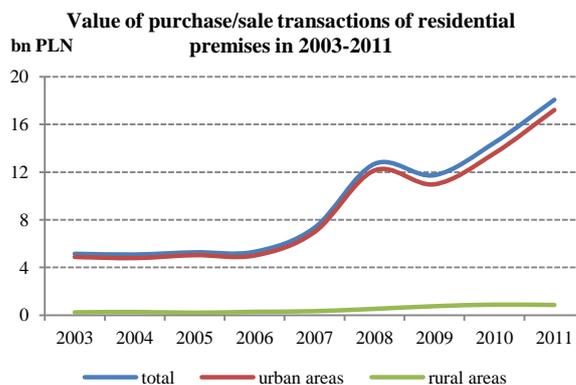

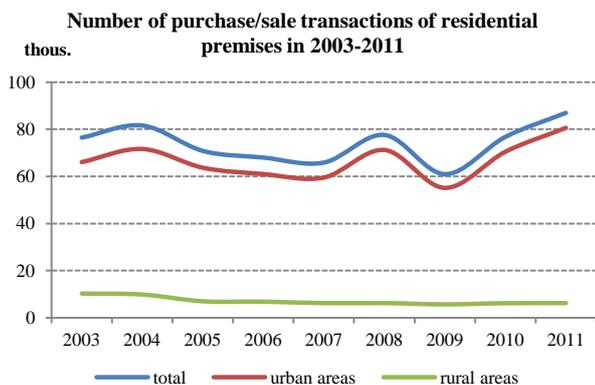

The number of purchase/sale transactions of premises registered in 2011 amounted to about 93.8 thous. accounting for 33.0% of all real estate transactions. The value of the premises turnover reached the level of PLN 19.0 bn, which corresponded to 39.0% of the total real estate turnover. The usable floor space of the premises constituting the object of the purchase/sale transactions amounted to approx. 5.6 mln m².

Two basic segments might be distinguished on the premises market i.e. the residential premises segment and the non-residential premises segment. In 2011 residential premises turnover accounted for 92.6% of the premises turnover in terms of quantity, 94.8% in terms of value, and 83.3% in terms of the usable area sold.

In the years 2003-2011 a significant growth in the number of the purchase/sale transactions of premises was observed four times. The growth occurred for the first time in 2004, when the premises turnover in terms of quantity grew by 6.0% in relation to 2003. 2008 was the second period of considerable growth in the number of real estate transactions of premises, in which the growth of over 18.0% was recorded in relation to 2007. In last years of the period in question, the growth of over 23.0% in the premises turnover in terms of quantity was observed in 2010 in relation to 2009 and of over 14.0% in 2011 in relation to 2010. Analysing the value of the premises turnover, we can notice that the turnover level in the years 2003-2006 was relatively stable. In the next two years, however, a considerable growth in the value of turnover was observed of approx. 39.0% in 2007 and over 68.0% in 2008 respectively. Then, in 2009 a considerable drop in the sale of premises was recorded, both in terms of quantity and value. The value of the purchase/sale transactions of premises in 2010 increased by 21.4% in relation to 2009. In 2011, further growth of turnover value of 26.8% was recorded.

The situation in the residential premises segment developed in a similar way as on the premises market in total. Slightly different tendencies were observed in the non-residential premises segment. In 2004 and 2005 a drop in the number of the purchase/sale transactions of non-residential premises was recorded, followed by turns of their growths and drops, until 2009. In terms of value, a considerable growth in the non-residential premises turnover was observed in the period from 2006 to 2008, resulting in the transaction value in 2008 being more than two times higher than the corresponding value in 2005. 2010 was the second year in a row recording a drop in non-residential premises turnover, both as regards quantity and value of transactions made. Not until 2011, the growth in non-residential premises turnover was recorded. In relation to 2010, the number of the purchase/sale transactions increased of almost 28.0%, whereas the turnover value increased of over 75.0%.

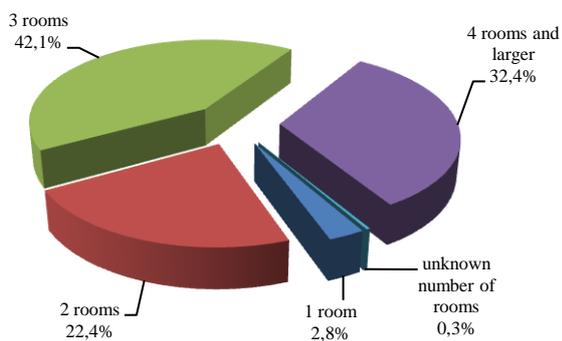

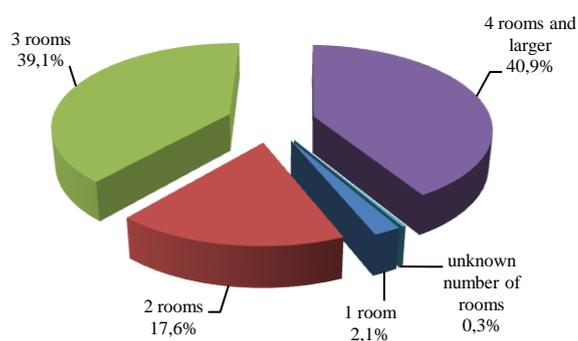

Residential premises

Analysing the turnover in the residential premises segment in 2011, it should be stated that the object of such transactions usually involved three-room or four-room and larger premises, which in terms of quantity in total constituted 74.5% of the residential premises turnover, and in terms of value they reached 80.0%. The sales of one-room premises constituted 2.8% of total number of purchase/sale transactions of premises, and 2.1% of their total value.

Quantity structure of purchase/sale transactions of residential premises by number of rooms in 2011

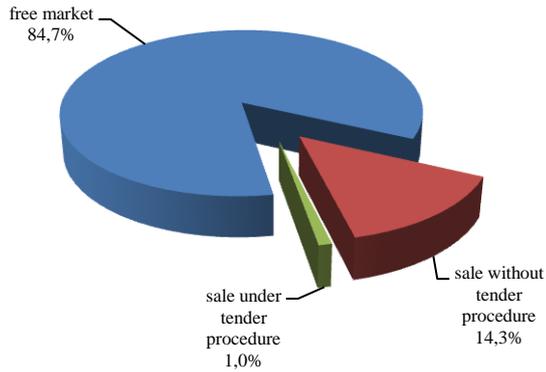

Value structure of purchase/sale transactions of residential premises by number of rooms in 2011

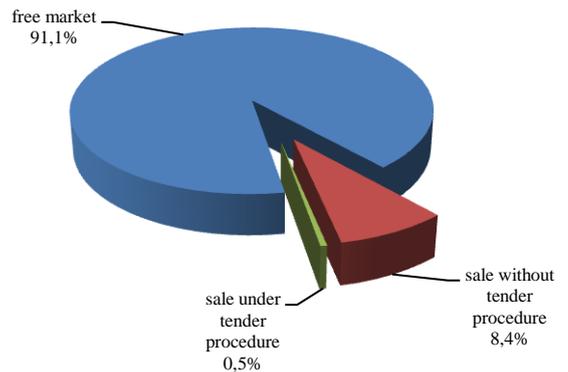

In 2011 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 84.7% and 91.1% of all transactions. Tender sales constituted relatively insignificant part of the sales of residential premises. In terms of quantity it accounted for 1.0% of the total residential premises turnover, and for 0.5% in terms of value.

Quantity structure of purchase/sale transactions of residential premises by turnover form in 2011

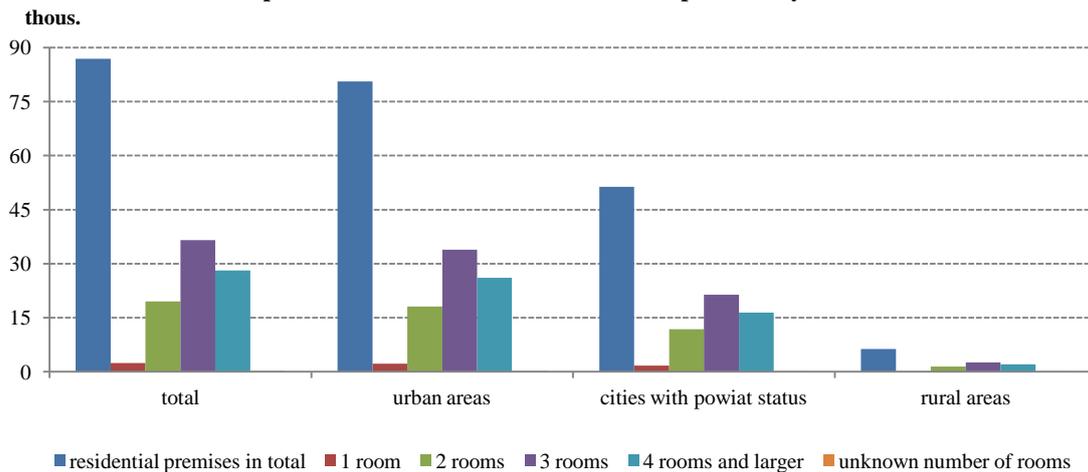

Value structure of purchase/sale transactions of residential premises by turnover form in 2011

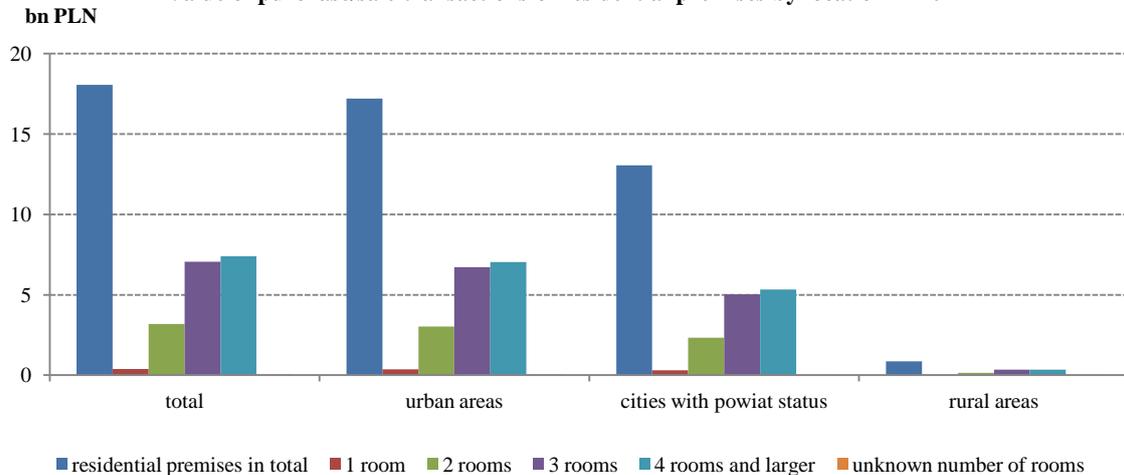

Residential premises were mainly sold in urban areas. Residential premises turnover within the city borders accounted for almost 93.0% of the total residential premises turnover in terms of quantity, and for about 95.0% in terms of value. An especially important role was played by markets in cities with powiat status, where over 59.0% of all purchase/sale transactions of residential premises was made, thereby accounting for 72.0% of total value of residential premises turnover. Three-room, four-room and larger premises were the most frequently sold, both in urban and rural areas.

Number of purchase/sale transactions of residential premises by location in 2011

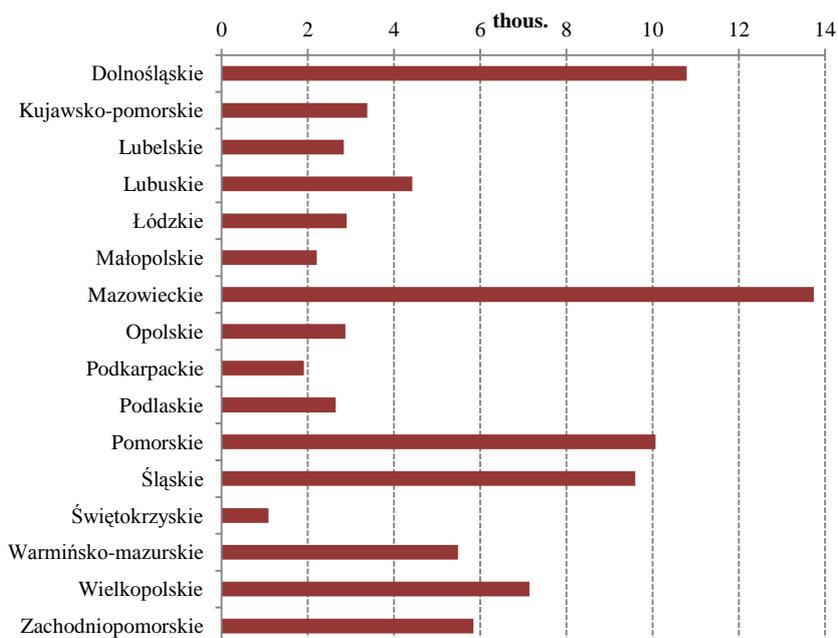

Value of purchase/sale transactions of residential premises by location in 2011

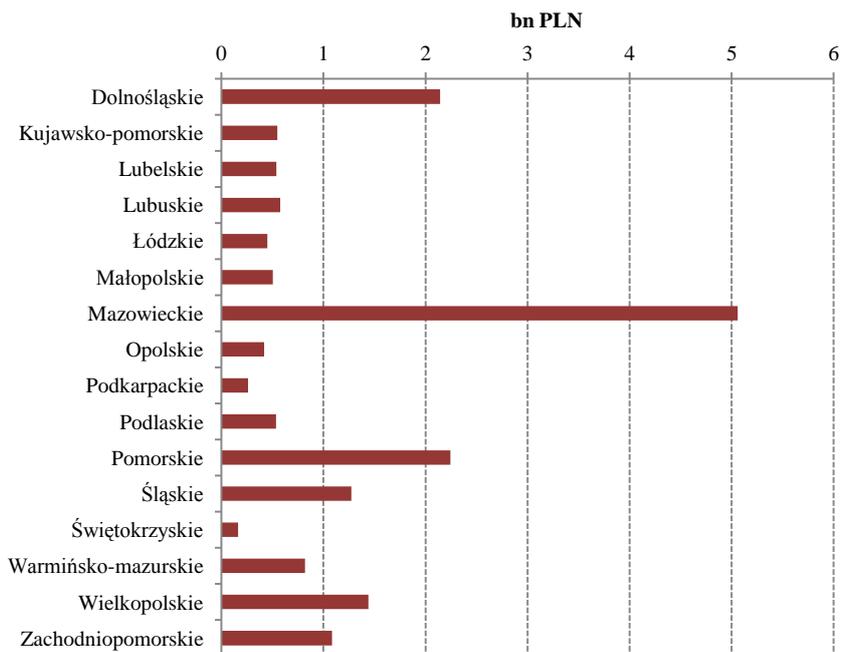

The residential premises turnover was allocated unevenly in country terms. The largest part of residential premises turnover, both as regards quantity and value of transactions made, took place in Mazowieckie Voivodship, where in 2011 nearly 16.0% of all purchase/sale transactions of residential premises in Poland were made in terms of quantity, and over 28.0% in terms of value. Apart from Mazowieckie Voivodship, Dolnośląskie, Pomorskie and Śląskie Voivodships belonged to voivodships with the highest residential premises turnover. The lowest number of transactions was recorded in Świętokrzyskie, Podkarpackie and Małopolskie Voivodships. These voivodships also indicated the lowest value of turnover.

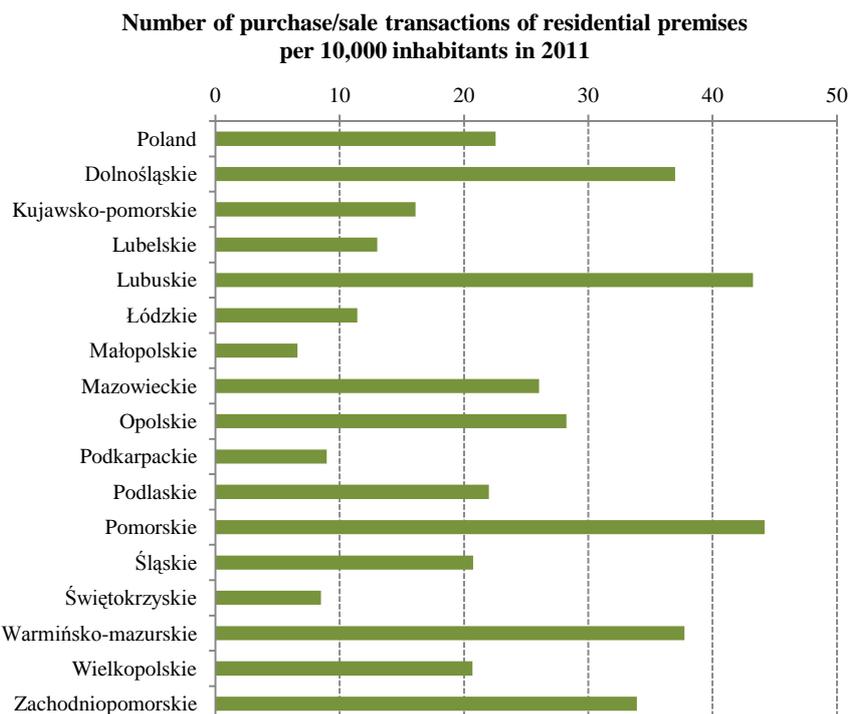

Number of purchase/sale transactions of residential premises in voivodships in 2011

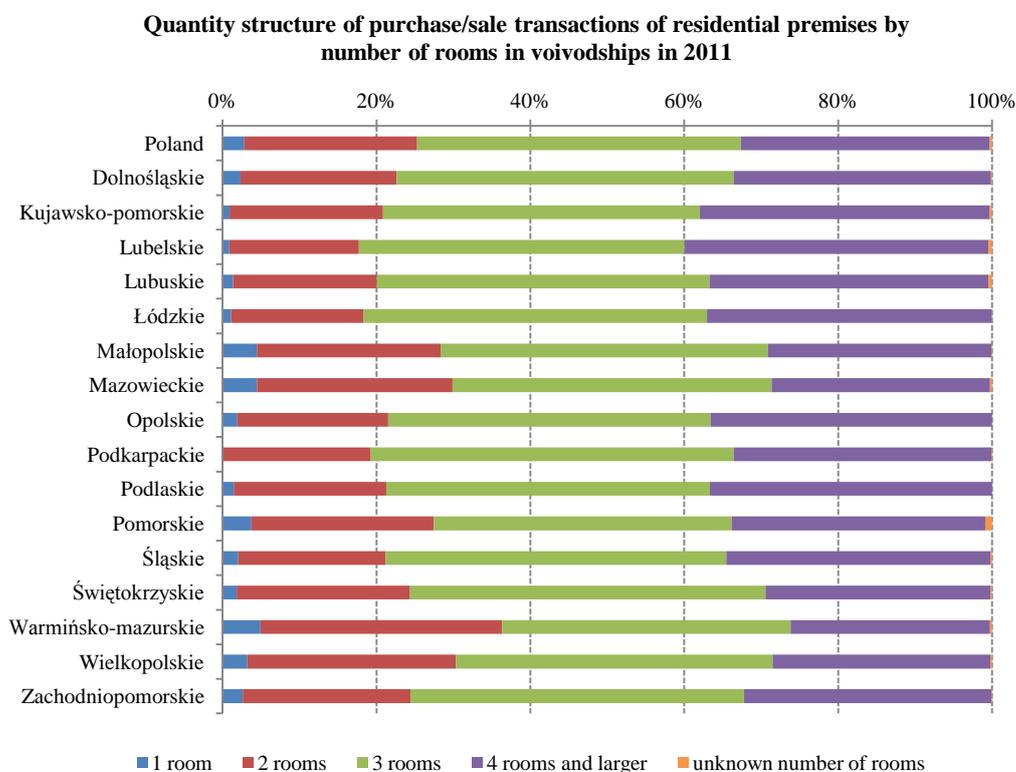

Value of purchase/sale transactions of residential premises in voivodships in 2011

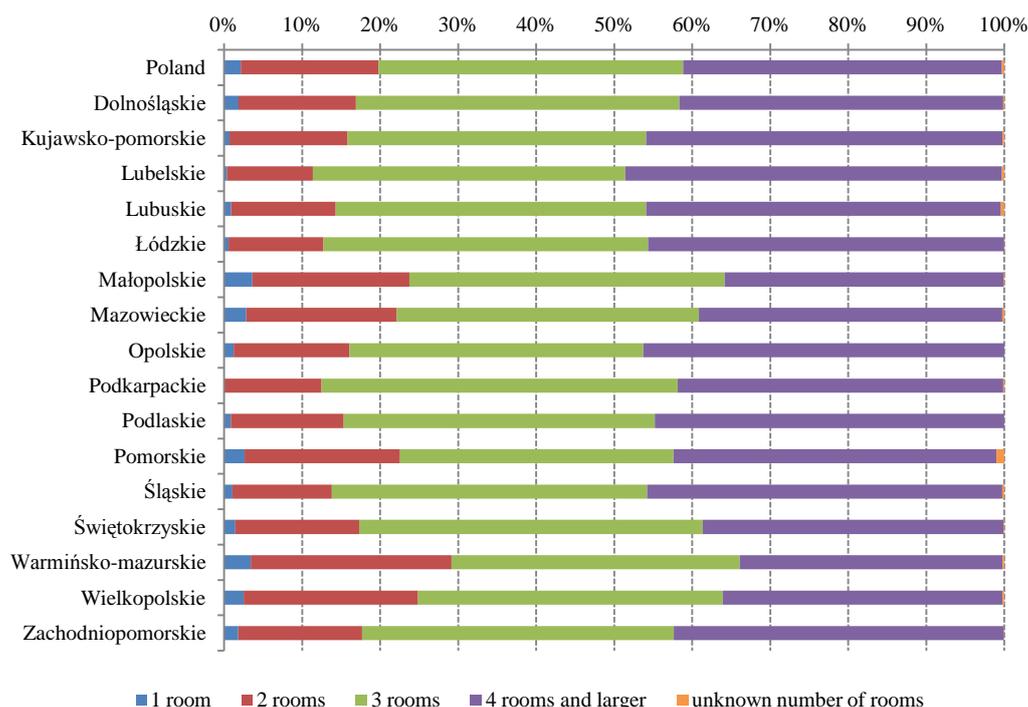

The number of purchase/sale transactions of residential premises per 10,000 inhabitants ranged from about 7 transactions in Małopolskie Voivodship to about 44 transactions in Pomorskie Voivodship.

As on the national scale, the sales of three-room, four-room and larger premises played the most significant role on the voivodship markets.

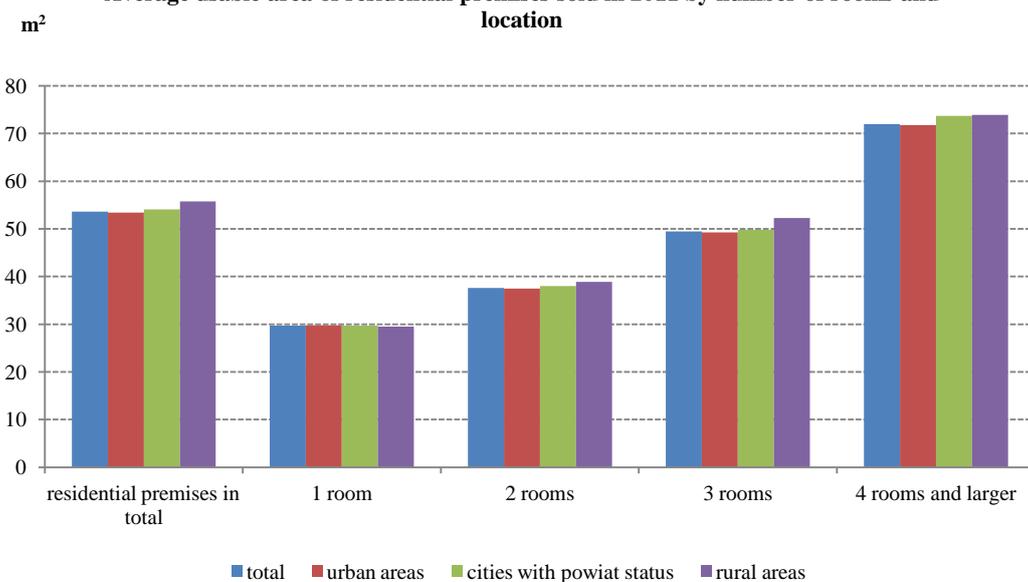

Value structure of purchase/sale transactions of residential premises by number of rooms in voivodships in 2011

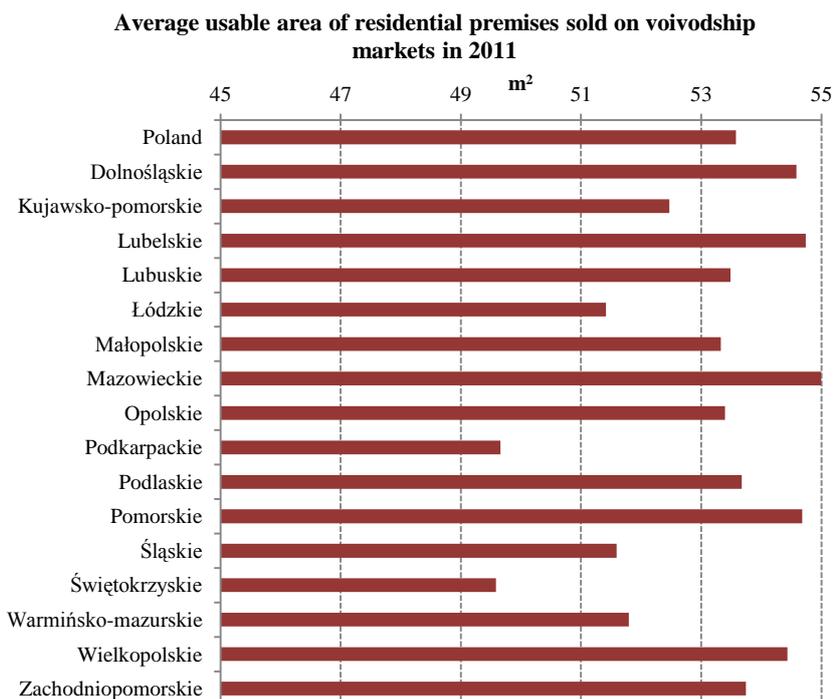

An average usable floor space of the residential premises constituting the object of turnover in 2011 amounted to 53.6 m². An average usable floor space of one-room premises sold in 2011 amounted to approx. 30.0 m². For two-room premises this parameter was almost 38.0 m², for three-room ones it was 50.0 m², whereas for four-room and larger premises it amounted to about 72.0 m². Dwellings sold in rural areas were usually slightly bigger than those sold in cities. The exception to this is a category of one-room premises, of which the average usable floor sold in single transaction both in cities and outside them developed at the similar level.

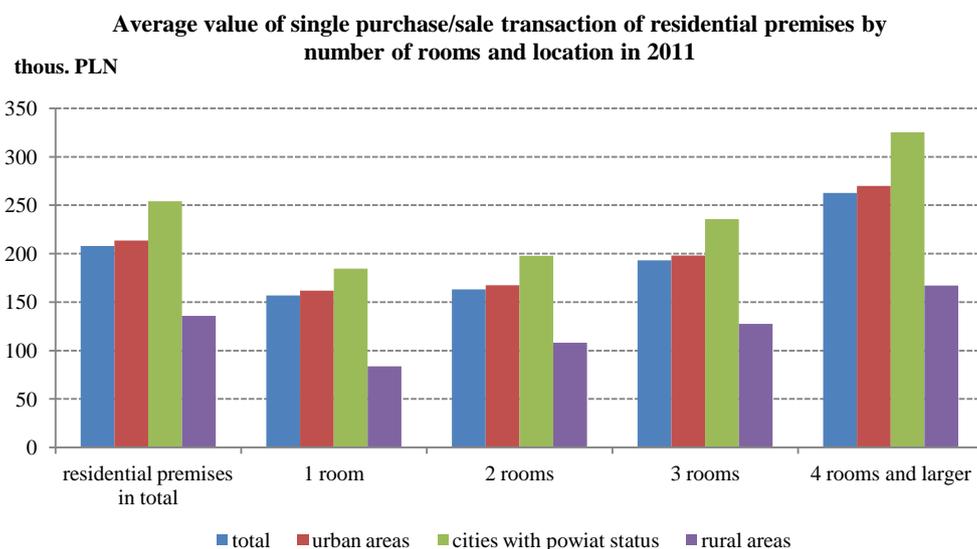

Average usable area of residential premises sold in 2011 by number of rooms and location

An average usable floor space of residential premises sold in 2011 ranged from 49.6 m² in Świętokrzyskie Voivodship to 55.0 m² in Mazowieckie Voivodship.

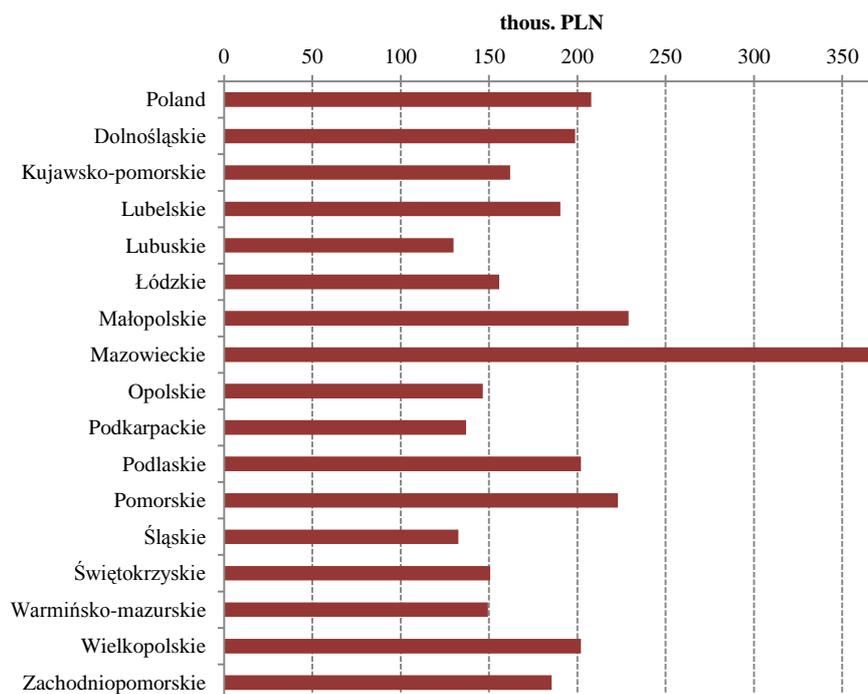

An average cost of a dwelling purchased amounted to PLN 207.9 thous. Average value of a single purchase/sale transaction of one-room residential premises amounted to almost PLN 157.0 thous. two-room residential premises it accounted for approx. PLN 163.0 thous., for three-room premises it exceeded PLN 193.0 thous. and for four-room ones – approx. PLN 263.0 thous. The transactions made in urban areas were by over 57% more expensive than those made in rural areas.

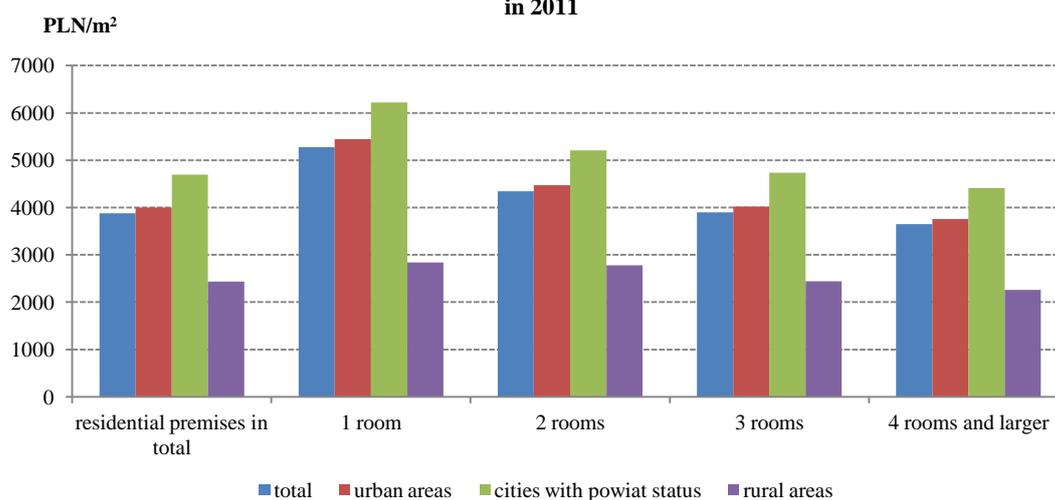

An average value of a single purchase/sale transaction of residential premises was the highest in Mazowieckie Voivodship, followed by Małopolskie and Pomorskie Voivodships. On average, the lowest amount of money was spent on dwelling purchase in Lubuskie, Śląskie and Podkarpackie Voivodships.

**Average value of single purchase/sale transaction of residential premises
by voivodships in 2011**

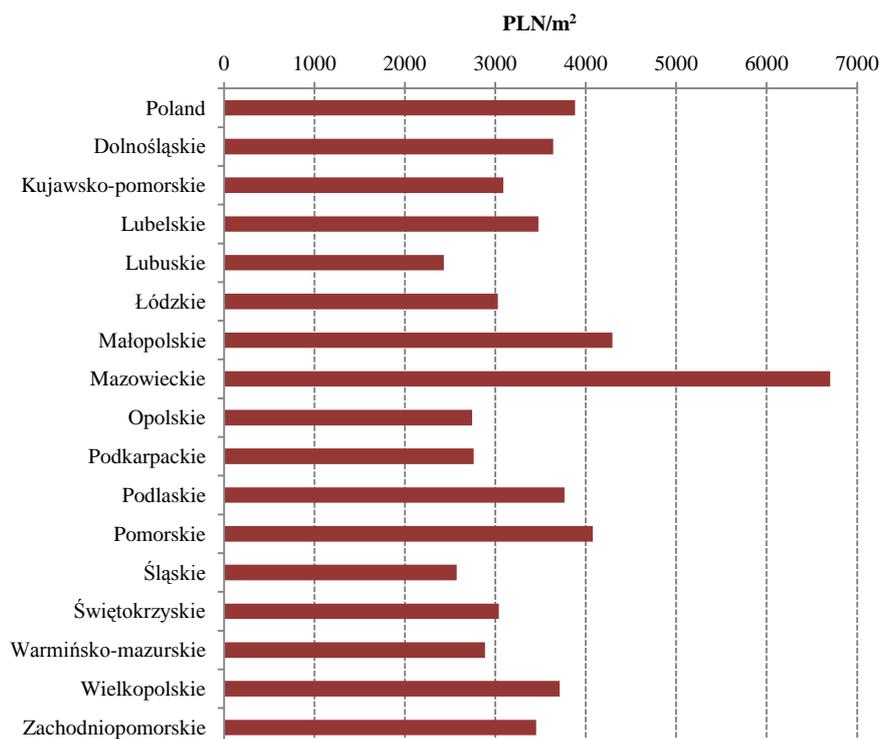

An average price for 1 m² of residential premises sold in 2011 amounted to PLN 3,881. As the area of residential premises grows an average price for 1 m² of usable floor space drops. Prices for 1 m² of one-room residential premises are over 36.0% higher than an average price of residential premises in total. The prices of three-room premises are the closest to an average price, being only 0.5% higher than an average price of residential premises in total. Average prices for 1 m² of residential premises sold in cities were considerably higher (of approx. 64.0%) than average prices obtained in rural areas.

**Average transaction prices of residential premises by number of rooms and location
in 2011**

Average prices of residential premises ranged from PLN 2,429 per 1 m² in Lubuskie Voivodship to PLN 6,701 per 1 m² in Mazowieckie Voivodship. Relatively high prices were also recorded in Małopolskie Voivodship – PLN 4,295 per 1 m² and in Pomorskie Voivodship – PLN 4,079 per 1 m².

**Average transaction prices of residential premises by voivodships
in 2011**

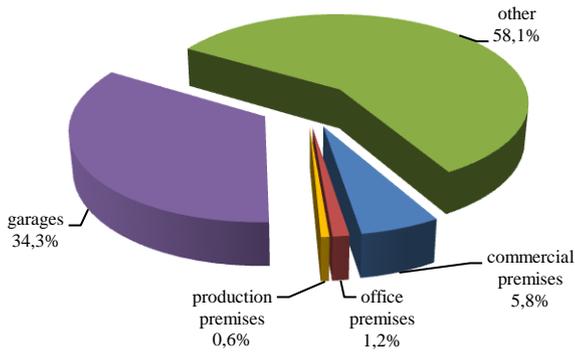

Non-residential premises

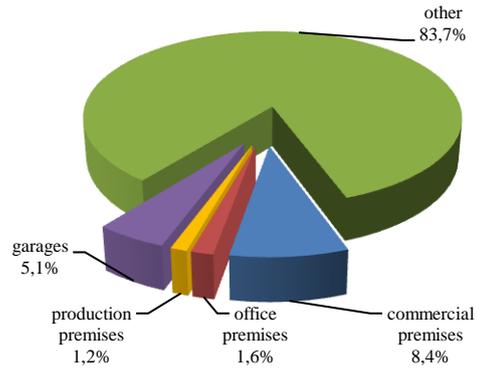

As in the preceding years, a relatively insignificant non-residential premises turnover was recorded also in 2011. 6.9 thous. of non-residential premises purchase/sale transactions were registered, with the turnover value of about PLN 1.0 bn. The area covered by such transactions amounted to about 0.9 million m².

Among the non-residential premises, premises classified as "others" were sold the most frequently; their share in the total number of all transactions of non-residential premises amounted to 58.1%. It is a very broad category including business premises of various kinds other than commercial premises, office premises, production premises and garages. Among other things, storage premises, gastronomical premises, consulting rooms and studios of different types and premises designed for socio-cultural activities are classified to this category. A slightly lower share in the non-residential premises turnover, in terms of quantity, was recorded in the category of garages – 34.3% and commercial premises – 5.8%. In terms of value, other non-residential premises were the most significant, accounting for 83.7% of turnover. Commercial premises were rated second, with a share at 8.4% in the non-residential premises turnover value, followed by garages, which reached 5.1% of turnover value. Production premises, in turn, indicated the lowest share in the size of turnover of non-residential premises, both in terms of quantity and value.

Quantity structure of purchase/sale transactions of non-residential premises by type in 2011

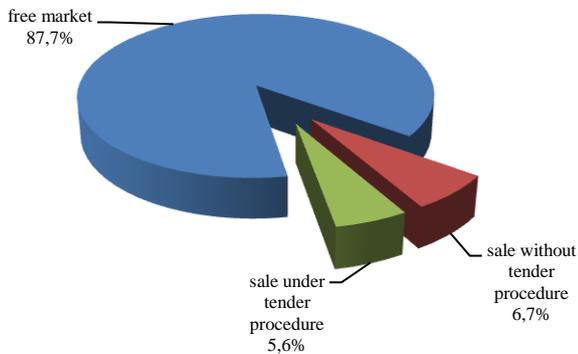

Value structure of purchase/sale transactions of non-residential premises by type in 2011

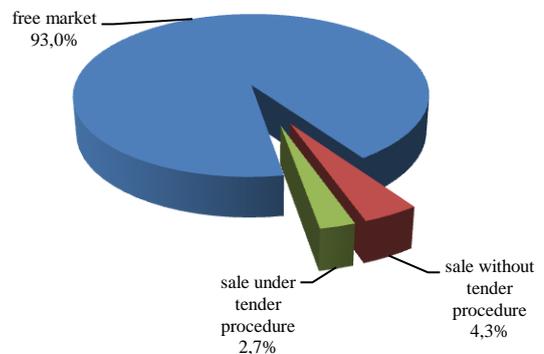

In 2011 sales on the free market constituted the predominating form of non-residential premises turnover, accounting for almost 88.0% in terms of quantity and 93.0% in terms of value of transactions.

Quantity structure of purchase/sale transactions of non-residential premises by turnover form in 2011

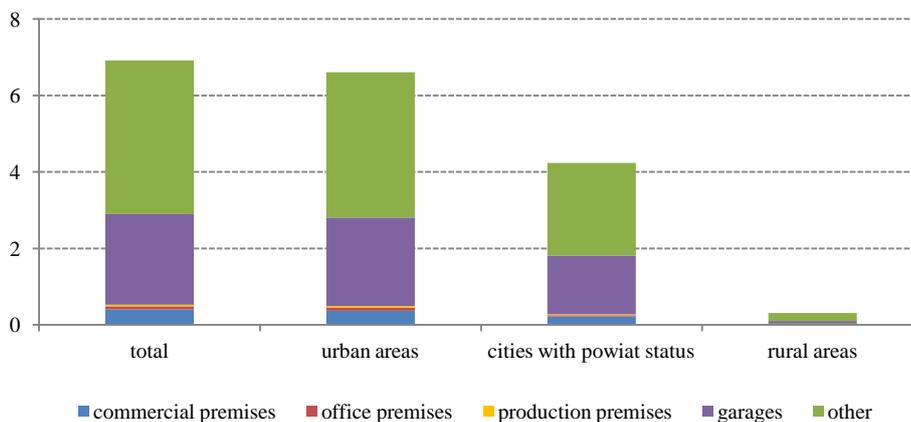

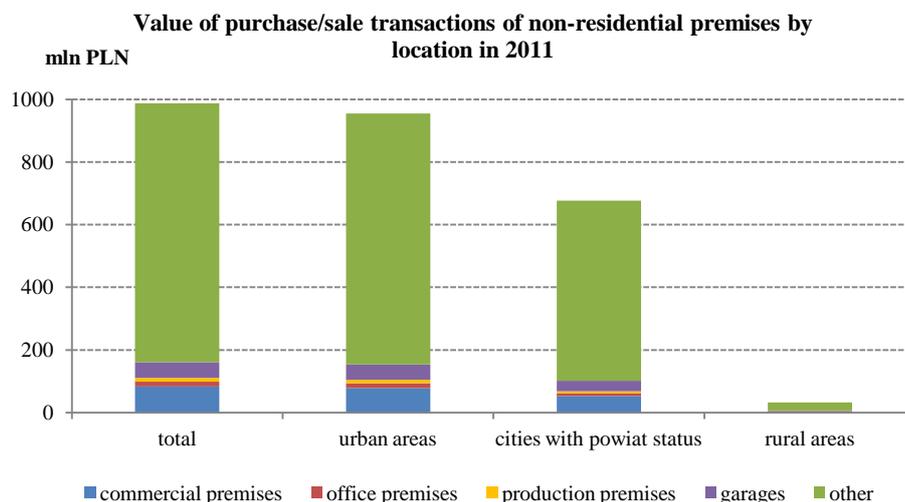

Value structure of purchase/sale transactions of non-residential premises by turnover form in 2011

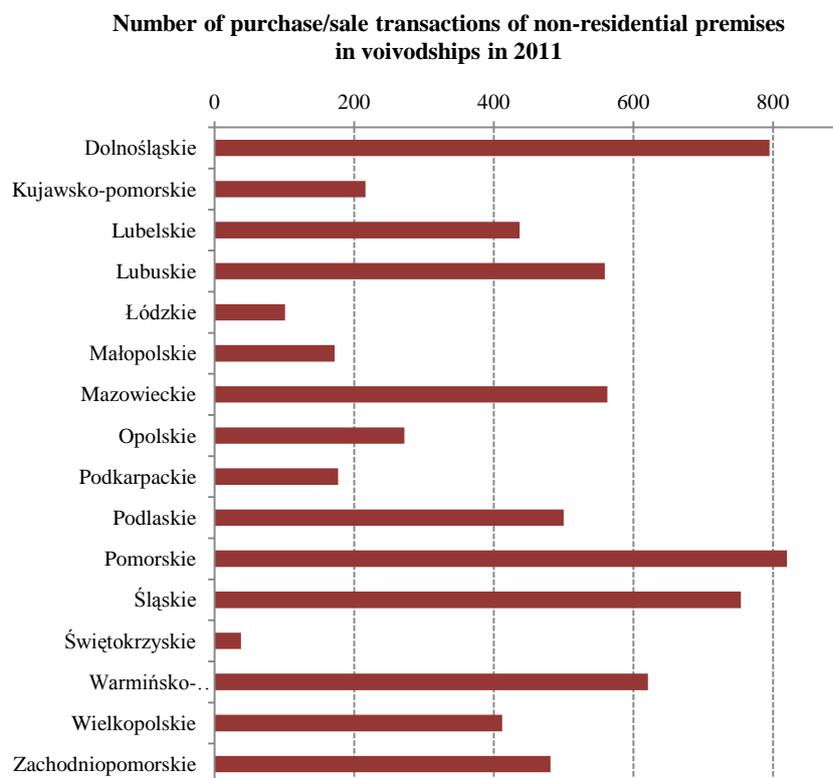

Non-residential premises, similar as residential premises, were mainly sold in urban areas. The non-residential premises turnover within the city borders accounted for over 95.0% of the non-residential premises turnover in terms of quantity, and approx. 97.0% in terms of value. An especially important role was played by markets in cities with powiat status, where over 61.0% of total number of purchase/sale transactions of non-residential premises was made, thereby accounting for over 68.0% of the turnover value of this real estate category.

Number of purchase/sale transactions of non-residential premises by location in 2011

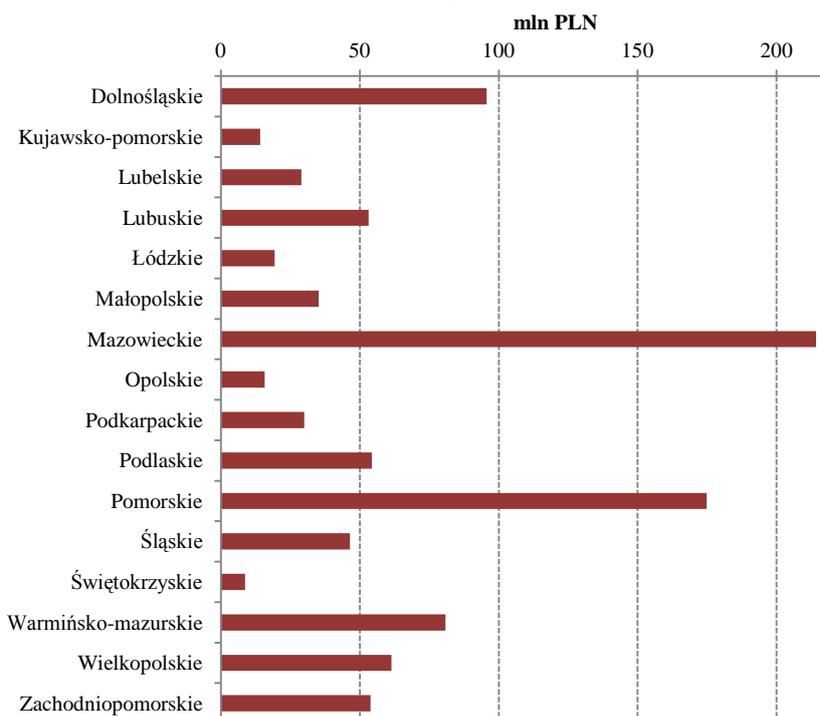

The largest number of transactions involving non-residential premises was made in Pomorskie Voivodship, followed by Dolnośląskie and Śląskie Voivodships. A total number of transactions made in these three voivodships constituted more than 34.0% of all transactions involving non-residential premises. In terms of value, the dominating role was attributed to Mazowieckie and Pomorskie Voivodships. The lowest number of transactions involving non-residential premises was recorded in Świętokrzyskie, Łódzkie, Małopolskie and Podkarpackie Voivodships. In terms of value, the lowest non-residential premises turnover was observed in the following voivodships: Świętokrzyskie, Kujawsko-Pomorskie, Opolskie and Łódzkie.

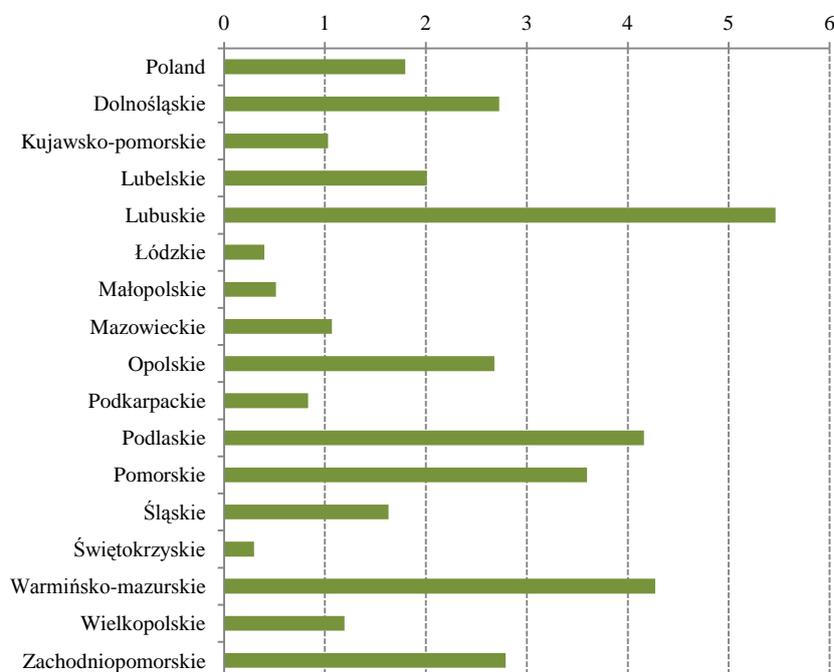

**Value of purchase/sale transactions of non-residential premises
in voivodships in 2011**

Lubuskie, Warmińsko-Mazurskie, Podlaskie and Pomorskie Voivodships belonged to voivodships with the largest number of purchase/sale transactions of non-residential premises per 10,000 inhabitants.

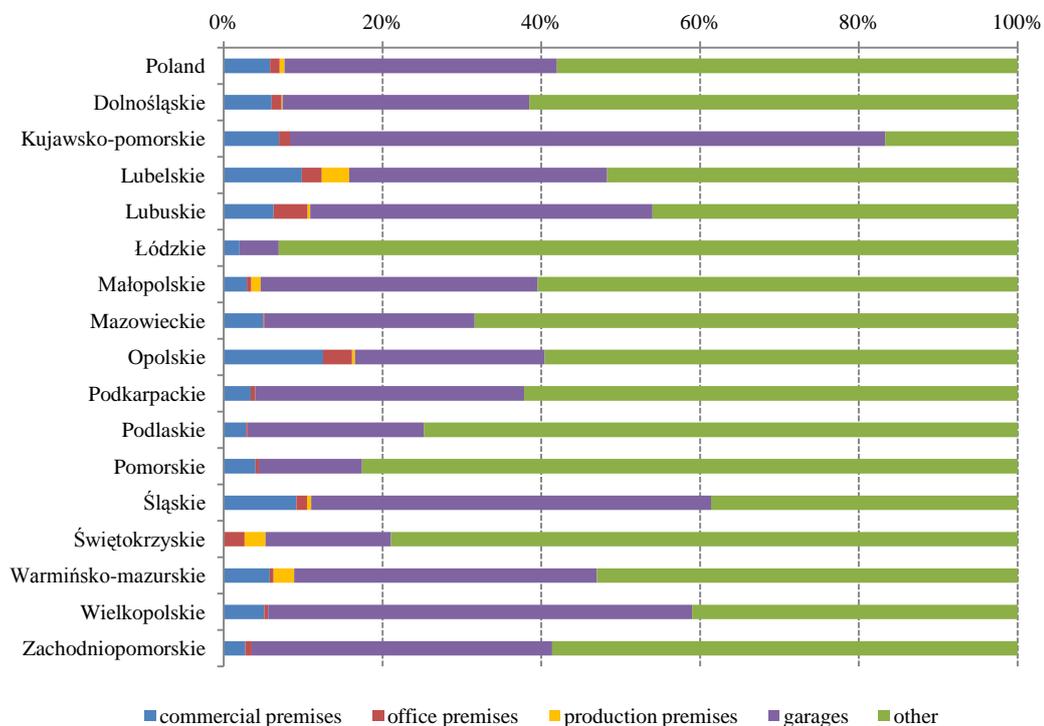

**Number of purchase/sale transactions of non-residential premises
per 10,000 inhabitants in 2011**

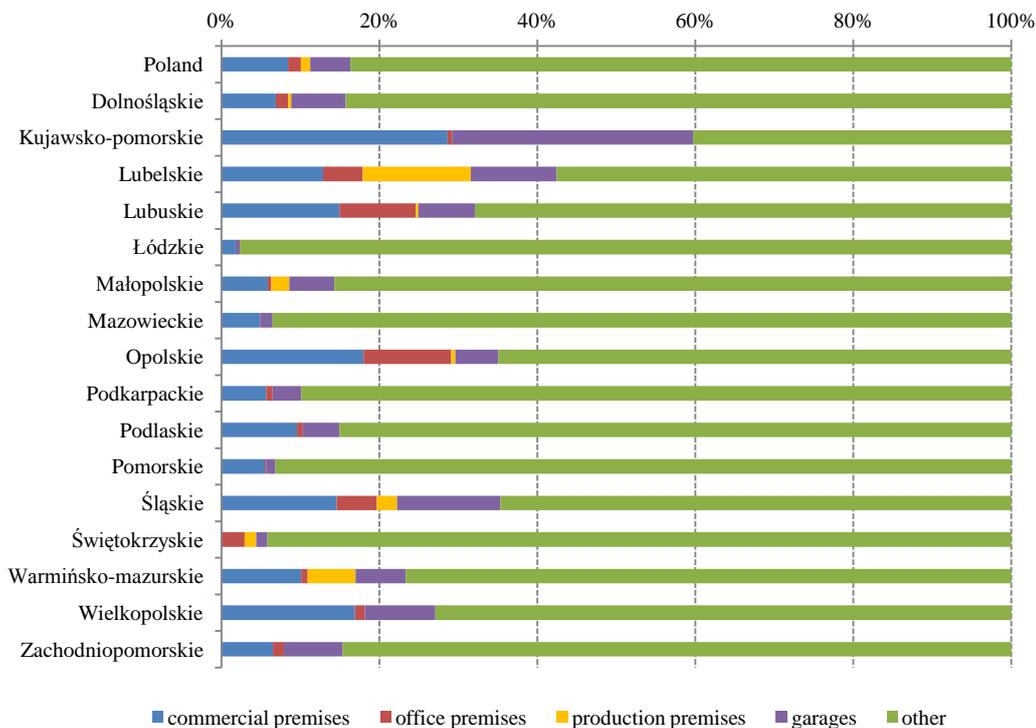

In terms of quantity, the sales in the category of other premises prevailed in most voivodships. Only in Kujawsko-Pomorskie, Śląskie and Wielkopolskie Voivodships the sales of garage prevailed. The purchase/sale transactions of production premises constitute a small percentage in non-residential premises turnover, and in

half of voivodships no transactions of this kind were recorded. In terms of value, the category of other premises prevailed in the case of all voivodships. In Kujawsko-Pomorskie Voivodship commercial premises as well as garages played a significant role.

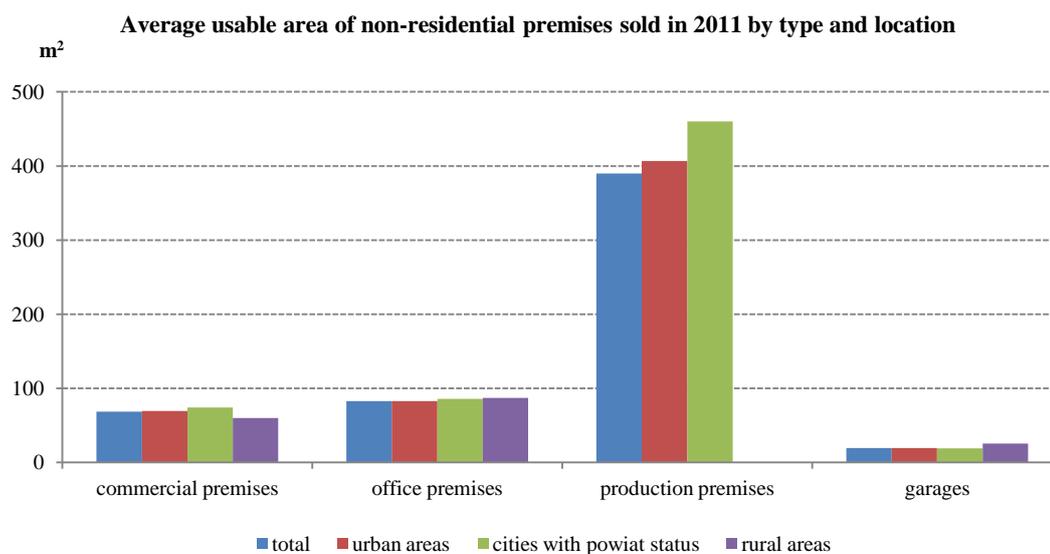

Quantity structure of purchase/sale transactions of non-residential premises by type in voivodships in 2011

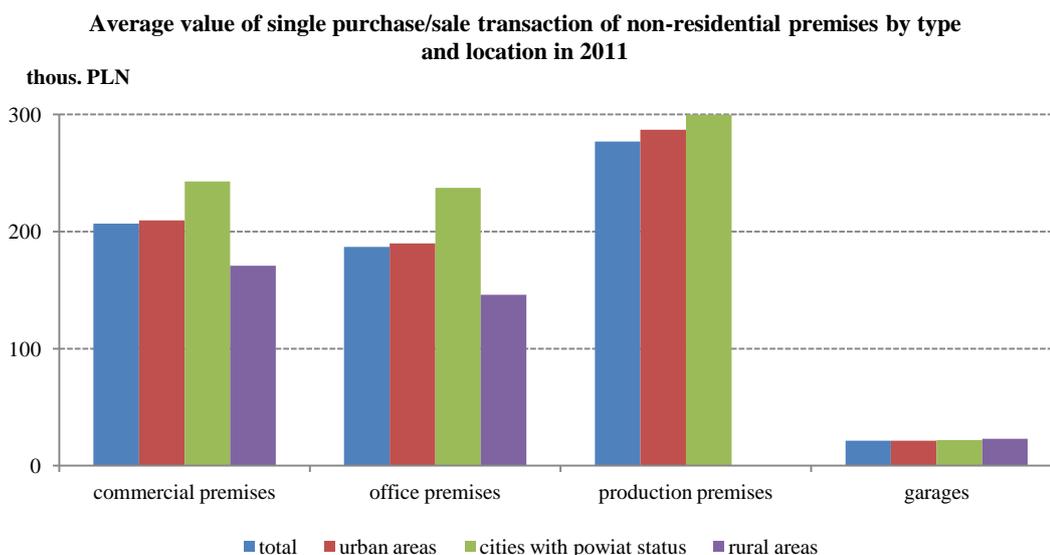

Value structure of purchase/sale transactions of non-residential premises by type in voivodships in 2011

The average area of commercial premises sold in 2011 amounted to approx. 69.0 m², office premises – nearly 83.0 m², production premises – approx. 390.0 m², and garages – over 19.0 m².

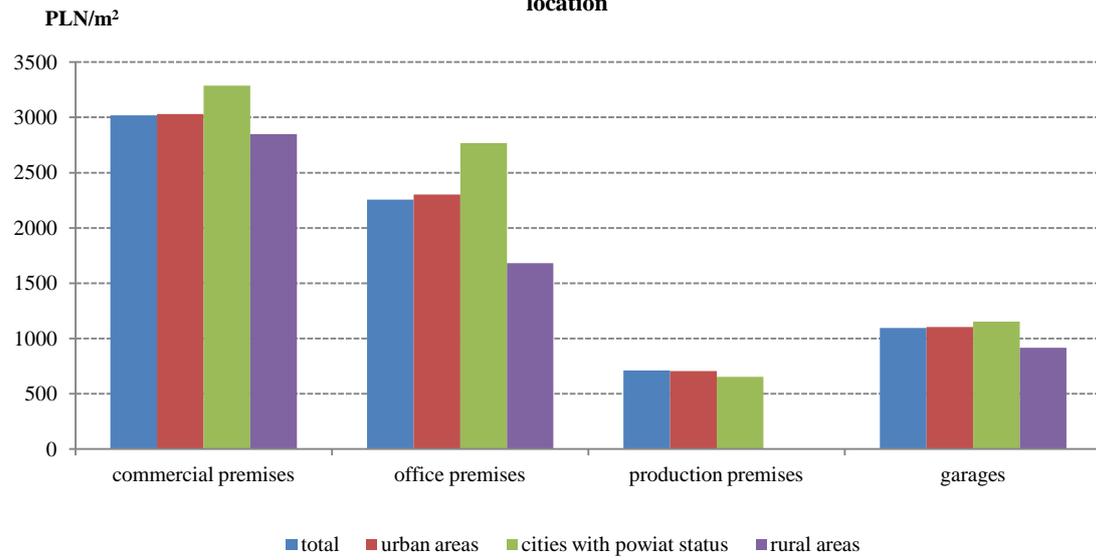

An average value of a single purchase/sale transaction of commercial premises amounted to PLN 206.9 thous., of office premises – PLN 186.8 thous., of production premises – PLN 276.9 thous. and of garages – PLN 21.3 thous.

In 2011, 1 m² of office areas was the most expensive; the average price amounted to PLN 3,019. An average transaction price of commercial premises amounted to PLN 2,257 per 1 m² and of garages to PLN 1,096 per 1 m². The lowest price per 1 m², amounting to PLN 710.00, was attributed to production premises. The prices obtained in rural areas were much lower than those obtained in cities. An average transaction price for 1 m² of usable floor space of commercial premises sold outside urban areas was by over 27.0% lower than an average price for cities, and in the case of garages – by almost 17.0%, and in the case of commercial premises - by 6.0%.

Average transaction prices of non-residential premises sold in 2011 by type and location

III. PURCHASE/SALE TRANSACTIONS OF BUILDINGS

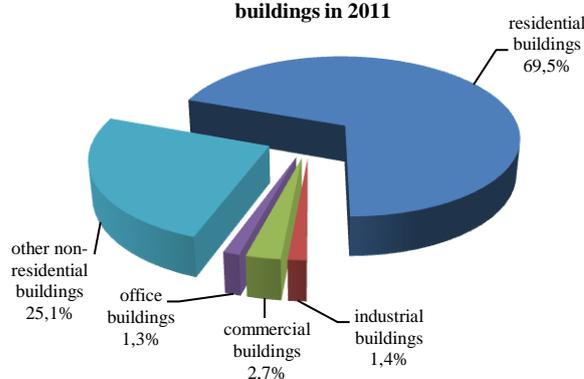

The number of purchase/sale transactions of buildings registered in 2011 amounted to 856, accounting for 0.3% of all real estate transactions. The turnover value for this real estate category reached PLN 247 million, which corresponded to 0.5% of the total real estate turnover. The usable floor space of the buildings constituting the object of the purchase/sales transactions amounted to 179 thous. m².

In the survey on the buildings turnover, a distinction was made between residential buildings, industrial buildings, commercial buildings, office buildings and other non-residential buildings. The category of other non-residential buildings is very broad and diversified, and it covers, among other things, hospitals and health care buildings, education, science and culture buildings, farm buildings, transport and telecommunication buildings, tanks, silos and storage buildings. In 2011, transactions involving residential buildings prevailed on the building real estate market, both in terms of quantity and value. The lowest turnover was registered in the case of industrial and office buildings.

Quantity structure of purchase/sale transactions of buildings in 2011

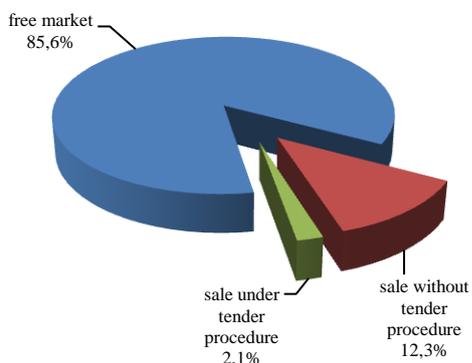

Value structure of purchase/sale transactions of buildings in 2011

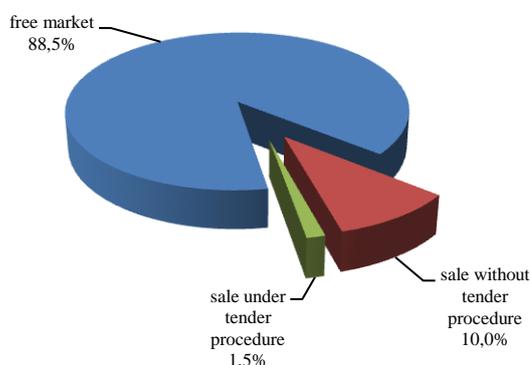

In 2011 sales on the free market constituted the predominating form of building real estate turnover, both in terms of quantity and value, accounting respectively for 85.6% and 88.5% of all transactions. The sale under tender procedure had an insignificant share in the building real estate turnover.

Quantity structure of purchase/sale transactions of buildings by turnover form in 2011

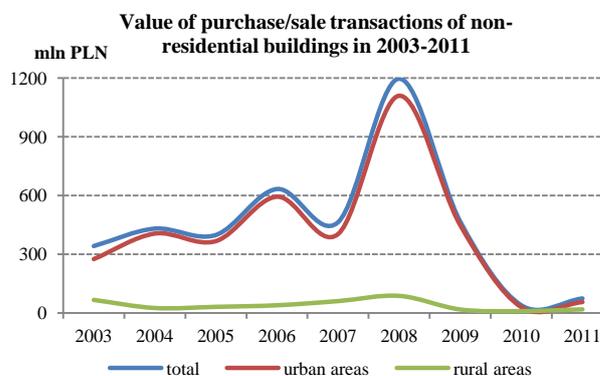

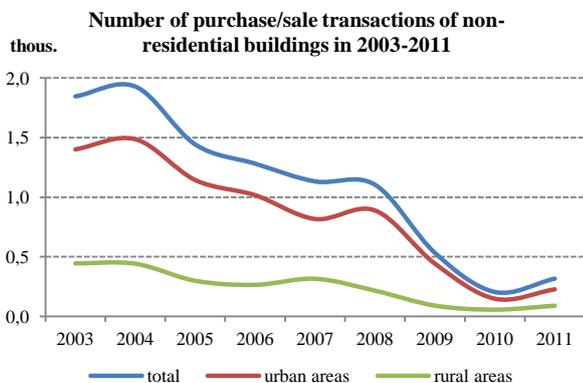

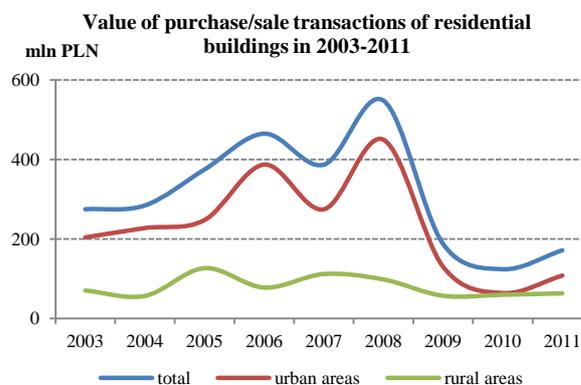

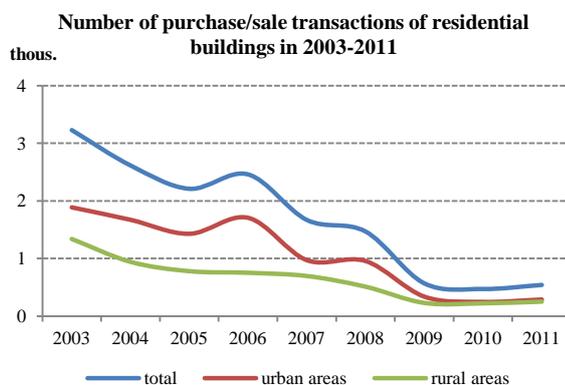

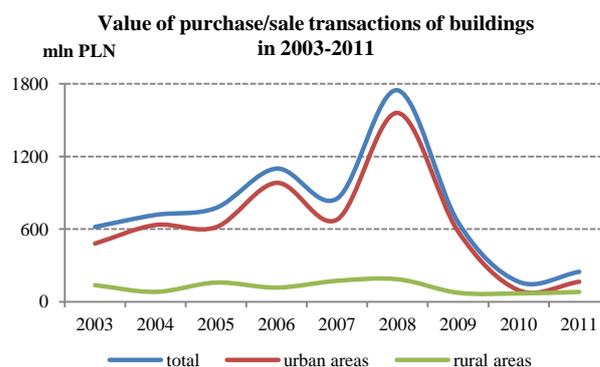

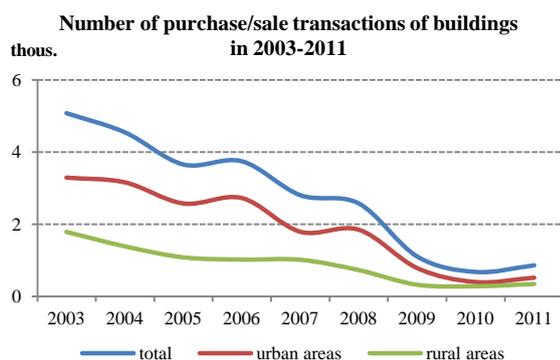

Value structure of purchase/sale transactions of buildings by turnover form in 2011

In the year 2003-2010 a decline in the number of purchase/sale transactions of buildings was observed with a slight revival in 2006, when a growth of 2.4% in the number of transactions, in relation to the preceding year, was recorded. It resulted from a growth in the sales of residential buildings in urban areas. In 2011 the sales of buildings increased by 27.0% compared to 2010; yet it was preceded with considerable declines in the number

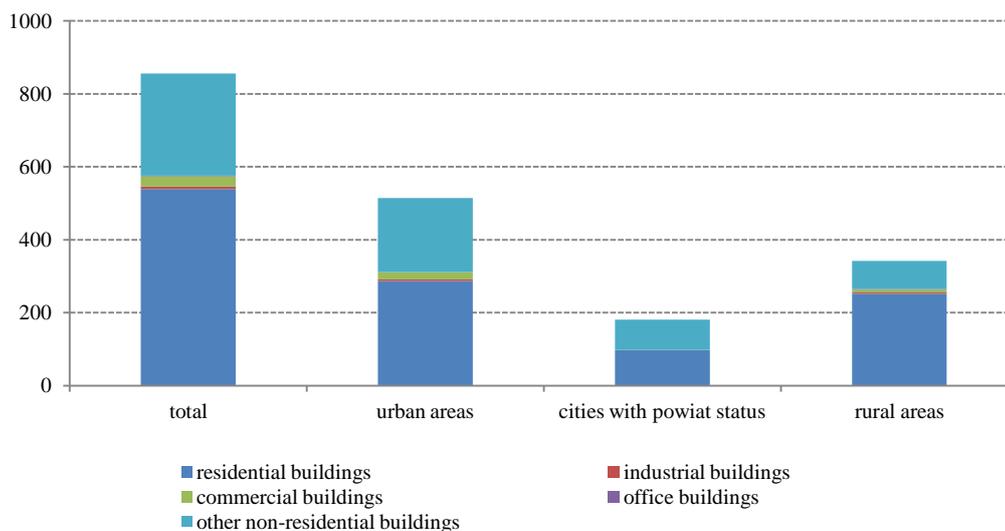

of transactions that took part in the years 2009 and 2010. The value of turnover in 2011 constitutes just marginally more than 33.0% of turnover registered in 2008. Annual sale value of buildings was growing up to 2006, when a growth of 42.0% in relation to the year 2005 was recorded. The year 2007 brought a decline in the purchase/sale transactions of buildings, amounting to 22.5%. Then, in 2008, more than a two-fold increase occurred in the value of transactions made, accompanied by a simultaneous drop exceeding 8.0% in the number of transactions. In the years 2009 and 2010, a decline in the buildings turnover has been observed, both in terms of quantity and value. The value of building sold in 2009 was by 62.5% lower compared to the turnover value in 2008. The value of buildings sold in 2010 was by 74.9% lower than the value of buildings sold in 2009. The growth of purchase/sale transactions of buildings recorded in 2011 in terms of quantity and value took place both in urban areas and outside the city borders. The value of buildings sold was by over 50.0% higher than the value of buildings sold in 2010.

In 2011, the vast majority of the building real estate turnover, both in terms of quantity and value, took place within the city borders. The turnover with buildings located outside the city borders constituted 40.0% of the total number of purchase/sale transactions of buildings, and approx. 33.0% of their value. Also in the case of

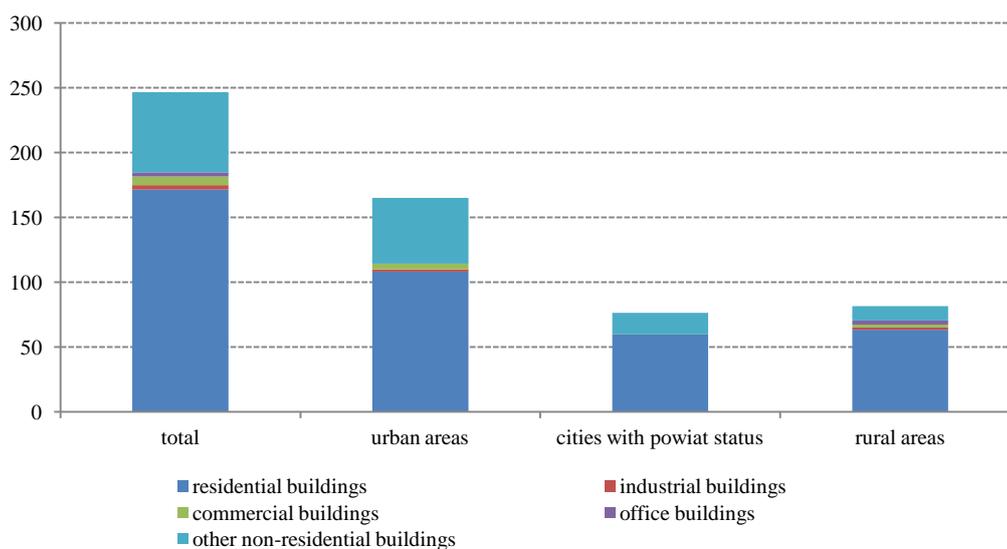

particular buildings categories under analysis, the majority of transactions, both in terms of quantity and value, took place within the city borders.

Number of purchase/sale transactions of buildings by type and location in 2011

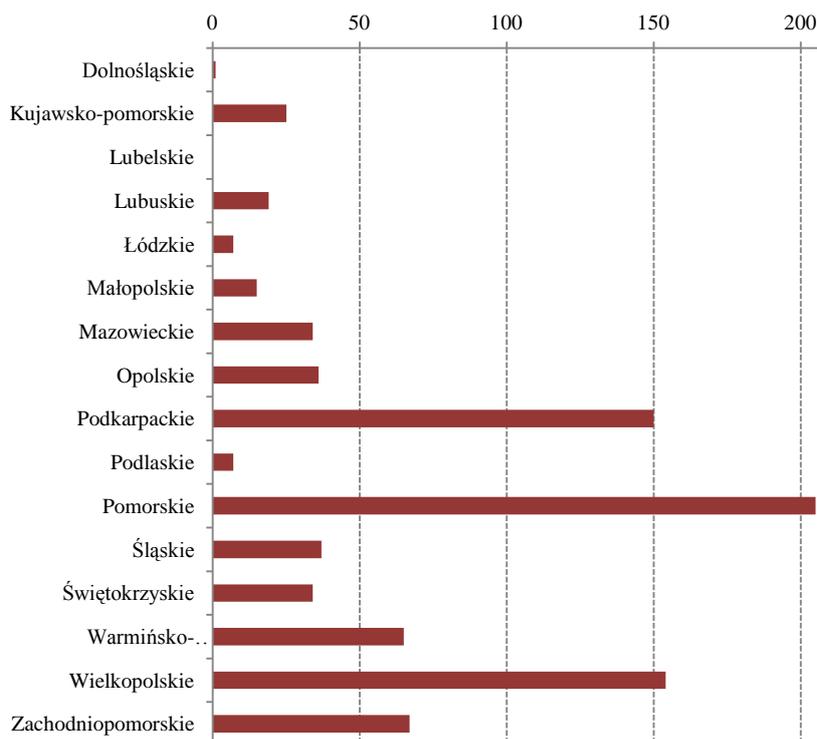

Value of purchase/sale transactions of buildings by type and location in 2011

mln PLN

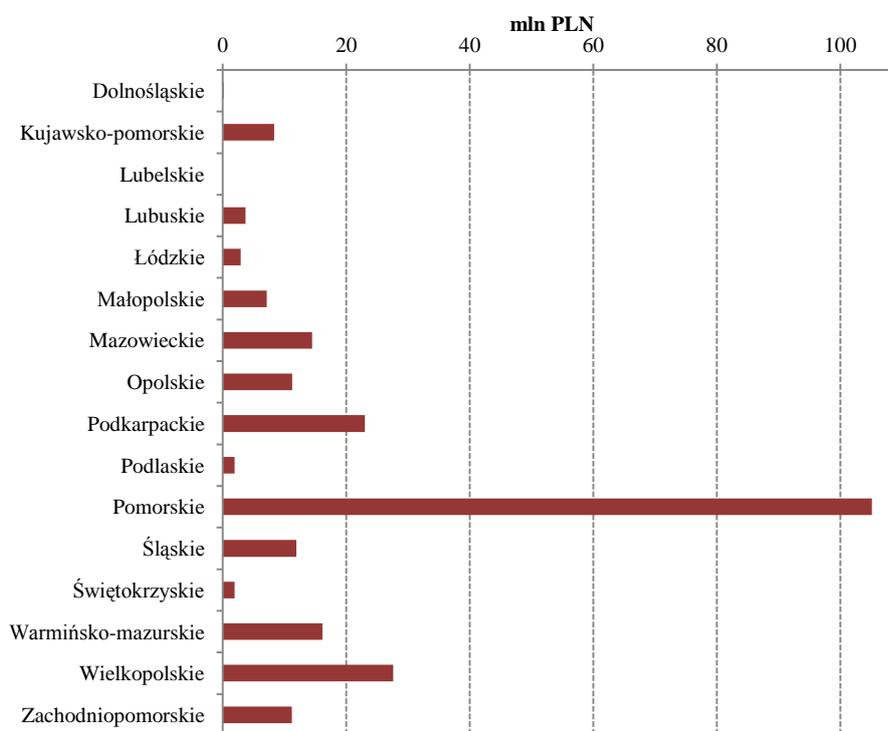

The largest building real estate turnover, both in terms of quantity and value, was recorded in Pomorskie, Wielkopolskie and Podkarpackie Voivodships. These three voivodships together accounted for more than 59.0% of all transactions in this real estate category in Poland. No buildings purchase/sale transaction was recorded in Lubelskie Voivodship. The lowest building real estate turnover was recorded in Dolnośląskie, Łódzkie and Podlaskie Voivodships.

Number of purchase/sale transactions of buildings in voivodships in 2011

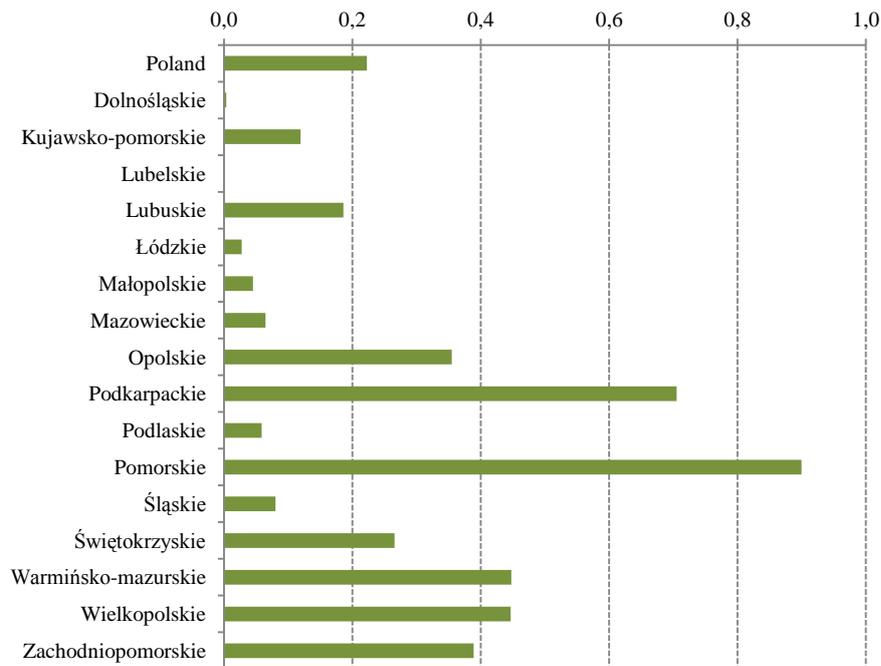

Value of purchase/sale transactions of buildings in voivodships in 2011

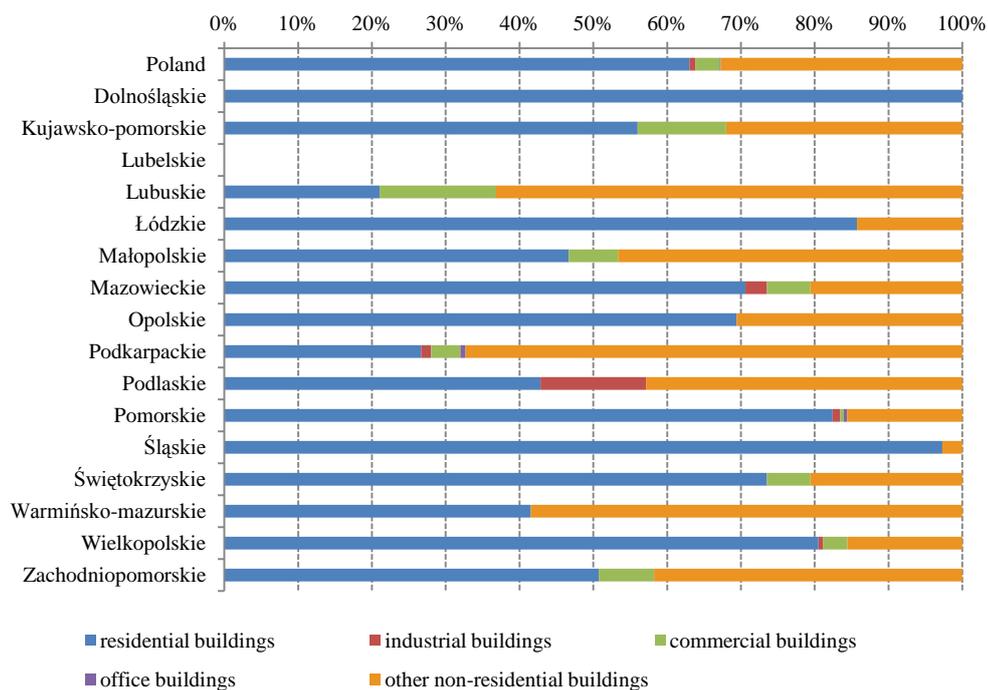

Pomorskie, Podkarpackie, Warmińsko-Mazurskie and Wielkopolskie Voivodships belonged to voivodships with the largest number of purchase/sale transactions of buildings per 10,000 inhabitants. The lowest number of transactions per 10,000 inhabitants was observed in Dolnośląskie, Łódzkie and Małopolskie Voivodships.

Number of purchase/sale transactions of buildings per 10,000 inhabitants in 2011

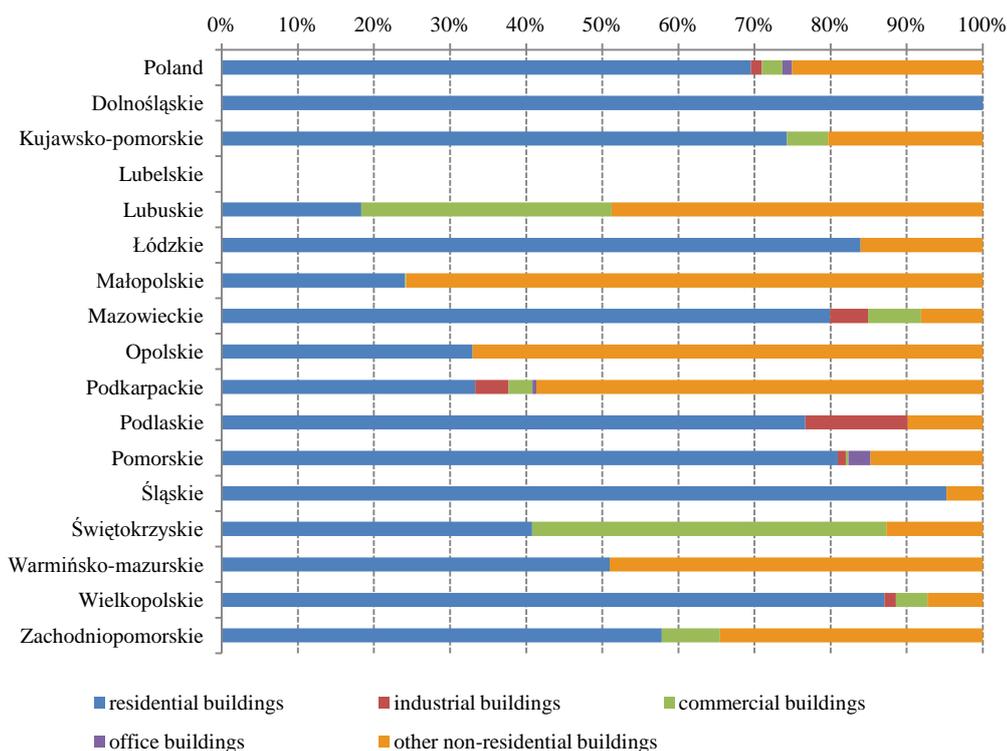

On the national scale, as well as on the majority of voivodship markets the sales of residential buildings prevailed. In Podkarpackie, Lubuskie and Warmińsko-Mazurskie Voivodships most of purchase/sale transactions of buildings concerned other non-residential buildings. Sale of industrial buildings occurred only in five voivodships (Mazowieckie, Podkarpackie, Podlaskie, Pomorskie and Wielkopolskie). In the case of office buildings, the sales were recorded only in Pomorskie and Podkarpackie Voivodships. Turnover of commercial buildings in 2011 was recorded in nine voivodships. In the value structure, the turnover of these buildings category played an important role in Świętokrzyskie (approx. 47.0% of turnover value) and Lubuskie (approx. 33.0% of turnover value) Voivodships.

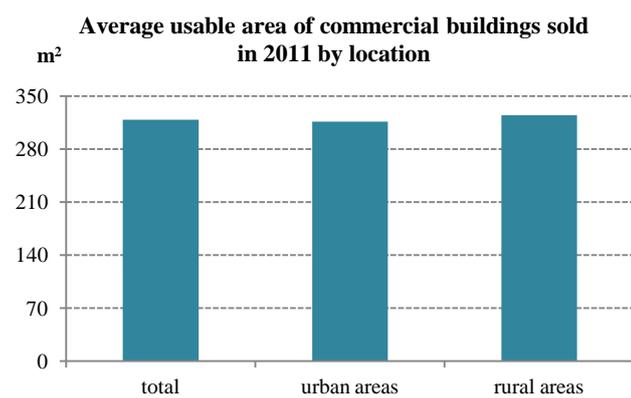

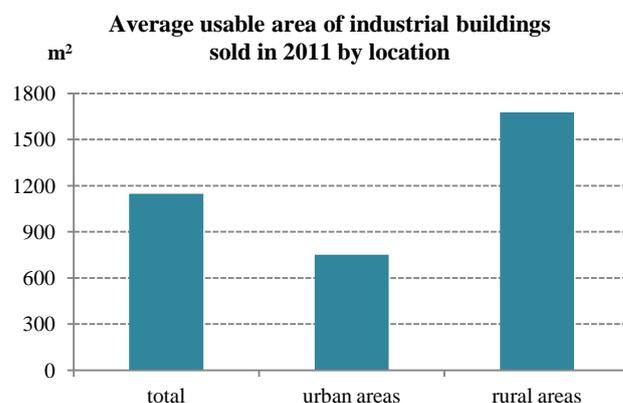

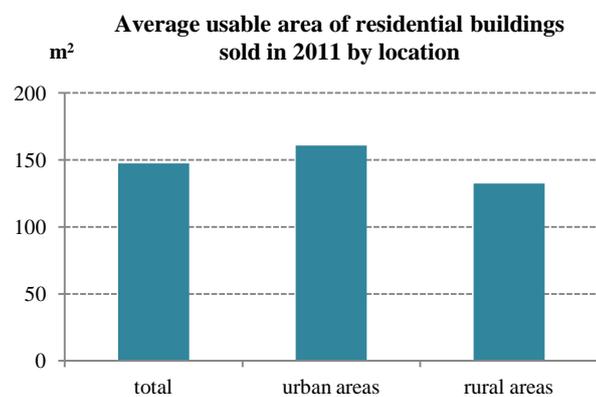

Quantity structure of purchase/sale transactions of buildings by type in voivodships in 2011

Value structure of purchase/sale transactions of buildings by type in voivodships in 2011

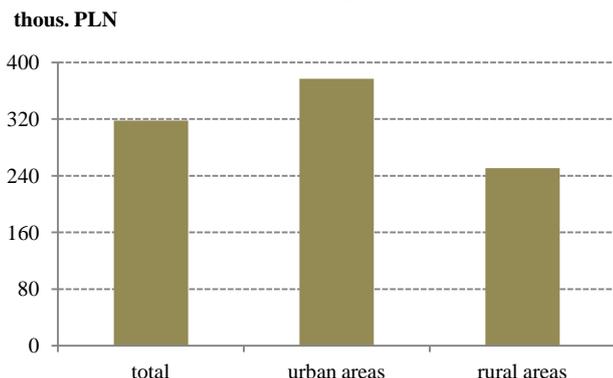

An average usable area of residential buildings sold in 2011 amounted to approx. 148.0 m². For industrial buildings an average usable area exceeded 1,148 m², for commercial buildings it amounted to approx. 319.0 m². Residential buildings sold in urban areas, particularly in cities with powiat status, were usually larger than those sold outside the city borders. Industrial buildings sold outside the city borders were on average over two times larger than those sold in urban areas.

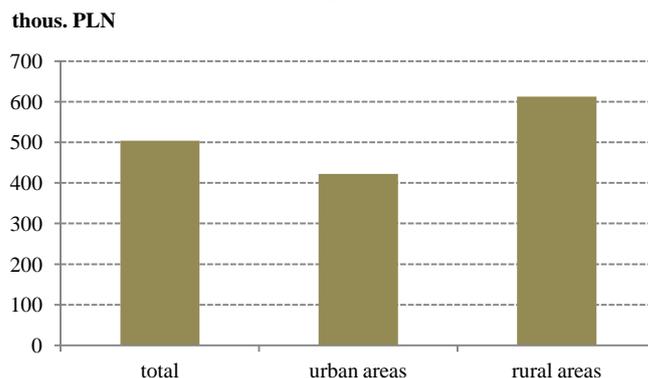

An average value of a single purchase/sale transaction made in 2011 amounted for residential buildings to PLN 318 thous., for industrial buildings to PLN 503.9 thous., while for commercial buildings to PLN 238.4 thous. In the case of industrial and commercial buildings, the transactions made outside the city borders were more expensive than those made in the cities. It was influenced by larger usable floor space and in the case of commercial buildings usually higher prices for 1 m² of usable floor space of the buildings located outside the city borders. Only in the case of residential buildings the average value of a single transaction made in urban areas was higher than the average value of transactions made outside the city borders (in cities with powiat status it was almost 2.5 times higher).

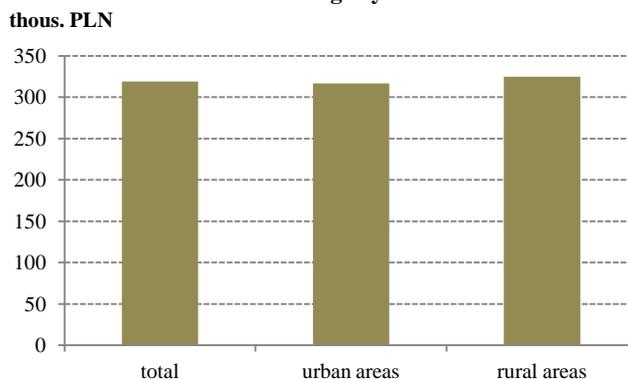

Average value of single purchase/sale transaction of residential buildings by location in 2011

Average value of single purchase/sale transaction of industrial buildings by location in 2011

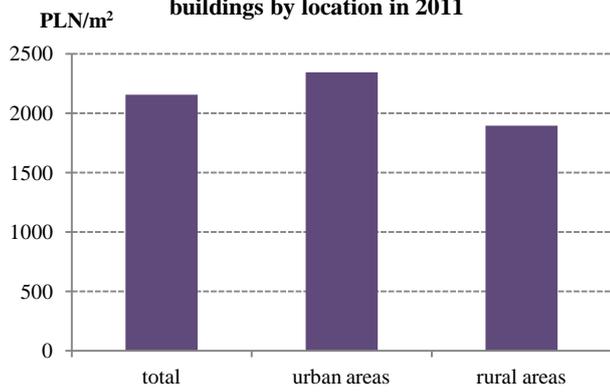

Average value of single purchase/sale transaction of commercial buildings by location in 2011

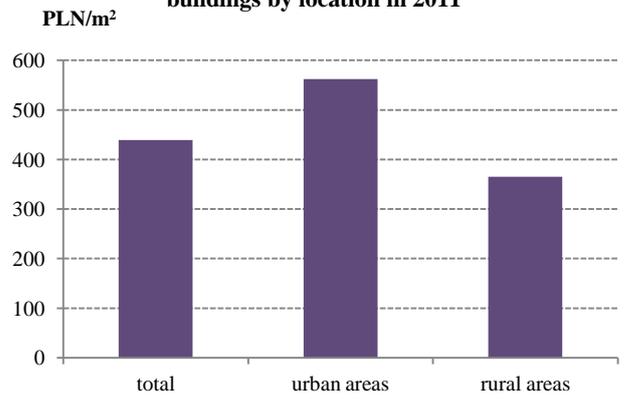

An average price for 1 m² of usable area of residential buildings was at the level of PLN 2,155, for industrial buildings PLN 439.00, for commercial buildings PLN 748.00. In the case of residential buildings and industrial buildings, average prices for 1 m² of usable area in cities were higher than the average prices obtained in rural areas. A reverse correlation was observed in the case of commercial buildings.

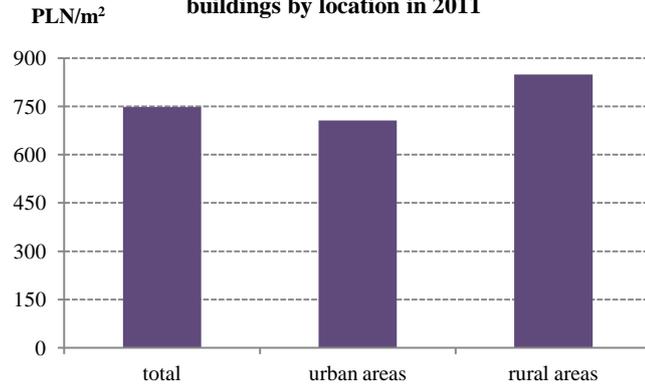

Average transaction prices of residential buildings by location in 2011

Average transaction prices of industrial buildings by location in 2011

Average transaction prices of commercial buildings by location in 2011

IV. PURCHASE/SALE TRANSACTIONS OF BUILT-UP PROPERTIES

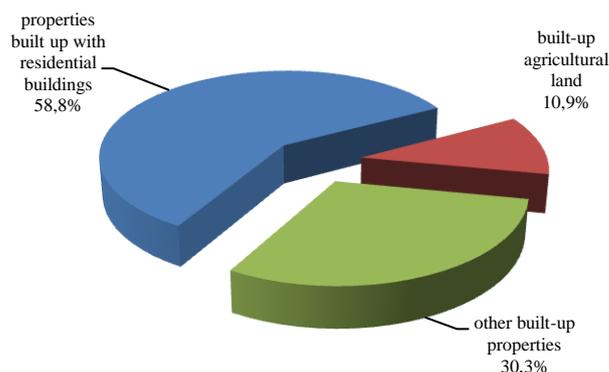

The number of purchase/sale transactions of built-up properties registered in 2011 amounted to about 54.1 thous., which accounted for 19.0% of all real estate transactions. The value of the built-up properties turnover reached the level of PLN 15.9 bn, which corresponded to 32.6% of the total real estate turnover. The cadastral area of the built-up properties constituting the object of purchase/sale transactions exceeded 395.1 million m².

In the survey on the built-up properties turnover, a distinction was made between the properties built up with residential buildings, built-up agricultural land, and other built-up properties, i.e. built up with buildings having other purposes than farmstead and residential ones. In 2011 the predominating role in built-up properties turnover was attributed to the built-up properties with residential buildings, accounting for more than a half of the built-up properties turnover, both in terms of quantity and value (56.2% and 58.8%, respectively). Other built-up properties constituted the second category in terms of significance, which in terms of the number of transactions made accounted for 24.3% of the market, and 30.3% in terms of value. The smallest part of the turnover of built-up properties, both in terms of quantity and value, constituted built-up agricultural land transactions (respectively 19.5% and 10.9% of the built-up properties turnover).

Quantity structure of purchase/sale transactions of built-up properties by type in 2011

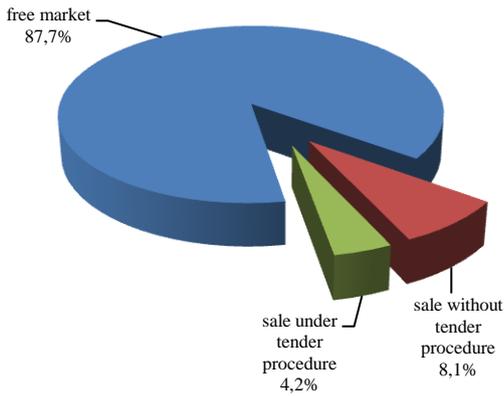

Value structure of purchase/sale transactions of built-up properties by type in 2011

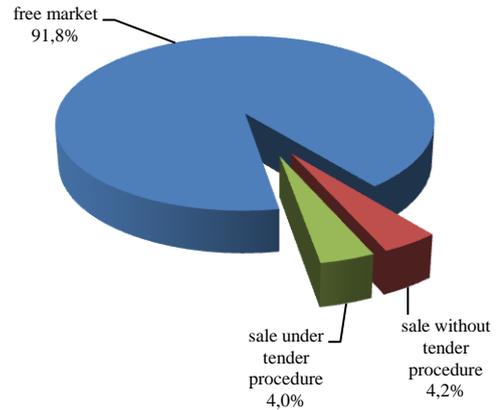

Within the built-up properties turnover, the ownership title was the most frequently occurring type of land ownership right. Within the structure of quantity, it accounted for 99.6% of all purchase/sale transactions of built-up properties, and within the structure of value for 99.7%.

In 2011 sales on the free market constituted the predominating form of built-up properties turnover, accounting for 87.7% of total number of transactions and 91.8% of total turnover value of this type of properties. In terms of quantity, tender sales constituted merely 4.2% of the built-up properties turnover, whereas in terms of value it constituted 4.0%.

Quantity structure of purchase/sale transactions of built-up properties by turnover form in 2011

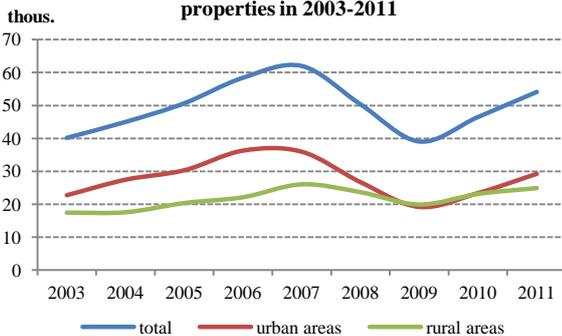

Value structure of purchase/sale transactions of built-up properties by turnover form in 2011

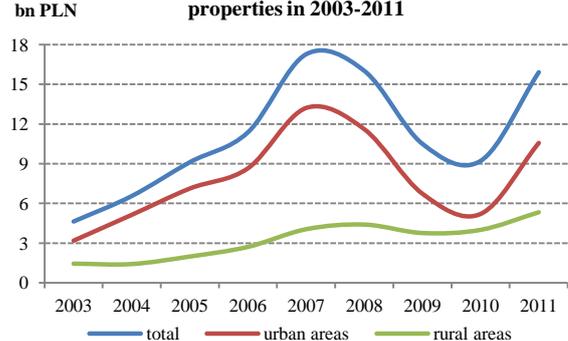

In the years 2003-2007 a constant growth in both the number and value of the purchase/sale transactions of built-up properties was observed. After that, in two subsequent years a considerable decline of the turnover in this real estate category was recorded. In 2010 a growth in the number of transactions involving built-up properties was observed with simultaneous continuing drop in the value of transactions made. In 2011, not only a growth in the number of transactions involving built-up properties was observed but also a considerable increase in the value of these transactions. The number of transactions involving built-up properties in 2011 was by over 16.0% higher in relation to the preceding year, and their value increased by approx. 73.0%. The growth in number of transactions observed in 2011 concerned each of market segments. The highest growth in the number of transactions was recorded in the segment of the properties built up with residential buildings located within city borders - by approx. 27.0 % in relation to the preceding year. The highest growth in terms of value of transactions was made in the segment of other built-up properties located within city borders - by approx. 200% in relation to the preceding year.

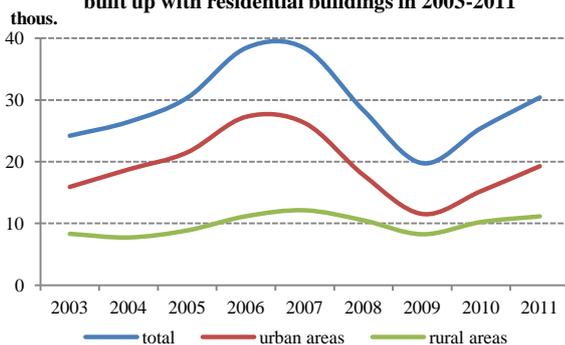

Number of purchase/sale transactions of built-up properties in 2003-2011

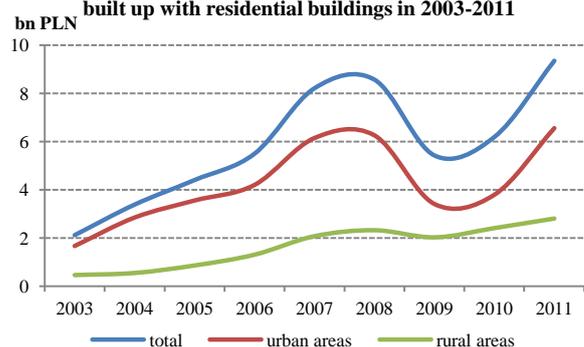

Value of purchase/sale transactions of built-up properties in 2003-2011

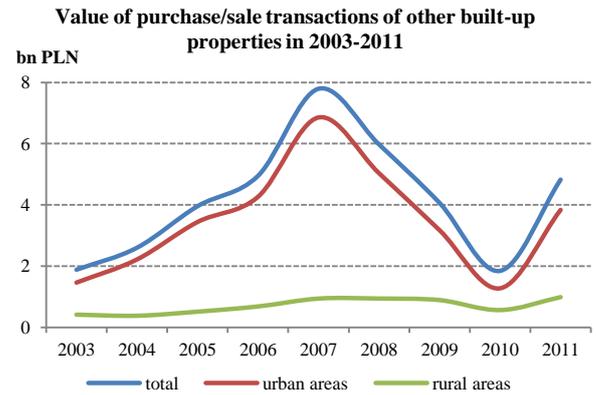

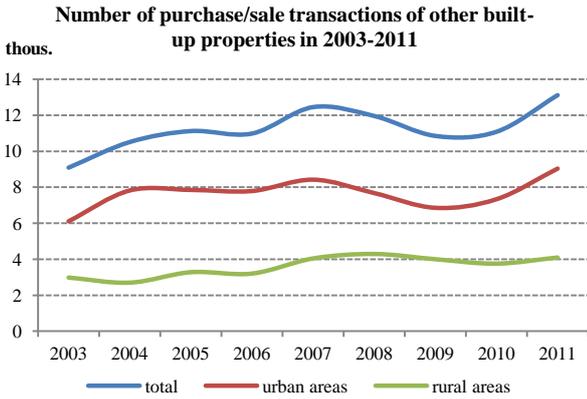

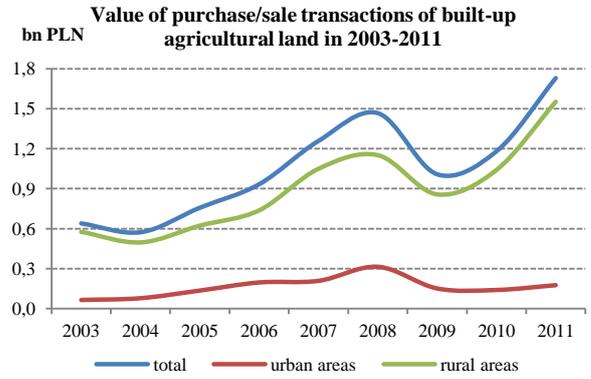

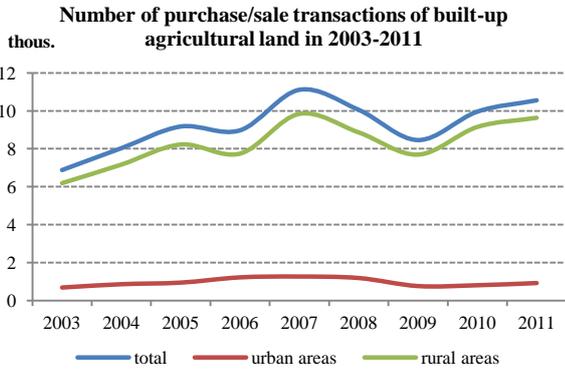

Number of purchase/sale transactions of properties built up with residential buildings in 2003-2011

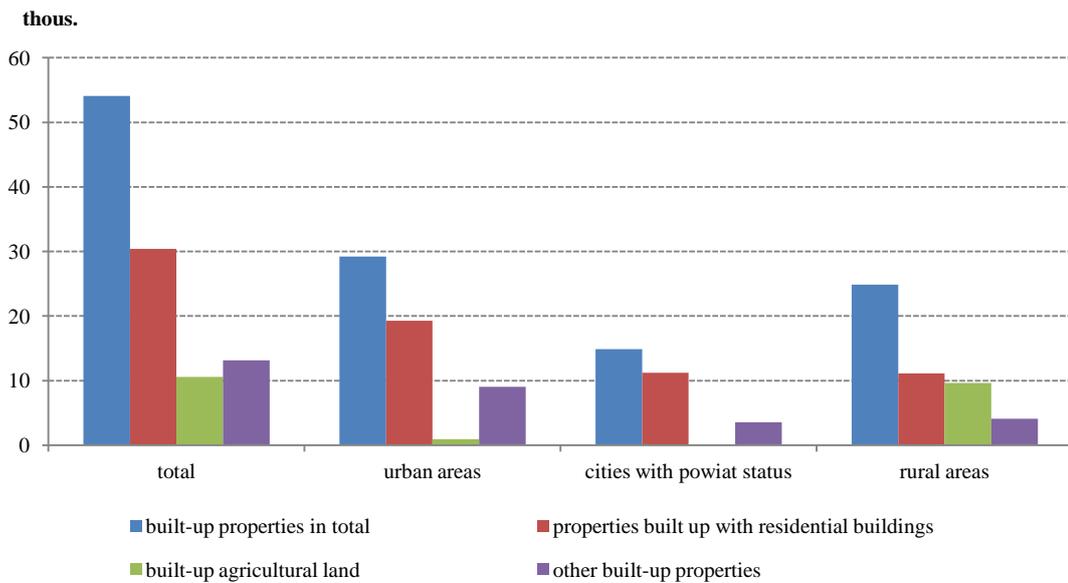

Value of purchase/sale transactions of properties built up with residential buildings in 2003-2011

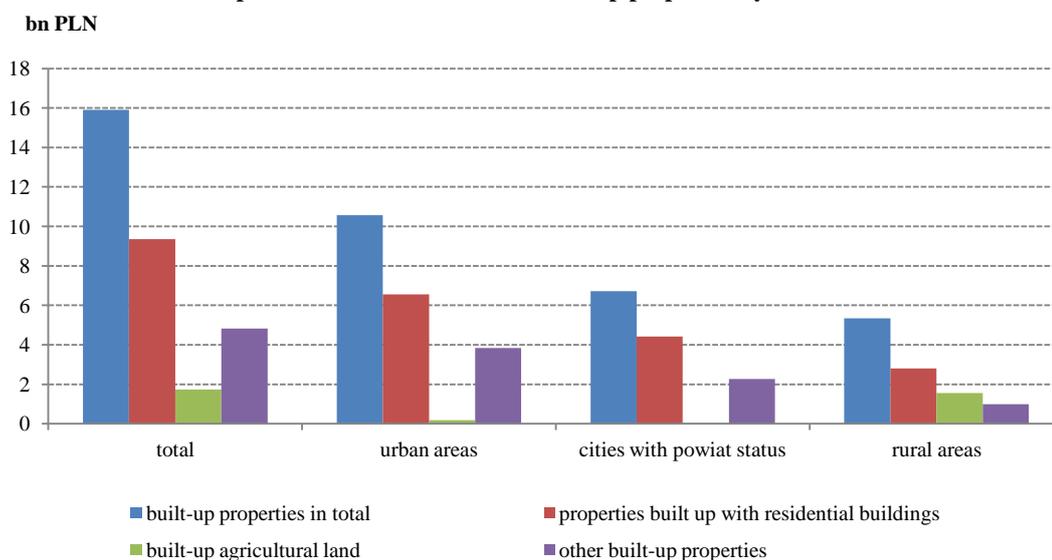

In 2011 the number of the purchase/sales transactions of built-up properties was relatively evenly allocated between urban areas (54.0%) and rural areas (46.0%). However, over 66.0% of total value of transactions was made in cities. In terms of quantity as well as in terms of value, the most significant role both in cities and outside the city borders was played by the purchase/sale transactions of the properties built up with residential buildings.

Number of purchase/sale transactions of built-up properties by location in 2011

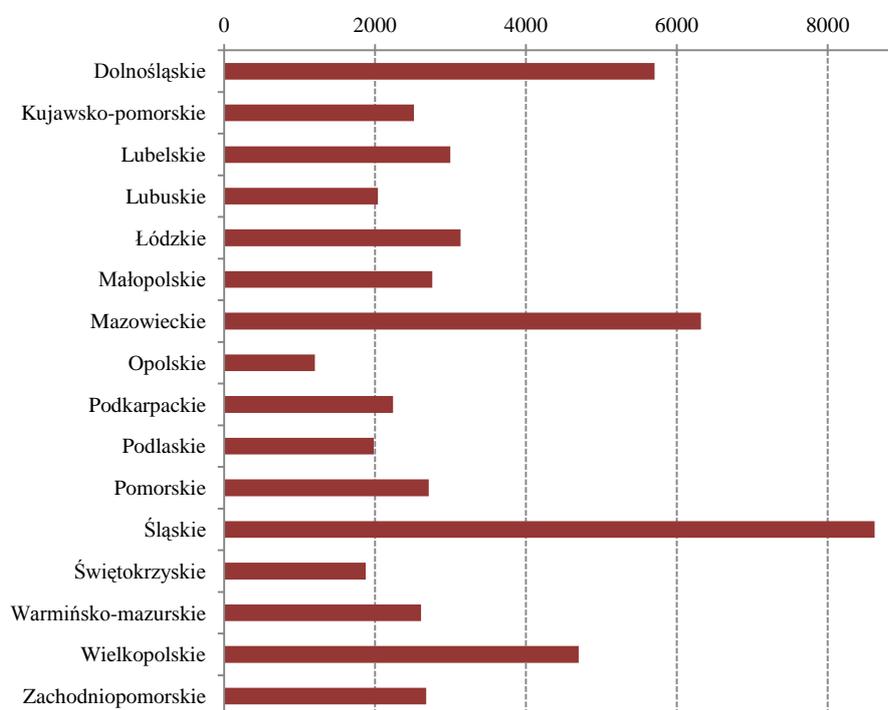

Value of purchase/sale transactions of built-up properties by location in 2011

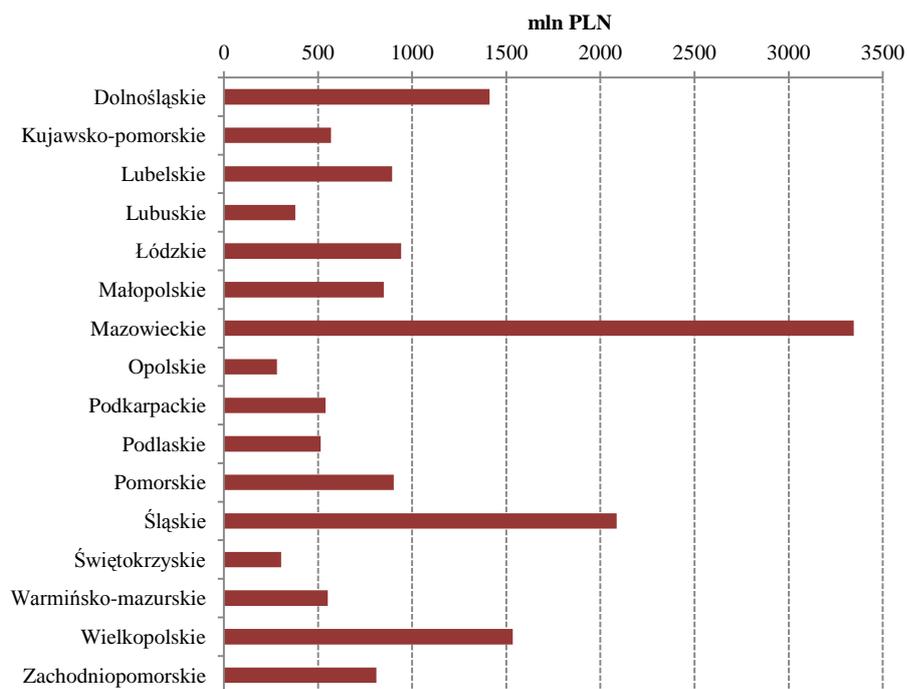

The highest built-up properties turnover, both in terms of quantity and value, was recorded in Mazowieckie and Śląskie Voivodships. In terms of quantity, these two voivodships accounted for a total of almost 28.0% of all purchase/sale transactions of built-up properties, and in terms of value - for more than 34.0%. The lowest turnover was recorded in Opolskie and Świętokrzyskie Voivodships.

Number of purchase/sale transactions of built-up properties in voivodships in 2011

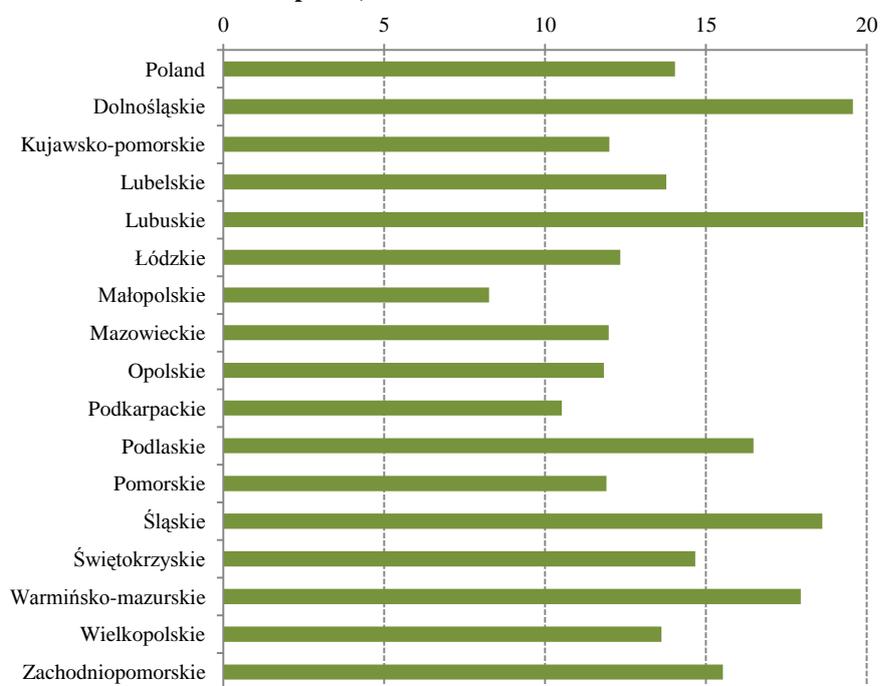

Value of purchase/sale transactions of built-up properties in voivodships in 2011

The number of purchase/sale transactions of built-up properties per 10,000 inhabitants at voivodship level in 2011 ranged from approx. 8 transactions in Małopolskie Voivodship to approx. 20 transactions in Lubuskie and Dolnośląskie Voivodships. Apart from Lubuskie and Dolnośląskie Voivodships, the highest indicators characterized the following voivodships: Śląskie, Warmińsko-Mazurskie, Podlaskie and Zachodniopomorskie.

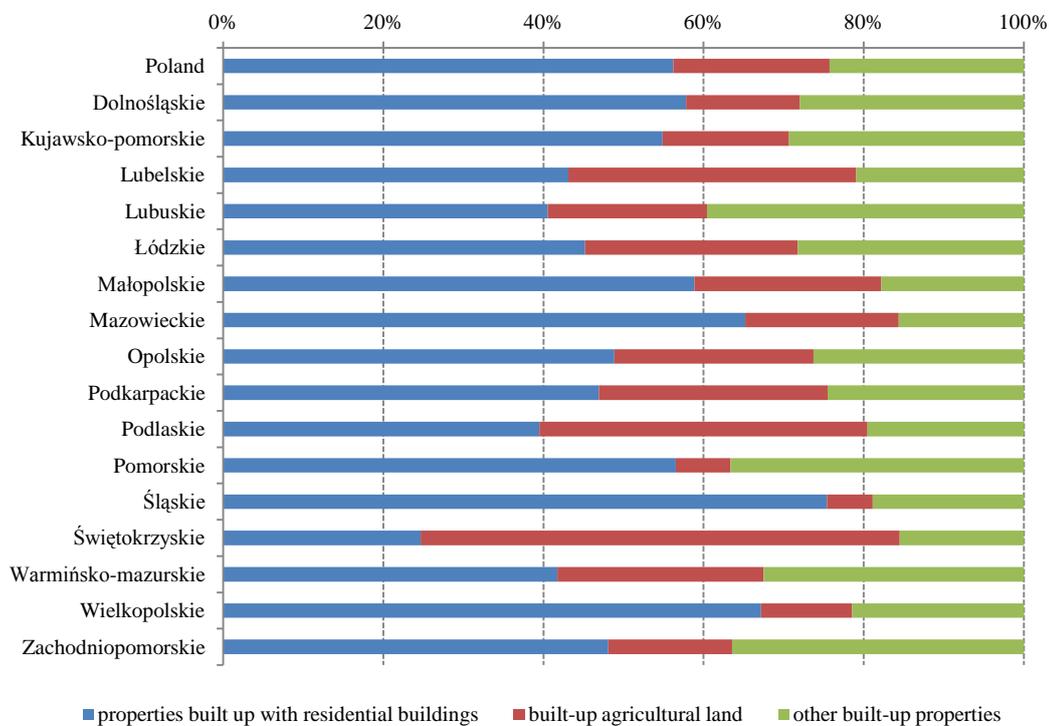

Number of purchase/sale transactions of built-up properties per 10,000 inhabitants in 2011

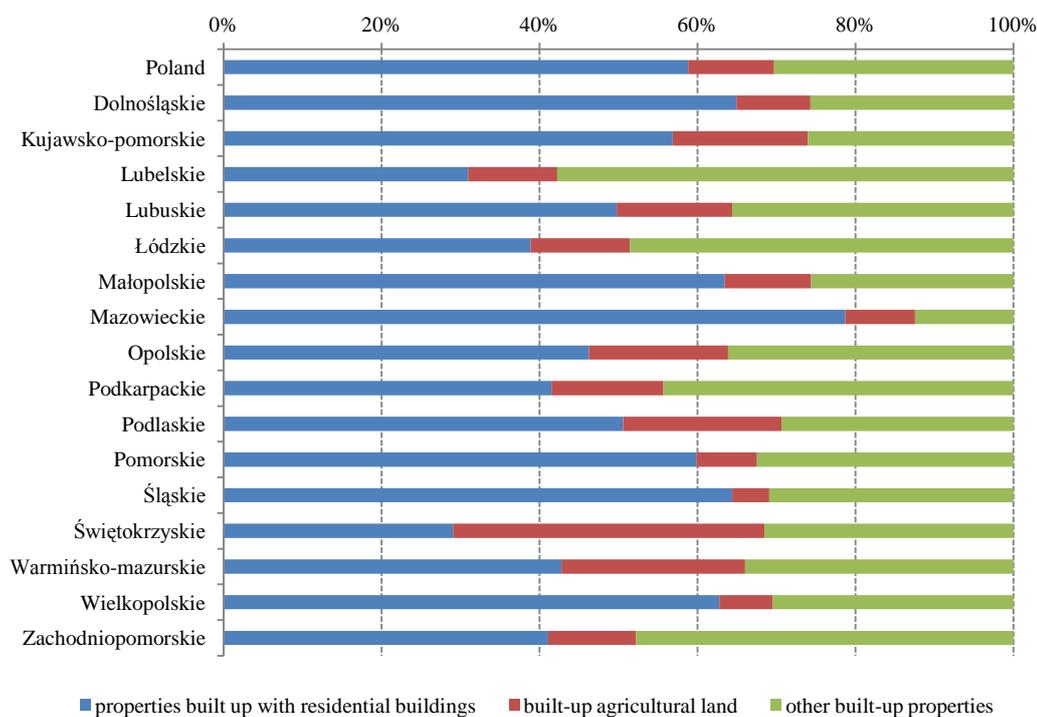

Similar as on the national scale, the sales of properties built up with residential buildings played the most significant role on most voivodship markets. A different situation was observed only in Świętokrzyskie Voivodship, where both in terms of quantity and value built-up agricultural land had the highest share in

turnover. Furthermore, also in Podlaskie Voivodship most of transactions of built-up properties concerned agricultural land, but in terms of value these transactions constitute only 20.0%. It is also worth noticing that in terms of value in Lubelskie, Łódzkie, Zachodniopomorskie and Podkarpackie the sales of other built-up properties played the most significant role.

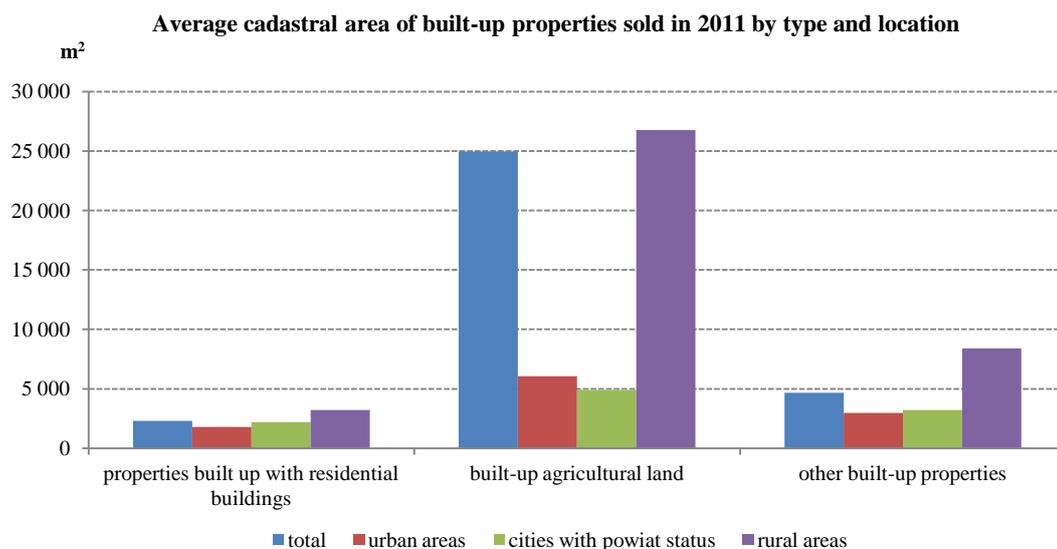

Quantity structure of purchase/sale transactions of built-up properties on voivodship markets in 2011

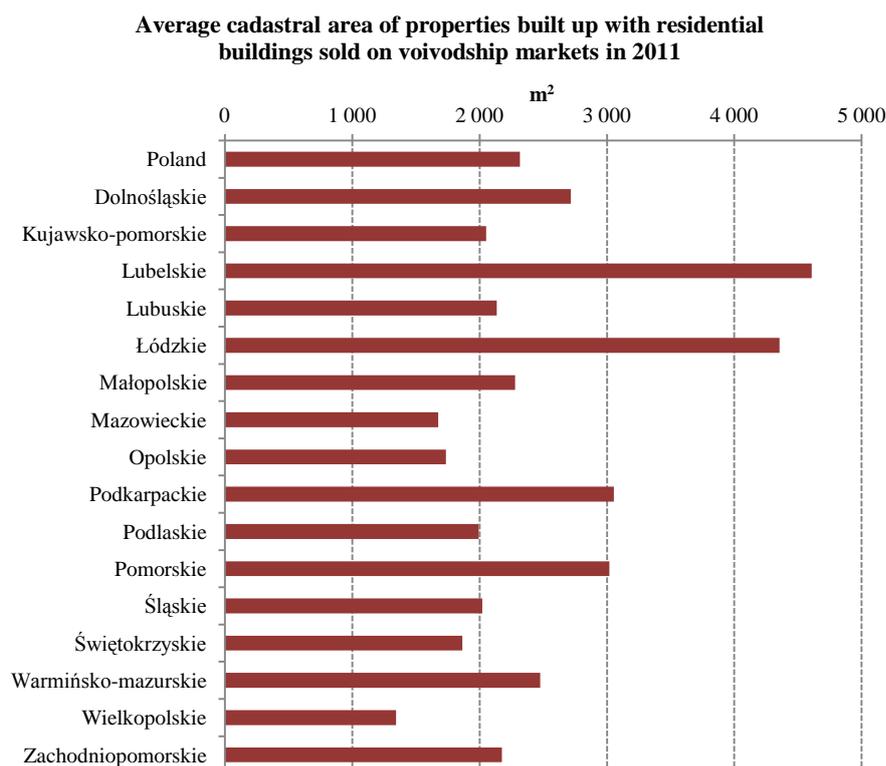

Value structure of purchase/sale transactions of built-up properties on voivodship markets in 2011

An average cadastral area of the properties built up with residential buildings sold in 2011 amounted to 2,316.1 m², built-up agricultural land - 24,975.0 m², and other built-up properties - 4,659.1 m².

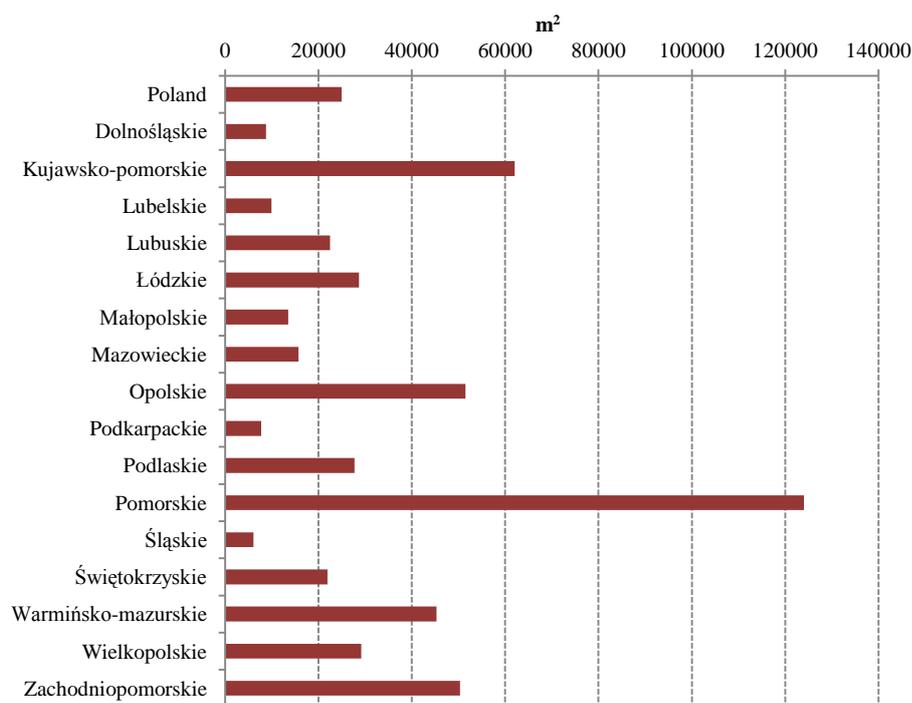

An average cadastral area of the properties built up with residential buildings, sold in a single transaction in 2011, ranged from 1,344.0 m² in Wielkopolskie Voivodship to 4,608.9 m² in Lubelskie Voivodship.

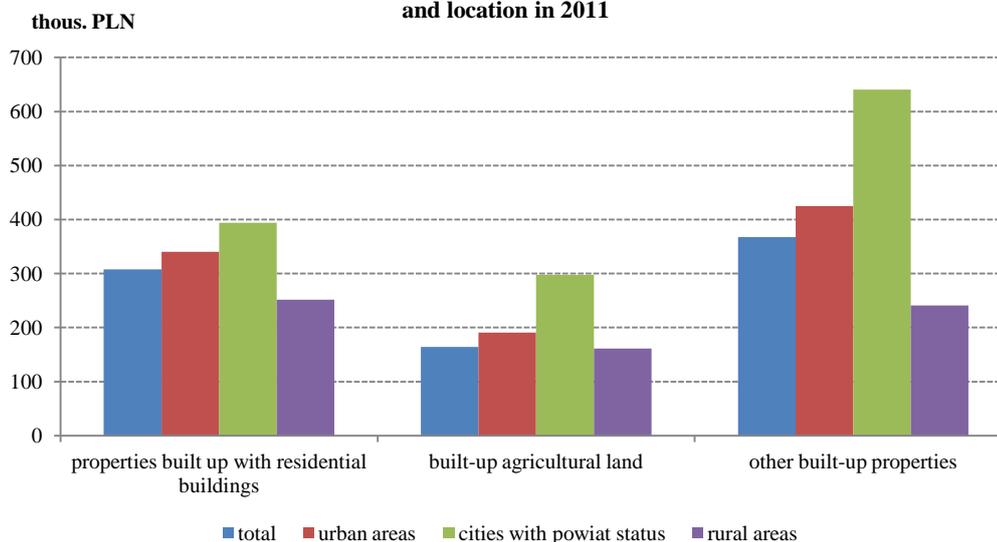

In 2011, similarly to the previous year, considerable disproportions were observed in an average size of built-up agricultural land sold in particular voivodship. In particular, this applied to the following voivodships: Pomorskie (124,063.7 m²), Kujawsko-Pomorskie (62,024.0 m²), Opolskie (51,507.2 m²), Zachodniopomorskie (50,290.2 m²), Warmińsko-Mazurskie (45,311.4 m²), which considerably exceeded the average for Poland in total. The lowest cadastral area of built-up agricultural land sold in a single transaction was recorded in Śląskie Voivodship – 6,038.6 m².

Average cadastral area of built-up agricultural land sold on voivodship markets in 2011

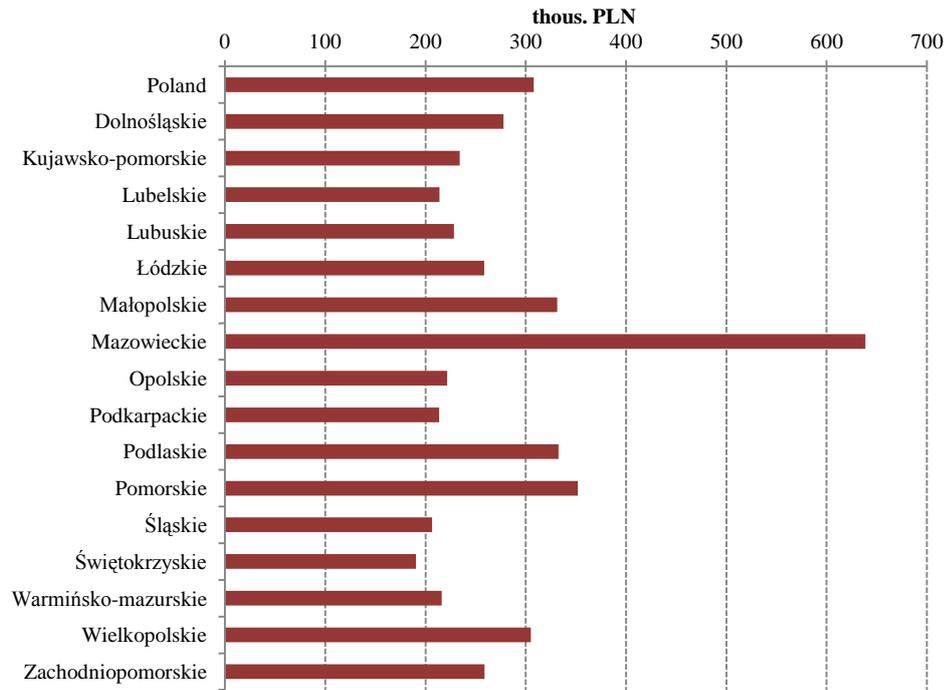

An average value of a single purchase/sale transaction of a property built up with residential buildings made in 2011, amounted to PLN 307.8 thous. The corresponding value of built-up agricultural land reached PLN 163.9 thous. and that of other built-up property – PLN 367.5 thous. In the case of each of the built-up properties category under analysis, the transactions made in cities, particularly in cities with powiat status, were characterized by higher value than those made in rural areas.

Average value of single purchase/sale transaction of built-up properties by type and location in 2011

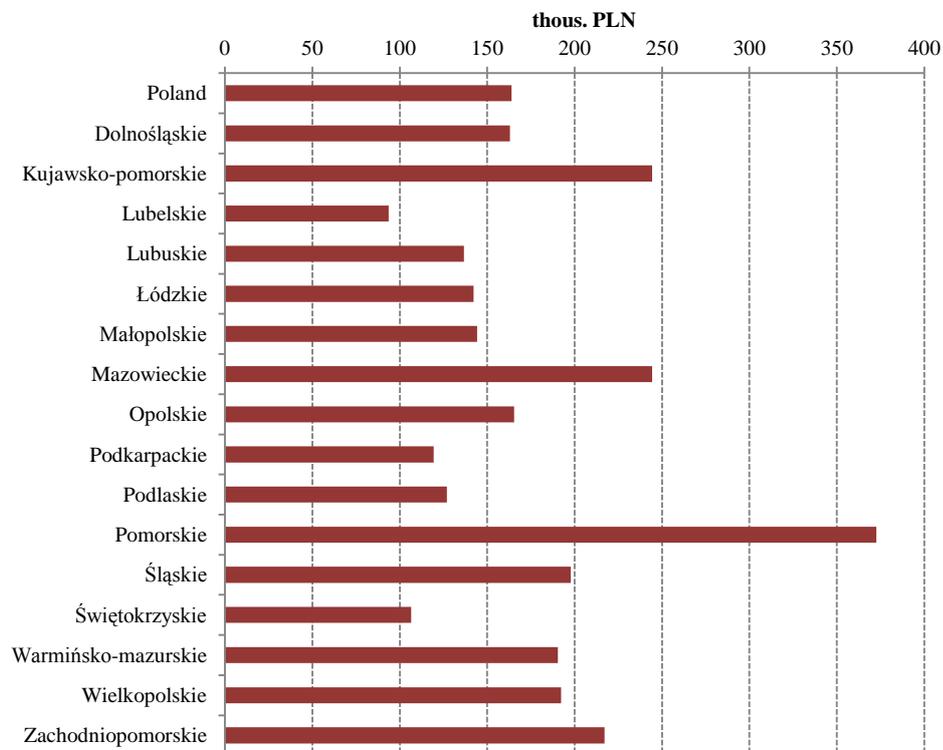

An average value of a single purchase/sale transaction of a property built up with residential buildings ranged from PLN 190.5 thous. in Świętokrzyskie Voivodship to PLN 638.8 thous. in Mazowieckie Voivodship.

Average value of single purchase/sale transaction of properties built up with residential buildings concluded on voivodship markets in 2011

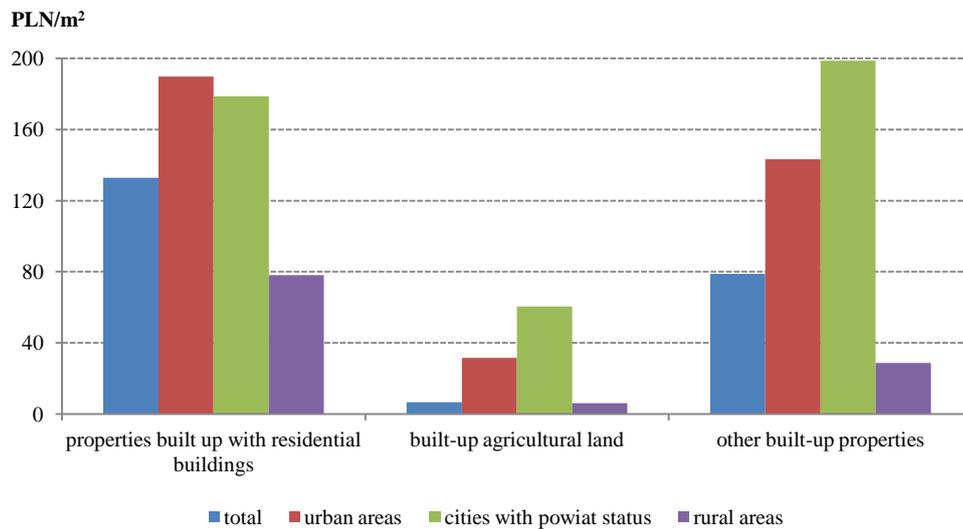

An average value of a single purchase/sale transaction of built-up agricultural land ranged from PLN 93.6 thous. in Lubelskie Voivodship to PLN 372.7 thous. in Pomorskie Voivodship.

Average value of single purchase/sale transaction of built-up agricultural land concluded on voivodship markets in 2011

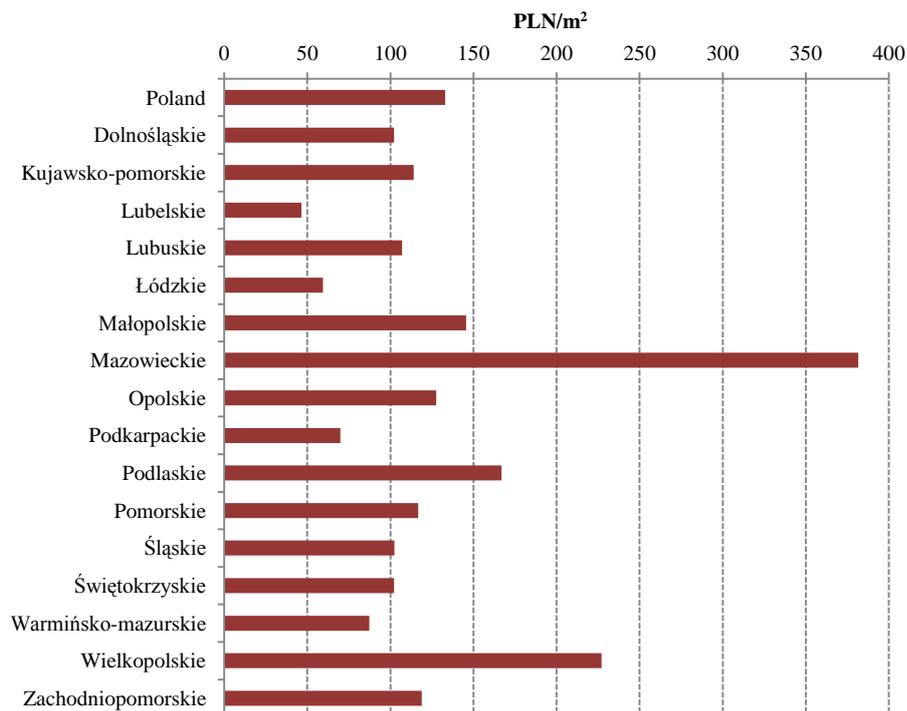

An average price for 1 m² of cadastral area of properties built up with residential buildings reached the level of PLN 132.9, of built-up agricultural land PLN 6.56 and of other built-up properties PLN 78,87.

Average transaction prices of built-up properties by type and location in 2011

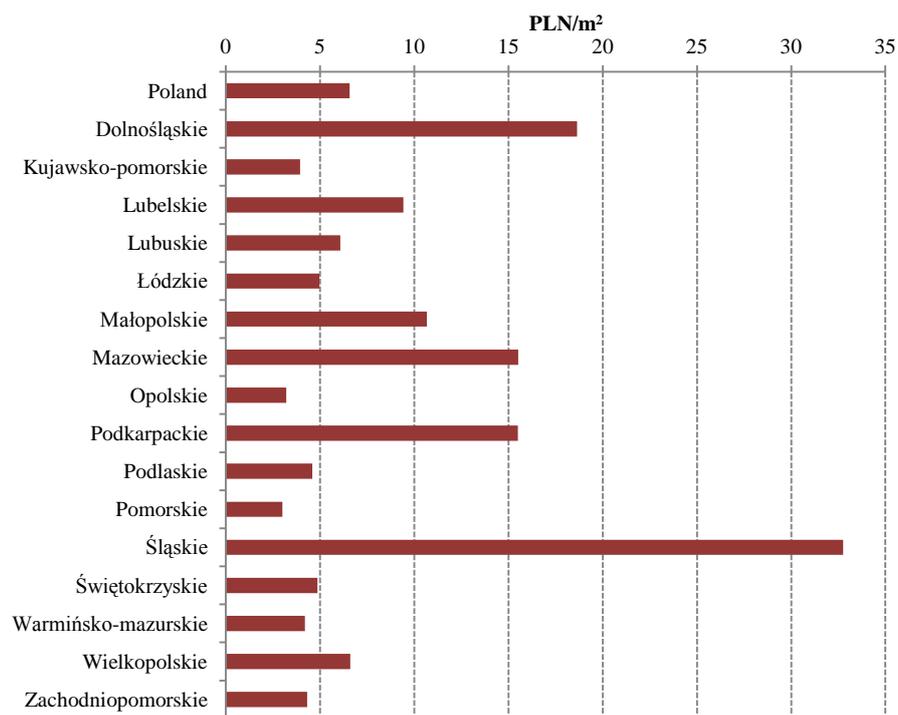

The highest average transaction price for properties built up with residential buildings was recorded in Mazowieckie Voivodship. It amounted to PLN 381.55 per 1 m² and was of approx. 187.0% higher than the average price for Poland in total. The lowest average transaction price for properties built up with residential buildings was recorded in Lubelskie Voivodship – about PLN 46.40 per 1 m².

Average transaction prices of properties built up with residential buildings on voivodship markets in 2011

The highest average transaction price for built-up agricultural land was recorded in Śląskie Voivodship – approx. PLN 32.8 per 1 m². The lowest average transaction price for built-up agricultural land was recorded in Pomorskie Voivodship – approx. PLN 3.00 per 1 m². This is a reverse situation compared to the size of average cadastral area sold in a single transaction in these voivodships. The lowest cadastral area was recorded in Śląskie Voivodship, whereas the highest one was recorded in Pomorskie Voivodship.

Average transaction prices of built-up agricultural land on voivodship markets in 2011

V. PURCHASE/SALE TRANSACTIONS OF LAND PROPERTIES

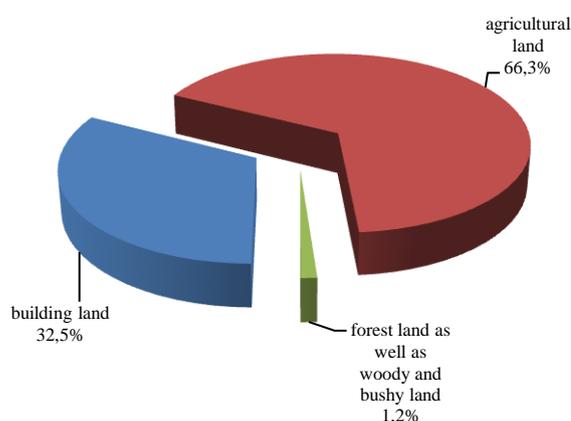

The number of purchase/sale transactions of land properties registered in 2011 amounted to almost 136 thous., accounting for 47.7% of all real estate transactions. The value of land properties turnover reached PLN 13.6 bn, which corresponded to 27.8% of the total real estate turnover. The cadastral area of the land properties constituting the object of purchase/sale transactions amounted to approx. 2.1 bn m².

Among the land property transactions, the agricultural land transactions had the highest share. They constituted almost 77.0% of the total number of land property transactions and more than 66.0% of turnover value. A large number of transactions were also recorded in the case of building land. Their number accounted for almost 22.0% of all land property transactions, whereas their value accounted for about 33.0%. Other transactions involving land properties concerned the turnover with forest land as well as woody and bushy land. In terms of quantity these transactions constituted 1.8%, whereas in terms of value - they constitute 1.2% of all land property transactions.

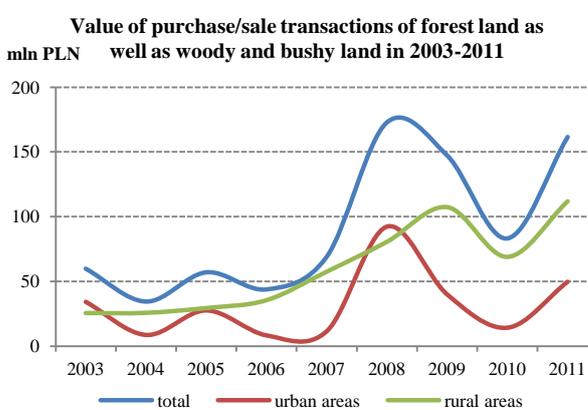

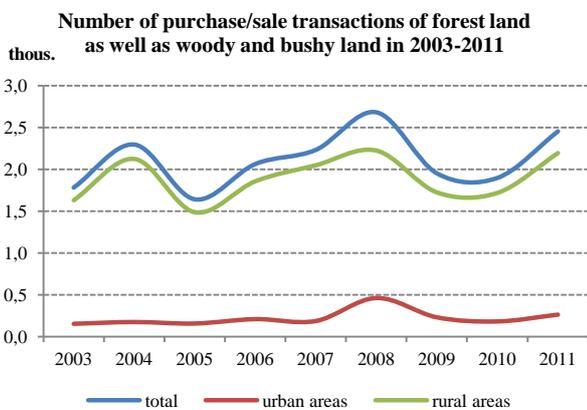

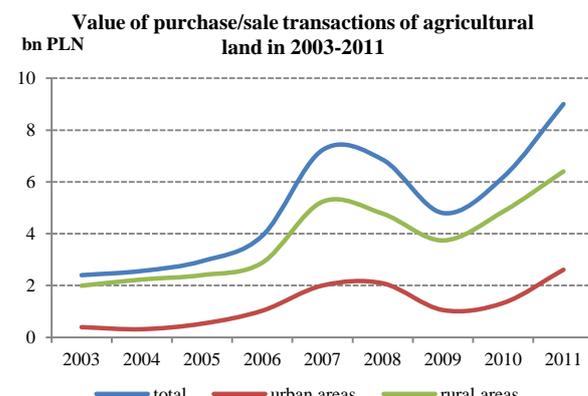

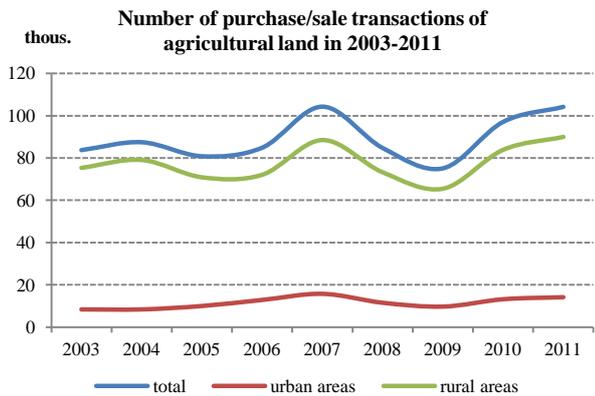

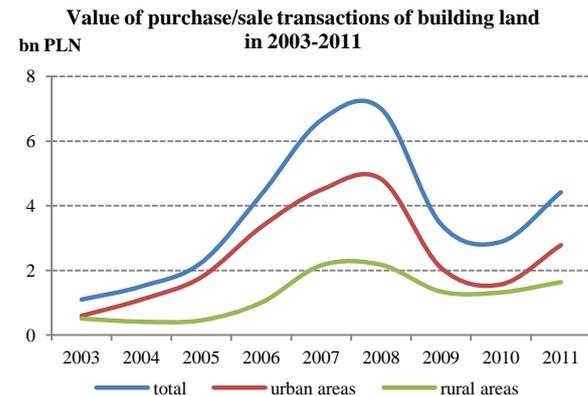

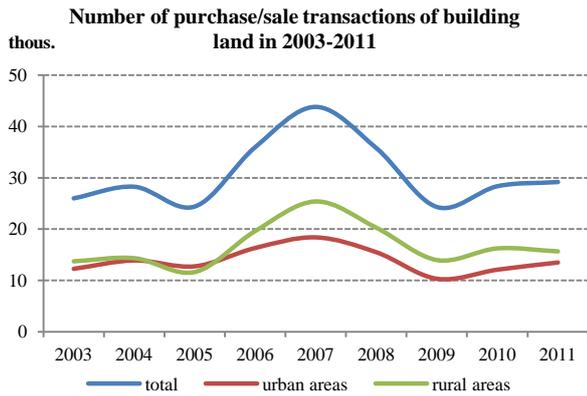

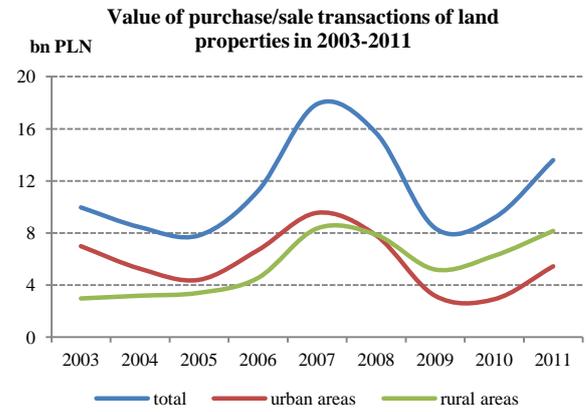

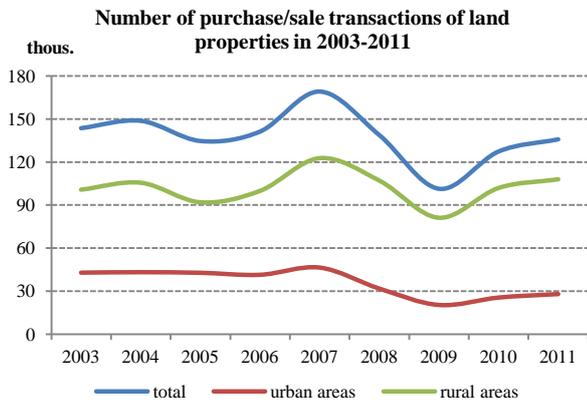

Quantity structure of purchase/sale transactions of land properties by type in 2011

Value structure of purchase/sale transactions of land properties by type in 2011

In 2011 a growth in the land property turnover was observed. The number of transactions involving land properties in 2011 was about 7.0% higher in relation to the preceding year, and their value rose by over 48.0%. The highest growth in turnover both in terms of quantity and value was recorded in the segment of woody and bushy land – by approx. 29.0% and 94.0% respectively. In the case of building land a growth in the number of transactions by approx. 3.0% was recorded, with simultaneous growth in their value by approx. 53.0%. Agricultural land turnover increased by over 7.0% in terms of quantity and by almost 46.0% in terms of value. The observed increase in the value of land properties turnover results from, among other things, changes in the structure of sold properties (in particular larger share of the sales on the free market and larger share of the sales in urban areas compared to the previous year) and increase in the average cadastral area of the land properties sold in 2011 in relation to the preceding year.

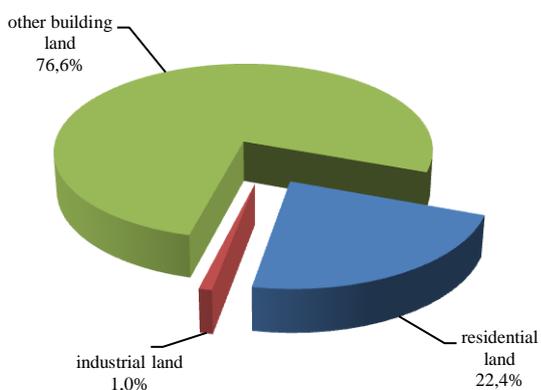

Building land

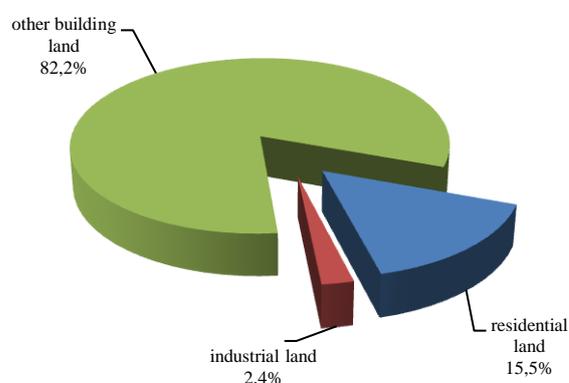

Building land constituted the second considerable group of land property transactions, preceded by agricultural land. Three types of land constituting the object of transaction can be distinguished in this group, namely residential land, industrial land, and other building land.

In 2011, in the scope of building land, the object of turnover involved mainly other building land. This category is very broad and diversified, and it covers land designated for buildings and other facilities related to administration, health care, trade, craft, services, education, culture and art, leisure, communications, religion, etc. In terms of quantity, transactions involving other building land constituted almost 77.0% of building land turnover, and in terms of value – over 82.0%. A considerable number of transactions were also recorded in the scope of residential land. Their number accounted for approx. 22.0% of all transactions involving building land, whereas their value constituted almost 16.0% of these transactions.

Quantity structure of purchase/sale transactions of building land by type in 2011

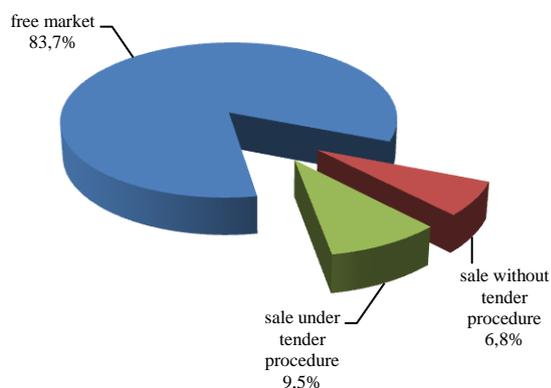

Value structure of purchase/sale transactions of building land by type in 2011

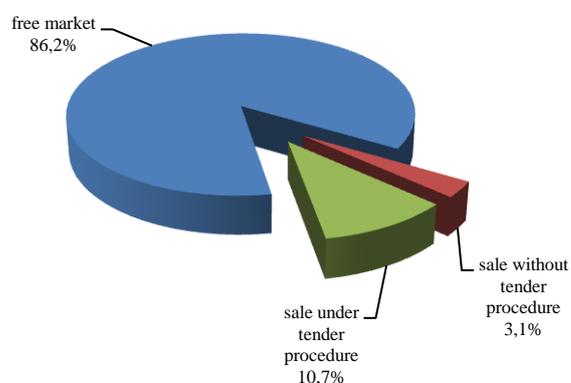

In 2011 sales on the free market constituted the predominating form of building land turnover, both in terms of quantity and value, accounting respectively for 83.7% and 86.2% of all transactions.

Quantity structure of purchase/sale transactions of building land by turnover form in 2011

Value structure of purchase/sale transactions of building land by turnover form in 2011

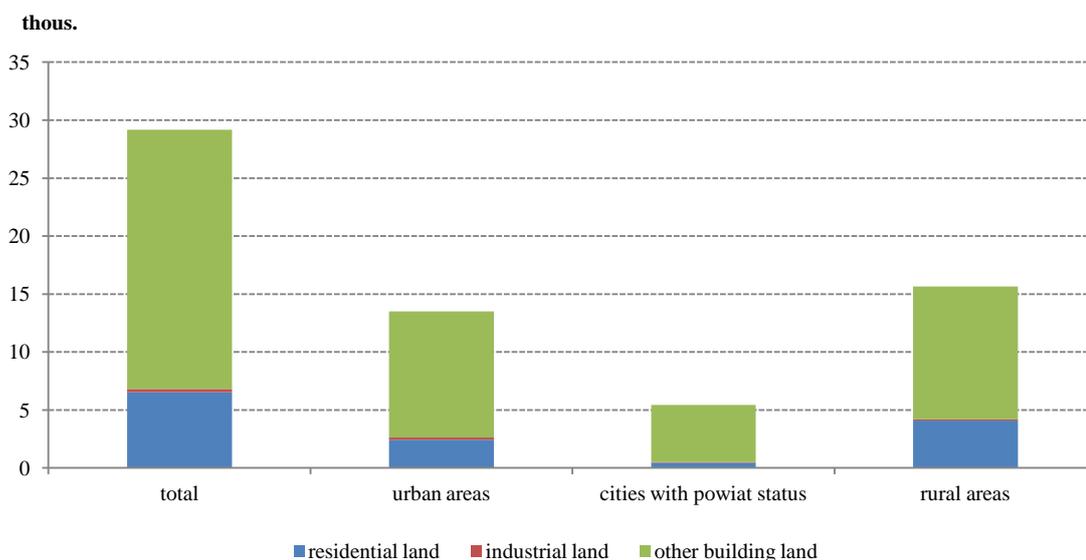

Within the turnover of building land, the ownership title was the most frequently occurring type of land ownership right. Both within the structure of quantity and value, it accounted for 99.9% of all purchase/sale transactions of building land.

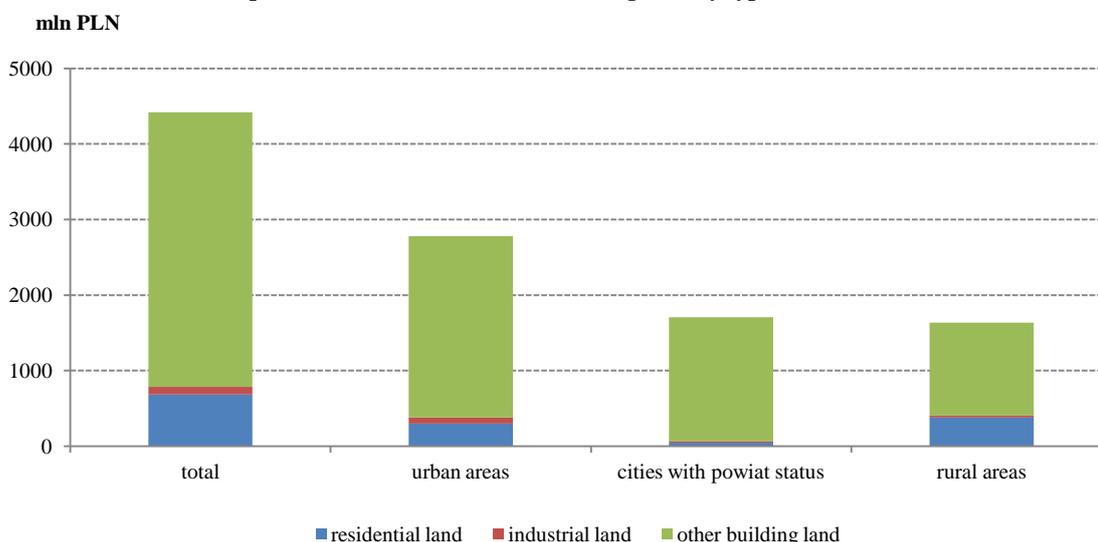

Almost 54.0% of all transactions involving building land took place in rural areas. In terms of value of the transactions made, the turnover within the city borders prevailed, accounting for approx. 63.0% of all transactions involving building land.

As regards residential land and other building land, most of transactions took place outside the city borders. The sales of industrial land, however, mainly occurred in urban areas. In the case of industrial land and other building land, the value of transactions made in cities was considerably higher than the value of transactions made in rural areas. A reverse relation was observed in the case of residential land.

Number of purchase/sale transactions of building land by type and location in 2011

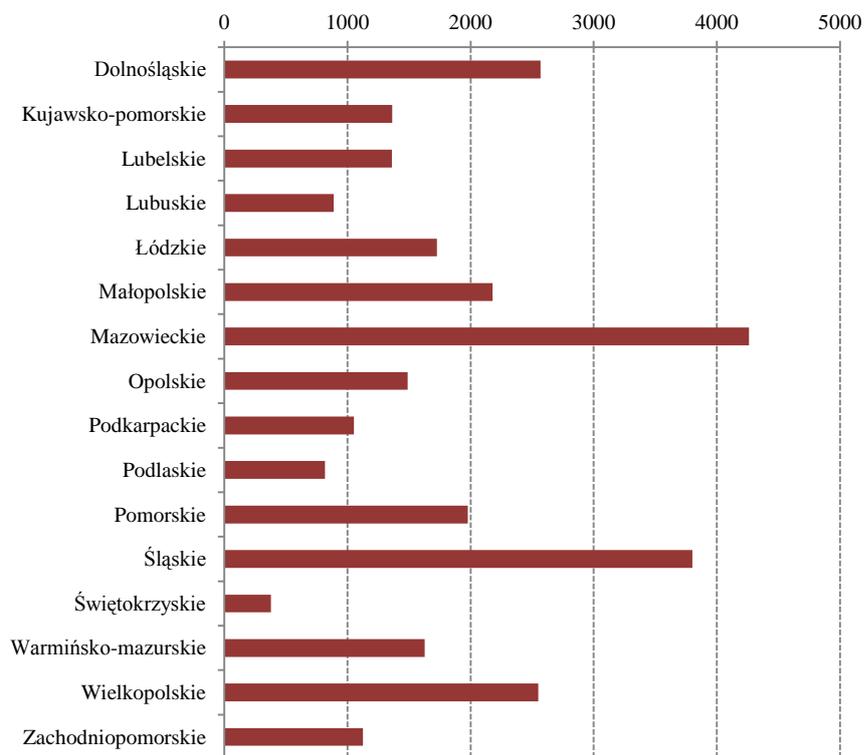

Value of purchase/sale transactions of building land by type and location in 2011

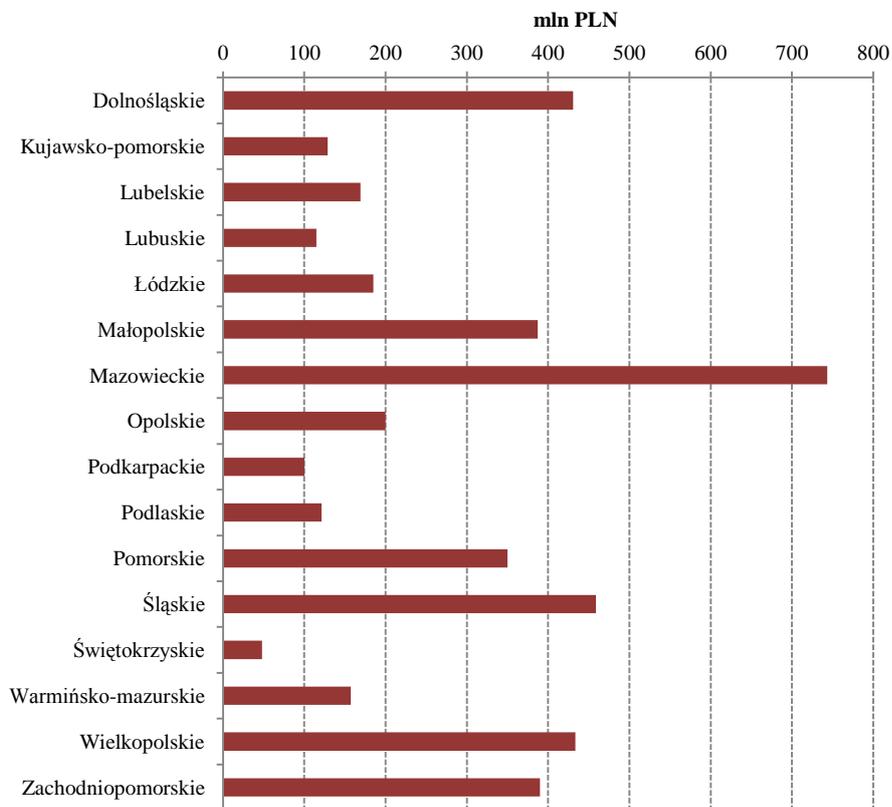

The highest turnover of building land, both in terms of quantity and value, was recorded in Mazowieckie Voivodship, followed by Śląskie, Dolnośląskie and Wielkopolskie Voivodships. The transactions of building land made in these four voivodships, accounted in terms of quantity for over 45.0% of all transactions in this category of real estate in Poland, whereas in terms of total value they accounted for approx. 47.0%. The lowest

number of transactions of building land was recorded in Świętokrzyskie, Podlaskie, Lubuskie and Podkarpackie Voivodships. These were also the voivodships with the lowest value of transactions of building land.

Number of purchase/sale transactions of building land in voivodships in 2011

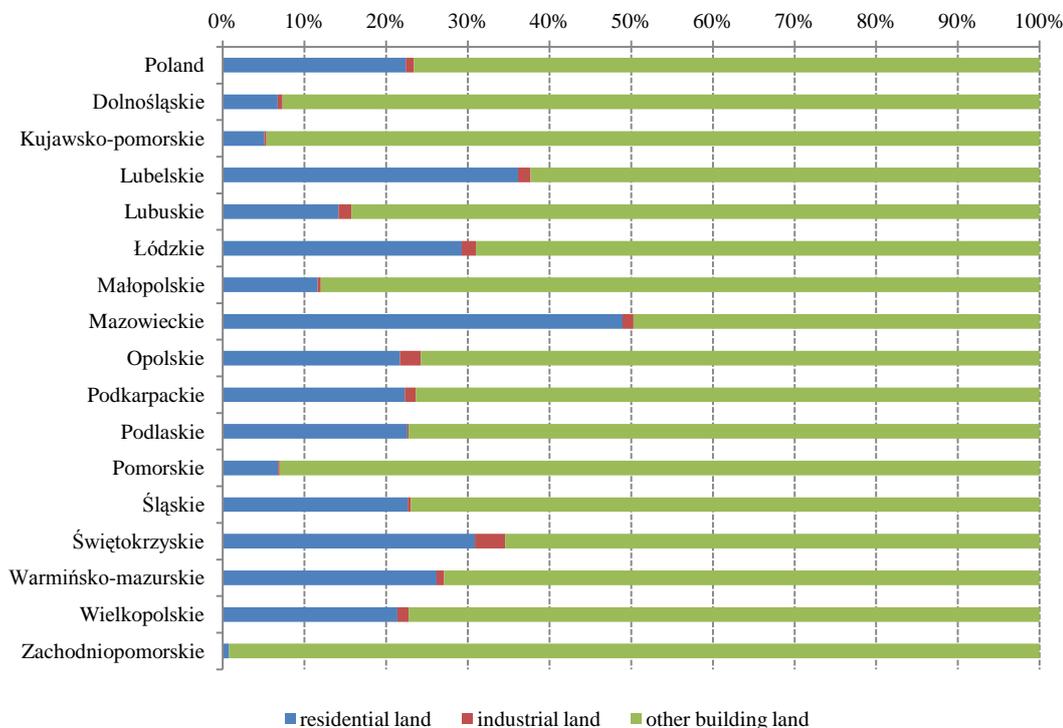

Value of purchase/sale transactions of building land in voivodships in 2011

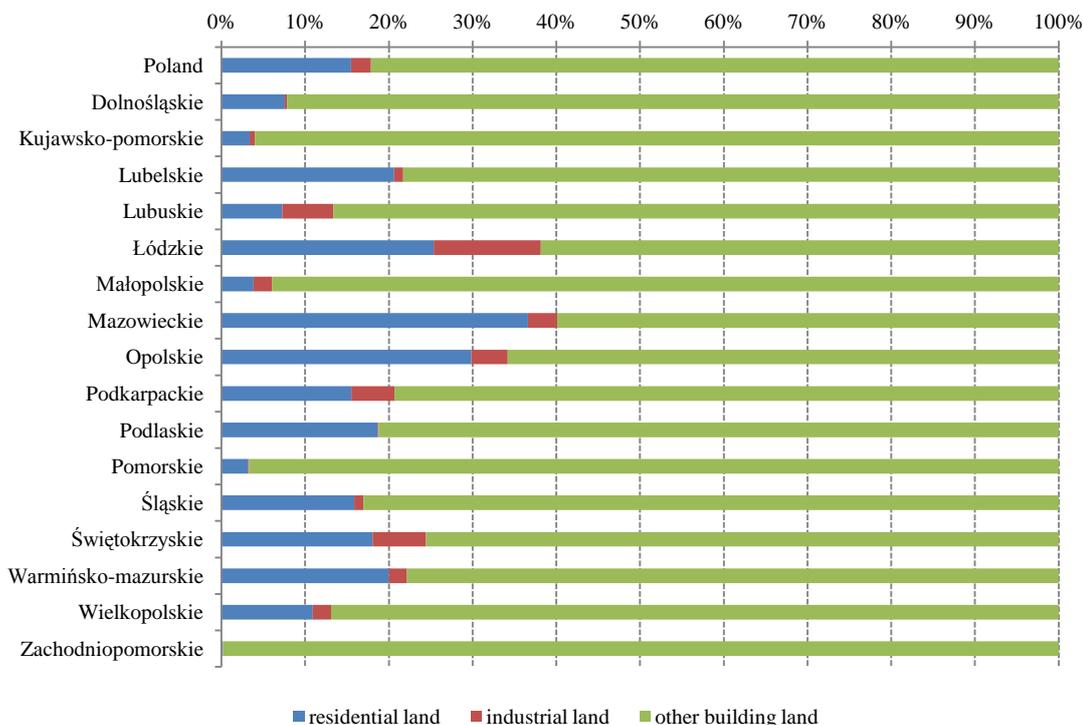

Other buildings land constituted the biggest share in the sale of building land. Such situation was observed both on the national scale and on particular voivodships scale. The highest share of turnover of building land was recorded in Mazowieckie Voivodship, where in terms of quantity this category of properties was the object of almost as many transactions as were made with regard to other buildings land.

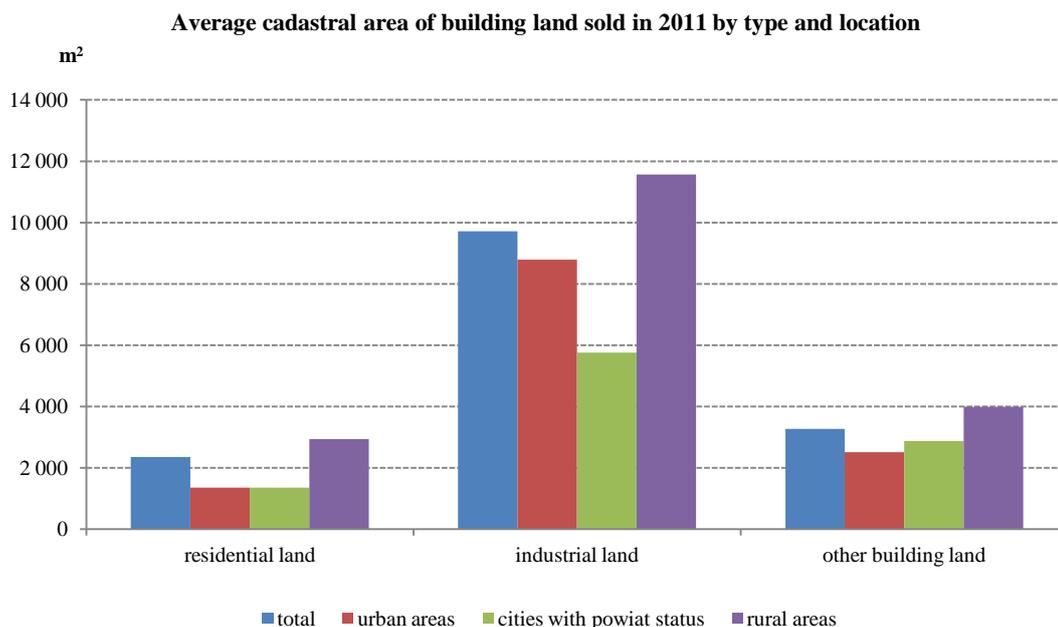

Quantity structure of purchase/sale transactions of building land in voivodships in 2011

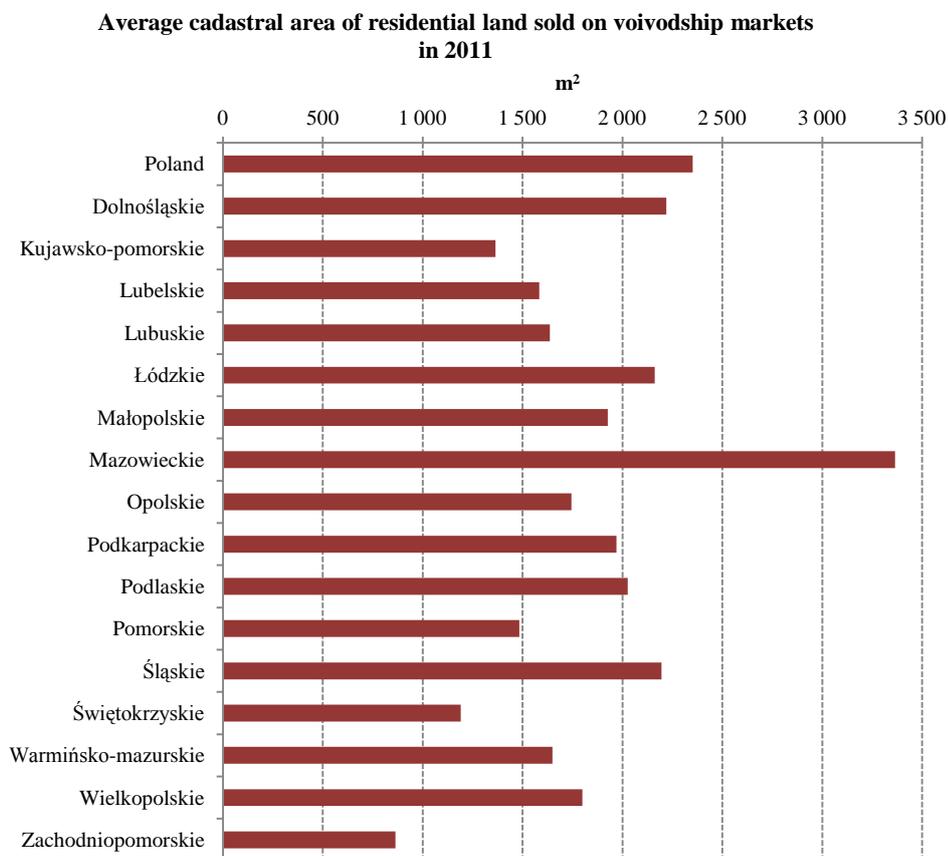

Value structure of purchase/sale transactions of building land in voivodships in 2011

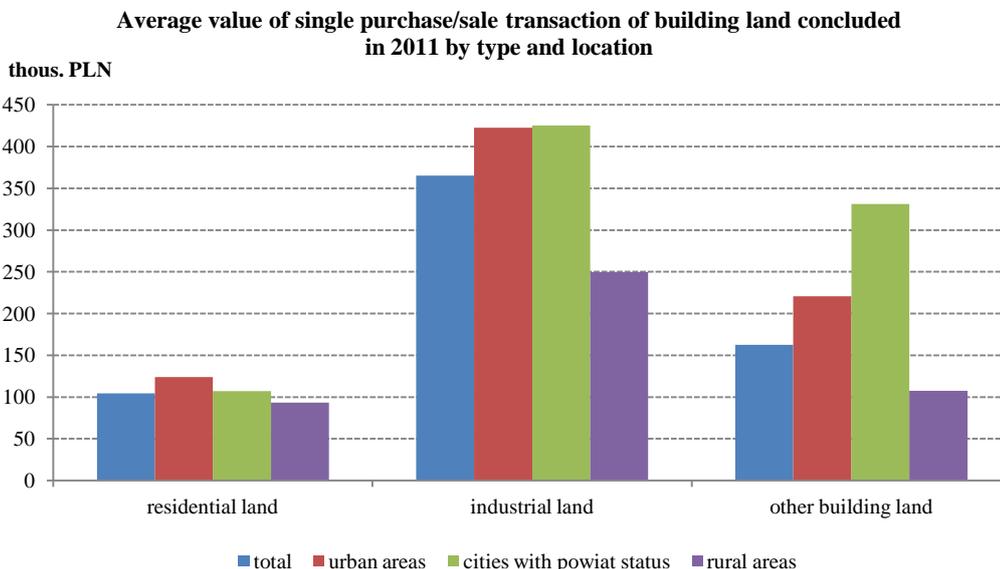

As regards the sales conducted in 2011, an average cadastral area of residential land amounted to 2,352.1 m², of industrial land 9,716.9 m², and of other building land – 3,269.7 m². Building land sold outside the city borders was usually considerably larger than those sold in urban areas.

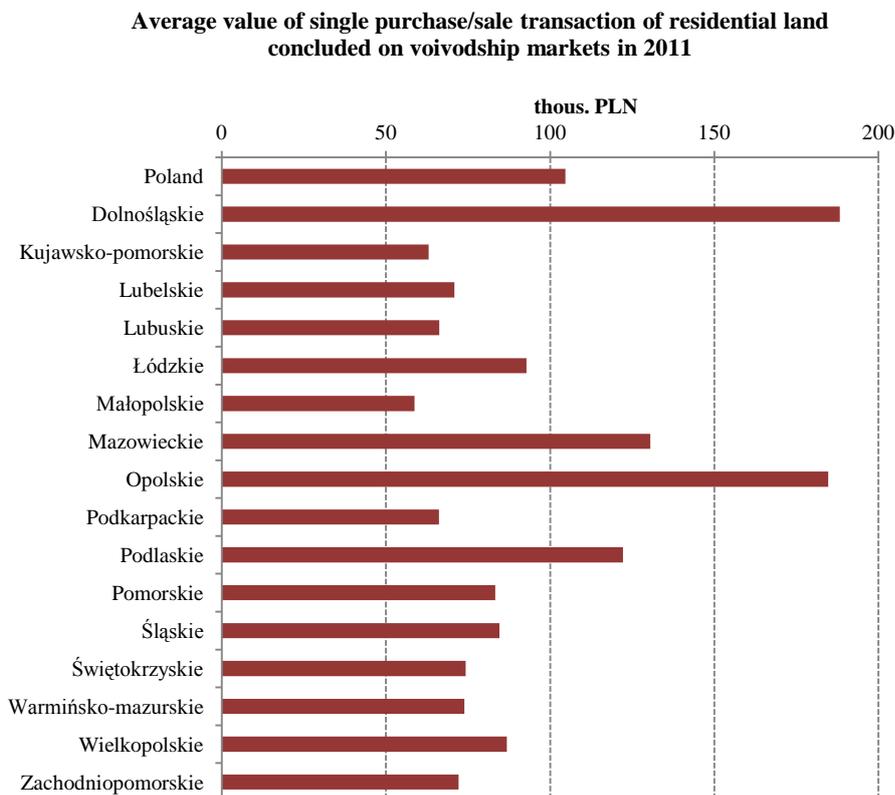

An average cadastral area of residential land sold in a single transaction in 2011 ranged from 863.1 m² in Zachodniopomorskie Voivodship to 3,364.2 m² in Mazowieckie Voivodship.

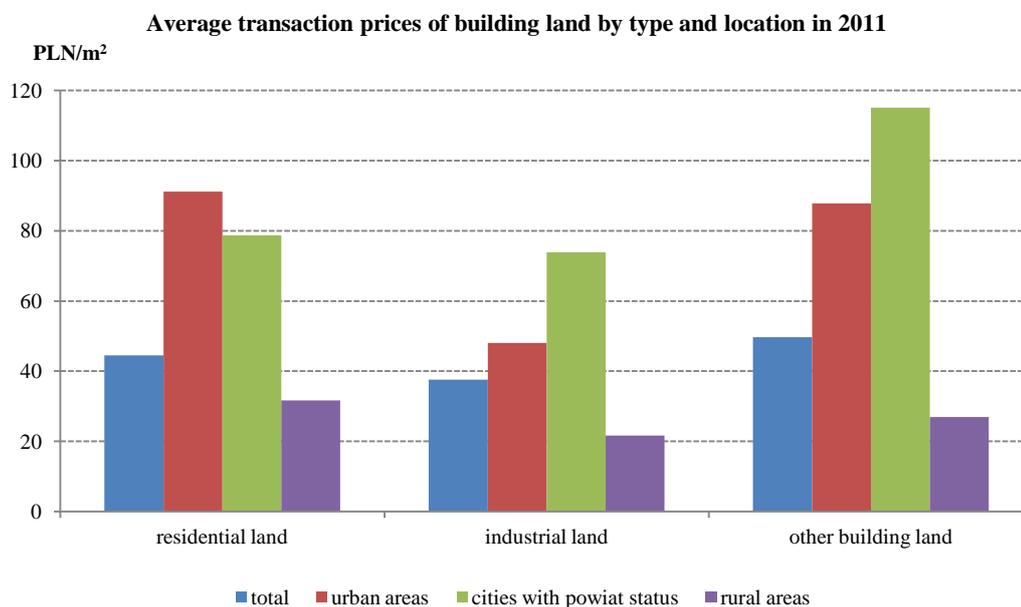

An average value of a single purchase/sale transaction of residential land made in 2011 amounted to PLN 104.6 thous., of industrial land to PLN 365.2 thous., and of other building land to PLN 162.4 thous. The transactions of residential land made in urban areas were more expensive than those made in rural areas, which was influenced by relatively high prices for 1 m² of cadastral area, recorded within city borders. In the case of each of the building land category under analysis, the transactions made in cities were more expensive than those made in rural areas.

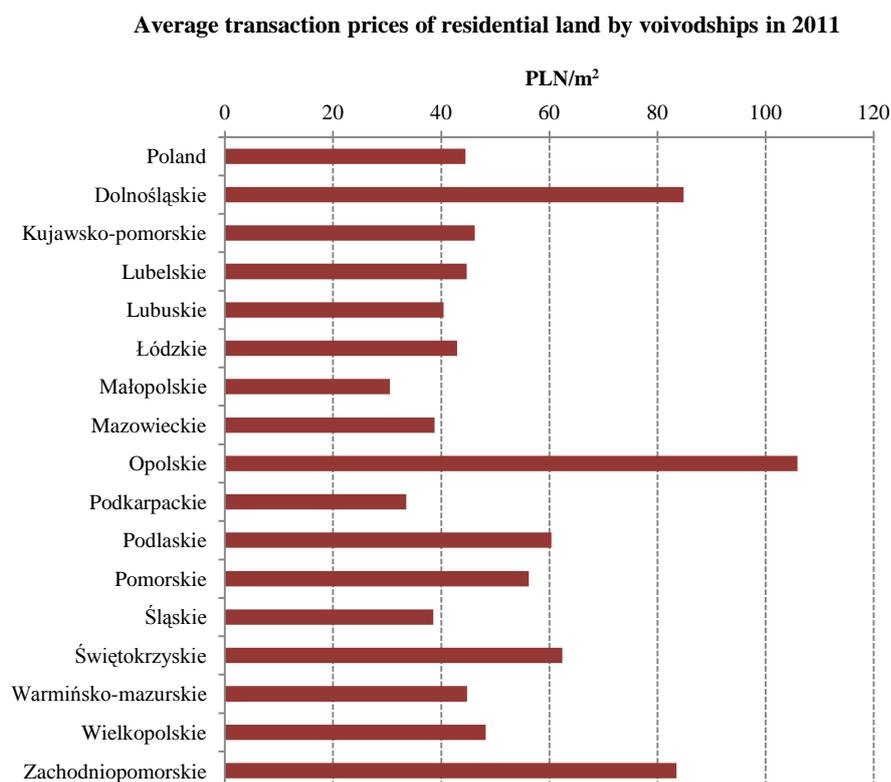

The highest average value of a single purchase/sale transaction of residential land was recorded in Dolnośląskie Voivodship, amounting to PLN 188.2 thous. The lowest average value of a single purchase/sale transaction of residential land was observed in Małopolskie Voivodship, amounting to PLN 58.7 thous.

An average price for 1 m² of cadastral area of residential land reached the level of approx. PLN 44.00, of industrial land almost PLN 38.00, and of other building land – approx. PLN 50.00. A considerable impact on the prices of building land was exerted by its location. The prices of building land located in urban areas were higher than for land located outside the city borders. As regards urban areas, exceptionally high prices of industrial land as well as other building land were recorded in cities with powiat status.

The highest average transaction price for residential land was recorded in Opolskie Voivodship. It amounted to over PLN 106.00 per 1 m² and was of over 138.0% higher than the average price for Poland. The lowest average transaction price for residential land was recorded in Małopolskie Voivodship – about PLN 31.00 per 1 m².

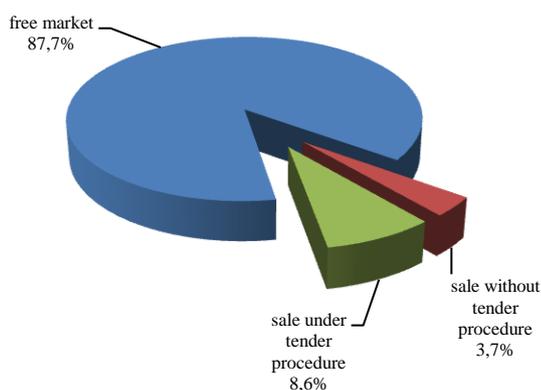

Agricultural land

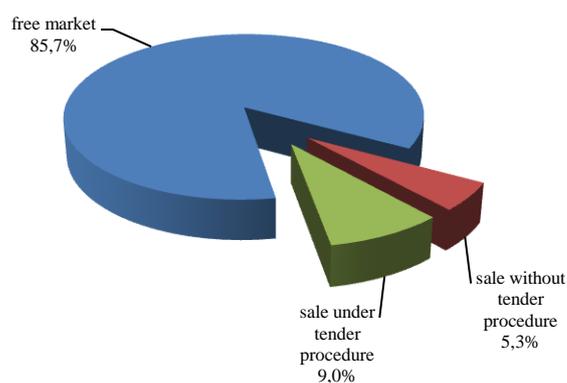

Agricultural land constituted the most prominent transaction group, as regards land property transactions.

In 2011 sales on the free market constituted the predominating form of turnover, both in terms of structure of quantity and value, accounting respectively for 87.7% and 85.7% of all transactions. Sales without tender procedure were the least frequent form of turnover. In terms of quantity, these accounted for 3.7% of the agricultural land turnover, and in terms of value for 5.3%.

Quantity structure of purchase/sale transactions of agricultural land by turnover form in 2011

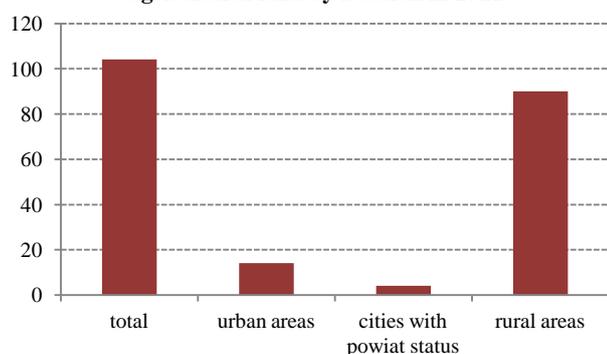

Value structure of purchase/sale transactions of agricultural land by turnover form in 2011

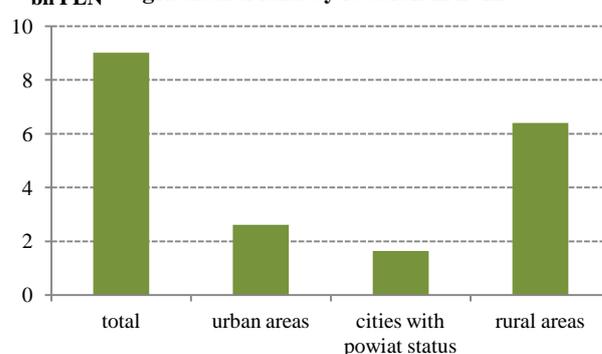

Within the agricultural land turnover, the ownership title was the most frequently occurring type of land ownership right.

The majority of the agricultural land turnover, both in terms of quantity and value, took place outside the city borders (86.4% and 71.0%, respectively).

Number of purchase/sale transactions of agricultural land by location in 2011

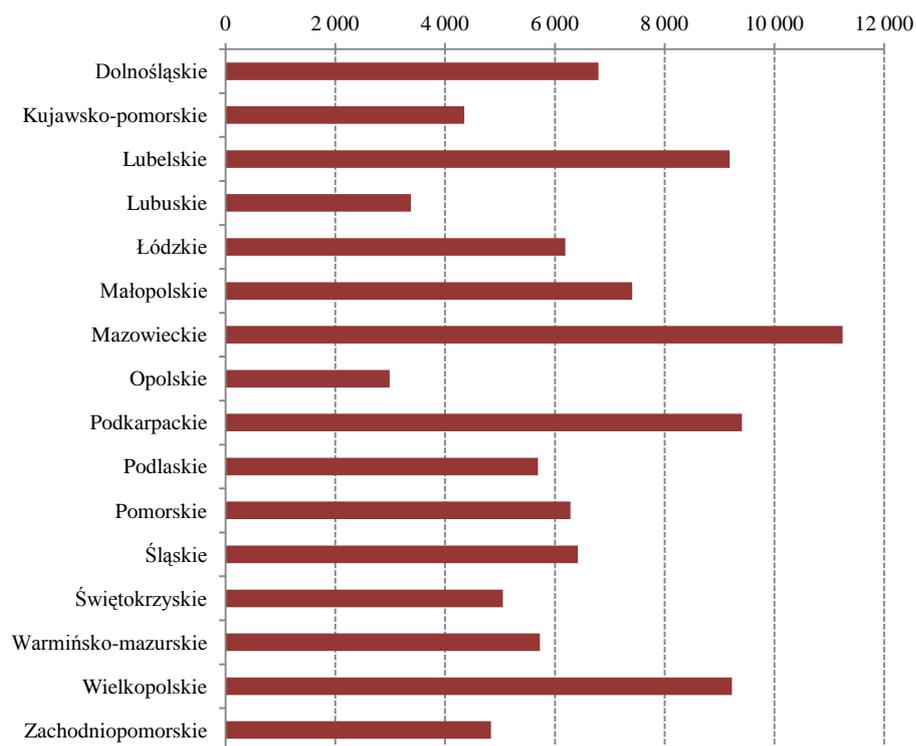

Value of purchase/sale transactions of agricultural land by location in 2011

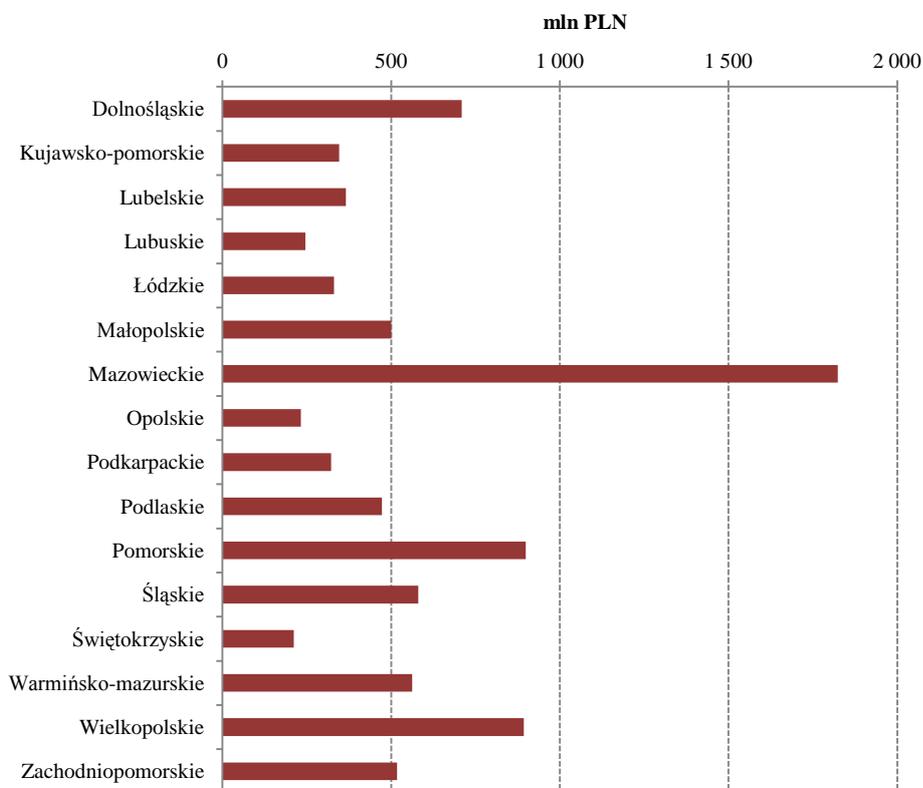

The largest number of agricultural land transactions was recorded in Mazowieckie, Podkarpackie, Wielkopolskie and Lubelskie Voivodships, whereas the lowest number in Opolskie and Lubuskie Voivodships. In terms of value the most active voivodships were as follows: Mazowieckie (over 20.0% of the turnover value in the whole of Poland), Pomorskie and Wielkopolskie Voivodships. The lowest value of purchase/sale transactions of agricultural land was recorded in Świętokrzyskie, Opolskie and Lubuskie Voivodships.

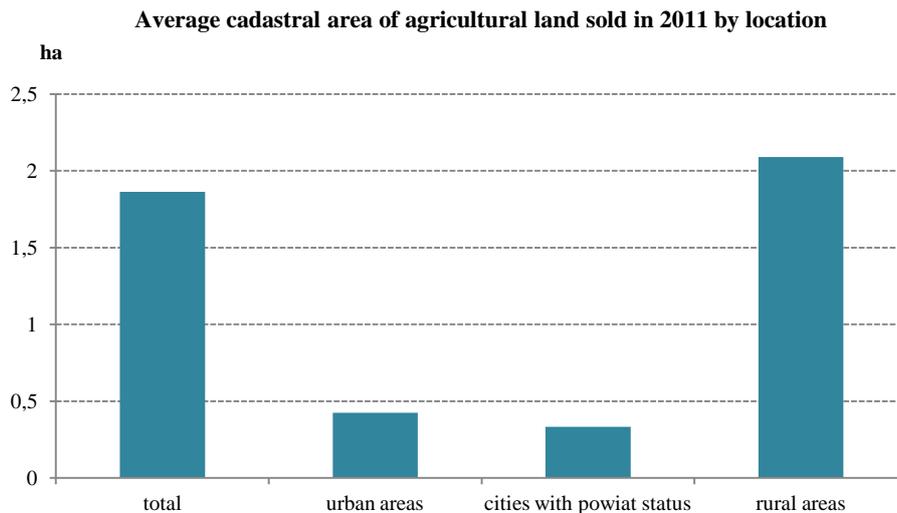

**Number of purchase/sale transactions of agricultural land
in voivodships in 2011**

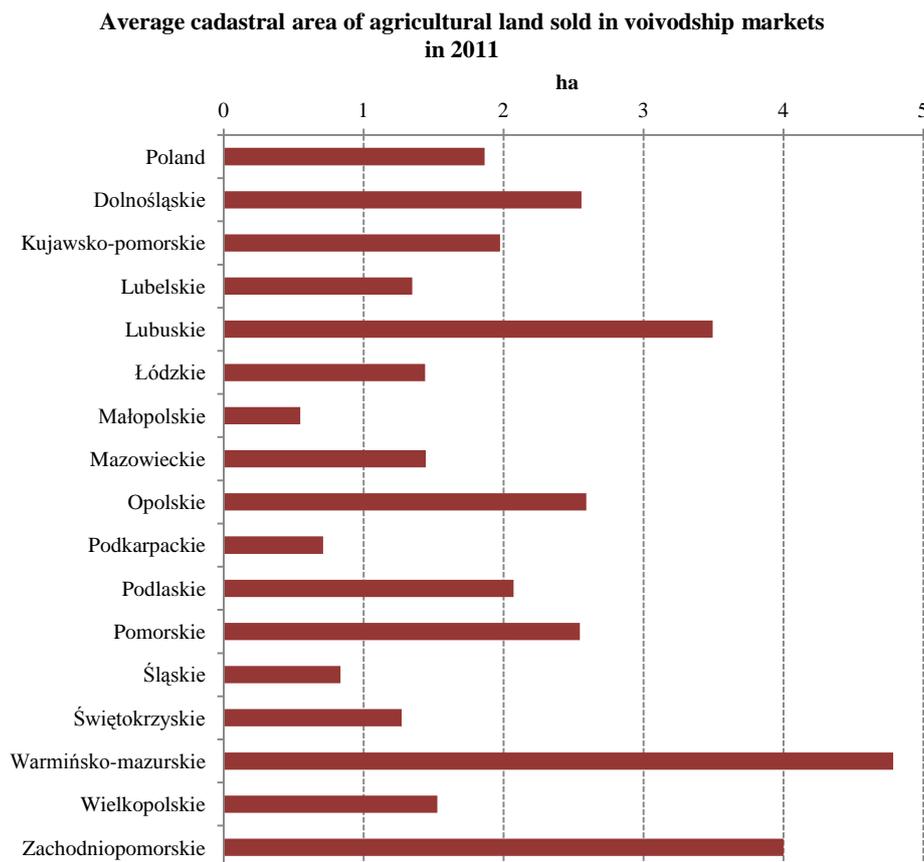

**Value of purchase/sale transactions of agricultural land in voivodships
in 2011**

An average cadastral area of agricultural land, constituting the object of turnover in 2011, amounted to 1.86 ha. Agricultural land sold in rural areas was considerably larger than that sold within city borders.

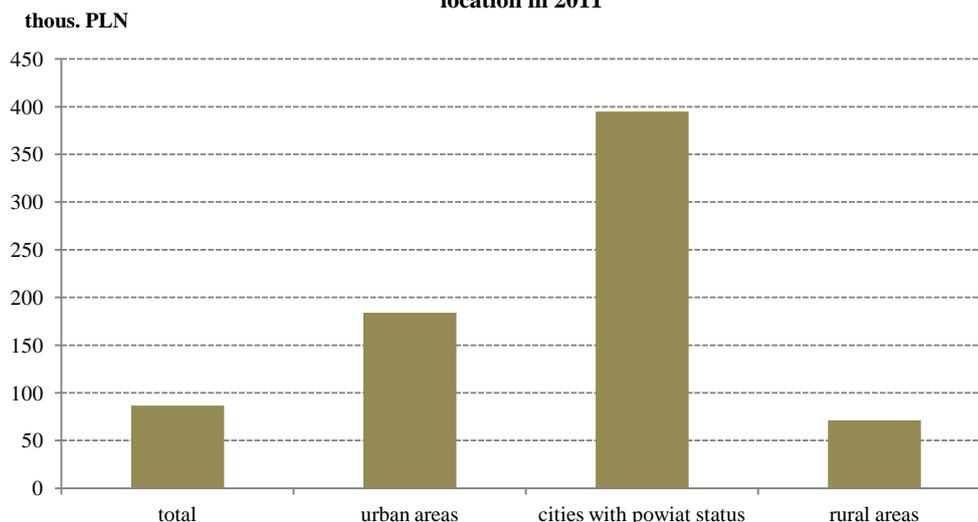

An average cadastral area of agricultural land sold in a single transaction in 2011 ranged from 0.55 ha in Małopolskie Voivodship to 4.78 ha in Warmińsko-Mazurskie Voivodship.

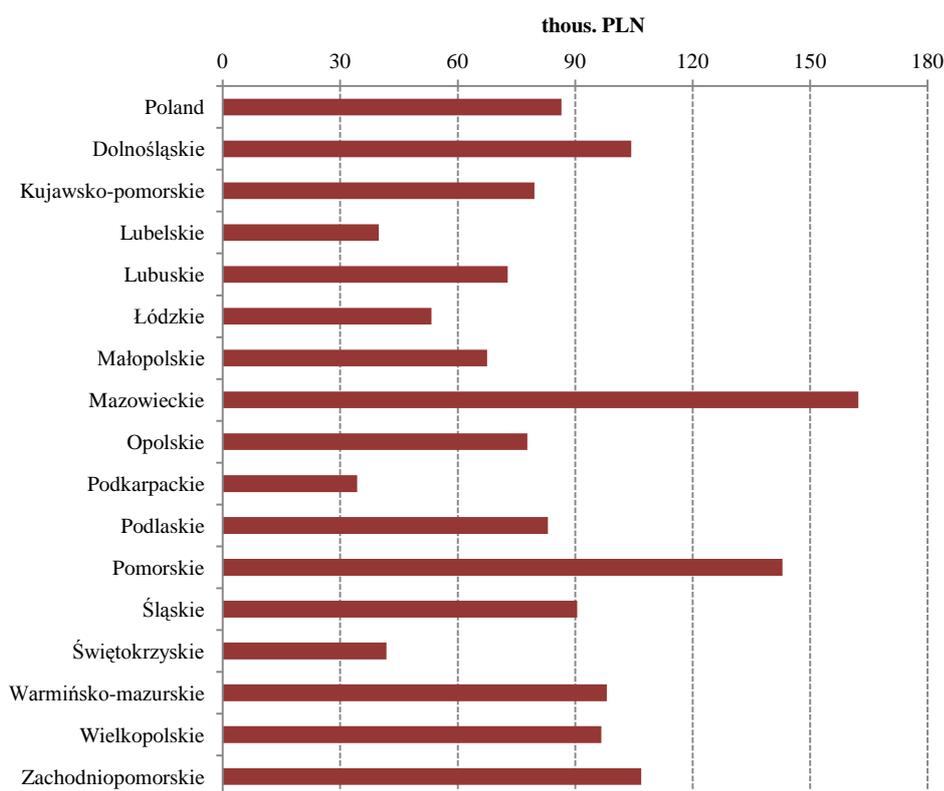

An average value of agricultural land purchased in a single transaction amounted to PLN 86.5 thous. The agricultural land transactions made in urban areas were about 159.0% more expensive than those made in rural areas, which was influenced by relatively high prices for 1 ha of cadastral area, recorded within city borders.

Average value of single purchase/sale transaction of agricultural land by location in 2011

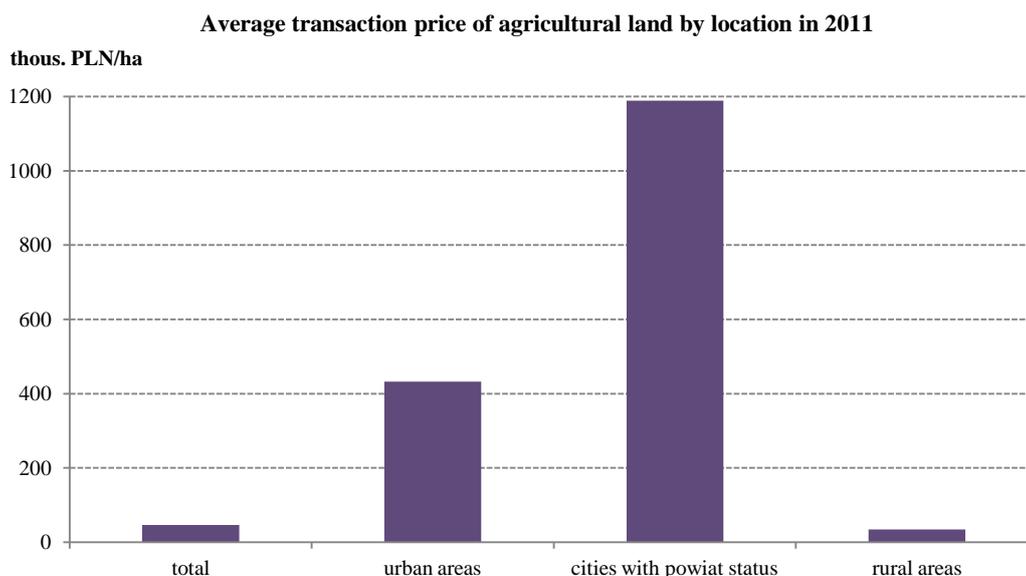

An average value of a single purchase/sale transaction of agricultural land ranged from PLN 34.3 thous. in Podkarpackie Voivodship to PLN 162.3 thous. in Mazowieckie Voivodship.

Average value of single purchase/sale transaction of agricultural land concluded on voivodship markets in 2011

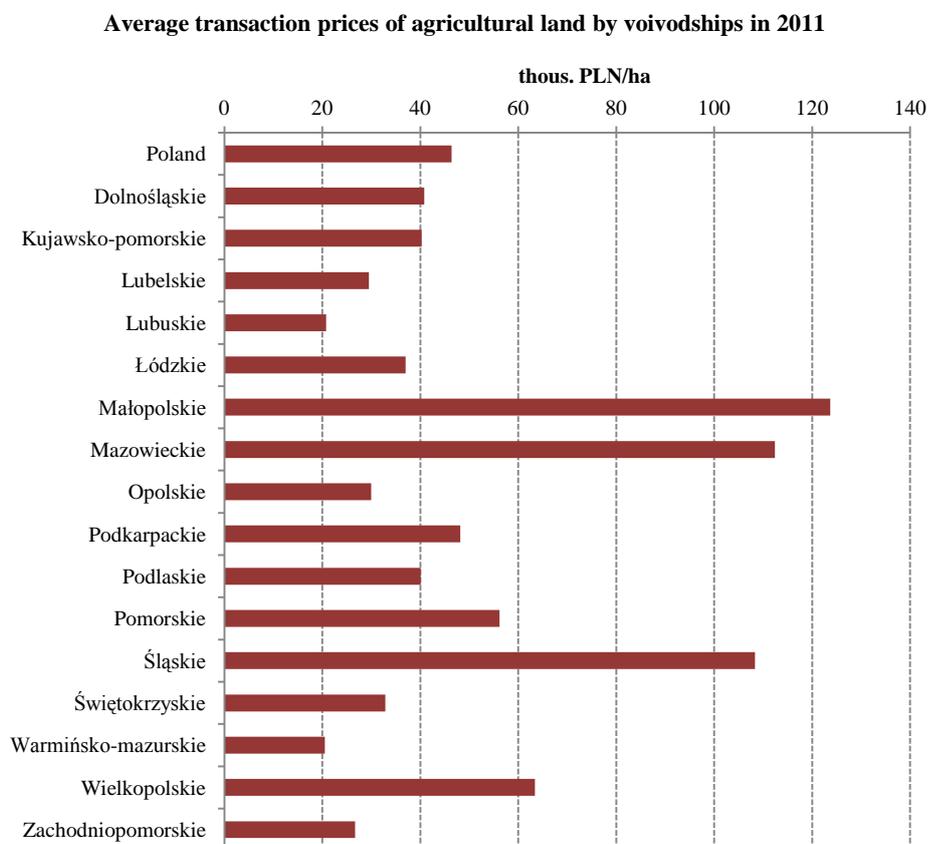

An average price for 1 ha of cadastral area of agricultural land sold in 2011 in Poland amounted to about PLN 46 thous. per ha. The prices of agricultural land located in urban areas were considerably higher than the prices of land located outside city borders. Especially high prices were recorded in cities with powiat status.

An average price for 1 ha of cadastral area of agricultural land sold in cities with powiat status was 25.6 times higher than an average price of this real estate category for Poland in total.

The highest average transaction prices for agricultural land were recorded in Małopolskie, Mazowieckie and Śląskie Voivodships. The lowest average transaction price for agricultural land was recorded in Warmińsko-Mazurskie and Lubuskie – approx. PLN 21 thous. per 1 ha.

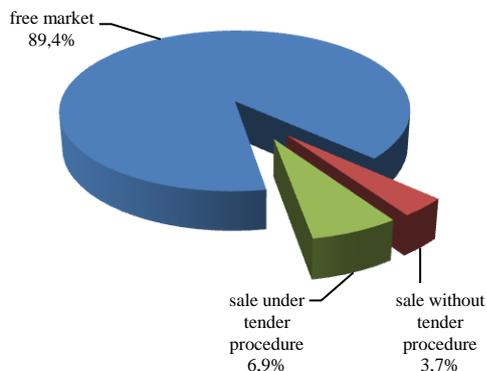

Forest land as well as woody and bushy land

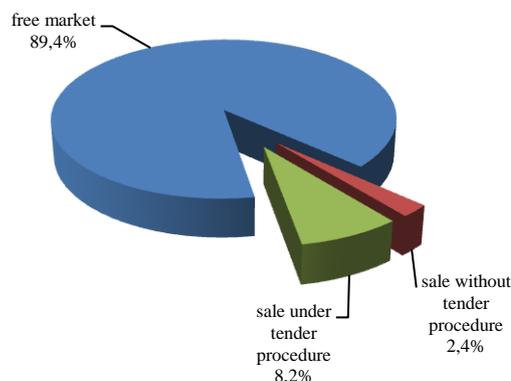

Forest land as well as woody and bushy land constituted the category of most rarely sold land properties.

In 2011 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 89.4% in both cases of all transactions.

Quantity structure of purchase/sale transactions of forest land as well as woody and bushy land by turnover form in 2011

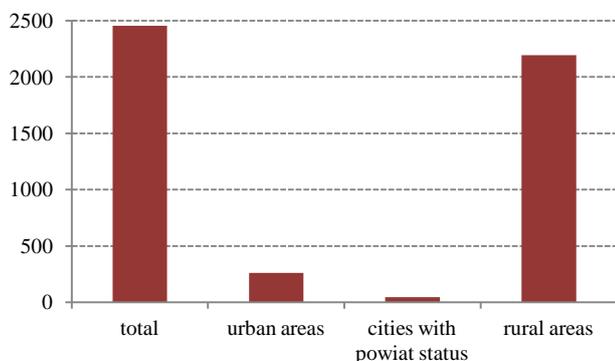

Value structure of purchase/sale transactions of forest land as well as woody and bushy land by turnover form in 2011

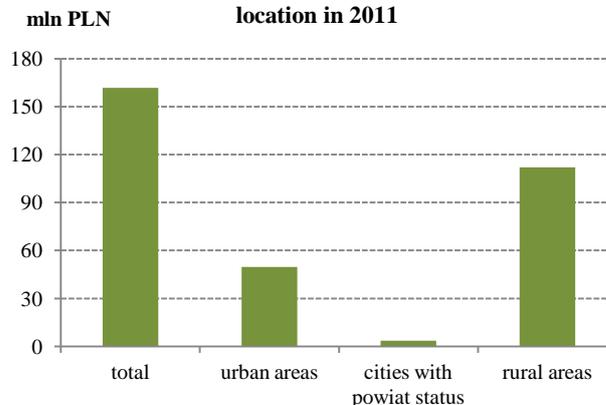

In the case of forest land as well as woody and bushy land turnover, the ownership title was the object of the whole observed turnover.

The majority of the forest land as well as woody and bushy land turnover, both in terms of quantity and value, took place outside the city borders (89.4% and 69.3% respectively).

Number of purchase/sale transactions of forest land as well as woody and bushy land by location in 2011

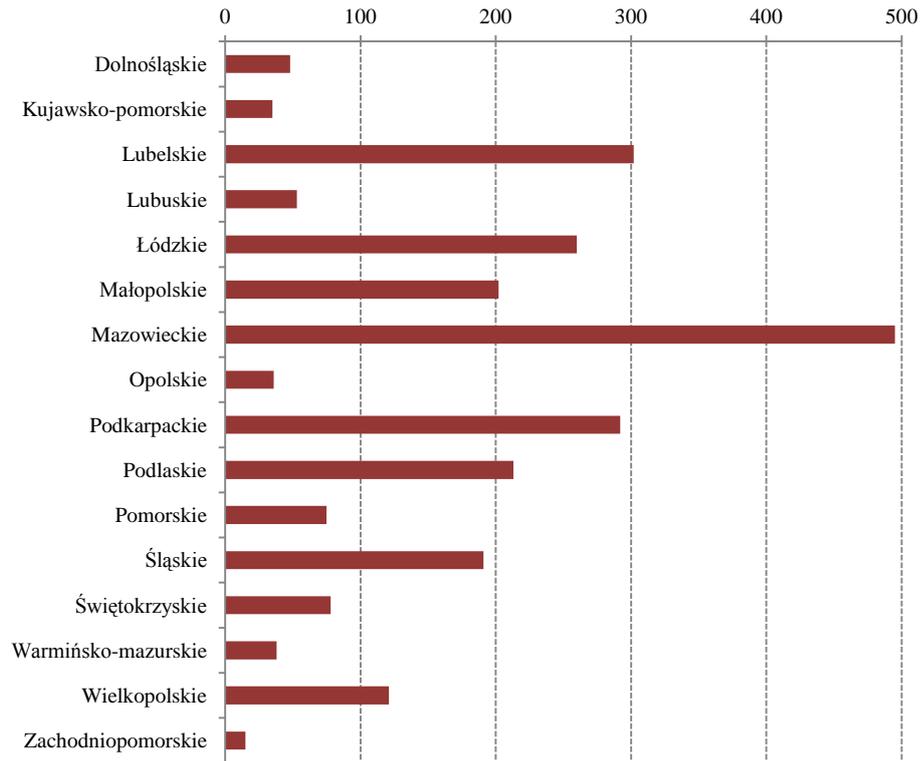

Value of purchase/sale transactions of forest land as well as woody and bushy land by location in 2011

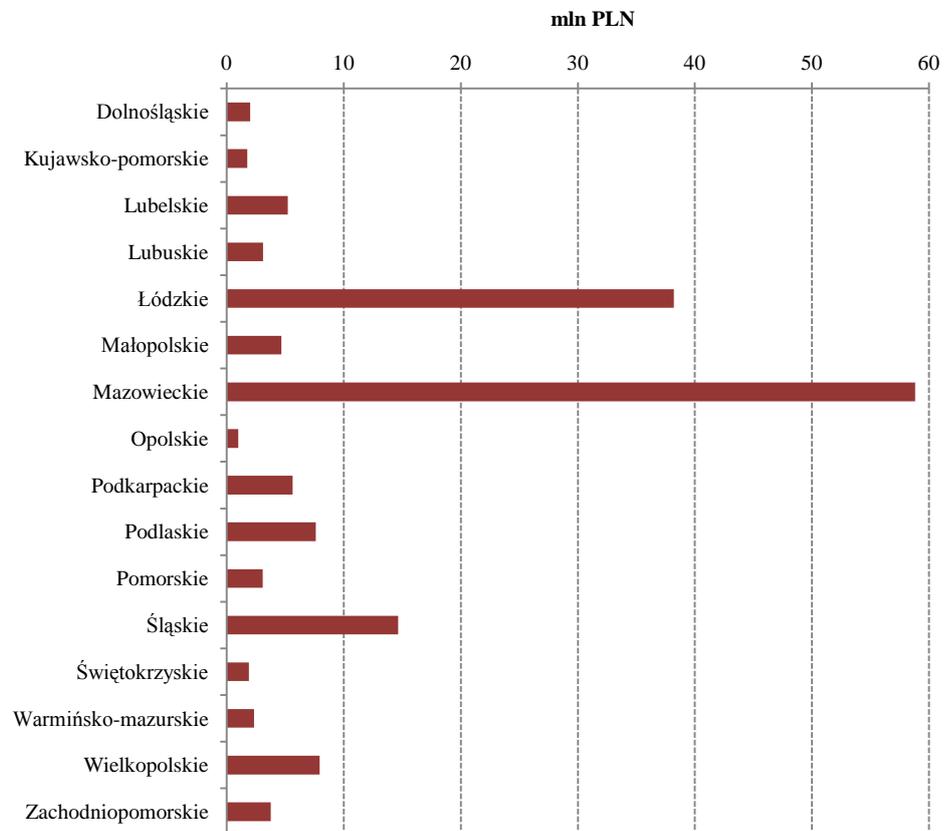

The largest number of forest land as well as woody and bushy land turnover was recorded in Mazowieckie, Lubelskie and Podkarpackie Voivodships. Over 44.0% of all forest land as well as woody and bushy land transactions were made in these three voivodships in total. In turn, in terms of value the most active voivodships were Mazowieckie and Łódzkie. The lowest forest land as well as woody and bushy land turnover in terms of quantity was recorded in Zachodniopomorskie, Kujawsko-Pomorskie, Opolskie and Warmińsko-Mazurskie, whereas in terms of value – in Opolskie, Kujawsko-Pomorskie, Świętokrzyskie and Dolnośląskie Voivodships.

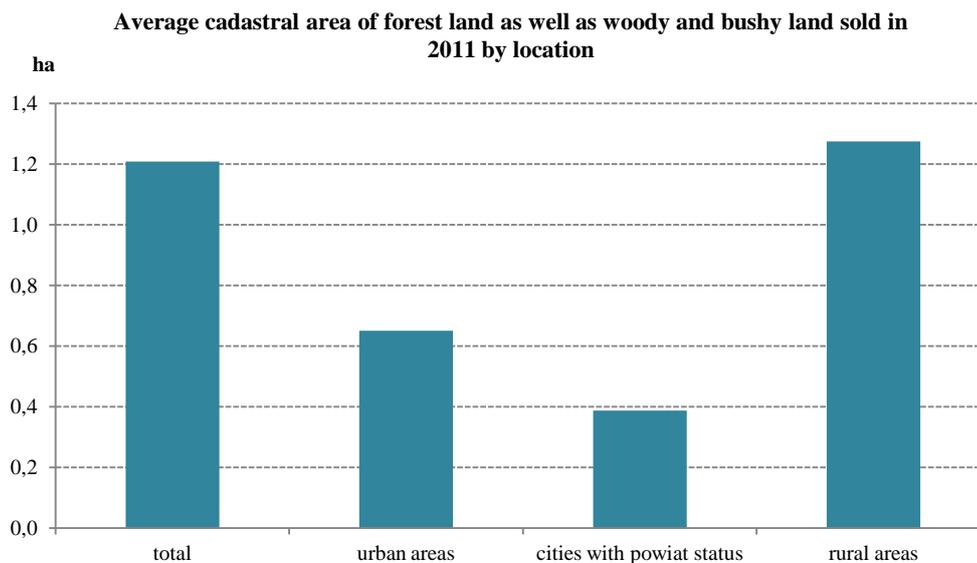

Number of purchase/sale transactions of forest land as well as woody and bushy land in voivodships in 2011

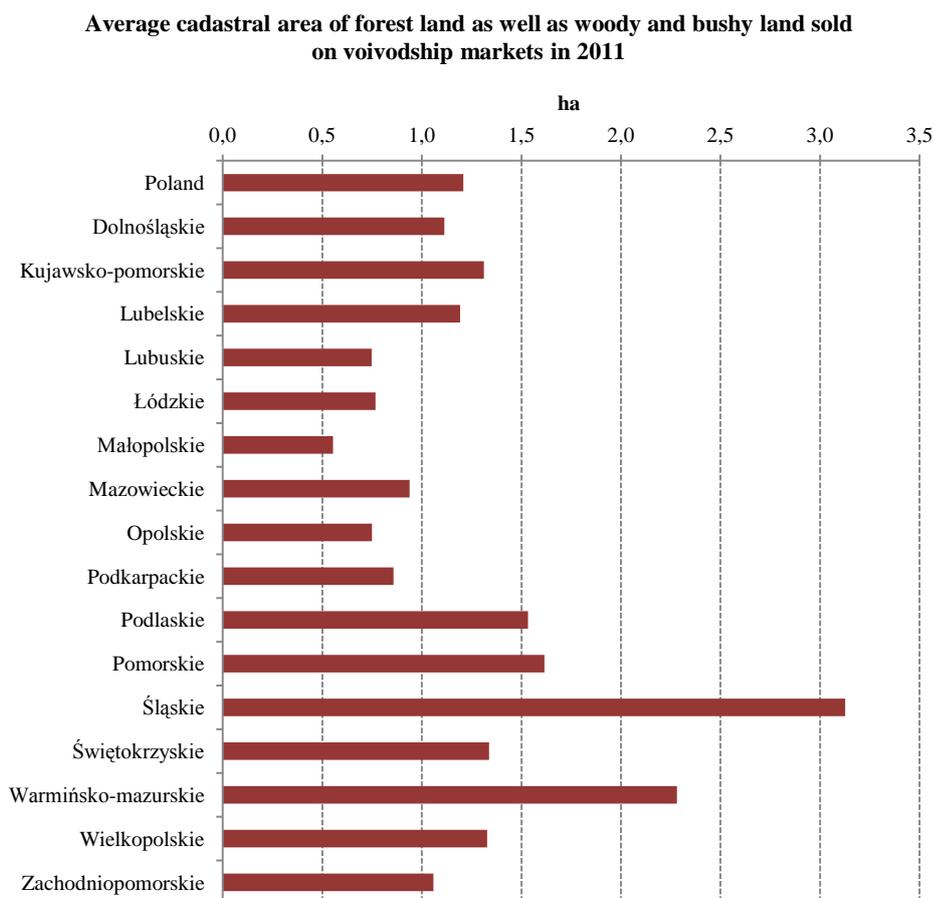

Value of purchase/sale transactions of forest land as well as woody and bushy land in voivodships in 2011

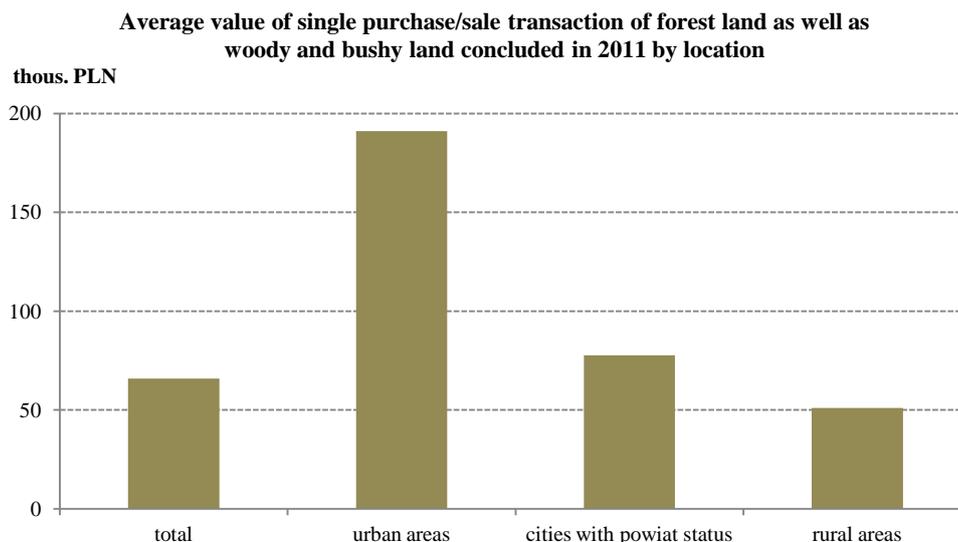

The average cadastral area of forest land as well as woody and bushy land transactions, constituting the object of turnover in 2011, amounted to 1.21 ha.

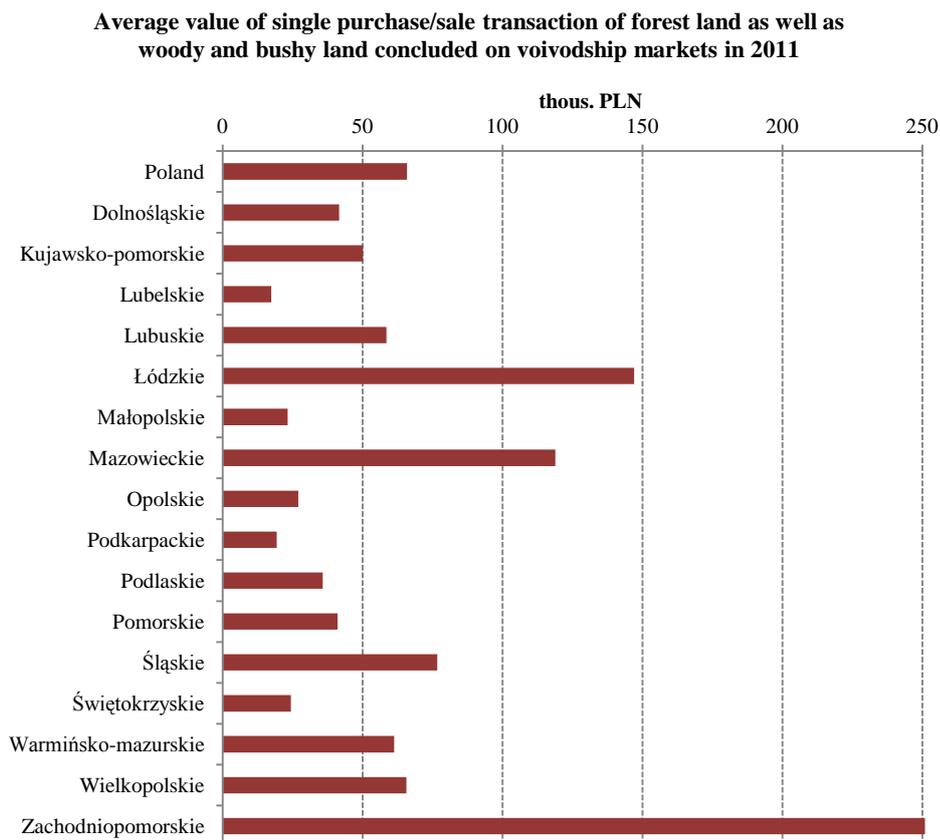

An average cadastral area of forest land as well as woody and bushy land sold in a single transaction in 2011 ranged from 0.55 ha in Małopolskie Voivodship to 3.13 ha in Śląskie Voivodship.

An average cost of forest land as well as woody and bushy land purchased in a single transaction amounted to PLN 65.9 thous.

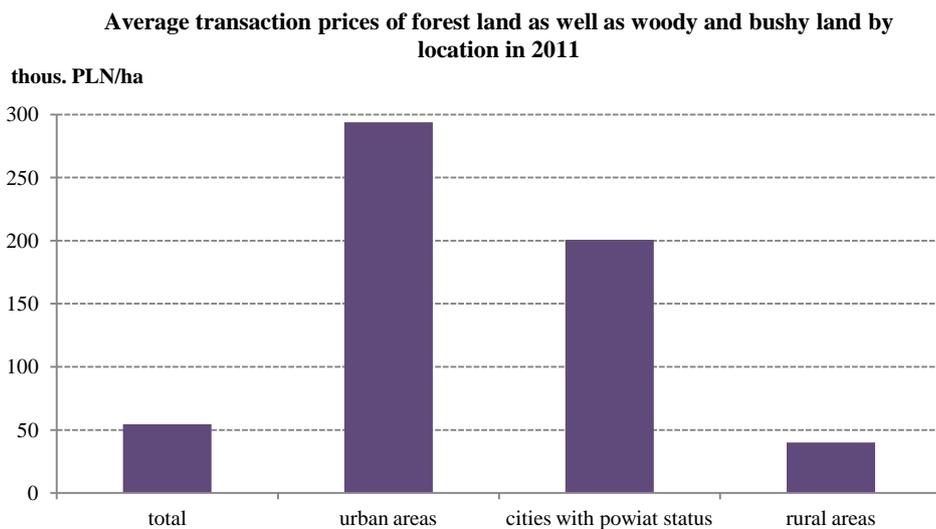

An average value of a single purchase/sale transaction of forest land as well as woody and bushy land ranged from PLN 17.3 thous. in Lubelskie Voivodship to PLN 250.9 thous. in Zachodniopomorskie Voivodship.

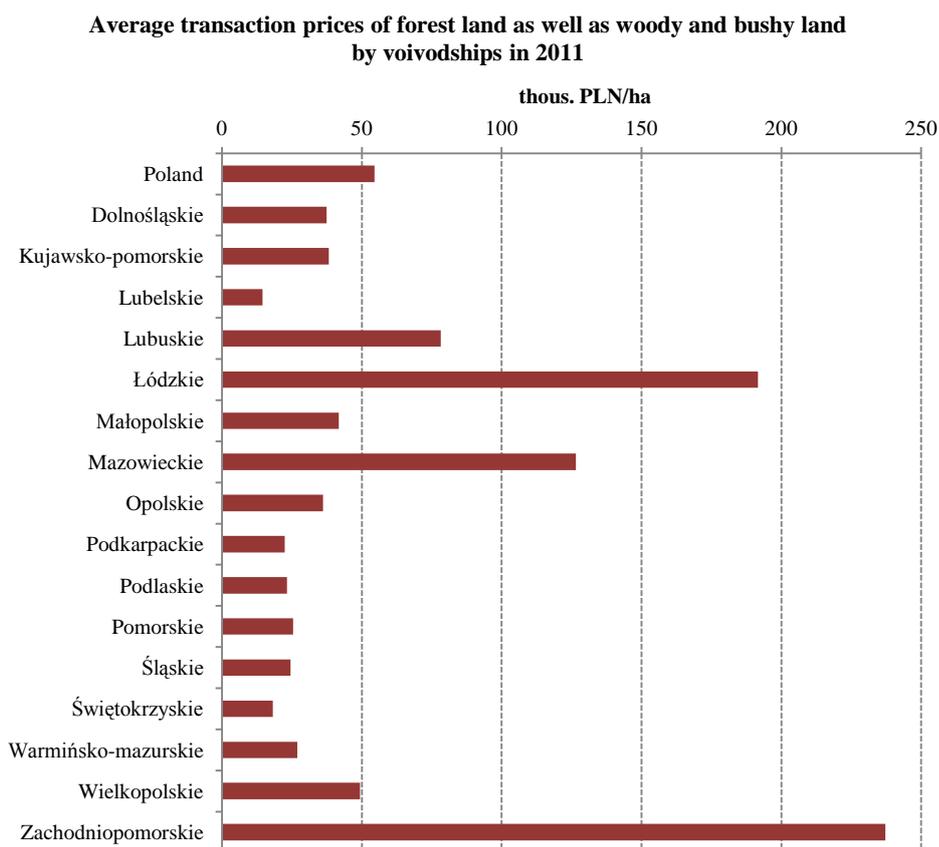

An average price for 1 ha of cadastral area of forest land as well as woody and bushy land sold in 2011 in Poland amounted to about PLN 55 thous. The prices of forest land as well as woody and bushy land in urban areas were considerably higher than those located outside the city borders. An average price for 1 ha of cadastral

area of forest land as well as woody and bushy land sold in cities was nearly five times higher than an average price of this real estate category for Poland in total.

Average transaction prices for forest land as well as woody and bushy land ranged from approx. PLN 15 thous. per 1 ha in Lubelskie Voivodship to approx. 237 thous. per 1 ha in Zachodniopomorskie Voivodship.
