

Index numbers of industrial and construction-assembly production in July 2012^{a)}

Index numbers of industrial and construction-assembly production in real time (constant prices) were:

Specification	VII		I-VII ^{b)}	VII
	previous month = 100	corresponding period of previous year = 100		monthly average of 2005 = 100
INDUSTRIAL UNITS				
Total	97.7	105.2	104.1	141.6
incl.:				
minig and quarrying	97.2	96.7	93.1	86.9
manufacturing	97.5	105.8	104.6	152.3
electricity, gas, steam and air conditioning supply	101.2	103.0	103.5	81.5
water supply; sewerage waste management and remediation activities	98.4	100.3	101.4	134.7
CONSTRUCTION UNITS				
Total	92.9	91.2	104.8	184.9

^{a)} Reported data; comprise enterprises employing over 9 persons.

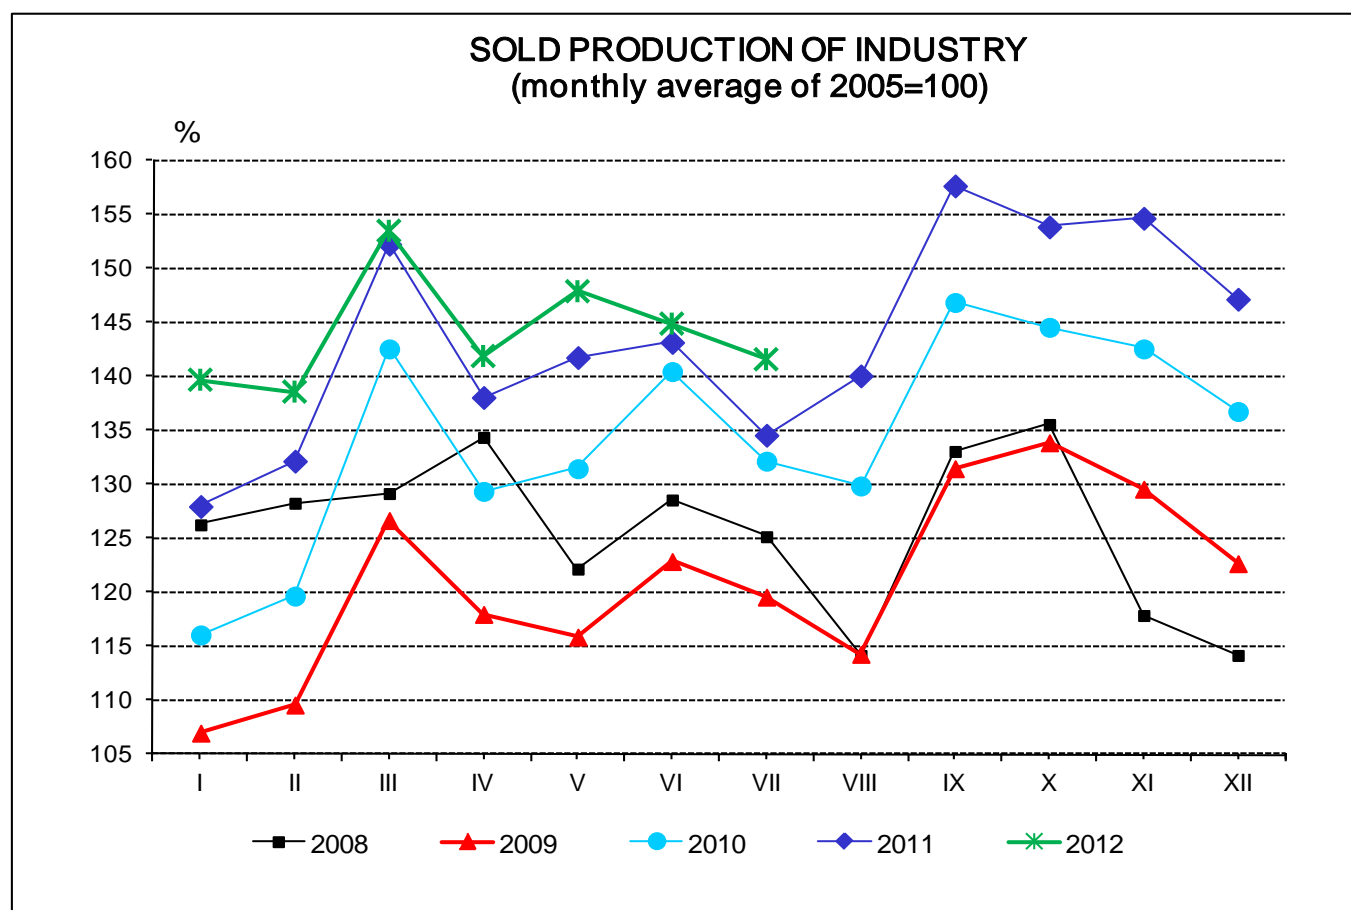

^{b)} Data including final information on production and prices in June and reported data – in July.

According to the preliminary data **sold production of industry** in constant prices (in enterprises employing more than 9 persons) in July of 2012 was by 5.2% higher than in the previous year, but lower by 2.3% than in June of 2012. After eliminating the seasonal factors, sold production of industry reached the level higher by 4.7% than in the corresponding month of the previous year and higher by 2.4% than in June of 2012.

As compared to July of 2011, an increase in sold production was reported in 23 (out of 34) industry divisions, among others, in manufacture of beverages – by 17.7%, manufacture of electrical equipment – by 11.5%, manufacture of food products – by 10.4%, manufacture of chemicals and chemical products, paper and paper products – by 8.5%, manufacture of metal products – by 8.0% and manufacture of machinery and equipment – by 6.9%. A drop in sold production of industry, as compared to July of 2011, was recorded in 11 divisions, among others, in manufacture of pharmaceutical products – by 7.9%, manufacture of furniture – by 5.2%, in mining of coal and lignite – by 4.7%, in manufacture of computer, electronic and optical products – by 3.8% and manufacture of other non-metallic mineral products – by 1.1%.

In the period January-July of 2012 sold production of industry was by 4.1% higher than in the corresponding period of the previous year.

Indices of sold production of industry in comparison with an average monthly level in 2005 are presented in the graph below:

According to preliminary data, **construction and assembly production** (in constant prices), including investment and repair work, carried out domestically by construction enterprises employing more than 9 persons, was in July of 2012 8.8% lower than a year before and 7.1% lower than in June of 2012. After eliminating the seasonal factors, construction and assembly production reached the level 2.8% lower than in the corresponding month of the previous year and 1.0% lower in comparison to June of 2012.

A decrease in production was recorded in all divisions of construction both in comparison to July of 2011 and to June of 2012. In relation to July of 2011, in enterprises whose basic type of activity is civil engineering the production declined by 12.9%, in entities specialising in the construction of buildings by 6.6% and in carrying out specialised construction activities by 5.1%.

In comparison to June of this year, a decrease in production was recorded in enterprises performing specialised construction activities – by 12.0%, in entities carrying out work connected with civil engineering – by 6.3%, and in entities realizing mainly the construction of buildings – by 4.8%.

In the period January-July of 2012, construction and assembly production was 4.8% higher than in the corresponding period of the previous year.

Indices of the construction and assembly production, in comparison with an average monthly level in 2005, are presented in the graph below:
