PREFACE

This publication constitutes another edition of the “Real Estate Turnover” compilation. Its purpose is to present the information specific to the market of real estate purchase/sale transactions in Poland in 2010.

The compilation contains information on the quantity and value of transactions and the area of properties sold, as well as the average measures reflecting the characteristics of purchase/sale transactions for individual types of properties, i.e. premises, buildings, land properties and built-up properties. Data are presented in the territorial profile, in the breakdown by turnover form and by types of properties comprising the subject of transactions.

Information presented in the publication have been prepared on the basis of data from the Registers of Prices and Values of Real Estate, which are kept by the starosts and cities with powiat status.

The entire compilation consists of: general notes, methodological notes covering description of sources of information and basic definitions and analytical commentary, which separately for each type of property presents the descriptive and graphic interpretation of results with a set of tables presenting data.

Presenting you with the “Real Estate Turnover in 2010” I would like to express our gratitude to all persons and institutions for their suggestions, which provide a valuable contribution to the enrichment of its next editions.

GENERAL NOTES

1. Data included in the publication refer to **the territorial division of 1 January 1999**, taking into consideration the Nomenclature of Territorial Units for Statistics (NTS), introduced by the Regulation of the Council of Ministers of 13 July 2000 (Journal of Laws No. 58, Item 685, with subsequent amendments).
2. **Relative numbers (indicators, interest)** were calculated mostly on the basis of absolute data expressed with higher precision than indicated in the tables.
3. **Average transaction prices**, as presented in the publication, were obtained as a quotient of the values and areas of real estate sold.
4. Descriptive price characteristics, e.g. variation range, arithmetic mean, median or variation coefficient, supplement the information on average transaction prices. **The median** is the numerical value of a given feature, above and below which there is an equal number of observations. **Standard deviation constitutes** the measure of variability of the feature analysed and informs us about how specific cases differ on average from the arithmetic average. **The coefficient of variation** is a relative measure of variability and forms the ratio of the standard deviation from the arithmetic mean of the feature analysed. It tells us what percentage of the arithmetic mean value constitutes standard deviation.

METHODOLOGICAL NOTES

I. Data scope and sources

1. This publication provides data characterising the real estate turnover in 2010. In particular, it includes information on the number and transaction values of the real estate purchase/sale, on the area of real estate sold, and on the average transaction prices, divided by:
 - premises
 - buildings
 - built-up properties
 - land properties
2. Data included in the publication was compiled on the basis of information obtained from Registers of Prices and Values of Real Estate, kept by powiat starosta offices and mayors of cities with powiat status, and using the data derived from notarial deeds. Presented data was compiled on the basis of information from 371 out of 379 powiats and cities with powiat status.
3. The survey covers transactions concluded on the free market, resulting from the sales preceded by a tender, or from non-tender sales, where the State Treasury, a gmina, a powiat, a voivodship, or a natural or legal person, holding the ownership or joint ownership title, mortgaged real estate or joint mortgaged real estate title, can act as the seller.
4. Only those purchase/sale transactions of properties are observed, which were concluded during the period under survey and were registered in the Register of Prices and Values of Real Estate before the date of data transfer to the Central Statistical Office.
5. The real estate **value** comprises all and any elements of the real estate purchased/sold under the notarial deeds produced.

II. Definitions of basic terms

1. **A notarial deed** is understood as a document confirming the conclusion of a legal transaction, drafted entirely by a notary, then read out to the parties and signed by all persons concerned (Act of 14 February 1991 – Notarial Law).
2. **A real estate purchase/sale transaction** is understood as selling or purchasing real estate by concluding a legal transaction, under which the ownership title to the said real estate is being transferred.
3. **Real estate** covers all parts of land constituting separate ownership (land), and buildings, or parts of buildings, permanently connected with the ground, provided that they constitute separate ownership from the land under any specific provisions. Three types of real estate are distinguished:
 - retail real estate
 - building real estate
 - land property
4. **Retail real estate** refers to residential or business premises, including a garage forming part of a building, provided that it constitutes separate ownership. Retail real estate is established under the Act of 24 June 1994 on the Ownership of Premises.

5. **Building real estate** is a building and other facilities permanently connected with the ground, provided that they constitute separate ownership from such land under any specific provisions.
6. **Land property** is land with any component parts, excluding buildings and premises, provided that they constitute separate ownership. If a land and mortgage register is kept for the land property, then the land constitutes separate real estate from any other real estate held by the same owner.
7. **Premises** (an independent residential apartment or premises designated for other purposes) refers to a room or set of rooms separated with durable walls within the building dedicated to the permanent stay of persons, which together with the auxiliary rooms serve the purpose of fulfilling their housing needs or which are used according to their dedication for the purposes other than residential ones.
8. **An independent residential apartment** is a residential apartment, in relation to which the starost has determined, in the form of a statement, the compliance with the requirements mentioned in Article 2, Section 2 of the Act of 24 June 1994 on the Ownership of Premises; the definition is applied accordingly also to the independent premises used according to their dedication for the purposes other than residential ones.
9. **A room** is a premise in a dwelling, separated from other premises with fixed walls from the floor to the ceiling, with an area not smaller than 4 m^2 , and with direct daylight, i.e. with a window or a French window in an external wall of the building; kitchens are also considered rooms as long as they fulfil the above criteria. Corridors, halls, bathrooms, toilets, larders, verandas, porches, storerooms, etc. are not considered rooms, irrespective of their area and lighting.
10. **A building** is a covered constructed structure, together with built in systems and technical facilities, used for permanent purposes, adjusted to house persons, animals, or to protect items; a shed is considered a specific kind of a building, which is a structure built on the ground, not surrounded by walls from all sides, or even not having any walls at all.
11. **Residential buildings** are constructed structures in which at least one half of the overall space is used for residential purposes; these include single-family buildings, buildings with two dwellings, multi-dwelling buildings and collective accommodation buildings, e.g. social assistance houses (without medical care), employee boarding houses, boarding schools, school dormitories, student dormitories, care and education centres, homeless shelters, etc.)
12. **Non-residential buildings** are constructed structures in which more than half of the surface area is used for non-residential purposes.
13. **Industrial buildings** are buildings dedicated for production purposes for all types of industrial activity, e.g. plants, workshops, production halls, slaughter houses, breweries, assembly plants, film companies, etc.
14. **Commercial buildings** include commercial centres, department stores, independent shops and boutiques, fair, auction and exhibition halls, covered markets, petrol stations, service stations, pharmacies, etc.
15. **Office buildings** are buildings used as the workplace for office activity, or other administrative activity, e.g. banks, post office, city, gmina, self-government, ministry offices, administrative premises of various economic entities, as well as conference and congress centre buildings, court and parliament houses.

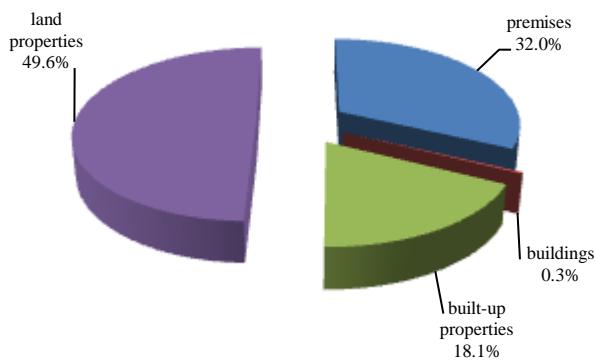

16. **Land built-up with residential buildings** refers to land not used for agricultural and forest production, dedicated for residential buildings and functional equipment connected with residential buildings (farmyards, access roads, passages, adjacent playgrounds, etc), as well as adjacent gardens.
17. **Built-up agricultural land** refers to land dedicated for residential buildings, and other buildings and facilities serving the purpose of agricultural production (not excluding fish production), as well as agricultural and food processing (boiler plants, storerooms, garages, cotes, barns, sheds, granaries, inventory buildings, storage and manoeuvre area within the built-up land, etc.), and land occupied by adjacent gardens within agricultural farms.
18. **Agricultural land** covers arable land, adjacent gardens, permanent crops, including orchards, meadows and pastures, as well as other arable land.
19. **Forest area** refers to land of a compact area of at least 0.10 ha, covered by forest vegetation (wooded area – trees, bushes and undergrowth – or temporarily devoid of forest vegetation, and:
 - a) designated for silviculture production,
 - b) constituting nature reserves or forming part of a national park; or
 - c) registered as a nature monument,as well as land connected with silviculture, designated for the purpose of forest management: buildings and structures, devices for water drainage, spatial division lines in forests, forest roads, areas under electricity power lines, forest nurseries, wood stockpiling areas, and forest car parks and tourist facilities.
20. **Woody and bushy land** refers to land covered by forest vegetation with an area smaller than 0.1 ha, including also field clusters of trees and bushes not classified as forests, peat bogs, areas covered by natural wicker and bushy forms of willow; land adjacent to surface waters and covered by trees or bushes, constituting a biological protection zone for watercourses and water containers; ravines and gorges covered by trees and bushes not classified as forests; stone and rubble deposit sites covered by trees and bushes; park-type clusters of trees and bushes, not equipped with facilities and structures serving recreational and leisure purposes.
21. **Perpetual usufruct** is a property right which may be established on the real estate owned by the State Treasury and self-government bodies on the principles set out in Articles 232-240 of the Civil Code, and in Articles 27-35 of the Act of 21 August 1997 on Real Estate Management

I. INTRODUCTION

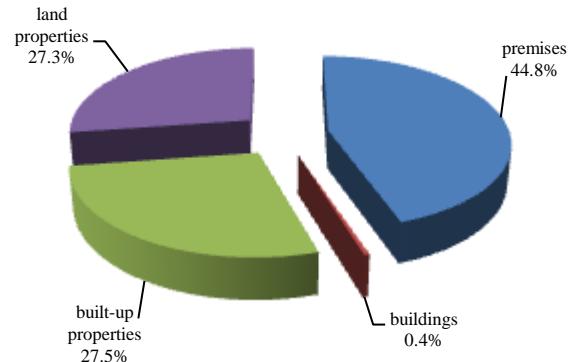

About 257 thousand real estate purchase/sale transactions were registered in 2010, with the turnover value reaching about 34 bn zl.

Nearly half of all transactions concerned land properties, 32% - premises, 18.1% - built-up properties, and 0.3% - buildings. In terms of value, the dominating position was gained by premises which sale value constituted 44.8% of the total real estate turnover. Share of sale value for built-up properties amounted to 27.5%, land properties – 27.3%.

Quantity structure of purchase/sale transactions of properties by type in 2010

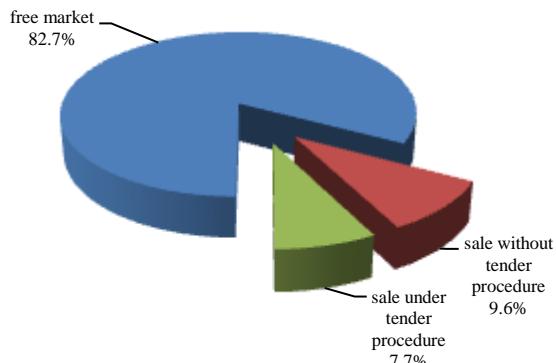

Value structure of purchase/sale transactions of properties by type in 2010

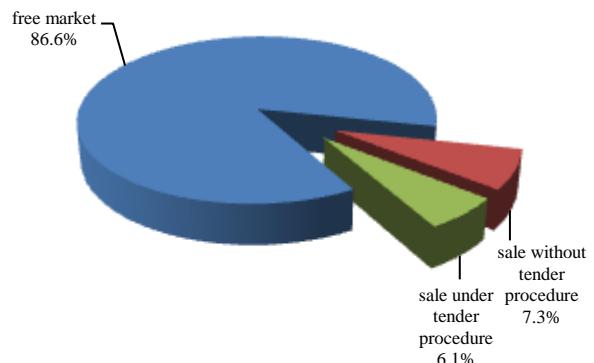

In 2010 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 82.7% and 86.6% of all transactions.

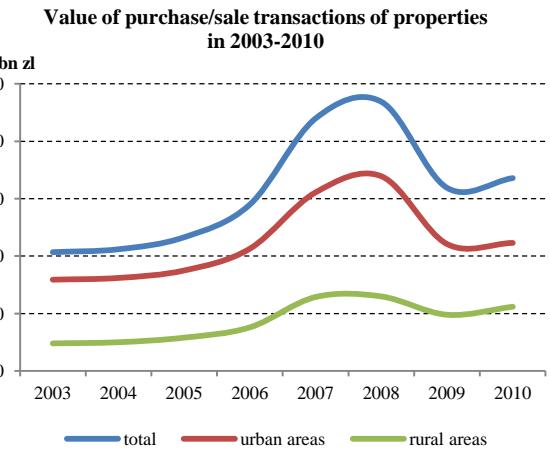

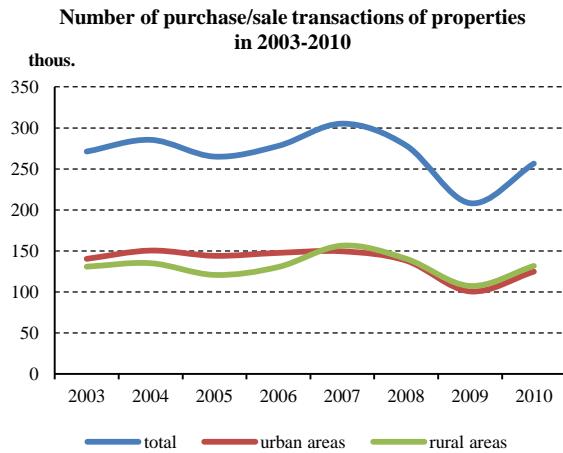

Quantity structure of purchase/sale transactions of properties by turnover form in 2010

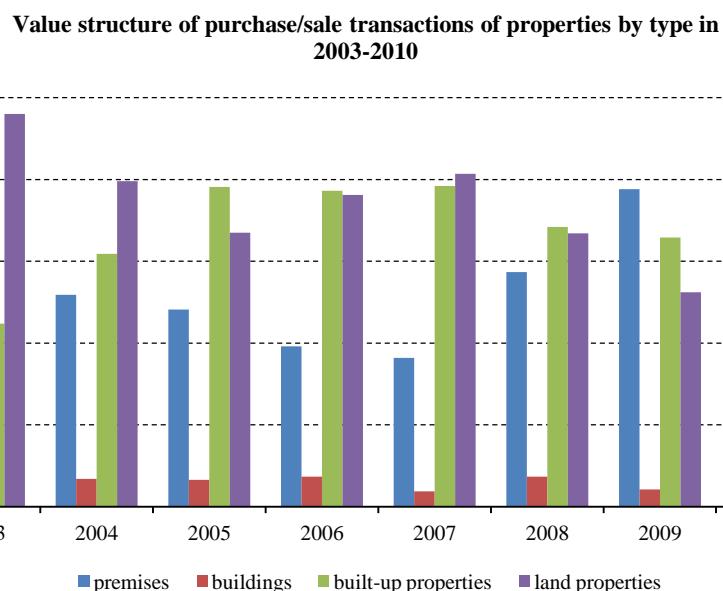

Value structure of purchase/sale transactions of properties by turnover form in 2010

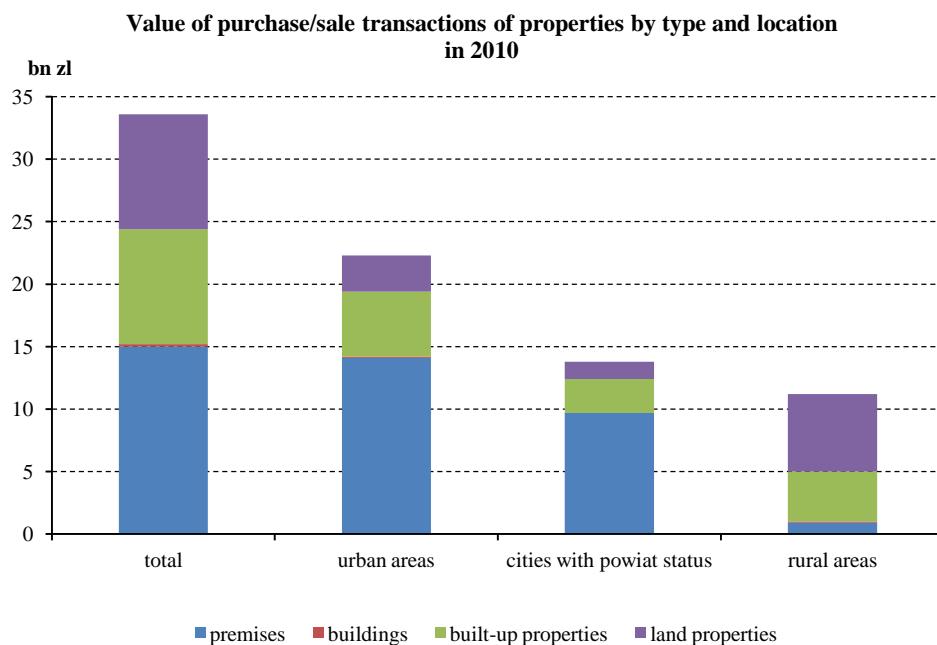

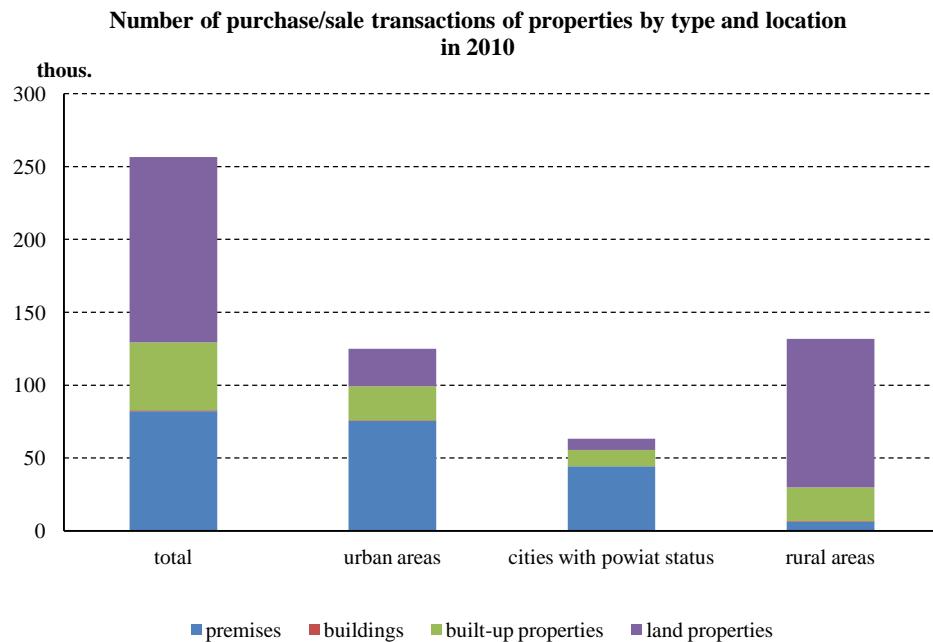

The number of real estate purchase/sale transactions registered in 2010 was over 23% higher in relation to 2009, whereas the value of transactions concluded increased by over 5%.

Since the year 2008 no significant changes in the quantity structure of purchase/sale transactions were observed. In the total value of transactions a significant increase of participation of premises has been observed (about 16 percentage points), with simultaneous decrease of share of purchase/sale transactions value for buildings (about 2 percentage points) and built-up properties (about 4 percentage points).

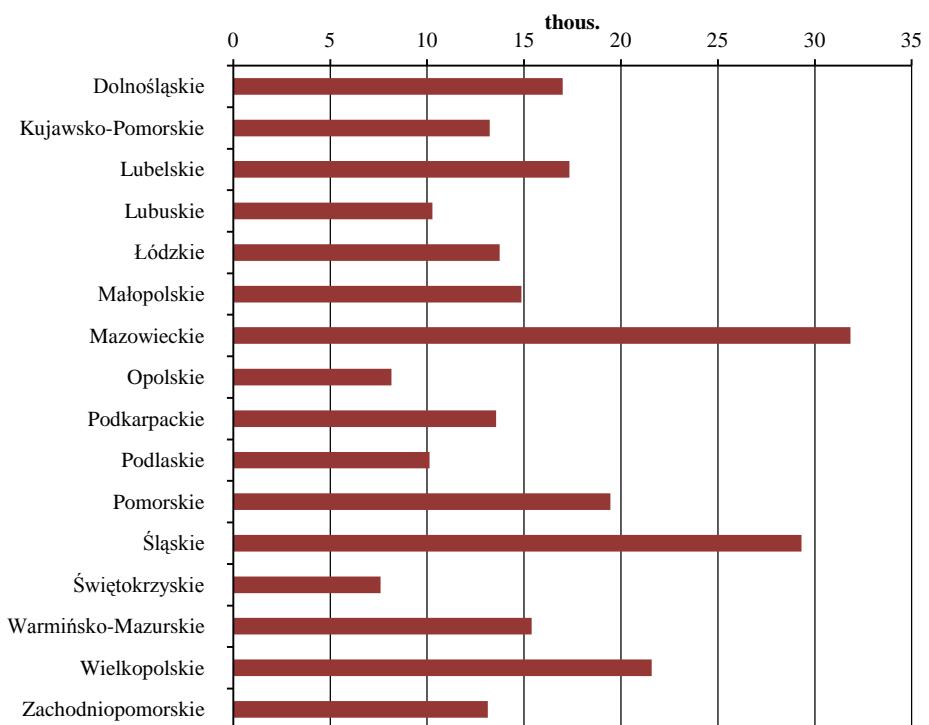

Analysing the real estate market in terms of territorial division, it should be stated that in 2010 the number of transactions was evenly allocated between urban areas (48.7%) and rural areas (51.3%). However, in terms of value, 66.5% of the real estate turnover referred to cities or towns. In urban areas, the objects of the majority of transactions were premises (60.6% in terms of quantity and 63.2% in terms of value). Land properties were, however, the most frequent objects of real estate purchase/sale transactions concluded outside city areas (77.3% in terms of quantity and 55.6% in terms of value).

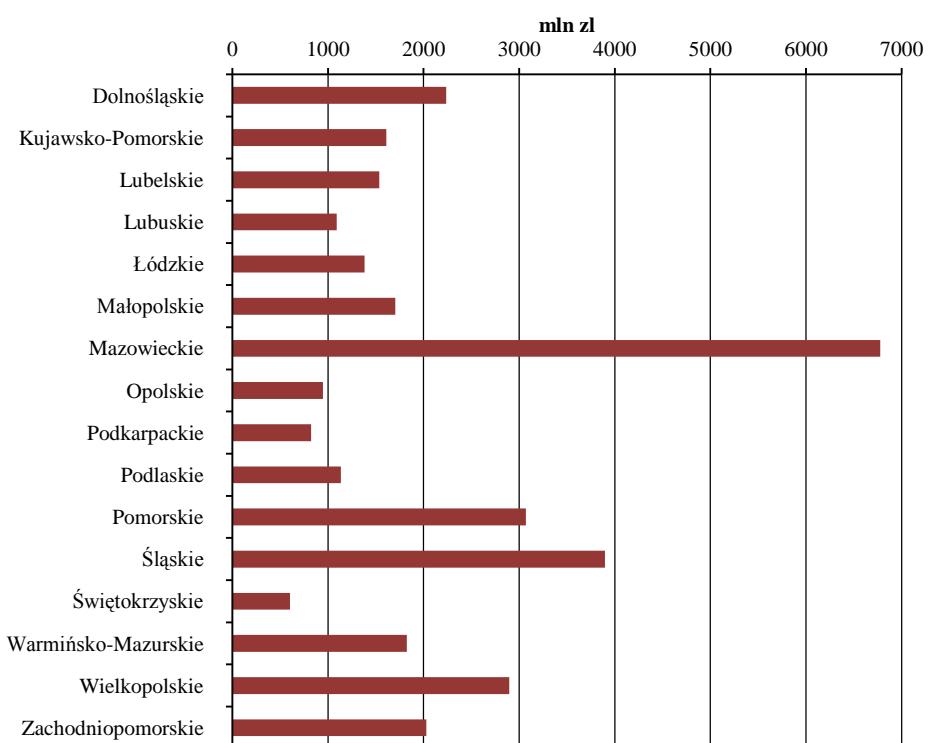

The highest real estate turnover, both in terms of quantity and value, was recorded in Mazowieckie, and Śląskie Voivodships. The lowest turnover was recorded in Świętokrzyskie Voivodship.

**Number of purchase/sale transactions of properties in voivodships
in 2010**

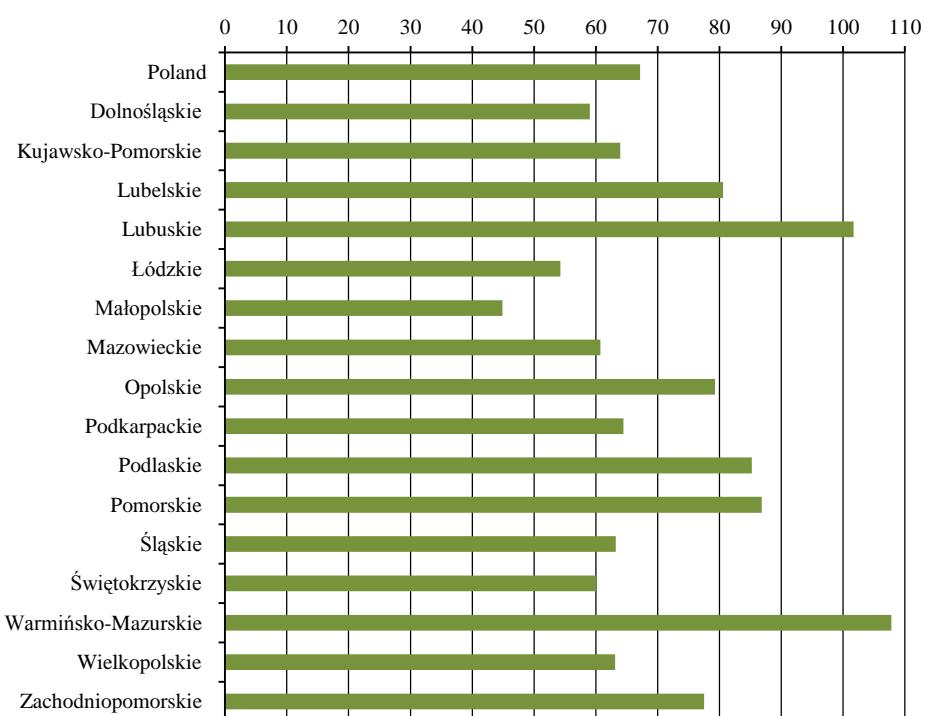

Value of purchase/sale transactions of properties in voivodships in 2010

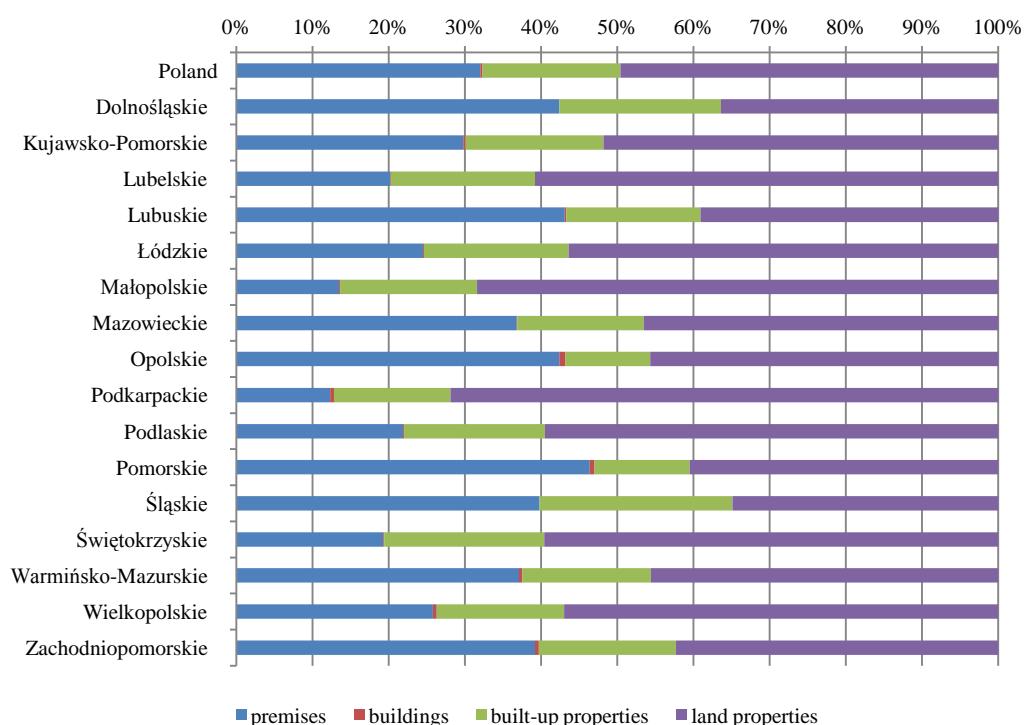

The number of purchase/sale transactions of properties per 10,000 inhabitants was very diversified. The range of this indicator at the voivodship level in 2010 was from about 45 transactions in Małopolskie Voivodship to about 108 transactions in Warmińsko-Mazurskie Voivodship. Apart from Warmińsko-Mazurskie Voivodship, the highest indicators characterized the following voivodships: Lubuskie, Pomorskie, Podlaskie and Lubelskie.

Number of purchase/sale transactions of properties per 10,000 inhabitants in 2010

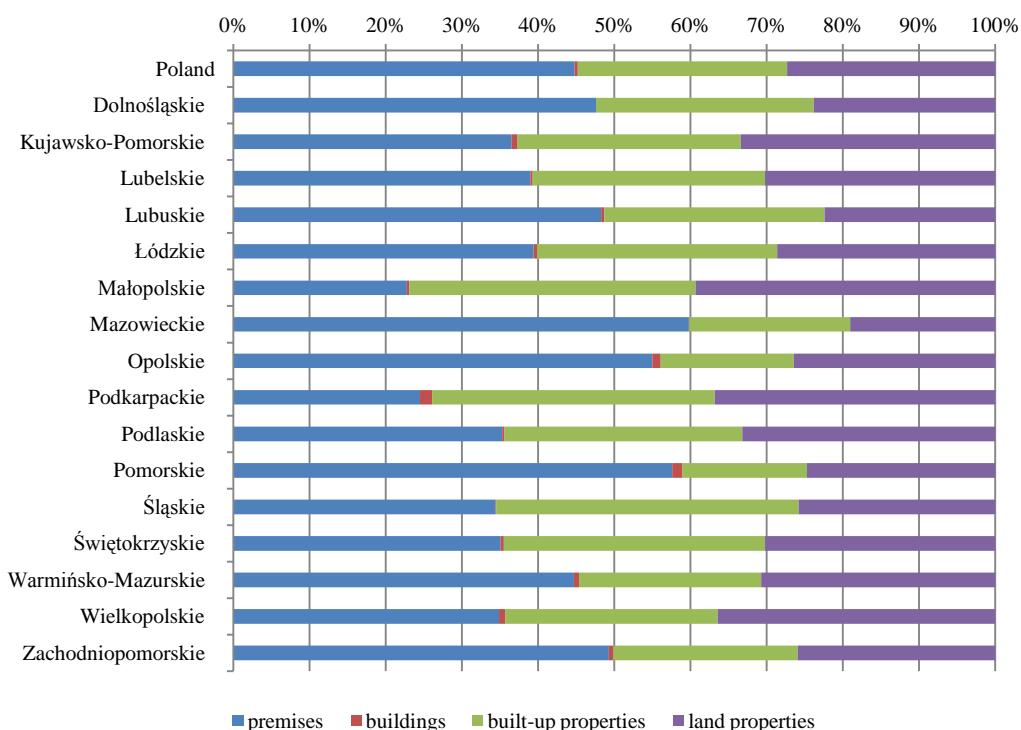

Voivodship markets are considerably diversified not only in terms of the intensity of purchase/sale transactions, but also in terms of the structure of real estate sold. In terms of quantity, land properties turnover prevailed in most voivodships. The highest share, above 60%, was observed in Podkarpackie, Małopolskie and Lubelskie Voivodships. In terms of value, transactions involving premises prevailed in most of the voivodships.

II. PURCHASE/SALE TRANSACTIONS OF PREMISES

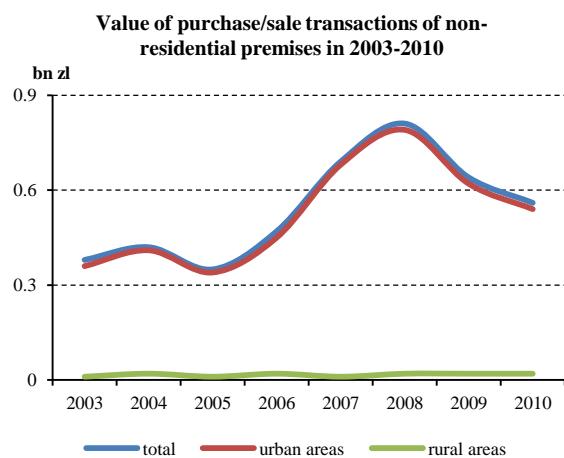

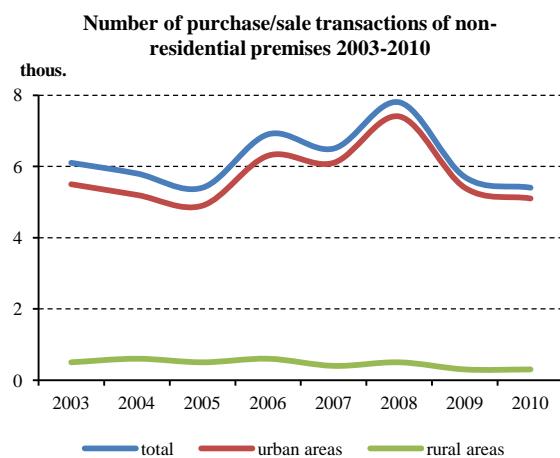

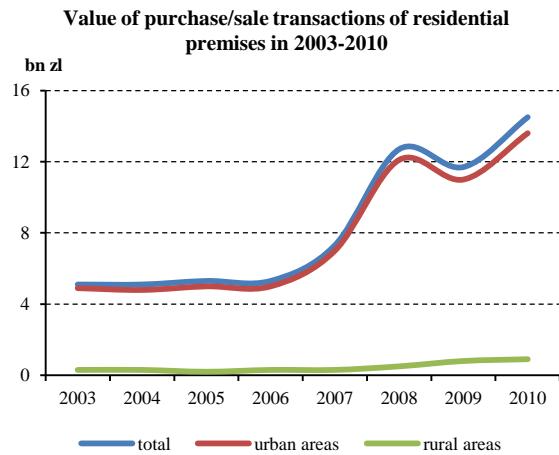

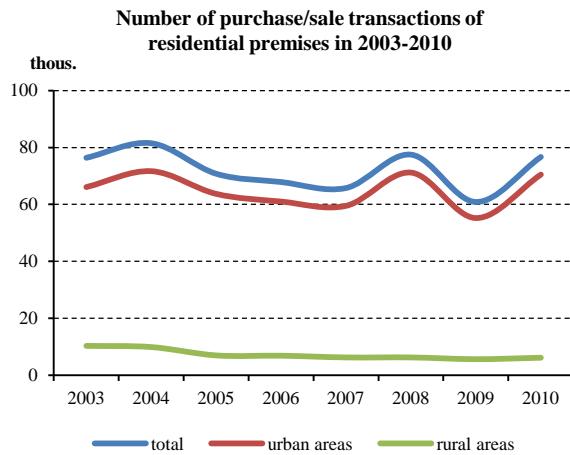

The number of purchase/sale transactions of premises registered in 2010 amounted to about 82.1 thousand, accounting for 32% of all real estate transactions. The value of the premises turnover reached 15.0 bn zł, which corresponded to 44.8% of the total real estate turnover. The usable floor space of the premises constituting the object of the purchase/sales transactions amounted to about 4.4 million m².

Two basic segments can be distinguished on the premises market, i.e. the residential premises segment and the non-residential premises segment. In 2010 residential premises turnover accounted for 93.4% of the total premises turnover in terms of quantity, 96.3% in terms of value, and 92.5% in terms of the usable area sold.

In 2003-2010 a significant growth in the number of the purchase/sale transactions of premises was observed three times. The growth occurred for the first time in 2004, when the premises turnover in terms of quantity grew by 6% in relation to 2003. 2008 was the second period which saw a considerable growth in the number of real estate transactions of premises, amounting to over 18% in relation to 2007. The third time the growth in the premises turnover in terms of quantity was observed in 2010 – over 23% in relation to 2009. Analysing the value of the premises turnover, we can notice that the turnover level in 2003-2006 was relatively stable. In the next two years, however, a considerable growth in the value of turnover was observed, reaching about 39% in 2007 and exceeding 68% in 2008. In 2009 a considerable decline in the sales of premises was recorded, both in terms of quantity and value. The value of the purchase/sale transactions of premises in 2010, increased by 21.4% in relation to 2009.

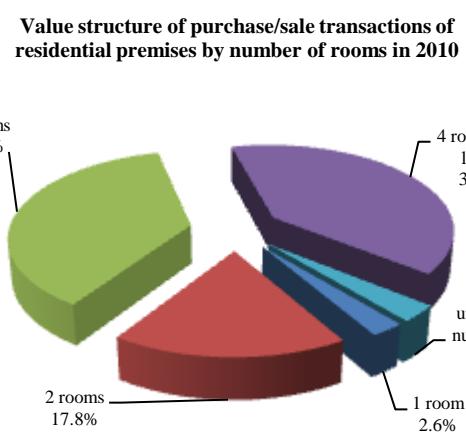

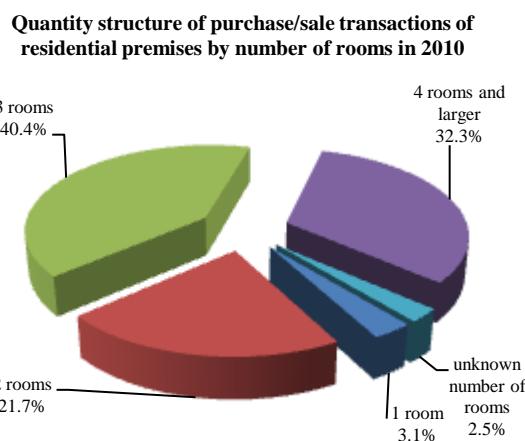

The situation in the residential premises segment developed in a similar way as on the premises market in total. Slightly different tendencies were observed in the non-residential premises segment. In 2004 and 2005 a drop in the number of the purchase/sale transactions of non-residential premises was recorded, followed by turns of their growths and drops, until 2009. In terms of value, a considerable growth in the non-residential premises turnover was observed in the period from 2006 to 2008, resulting in the transaction value in 2008 being more than two times higher than the corresponding value in 2005. 2010 was the second year in a row recording a drop in non-residential premises turnover, both as regards quantity and value of concluded transactions. In 2010, in relation to the preceding year, the number of the purchase/sale transactions of non-residential premises dropped by more than 5%, whereas in terms of value a drop of about 12% was observed.

Residential premises

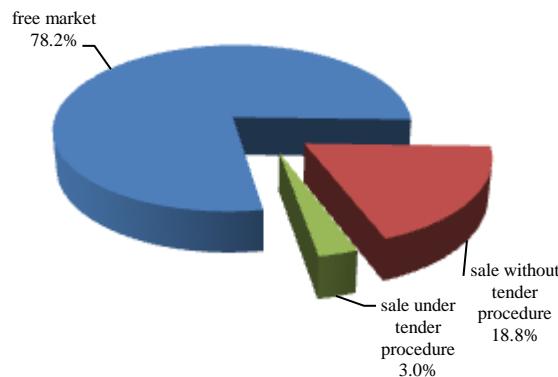

Analysing the turnover in the residential premises segment in 2010, it should be stated that the object of such transactions usually involved three-room or four-room and larger premises, which in terms of quantity in total constituted 72.7% of the residential premises turnover, and in terms of value they reached 76.5%. The sales of one-room premises constituted 3.1% of total number of purchase/sale transactions of premises, and 2.6% of their total value.

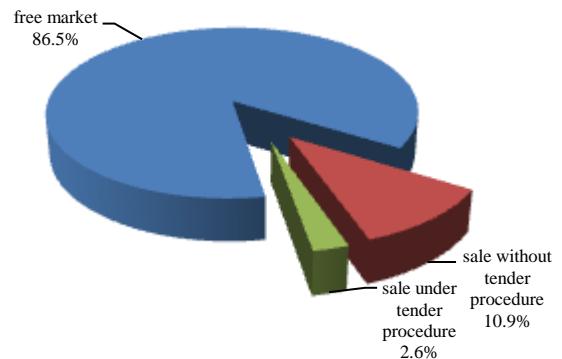

In 2010 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 78.2% and 86.5% of all transactions. Tender sales constituted a relatively

insignificant part of the sales of residential premises, accounting for 3% of the total residential premises turnover in terms of quantity, and for 2.6% in terms of value.

Quantity structure of purchase/sale transactions of residential premises by turnover form in 2010

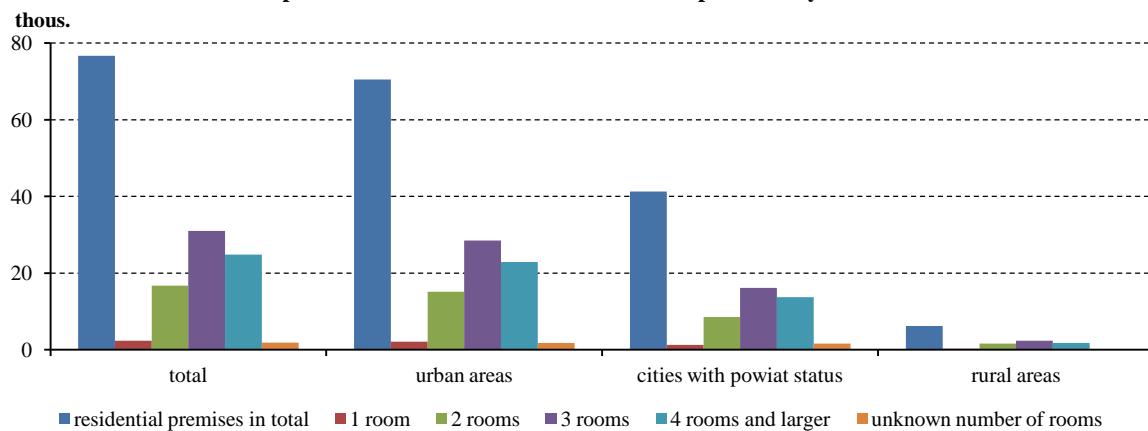

Value structure of purchase/sale transactions of residential premises by turnover form in 2010

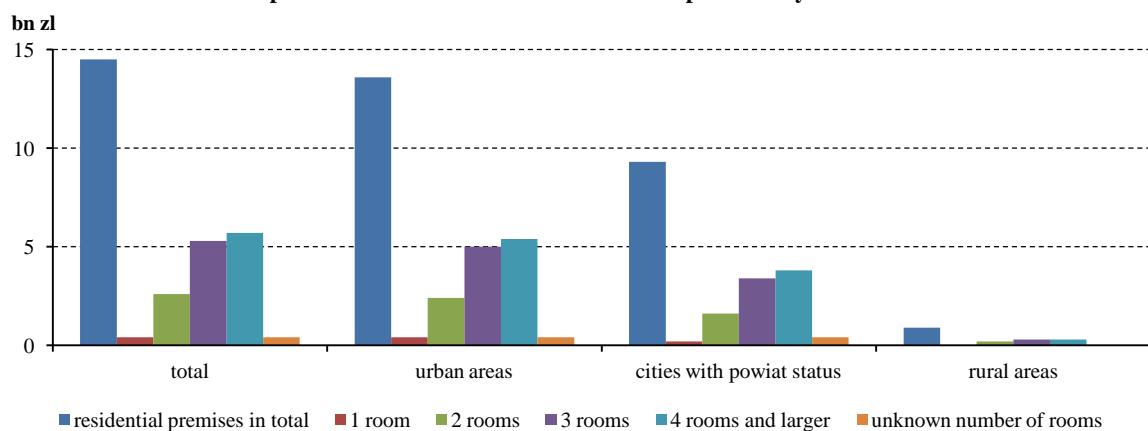

Residential premises were mainly sold in urban areas. The residential premises turnover within the city borders accounted for almost 92% of the total residential premises turnover in terms of quantity, and for about 94% in terms of value. An especially important role was played by markets in cities with powiat status, which in terms of quantity accounted for nearly 54% of all purchase/sale transactions of residential premises, and in terms of value – for over 64%. Three-room, four-room and larger premises were the most frequently sold, both in urban and rural areas.

Number of purchase/sale transactions of residential premises by location in 2010

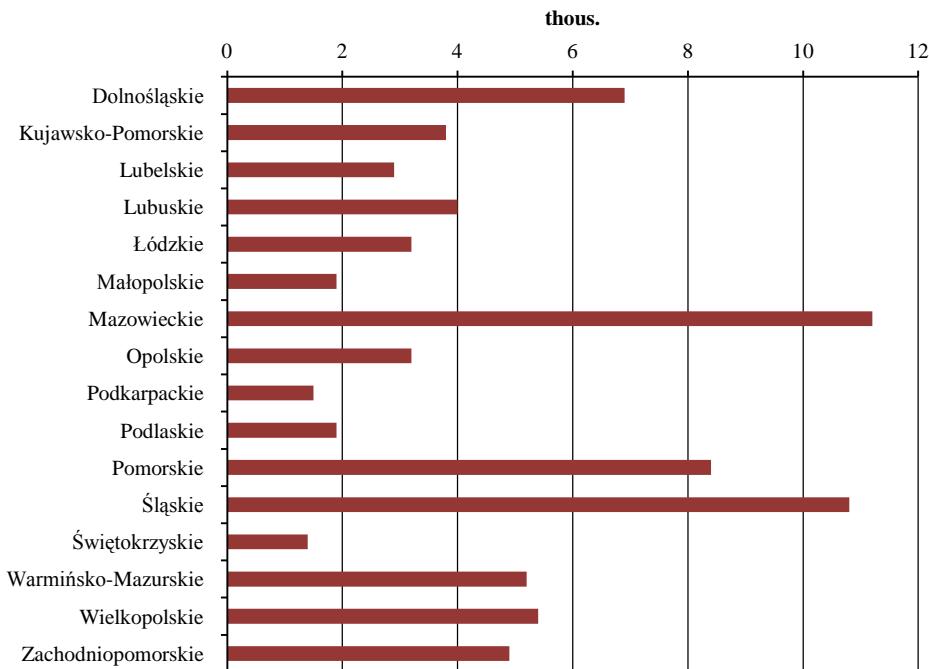

Value of purchase/sale transactions of residential premises by location in 2010

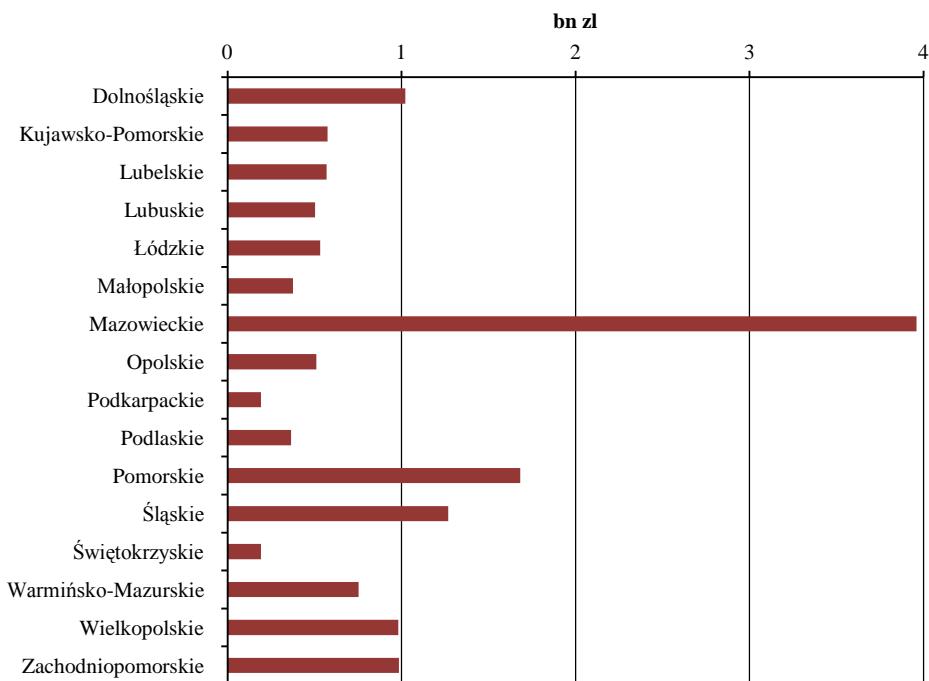

The residential premises turnover was allocated unevenly in country terms. The largest part of residential premises turnover, both as regards quantity and value of concluded transactions, took place in Mazowieckie Voivodship, where in 2010 nearly 15% of all purchase/sale transactions of residential premises in Poland were concluded in terms of quantity, and over 27% in terms of value. Apart from Mazowieckie Voivodship, Śląskie and Pomorskie Voivodships belonged to voivodships with the highest residential premises turnover. The lowest number of transactions was recorded in Świętokrzyskie, Podkarpackie, Podlaskie and Małopolskie Voivodships. These voivodships also indicated the lowest value of turnover.

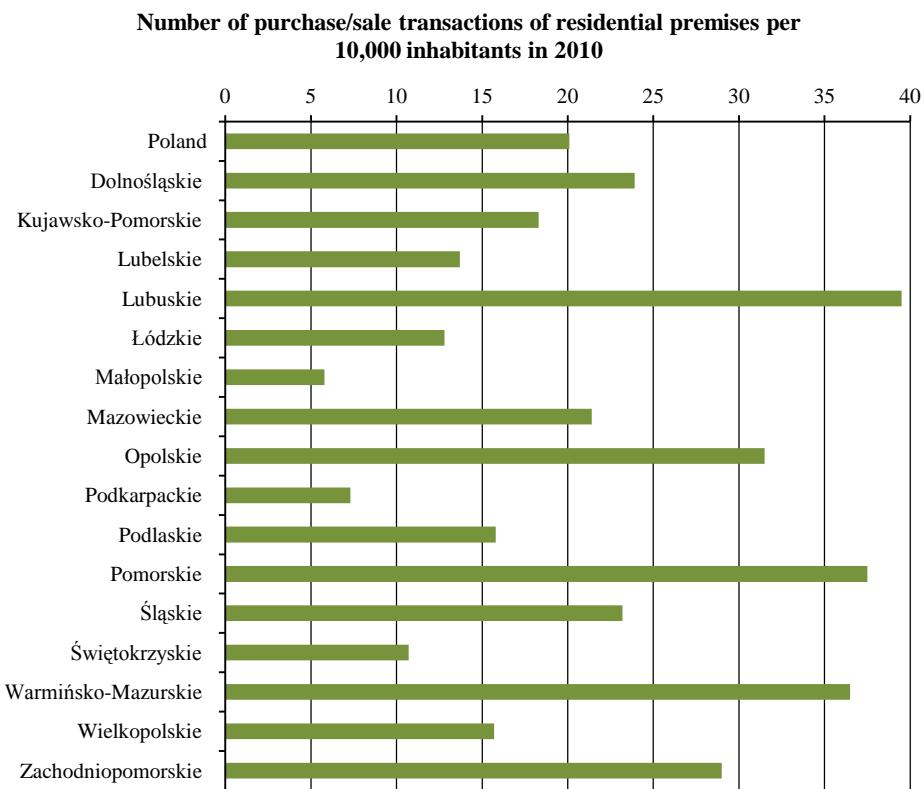

Number of purchase/sale transactions of residential premises in voivodships in 2010

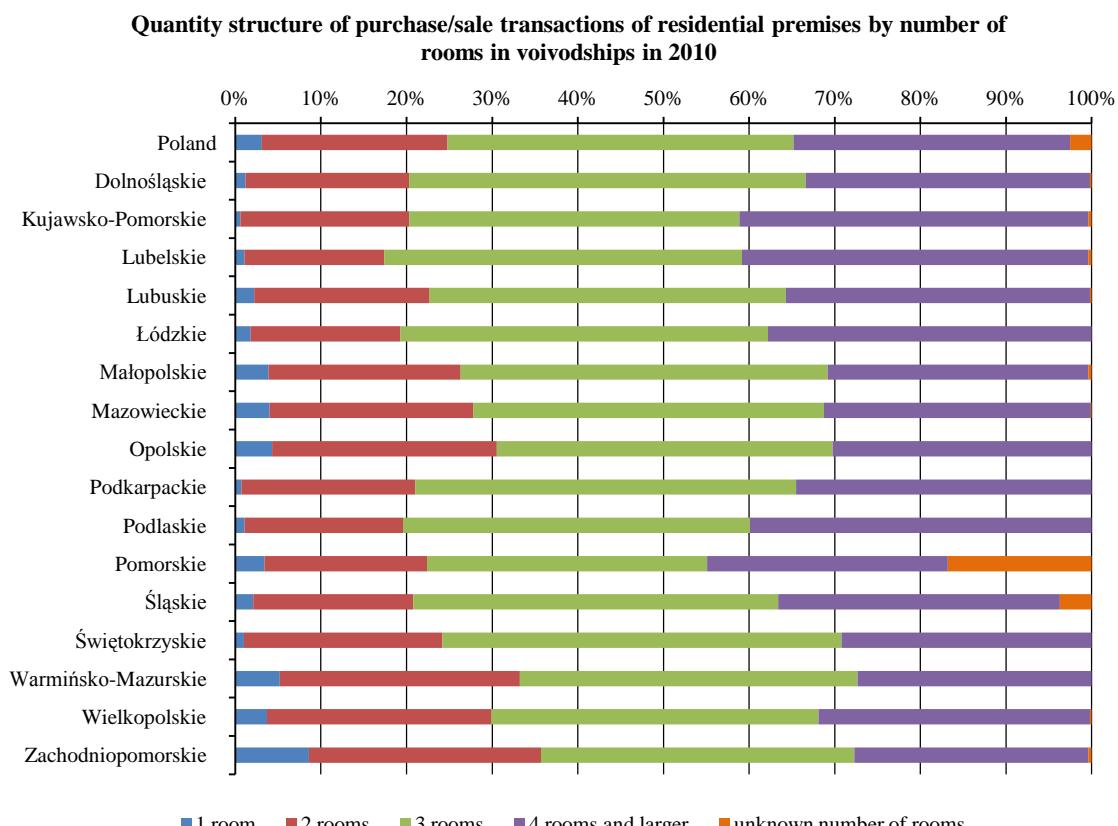

Value of purchase/sale transactions of residential premises in voivodships in 2010

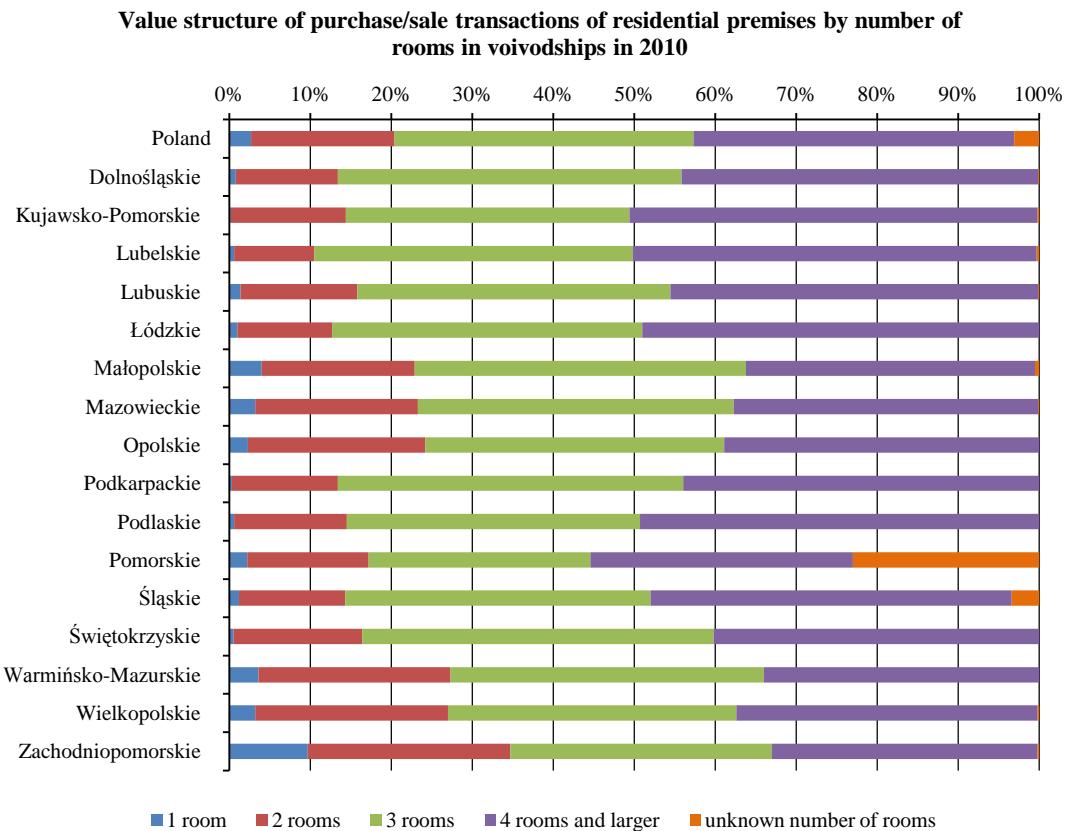

The number of purchase/sale transactions of residential premises per 10,000 inhabitants ranged from about 6 transactions in Małopolskie Voivodship to about 40 transactions in Lubuskie Voivodship.

As on the national scale, the sales of three-room, four-room and larger premises played the most significant role on the voivodship markets.

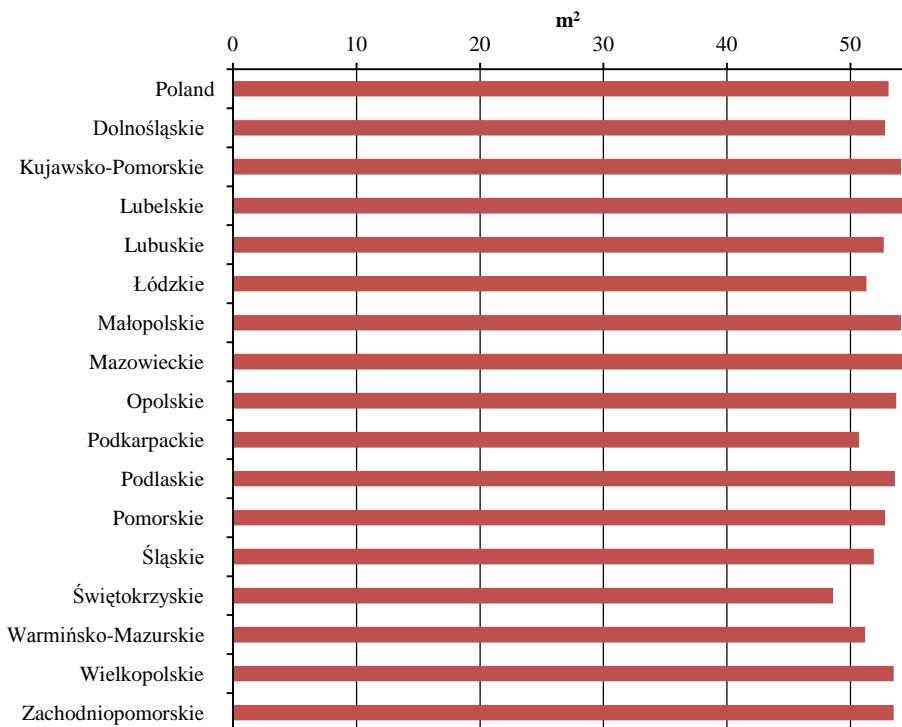

An average usable floor space of the residential premises constituting the object of turnover in 2010 amounted to 53.1 m². An average usable floor space of one-room premises sold in 2010 amounted to about 31 m². For two-room premises this parameter was almost 38 m², for three-room ones it was 49 m², whereas for four-room and larger premises it amounted to about 70 m². Dwellings sold in rural areas were usually slightly bigger than those sold in cities.

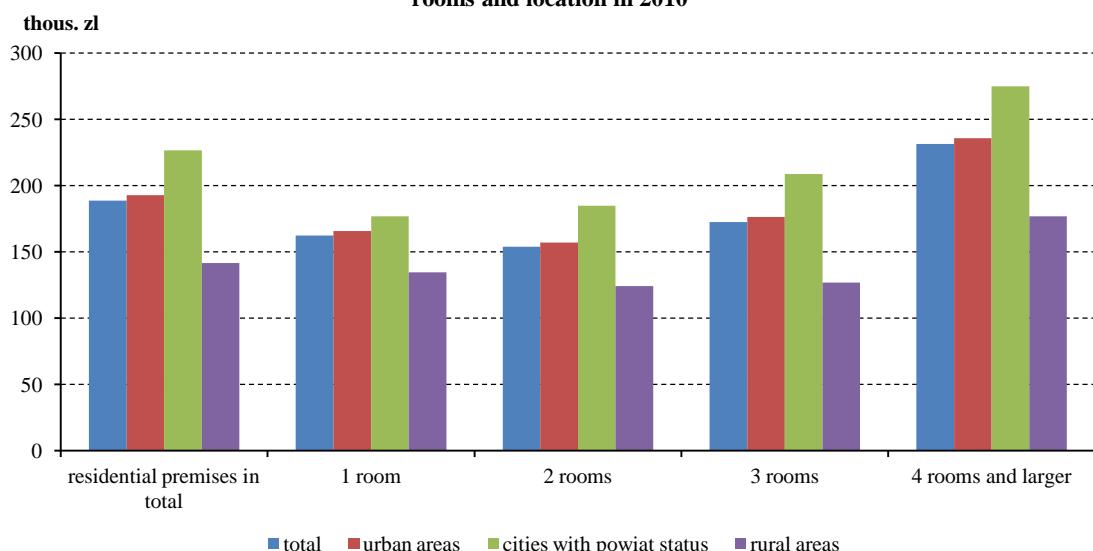

An average usable floor space of residential premises sold in 2010 ranged from 48.6 m² in Świętokrzyskie Voivodship to 56.2 m² in Lubelskie Voivodship.

**Average usable area of residential premises sold on voivodship markets
in 2010**

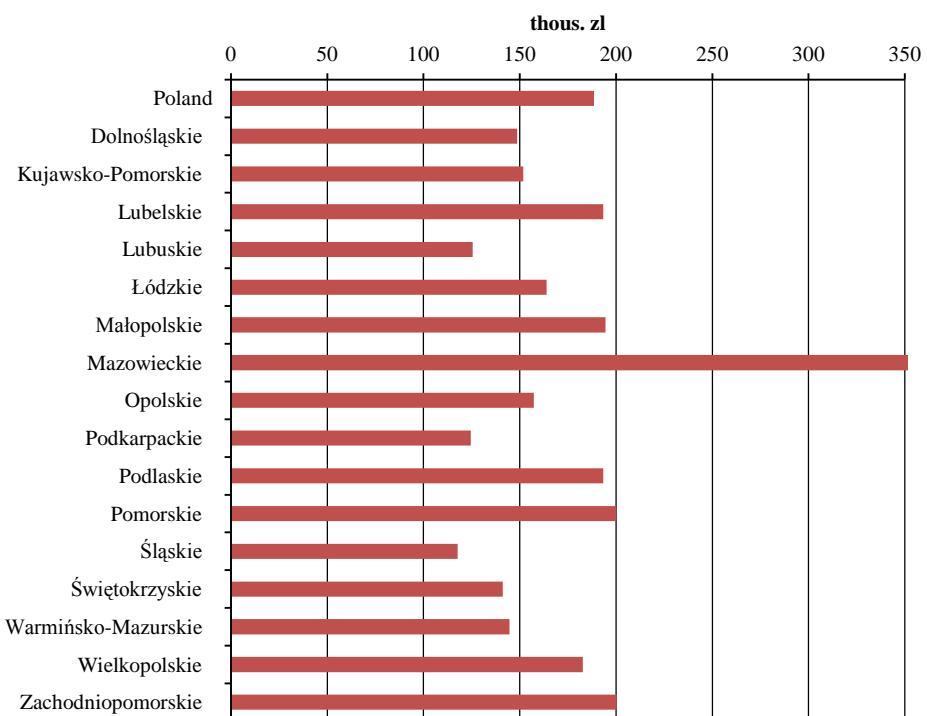

An average cost of a dwelling purchased amounted to 188.6 thous. zł. Average values of a single purchase/sale transaction of one-room residential premises exceeded 162 thous. zł, two-room residential premises accounted for about 154 thous. zł, for three-room premises exceeded 172 thous. zł, and the corresponding value of four-room ones – about 231 thous. zł. The transactions concluded in urban areas were by over 36% more expensive than those concluded in rural areas.

Average value of single purchase/sale transaction of residential premises by number of rooms and location in 2010

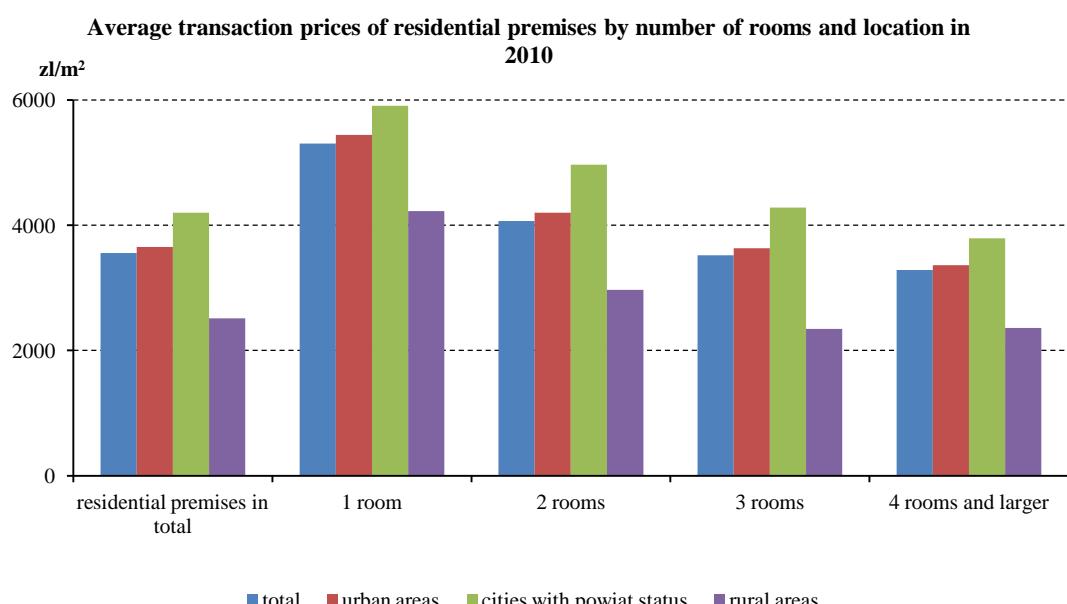

An average value of a single purchase/sale transaction of residential premises was the highest in Mazowieckie Voivodship, followed by Zachodniopomorskie and Pomorskie Voivodships. On average, the lowest amount of money was spent on dwelling purchase in Śląskie, Podkarpackie and Lubuskie Voivodships.

**Average value of single purchase/sale transaction of residential premises
by voivodships in 2010**

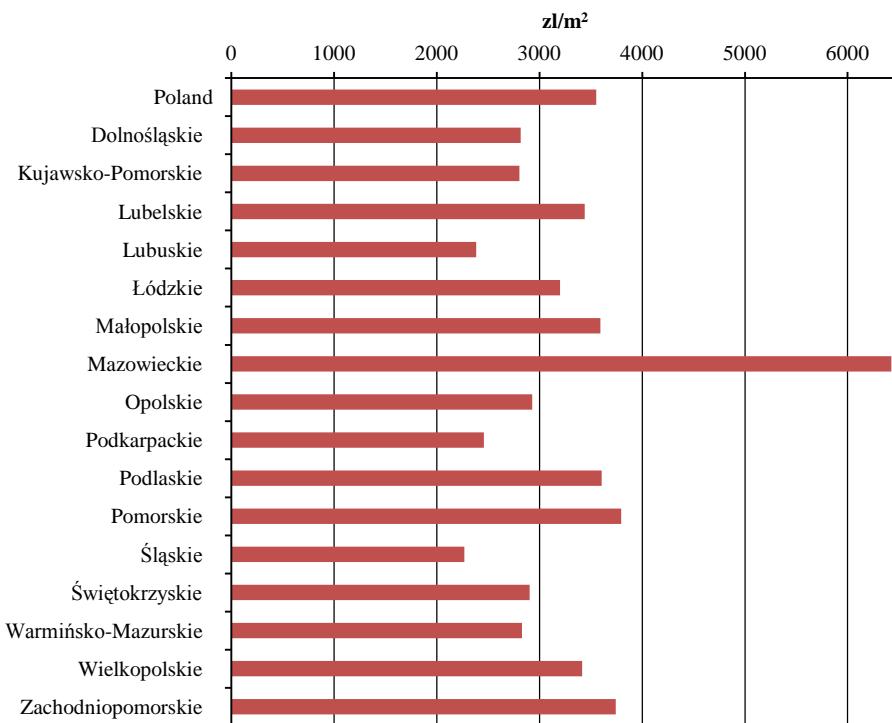

An average price for 1 m² of residential premises sold in 2010 amounted to 3,554 zł. As the area of residential premises grows, an average price for 1 m² of usable floor space drops. Prices for 1 m² of one-room residential premises are over 49% higher than an average price of residential premises in total. The prices of three-room premises are the closest to an average price, being only 1% lower than an average price of residential premises in total. Average prices for 1 m² of residential premises sold in cities were considerably higher (about 45%) than average prices obtained in rural areas.

Average prices of residential premises ranged from 2,268 zł per 1 m² in Śląskie Voivodship to 6,424 zł per 1 m² in Mazowieckie Voivodship. Relatively high prices were also recorded in Pomorskie Voivodship – 3,794 zł per 1 m² and in Zachodniopomorskie Voivodship – 3,744 zł per 1 m².

Average transaction prices of residential premises by voivodships in 2010

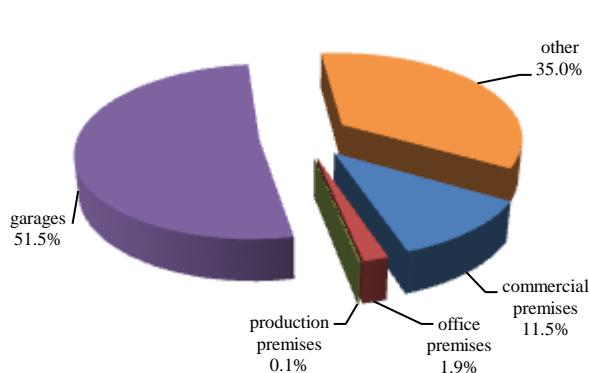

Non-residential premises

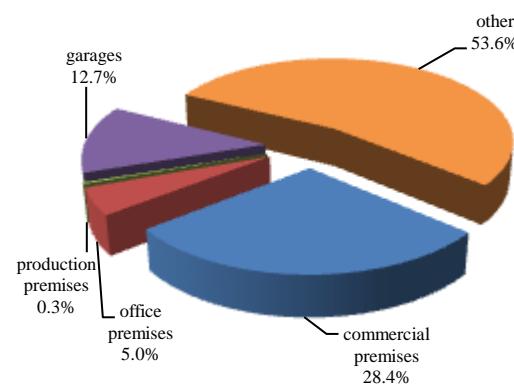

As in the preceding years, a relatively insignificant non-residential premises turnover was recorded also in 2010. 5.4 thousand non-residential premises purchase/sale transactions were registered, with the turnover value of about 0.6 bn zł. The area covered by such transactions amounted to about 0.3 million m².

Among the non-residential premises, garages were sold the most frequently, their share in the total number of all transactions involving non-residential premises amounting to 51.5%. A slightly lower share in the non-residential premises turnover, in terms of quantity, was recorded in the category of other premises – 35% and commercial premises – 11.5%. In terms of value, other non-residential premises were the most significant, accounting for 53.6% of the total turnover. It is a very broad category including business premises of various kinds other than commercial premises, office premises, production premises and garages. Among other things, storage premises, gastronomical premises, consulting rooms and studios of different types and premises designed for socio-cultural activities are classified to this category. Commercial premises were rated second, with a share at 28.4% in the non-residential premises turnover value, followed by garages, which reached 12.7% of turnover value. Production premises, in turn, indicated the lowest share in the size of turnover, both in terms of quantity and value.

Quantity structure of purchase/sale transactions of non-residential premises by type in 2010

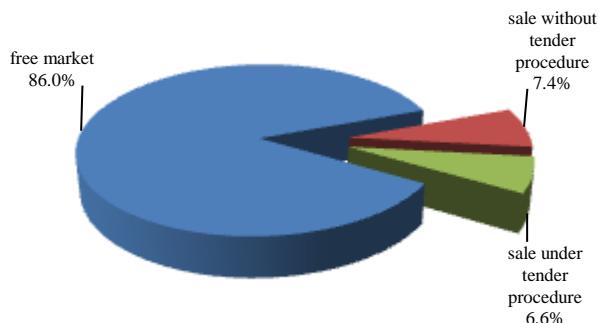

Value structure of purchase/sale transactions of non-residential premises in 2010

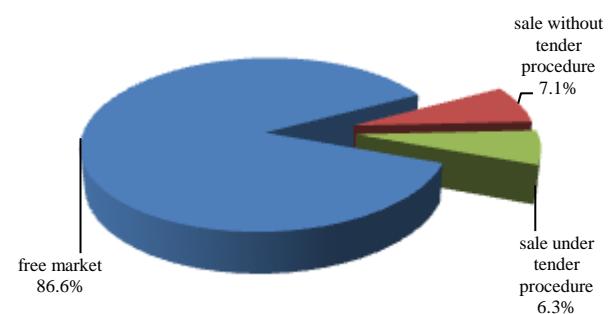

In 2010 sales on the free market constituted the predominating form of non-residential premises turnover, accounting for about 86% of all transactions both in terms of quantity and value.

Quantity structure of purchase/sale transactions of non-residential premises by turnover form in 2010

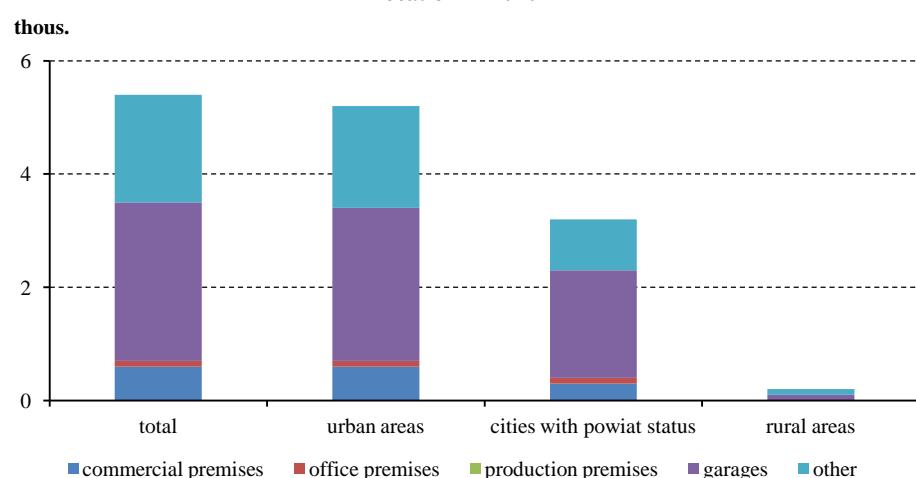

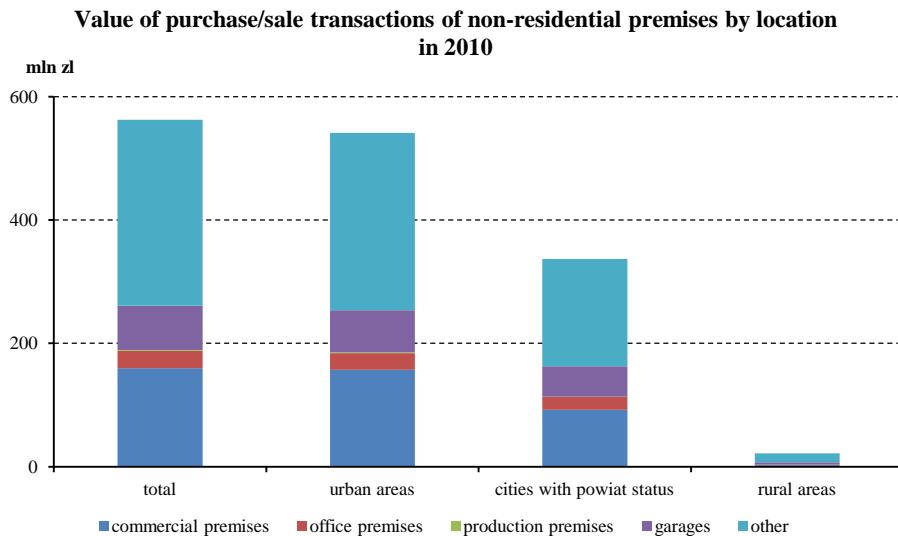

Value structure of purchase/sale transactions of non-residential premises by turnover form in 2010

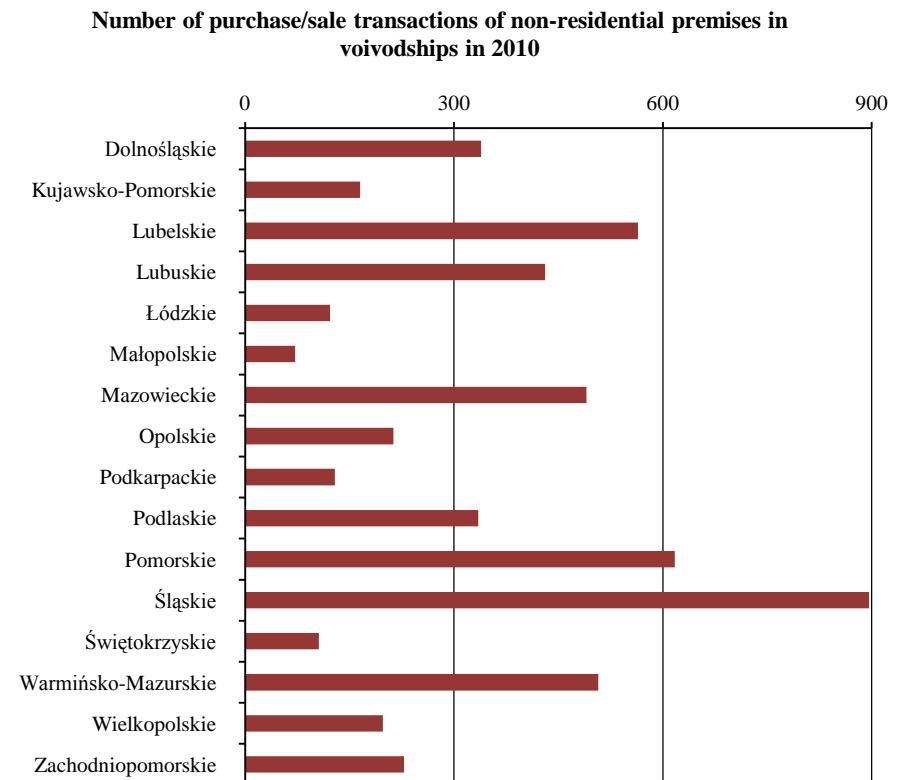

Non-residential premises, similar as residential premises, were mainly sold in urban areas. The non-residential premises turnover within the city borders accounted for more than 95% of the non-residential premises turnover in terms of quantity, and exceeded 96% in terms of value. An especially important role was played by markets in cities with powiat status, which in terms of quantity accounted for over 59% of all purchase/sale transactions of non-residential premises, and in terms of value about 60%.

Number of purchase/sale transactions of non-residential premises by location in 2010

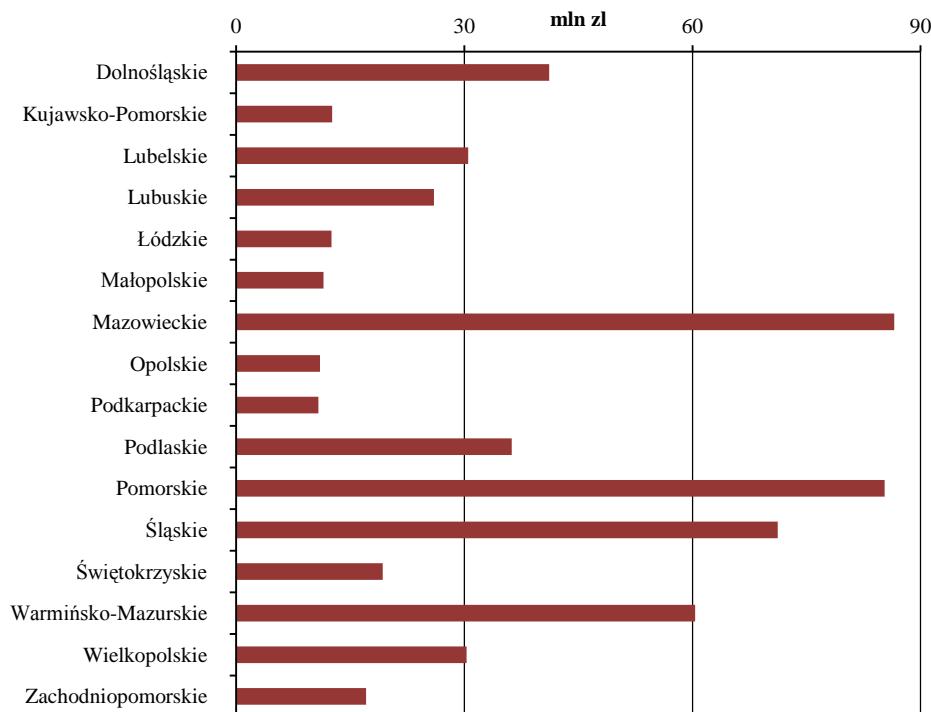

The largest number of transactions involving non-residential premises was concluded in Śląskie Voivodship, followed by Pomorskie and Lubelskie Voivodships. A total number of transactions concluded in these three voivodships constituted more than 38% of all transactions involving non-residential premises. In terms of value, the dominating role was attributed to Mazowieckie and Pomorskie Voivodships. The lowest number of transactions involving non-residential premises was recorded in Małopolskie, Świętokrzyskie, Łódzkie, and Podkarpackie Voivodships. In terms of value, the lowest non-residential premises turnover was observed in the following voivodships: Podkarpackie, Opolskie, Małopolskie, Kujawsko-Pomorskie and Łódzkie.

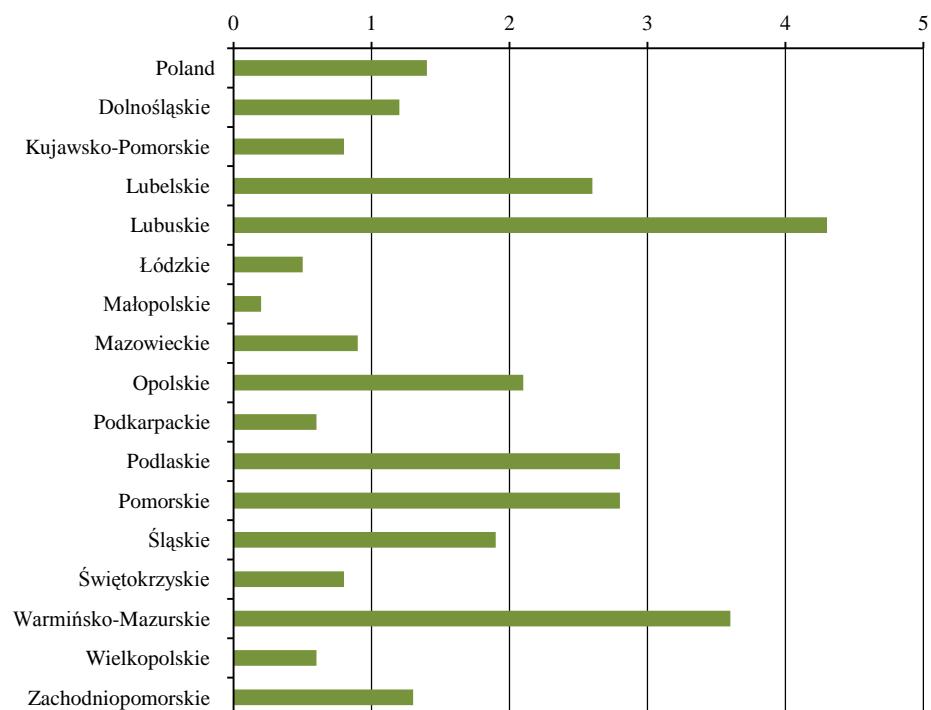

Value of purchase/sale transactions of non-residential premises in voivodships in 2010

Lubuskie, Warmińsko-Mazurskie, Pomorskie and Podlaskie Voivodships belonged to voivodships with the largest number of purchase/sale transactions of non-residential premises per 10,000 inhabitants.

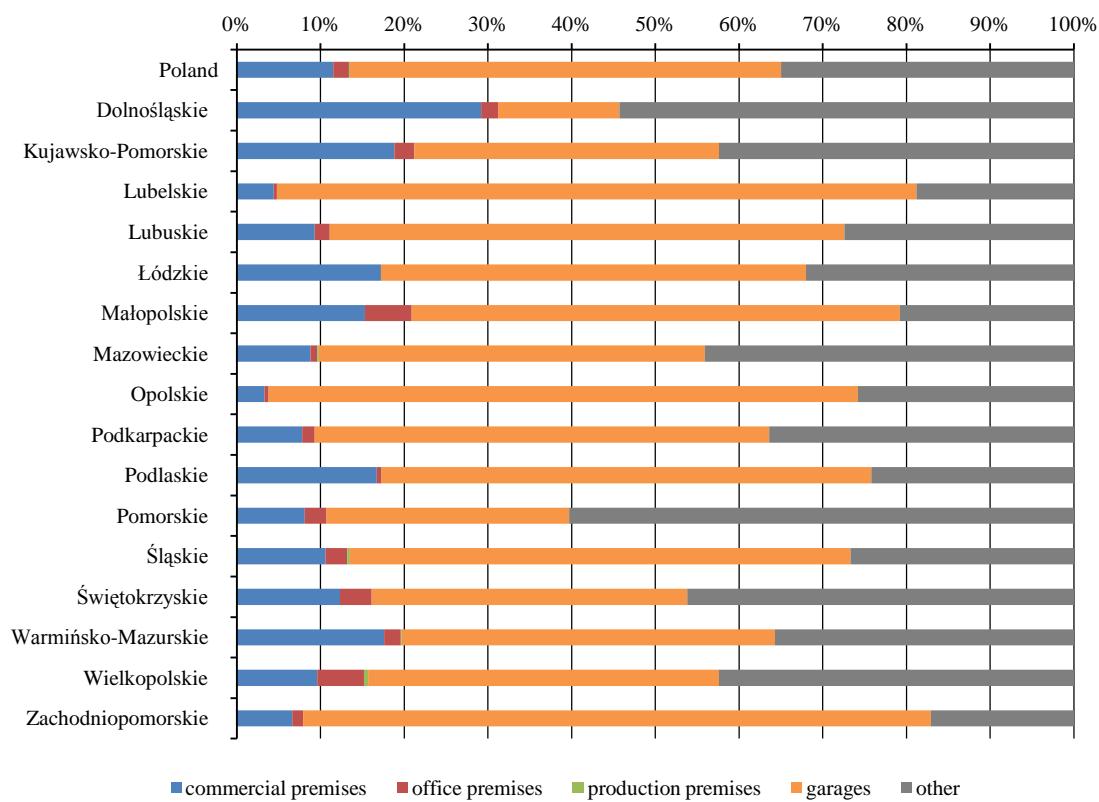

Number of purchase/sale transactions of non-residential premises per 10,000 inhabitants in 2010

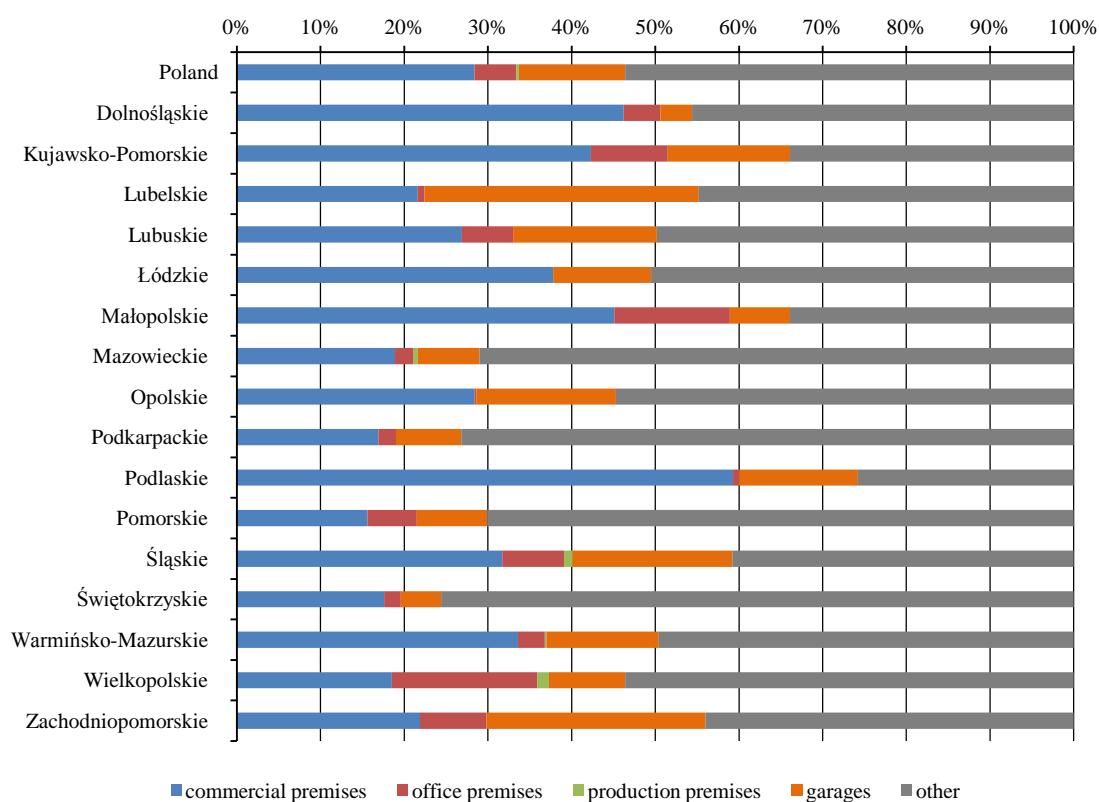

In terms of quantity, the garage turnover prevailed in most voivodships. Only in Dolnośląskie, Kujawsko-Pomorskie, Pomorskie, Świętokrzyskie and Wielkopolskie Voivodships the sales in the category of other premises prevailed. The purchase/sale transactions of production premises were recorded only in four

voivodships. In terms of value, the category of other premises prevailed in twelve voivodships. Commercial premises were the most significant in remaining four voivodships.

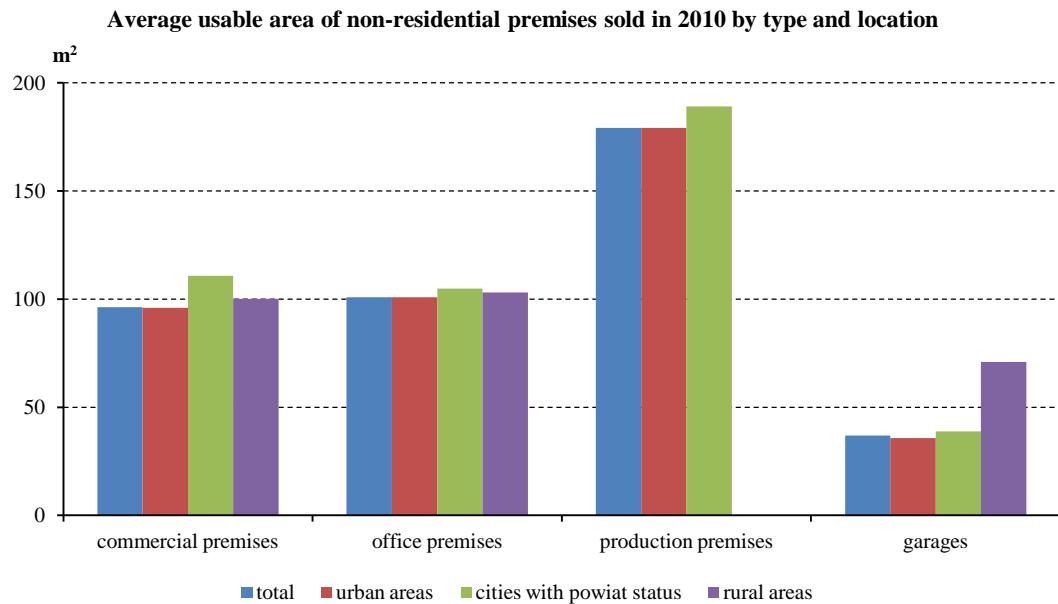

Quantity structure of purchase/sale transactions of non-residential premises by type in voivodships in 2010

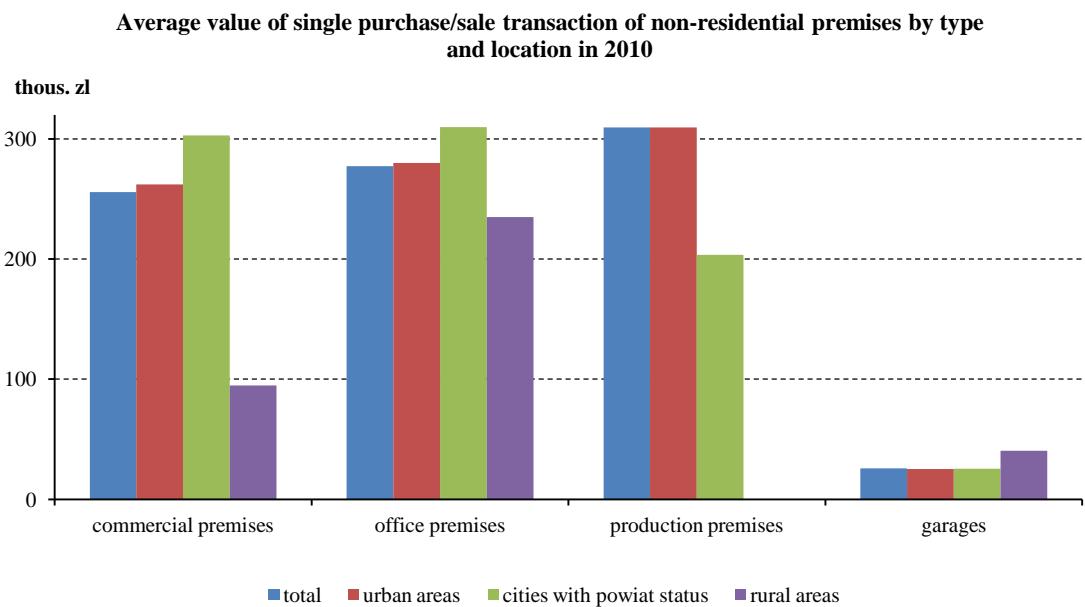

Value structure of purchase/sale transactions of non-residential premises by type in voivodships in 2010

The average area of commercial premises sold in 2010 amounted to about 96 m^2 , office premises – about 101 m^2 , production premises – more than 179 m^2 , and garages – nearly 37 m^2 .

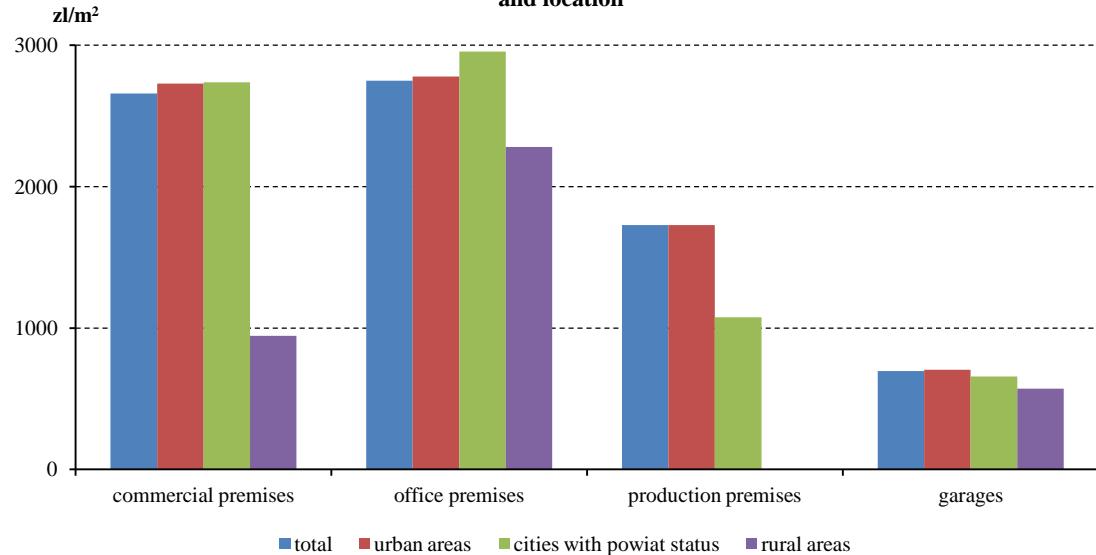

An average value of a single purchase/sale transaction of commercial premises amounted to 255.7 thous. zl, of office premises – 277.3 thous. zl, of production premises – 309.5 thous. zl, and of garages – 25.6 thous. zl.

In 2010, 1 m^2 of office areas was the most expensive; the average price amounted to 2,748 zl. An average transaction price of commercial premises amounted to 2,658 zl per 1 m^2 and of production premises to 1,727 zl per 1 m^2 . The lowest price per 1 m^2 , amounting to 696 zl, was attributed to garages. The prices obtained in rural areas were much lower than those obtained in cities. An average transaction price for 1 m^2 of usable floor space of commercial premises sold outside urban areas was by over 65% lower than an average price for cities, and in the case of office premises and garages – about 17%.

Average transaction prices of non-residential premises sold in 2010 by type and location

III. PURCHASE/SALE TRANSACTIONS OF BUILDINGS

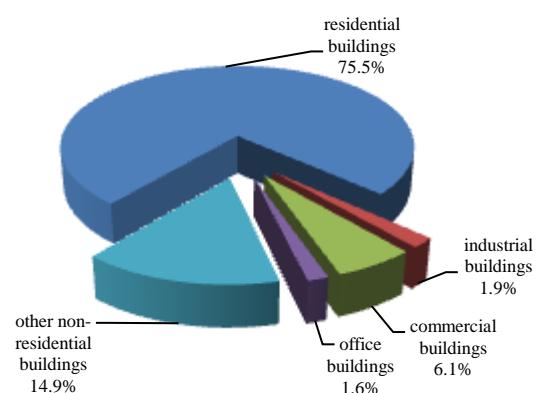

The number of purchase/sale transactions of premises registered in 2010 amounted to 674, accounting for 0.3% of all real estate transactions. The turnover value for this real estate category reached 164 million zł, which corresponded to 0.4% of the total real estate turnover. The usable floor space of the buildings constituting the object of the purchase/sales transactions amounted to 162 thousand m².

In the survey on the buildings turnover, a distinction was made between residential buildings, industrial buildings, commercial buildings, office buildings and other non-residential buildings. The category of other non-residential buildings is very broad and diversified, and it covers, among other things, hospitals and health care buildings, education, science and culture buildings, farm buildings, transport and telecommunication buildings, tanks, silos and storage buildings. In 2010, transactions involving residential buildings prevailed on the building real estate market, both in terms of quantity and value. The lowest turnover was registered in the case of industrial and office buildings.

Quantity structure of purchase/sale transactions of buildings in 2010

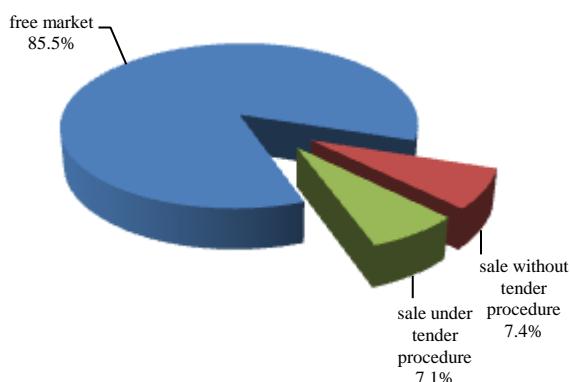

Value structure of purchase/sale transactions of buildings in 2010

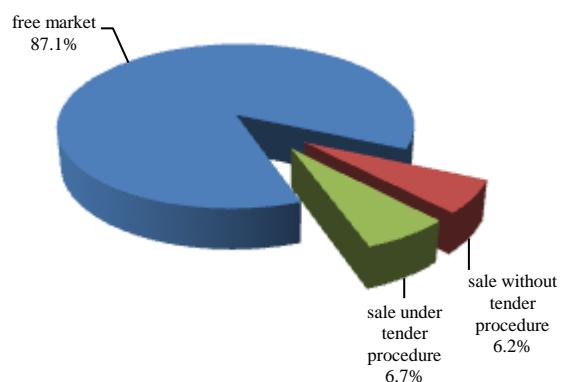

In 2010 sales on the free market constituted the predominating form of building real estate turnover, both in terms of quantity and value, accounting respectively for 85.5% and 87.1% of all transactions. The other two forms of sale (i.e. sale under tender procedure and sale without tender procedure) had a comparable share in the buildings turnover.

Quantity structure of purchase/sale transactions of buildings by turnover form in 2010

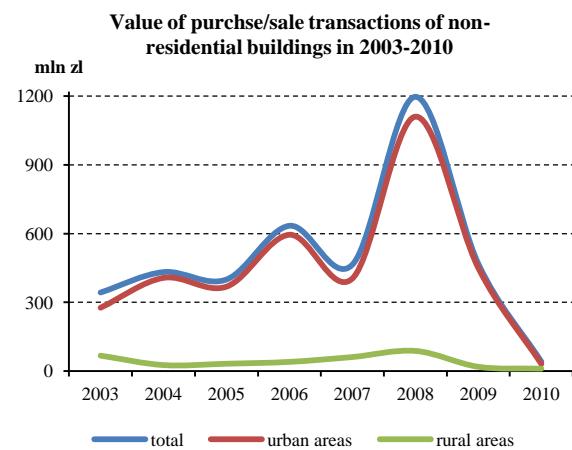

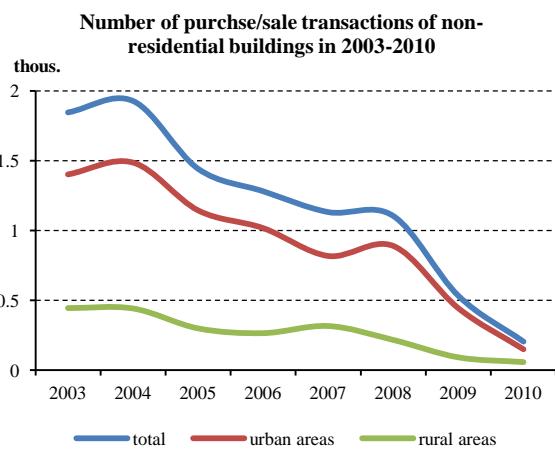

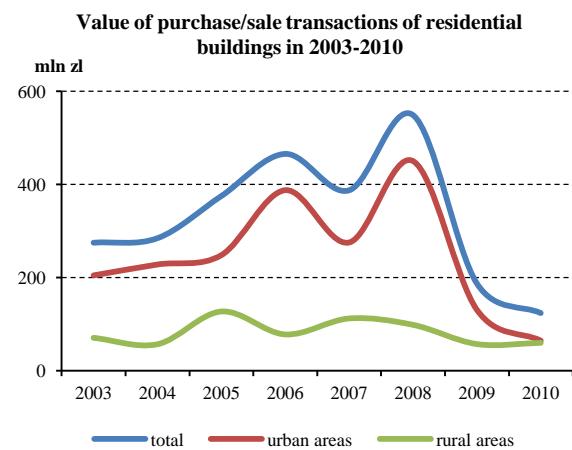

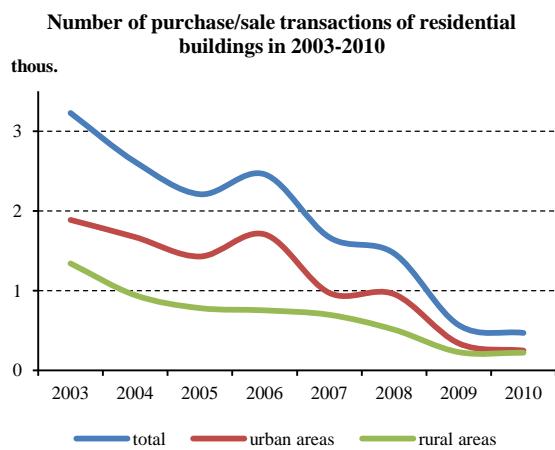

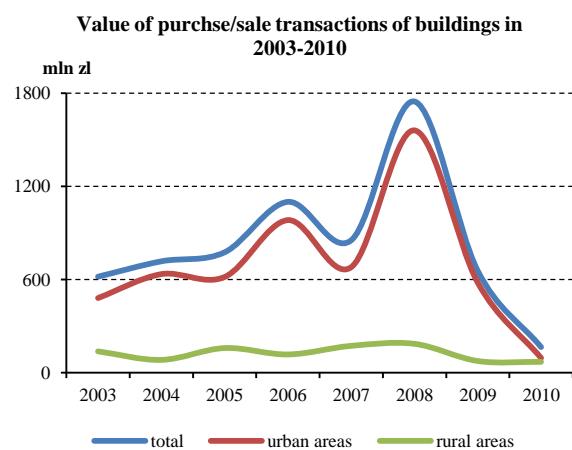

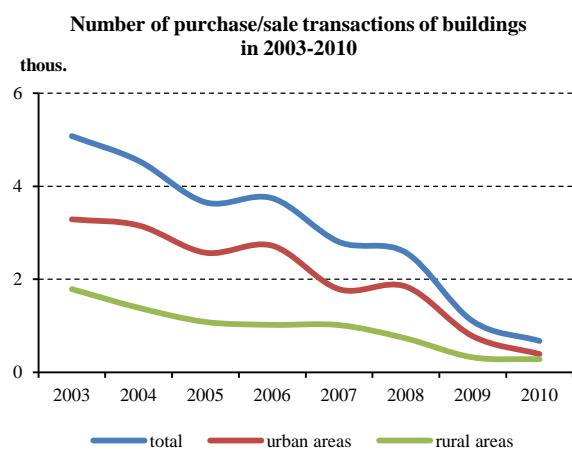

Value structure of purchase/sale transactions of buildings by turnover form in 2010

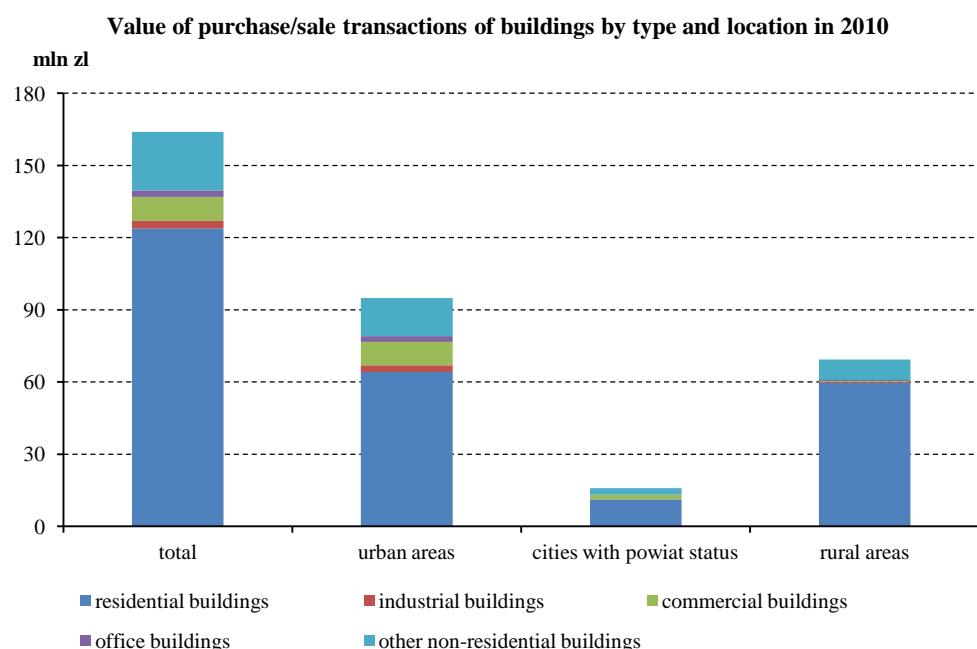

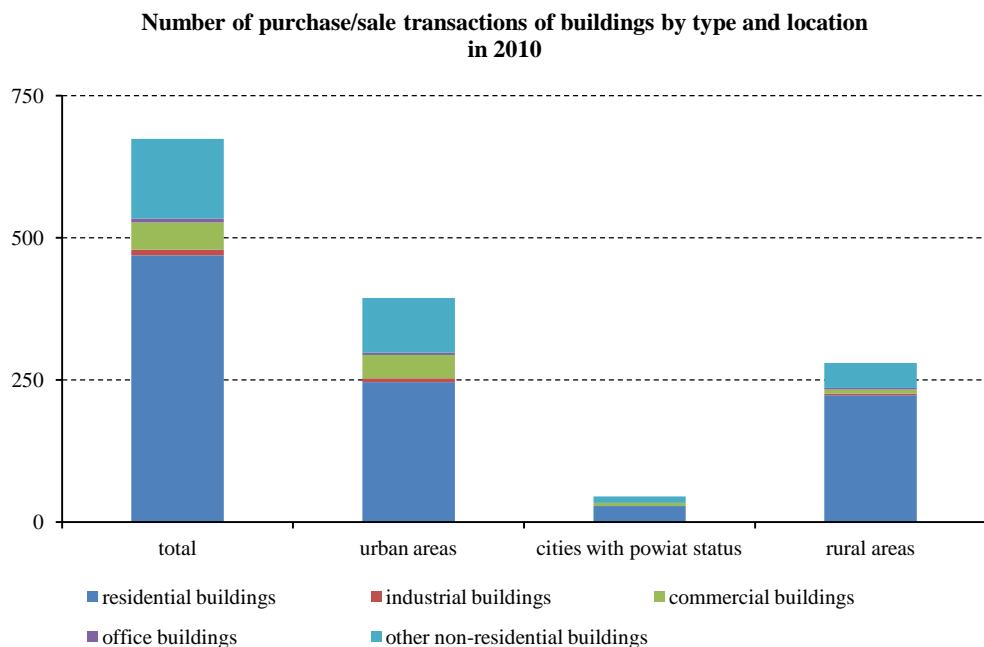

In the period of 2003-2010 a decline in the number of purchase/sale transactions of buildings was observed with a slight revival in 2006, when a growth of 2.4% in the number of transactions, in relation to the preceding year, was recorded, resulting from a growth in the sales of residential buildings in urban areas. Annual

sale value of buildings was growing up to 2006, when a growth of 42% in relation to the year 2005 was recorded. The year 2007 brought a decline in the purchase/sale transactions of buildings, amounting to 22.5%. In 2008, more than a two-fold increase occurred in the value of transactions concluded, accompanied by a simultaneous drop, exceeding 8%, in the number of transactions. Starting with 2009, a decline in the buildings turnover has been observed, both in terms of quantity and value. In 2010 the number of the purchase/sale transactions of building real estate registered in 2010 accounted for about 61% of the transactions recorded a year before, and for only about 13% of the number of transactions in 2003. A decline in the buildings turnover in terms of value was also observed in 2010. The value of buildings sold in 2010 was by 74.9% lower than the value of buildings sold in 2009. The declines in the buildings turnover, observed in 2010, took place both in urban areas and outside the city borders.

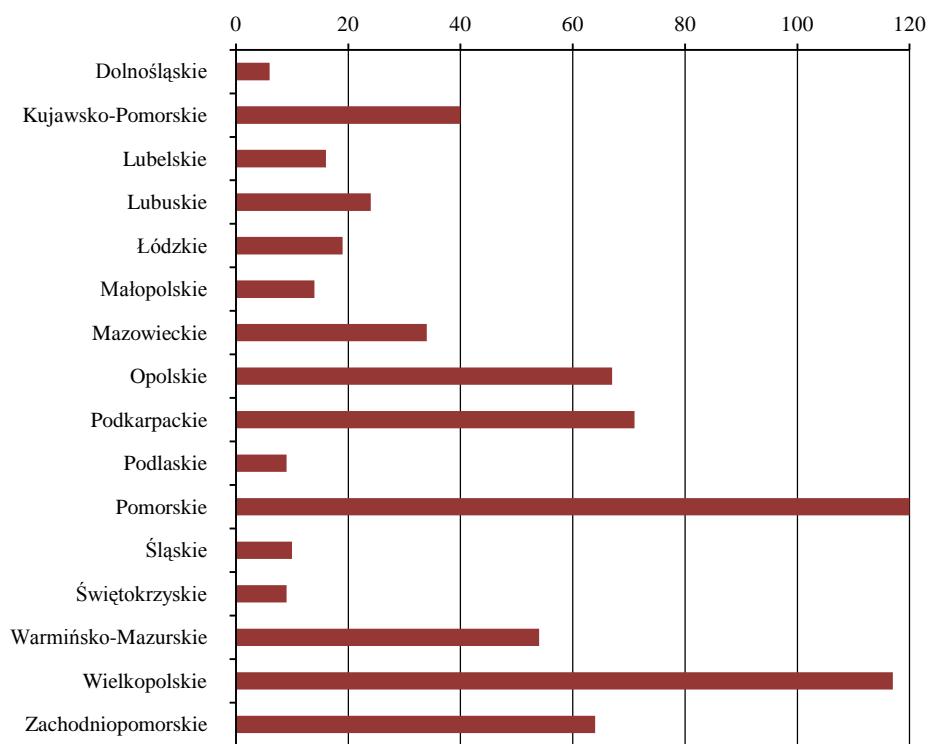

In 2010, the vast majority of the building real estate turnover, both in terms of quantity and value, took place within the city borders. The turnover with buildings located outside the city borders constituted 41.5% of the total number of purchase/sale transactions of buildings, and 42.2% of their value. Also in the case of each of the buildings categories under analysis, the majority of transactions, both in terms of quantity and value, took place within the city borders. Especially the commercial buildings turnover was almost entirely connected with urban areas (85.4% in terms of quantity and 97.4% in terms of value).

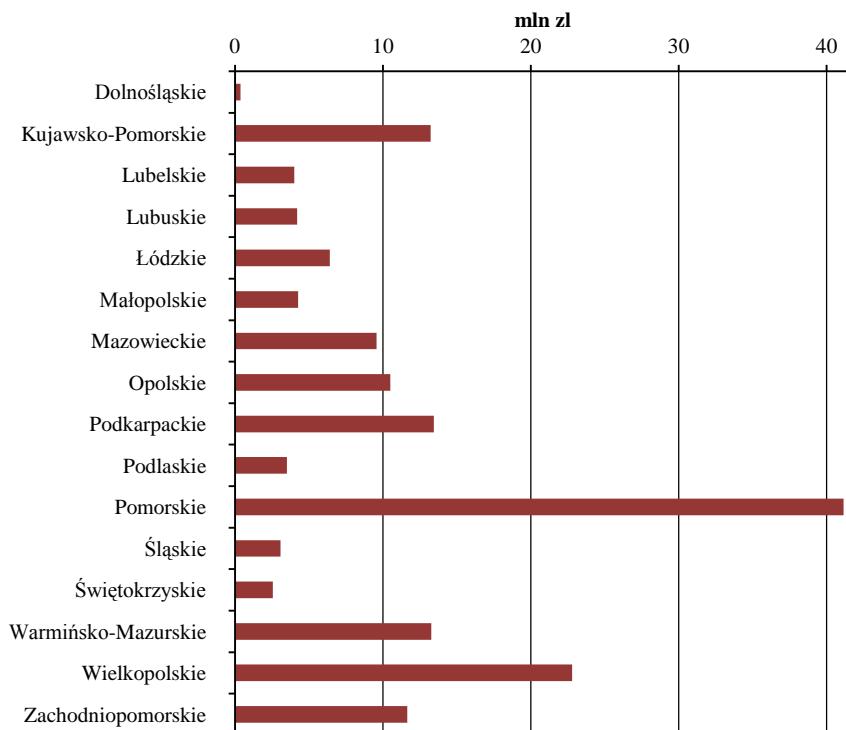

The largest building real estate turnover, both in terms of quantity and value, was recorded in Pomorskie and Wielkopolskie Voivodships. These two voivodships accounted for more than 35% of all transactions in this real estate category in Poland. The lowest building real estate turnover was recorded in Dolnośląskie, Podlaskie, Świętokrzyskie and Śląskie Voivodships.

Number of purchase/sale transactions of buildings in voivodships in 2010

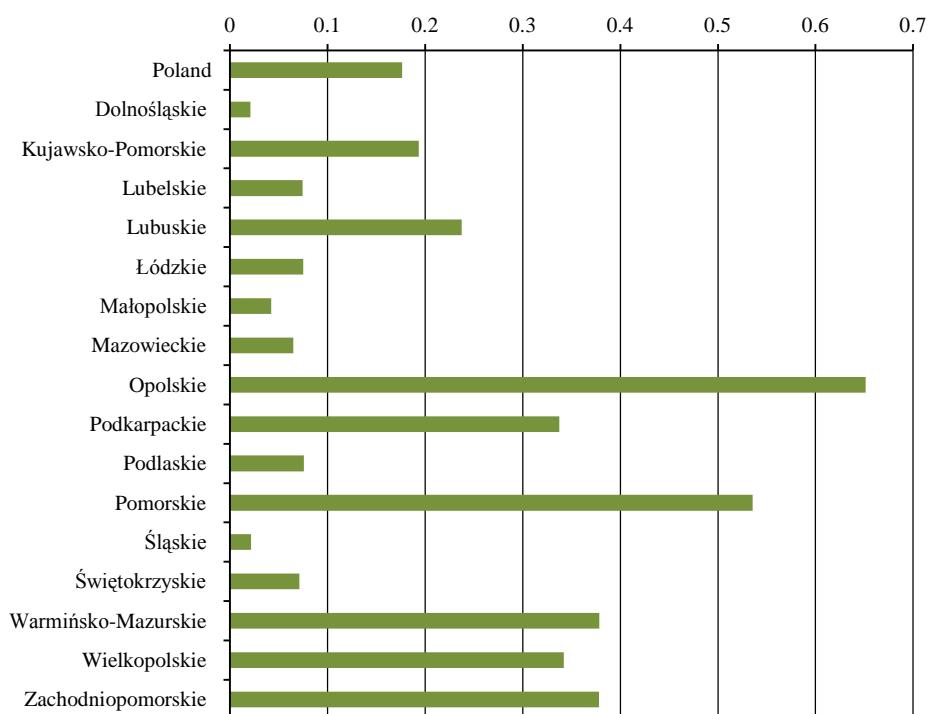

Value of purchase/sale transactions of buildings in voivodships in 2010

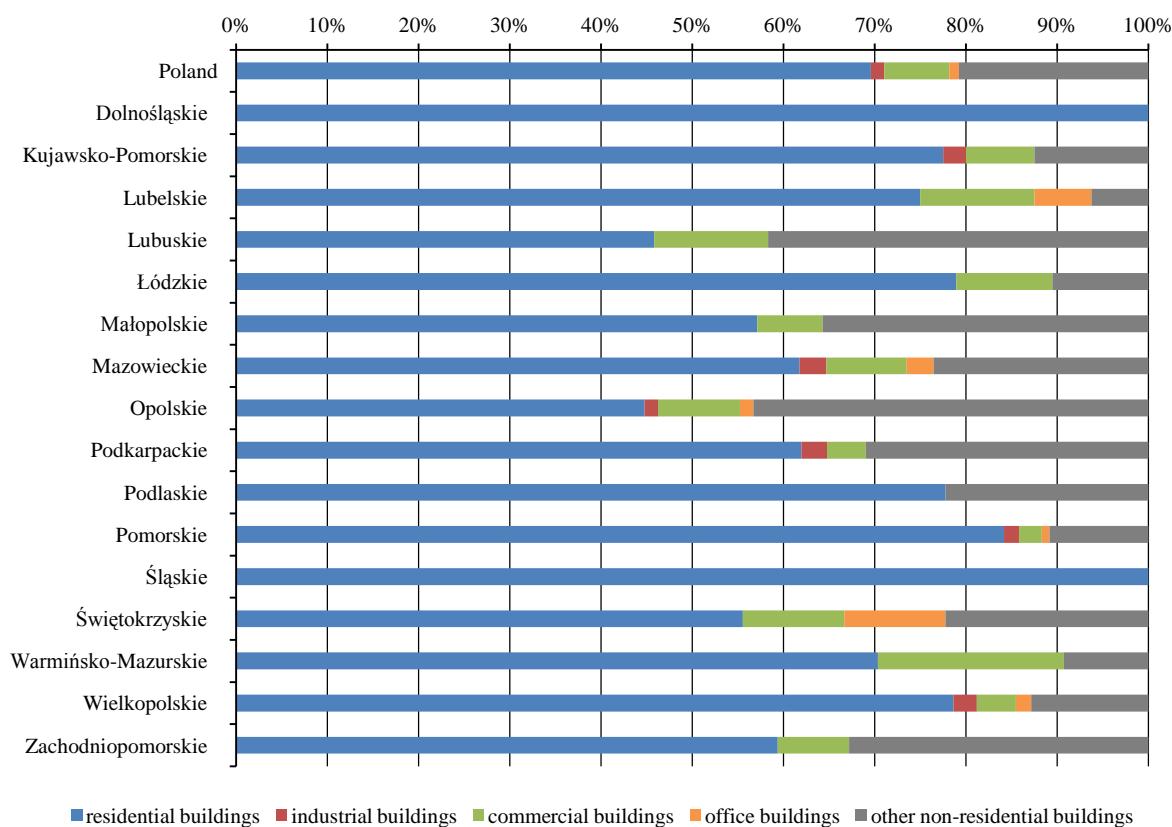

Opolskie, Pomorskie, Warmińsko-Mazurskie and Zachodniopomorskie Voivodships belonged to voivodships with the largest number of purchase/sale transactions of buildings per 10,000 inhabitants. The lowest number of transactions per 10,000 inhabitants was observed in Dolnośląskie and Śląskie Voivodships.

Number of purchase/sale transactions of buildings per 10,000 inhabitants in 2010

Similar as on the national scale, the sales of residential buildings also prevailed on voivodship markets. Sale of industrial buildings only occurred in six voivodships (Kujawsko-Pomorskie, Mazowieckie, Opolskie, Podkarpackie, Pomorskie and Wielkopolskie). Similarly, the sale of office buildings was recorded in six voivodships (Lubelskie, Mazowieckie, Opolskie, Pomorskie, Świętokrzyskie and Wielkopolskie).

Quantity structure of purchase/sale transactions of buildings by type in voivodships in 2010

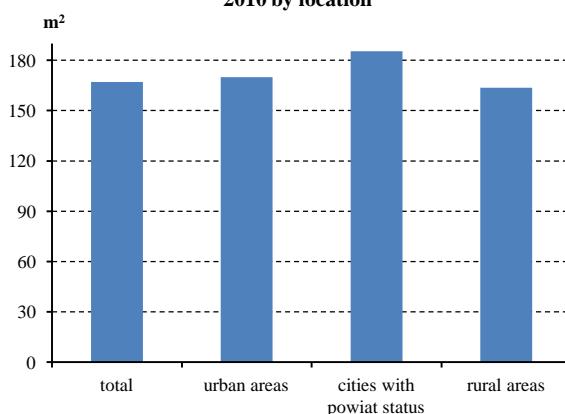

Value structure of purchase/sale transactions of buildings by type in voivodships in 2010

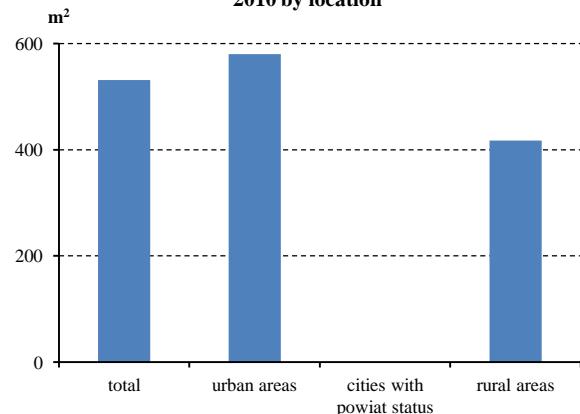

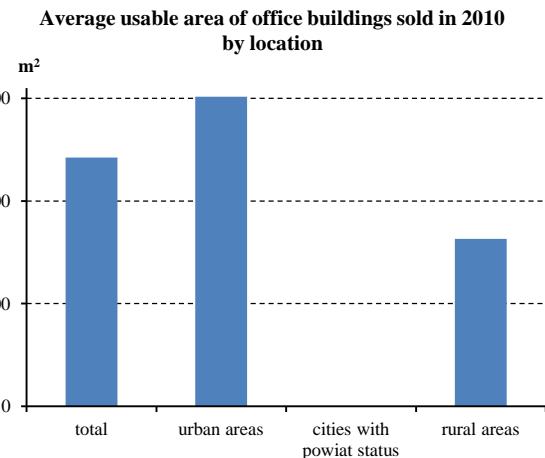

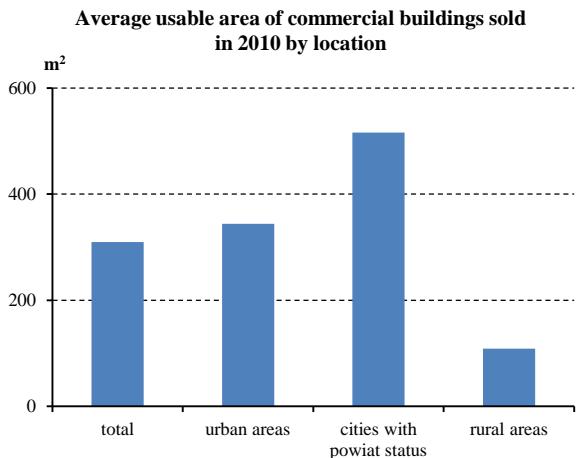

An average usable area of residential buildings sold in 2010 amounted to 167 m². For industrial buildings an average usable area exceeded 531 m², for commercial buildings it amounted to about 310 m², while for office buildings - to more than 484 m². Buildings sold in urban areas were usually larger than those sold outside the city borders. It is also worth noticing that residential and commercial buildings sold in cities with powiat status were larger than those sold in other urban areas. Sales of industrial buildings and office buildings in cities with powiat status were not recorded.

Average usable area of residential buildings sold in 2010 by location

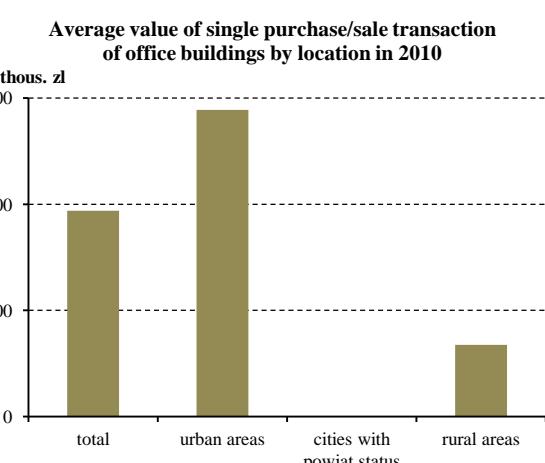

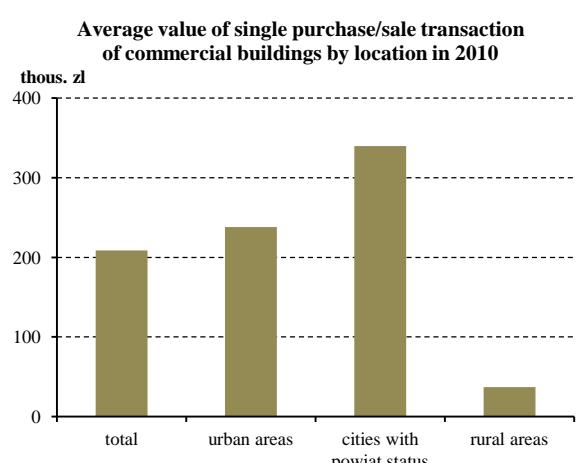

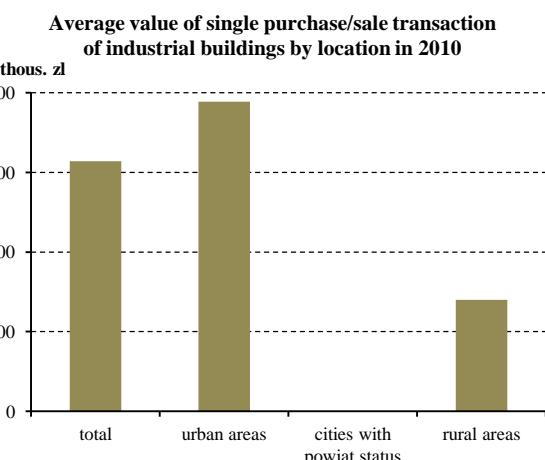

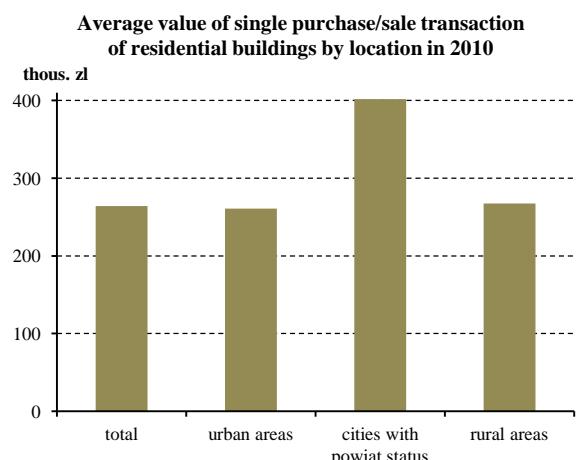

Average usable area of industrial buildings sold in 2010 by location

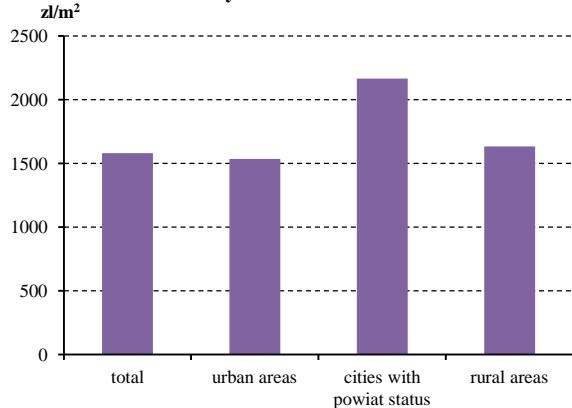

An average value of a single purchase/sale transaction concluded in 2010 amounted for residential buildings to 264 thous. zł, for industrial buildings to 314 thous. zł, for commercial buildings to 208.7 thous. zł, and for office buildings to 387.9 thous. zł. In the case of commercial buildings, industrial buildings and office buildings, the transactions concluded in cities were more expensive than those concluded outside the city borders, which was influenced by larger usable floor space and usually higher prices for 1 m² of usable floor space of the buildings located within the city borders. Only in the case of residential buildings the average value of a single transaction concluded in the city areas was approximate to the average value of transactions concluded outside the city borders.

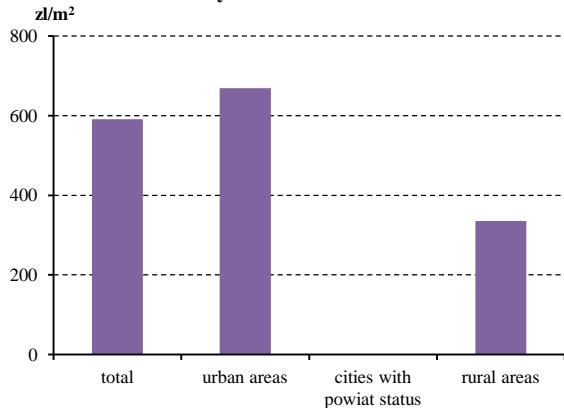

An average price for 1 m² of usable area of residential buildings was at the level of 1,581 zl, for industrial buildings 591 zl, for commercial buildings 674 zl, and for office buildings 801 zl. In the case of industrial buildings, commercial buildings and office buildings, average prices for 1 m² of usable area in urban areas were higher than the average prices obtained in rural areas. A reverse correlation was observed in the case of residential buildings.

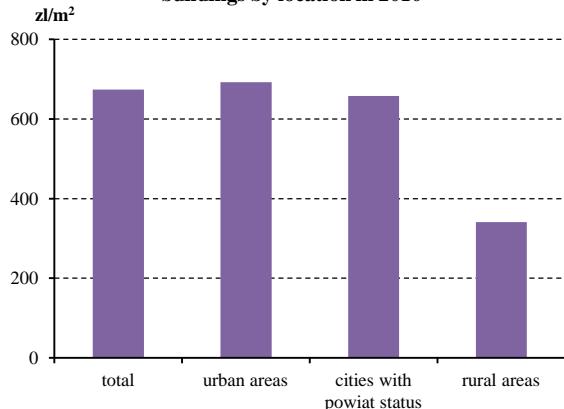

Average transaction prices of residential buildings by location in 2010

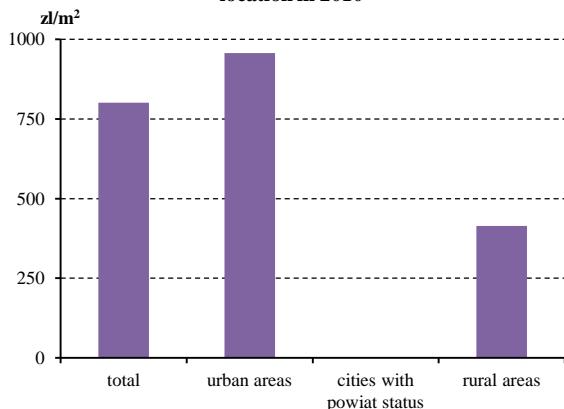

Average transaction prices of industrial buildings by location in 2010

Average transaction prices of commercial buildings by location in 2010

Average transaction prices of office buildings by location in 2010

IV. PURCHASE/SALE TRANSACTIONS OF BUILT-UP PROPERTIES

The number of purchase/sale transactions of built-up properties registered in 2010 amounted to about 46.5 thousand, accounting for 18.1% of all real estate transactions. The value of the built-up properties turnover reached 9.2 bn zł, which corresponded to 27.5% of the total real estate turnover. The cadastral area of the built-up properties constituting the object of purchase/sale transactions exceeded 50.4 million m².

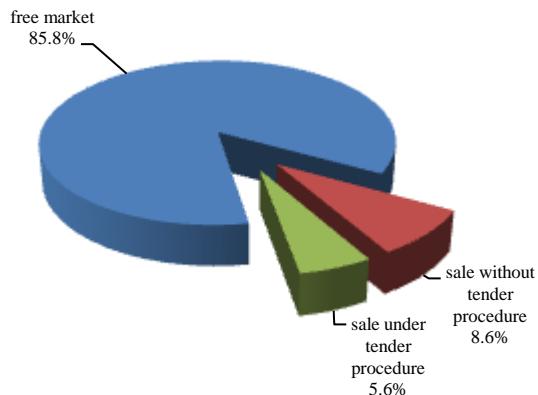

In the survey on the built-up properties turnover, a distinction was made between the properties built up with residential buildings, built-up agricultural land, and other built-up properties, i.e. built up with buildings having other purposes than farmstead and residential ones. In 2010 the predominating role was attributed to the properties built up with residential buildings, accounting for more than a half of the built-up properties turnover, both in terms of quantity and value (54.8% and 67.2%, respectively). Other built-up properties constituted the second category in terms of significance, accounting for 23.8% of the market in terms of quantity, and for 20.0% in terms of value. The smallest part of the turnover of built-up properties, both in terms of quantity and value, constituted built-up agricultural land (respectively 21.4% and 12.8% of the built-up properties turnover).

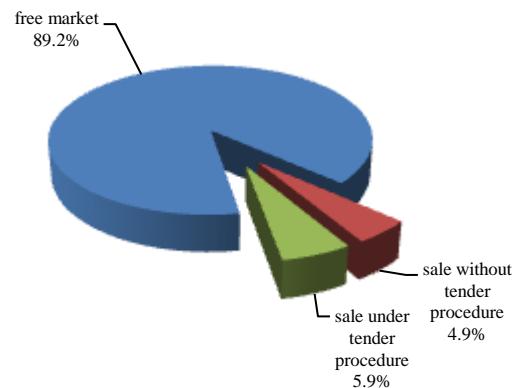

Within the built-up properties turnover, the ownership title was the most frequently occurring type of land ownership right. Within the structure of quantity, it accounted for 99.5% of all purchase/sale transactions of built-up properties, and within the structure of value for 99.6%.

In 2010 sales on the free market constituted the predominating form of built-up properties turnover, accounting for 85.8% of total number of transactions and 89.2% of total turnover value of this type of properties. Tender sales constituted a relatively insignificant part of the built-up properties sales. In terms of quantity, these sales accounted for only 5.6% of the built-up properties turnover, and in terms of value for 5.9%.

Quantity structure of purchase/sale transactions of built-up properties by turnover form in 2010

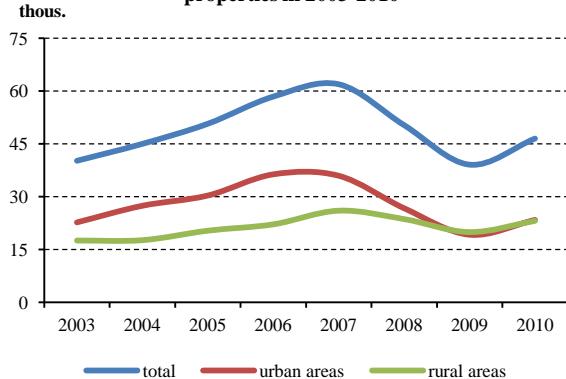

Value structure of purchase/sale transactions of built-up properties by turnover form in 2010

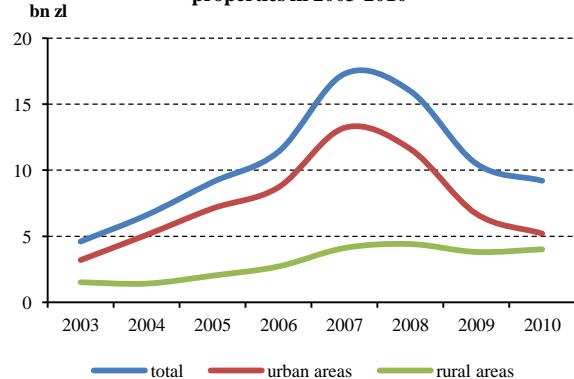

In 2003-2007 a constant growth in both the number and value of the purchase/sale transactions of built-up properties was observed. After that, in the two subsequent years a considerable decline of the turnover in this real estate category was recorded. In 2010 a growth in the number of transactions involving built-up properties was observed with simultaneous continuing drop in the value of transactions concluded. The number of transactions involving built-up properties in 2010 was by 19% higher in relation to the preceding year, and their value dropped by over 12%. The growth in number of transactions observed in 2010 concerned each of market segments. The highest growth in the number of transactions was recorded in the segment of the properties built up with residential buildings, by 28.8% in relation to the preceding year. In terms of value, in the case of properties built-up with residential buildings and built-up agricultural land a growth in turnover was observed, while in the case of other built-up properties a high decline was observed, amounting to 54.6%.

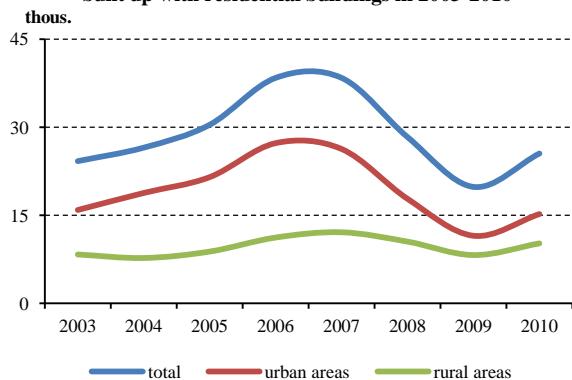

Number of purchase/sale transactions of built-up properties in 2003-2010

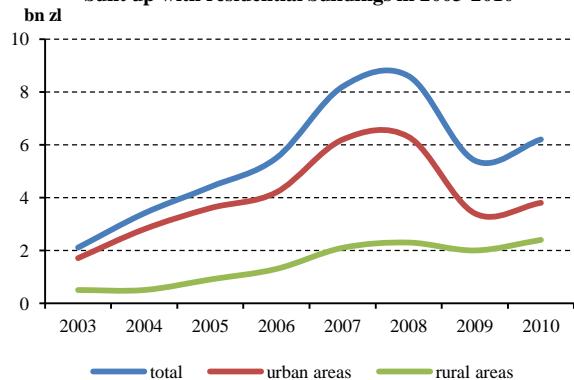

Value of purchase/sale transactions of built-up properties in 2003-2010

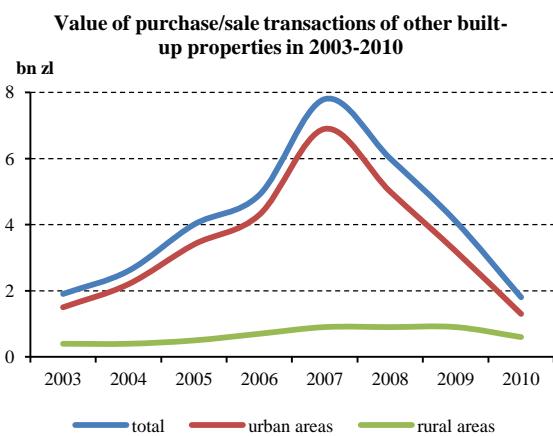

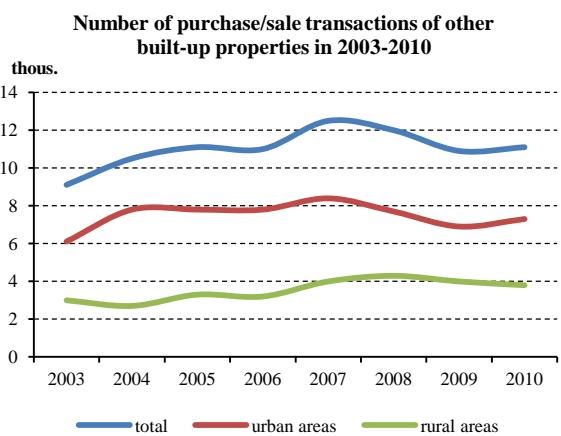

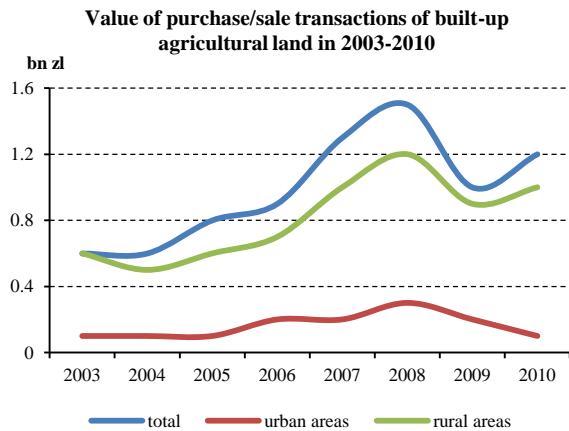

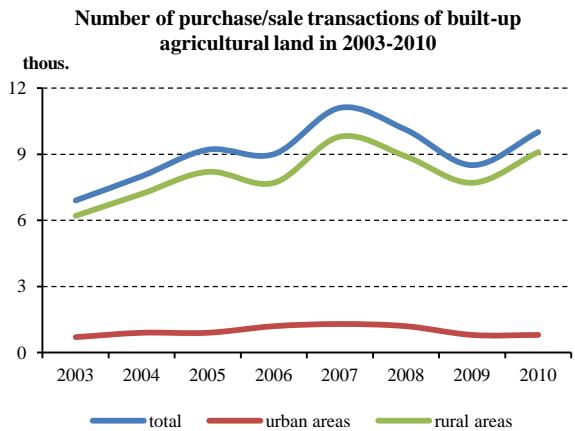

Number of purchase/sale transactions of properties built up with residential buildings in 2003-2010

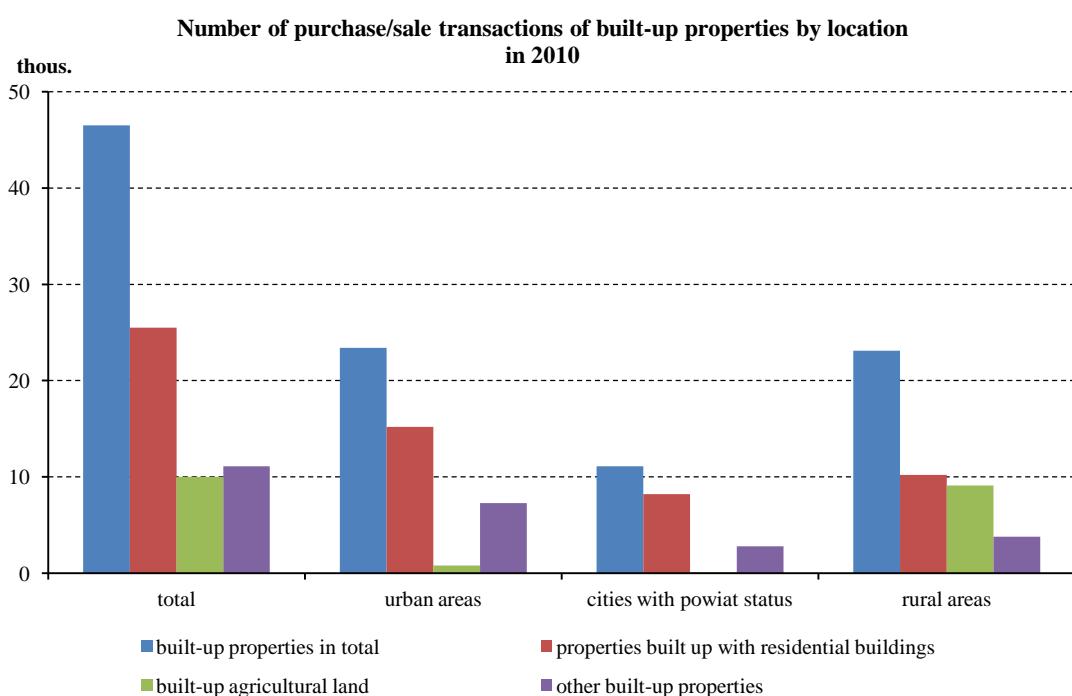

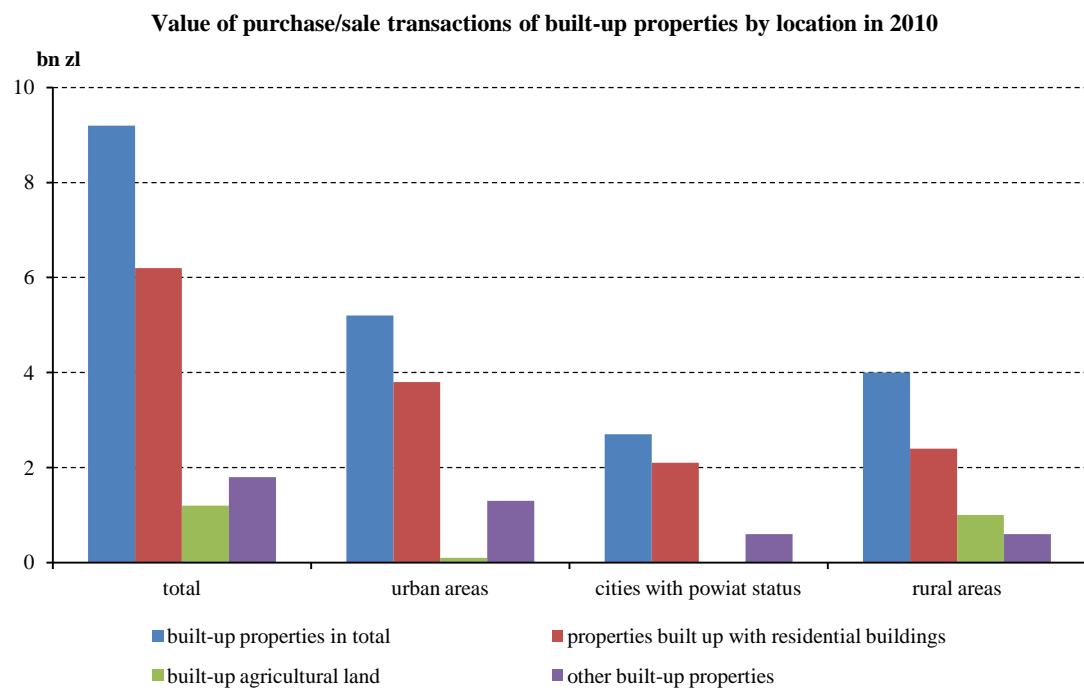

Value of purchase/sale transactions of properties built up with residential buildings in 2003-2010

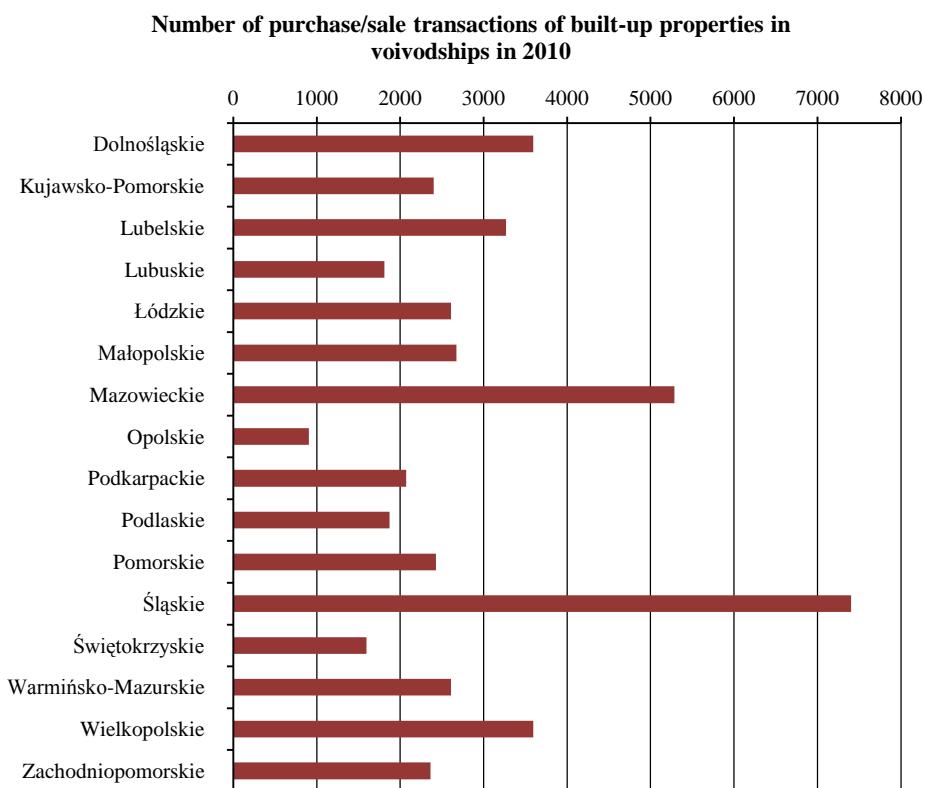

In 2010 the number of the purchase/sales transactions of built-up properties was relatively evenly allocated between urban areas (50.3%) and rural areas (49.7%), whereas in terms of value 56.5% of transactions occurred in cities. In terms of quantity and value, the most significant role both within and outside the city borders was played by the purchase/sale transactions of the properties built up with residential buildings.

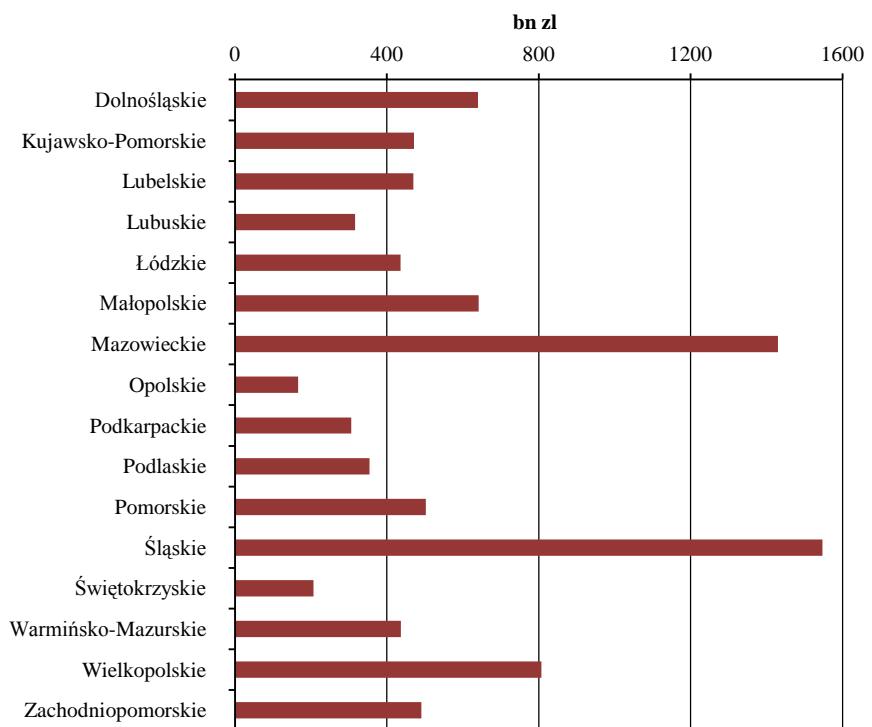

The highest built-up properties turnover, both in terms of quantity and value, was recorded in Mazowieckie and Śląskie Voivodships. In terms of quantity, these two voivodships account for a total of more than 27% of all purchase/sale transactions of built-up properties, and in terms of value for more than 32%. The lowest turnover was recorded in Opolskie and Świętokrzyskie Voivodships.

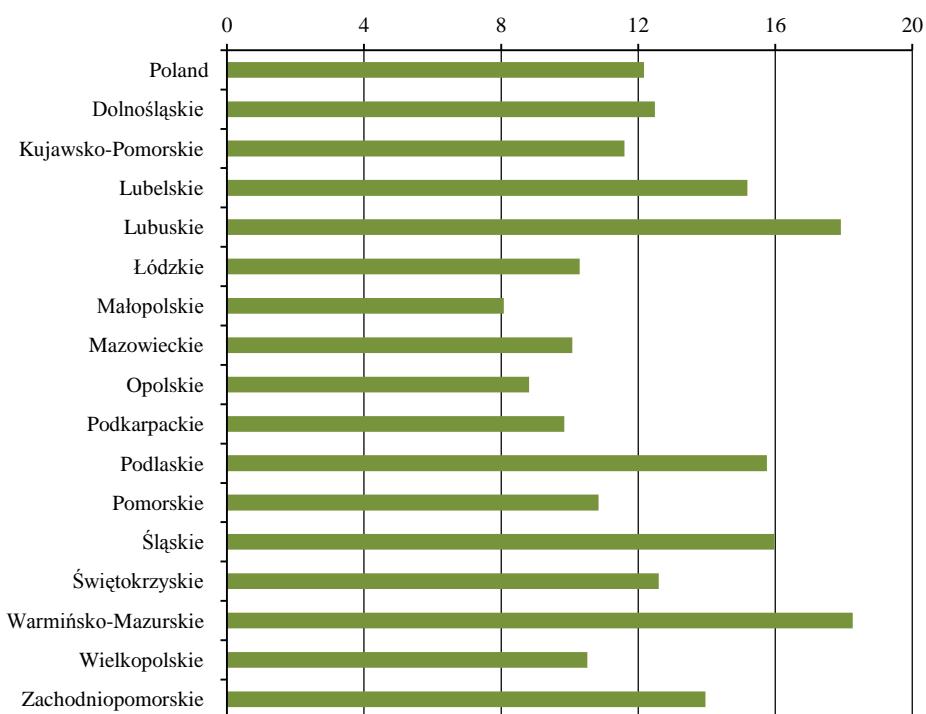

**Value of purchase/sale transactions of built-up properties in voivodships
in 2010**

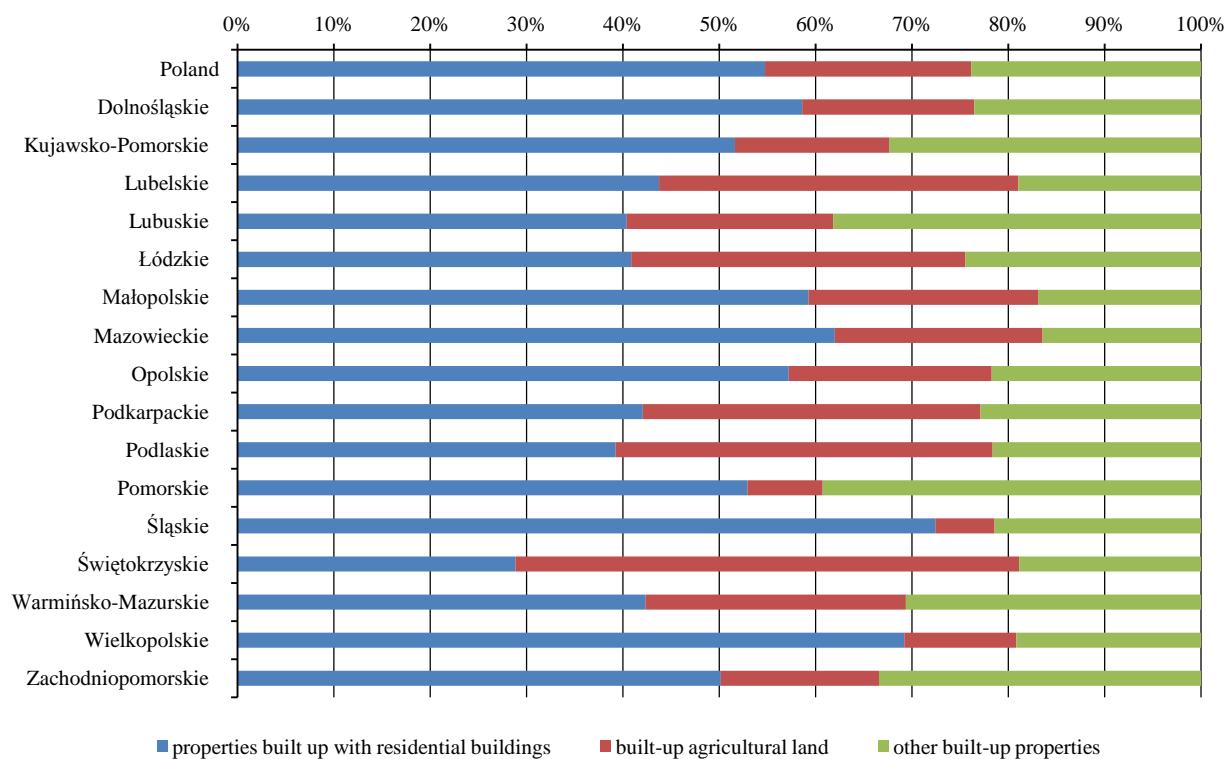

The number of purchase/sale transactions of built-up properties per 10,000 inhabitants at voivodship level in 2010 ranged from about 8 transactions in Małopolskie Voivodship to about 18 transactions in Lubuskie and Warmińsko-Mazurskie Voivodships. Apart from Lubuskie and Warmińsko-Mazurskie Voivodships, the highest indicators characterized the following Voivodships: Śląskie, Podlaskie, Lubelskie and Zachodniopomorskie.

**Number of purchase/sale transactions of built-up properties per
10,000 inhabitants in 2010**

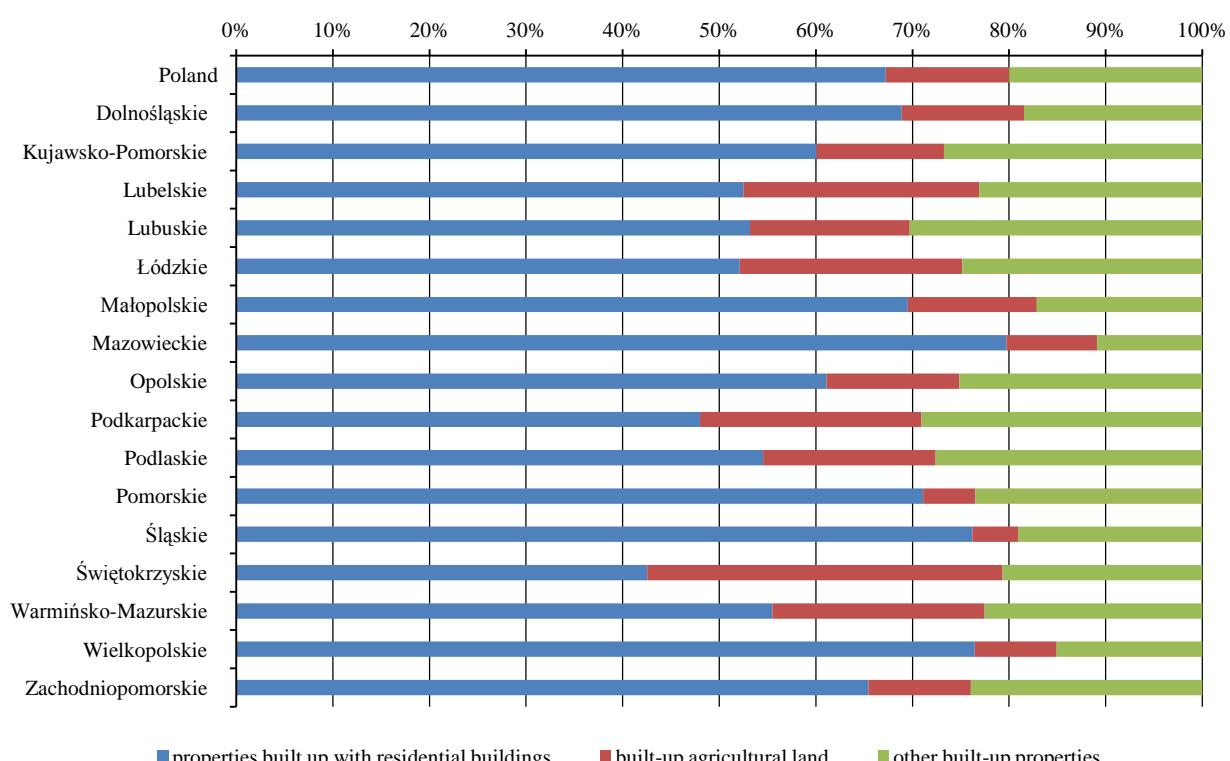

Similar as on the national scale, the sales of properties built up with residential buildings played the most significant role on most voivodship markets. A different situation was observed only in Świętokrzyskie Voivodship, where in terms of quantity built-up agricultural land had the highest share in turnover.

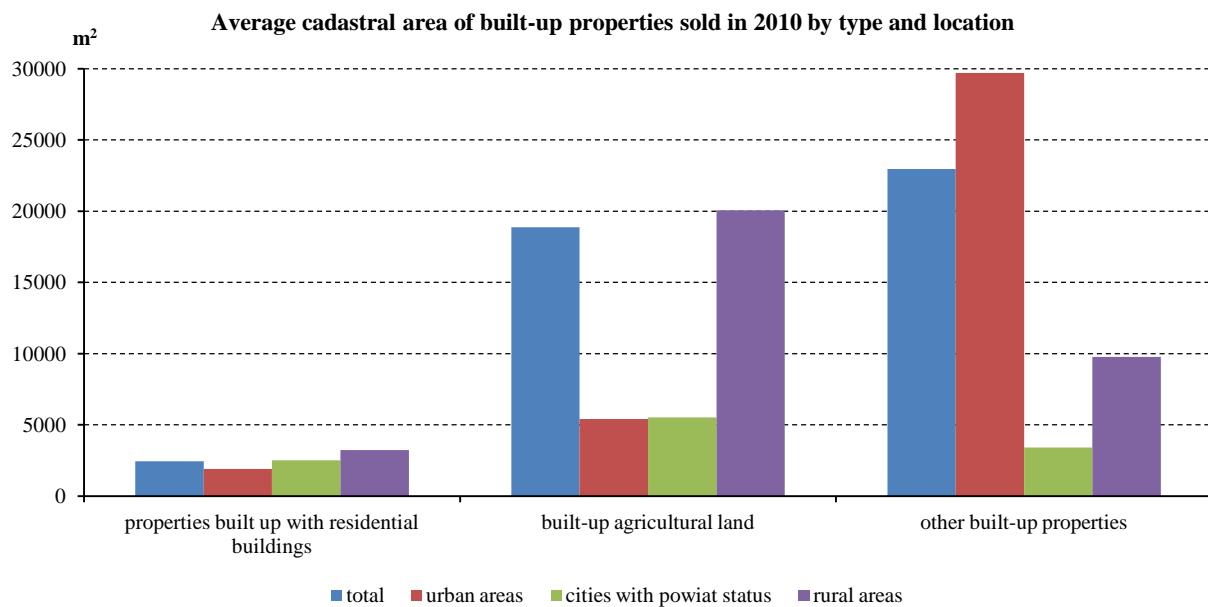

**Quantity structure of purchase/sale transactions of built-up properties
on voivodship markets in 2010**

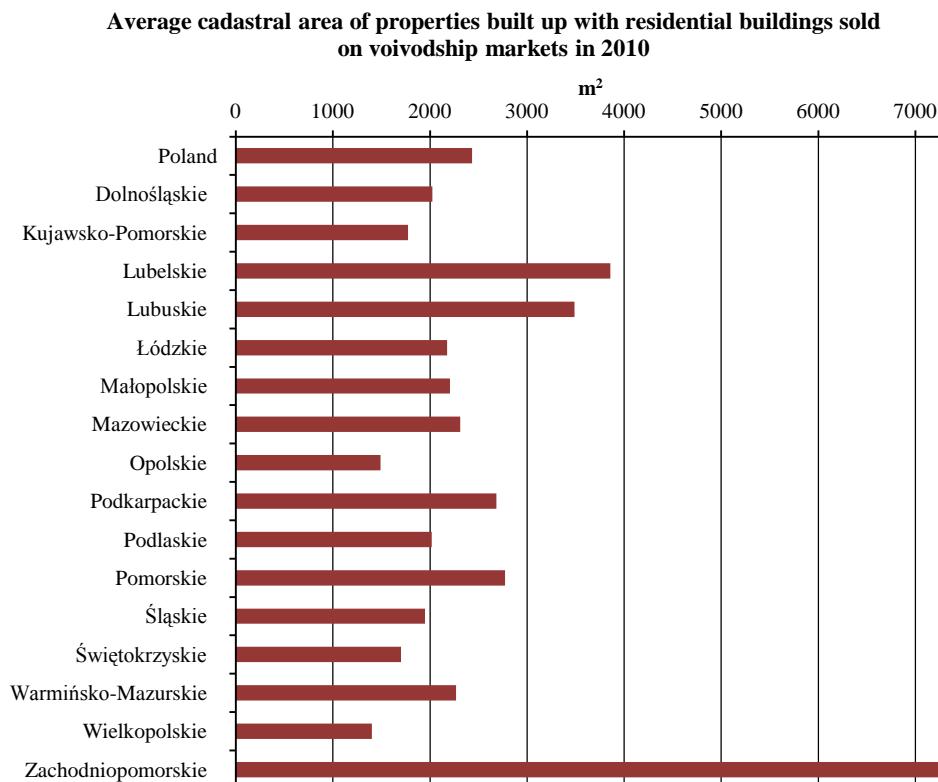

**Value structure of purchase/sale transactions of built-up properties
on voivodship markets in 2010**

An average cadastral area of the properties built up with residential buildings sold in 2010 amounted to 2,431.9 m², built-up agricultural land - 18,874.4 m², and other built-up properties - 22,952.1 m².

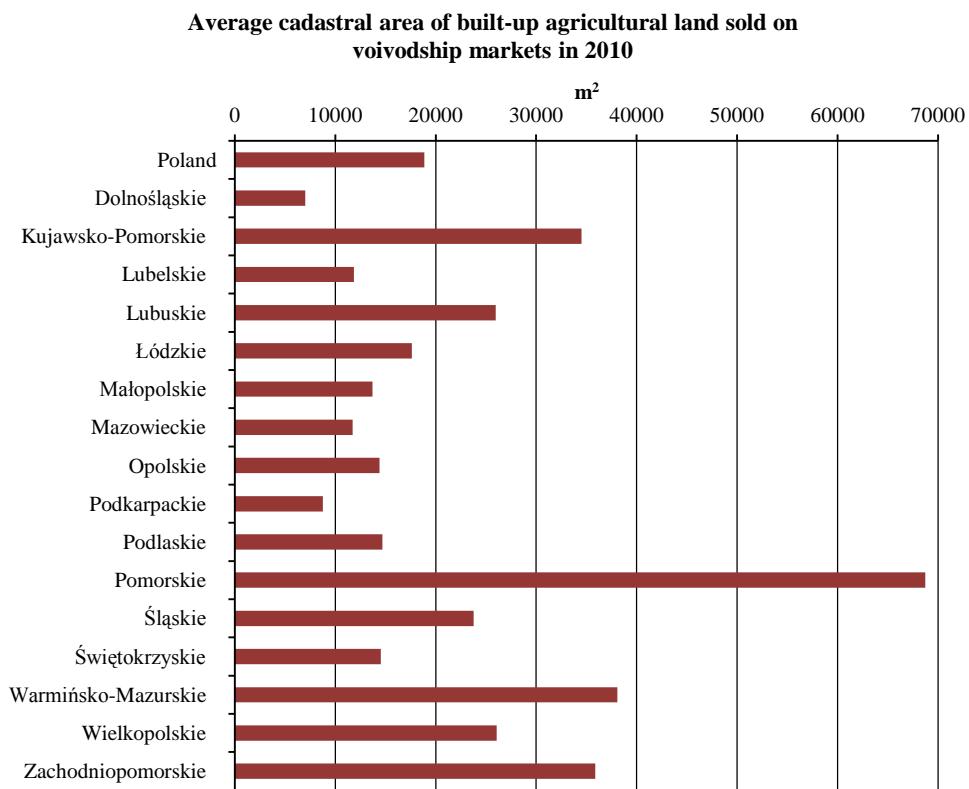

An average cadastral area of the properties built up with residential buildings, sold in a single transaction in 2010, ranged from 1,400.2 m² in Wielkopolskie Voivodship to 7,235.8 m² in Zachodniopomorskie Voivodship.

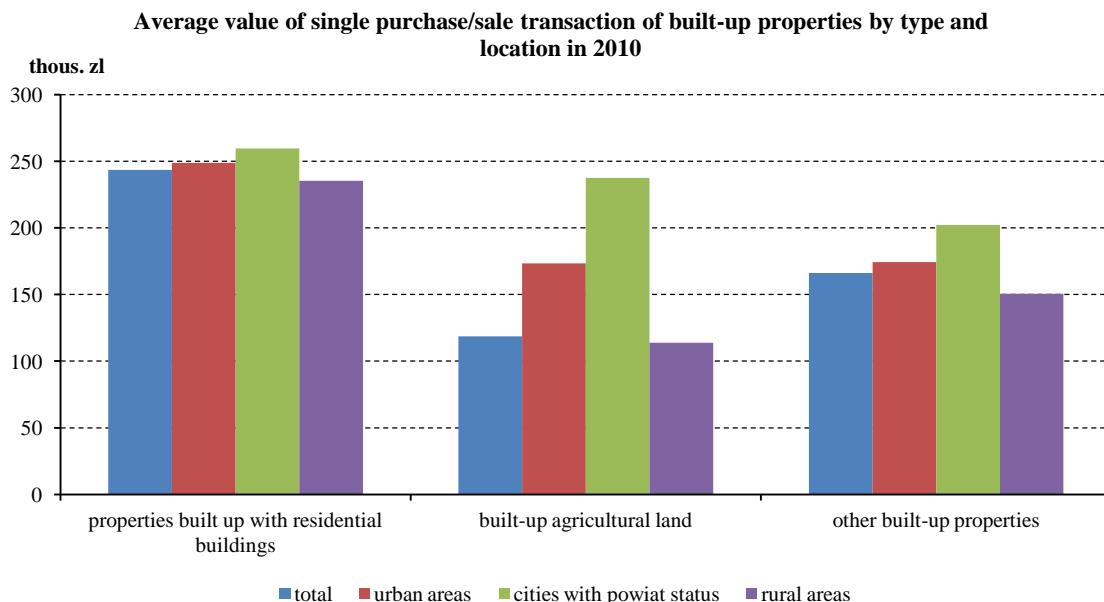

Considerable disproportions were observed in an average size of built-up agricultural land sold by voivodship. In particular, the average figures recorded in Pomorskie (68,733.6 m²), Warmińsko-Mazurskie (38,073.3 m²) and Zachodniopomorskie Voivodship (35,898.2 m²) considerably exceeded the average for Poland

in total. The lowest cadastral area of built-up agricultural land sold in a single transaction was recorded in Dolnośląskie Voivodship – 7,025.9 m².

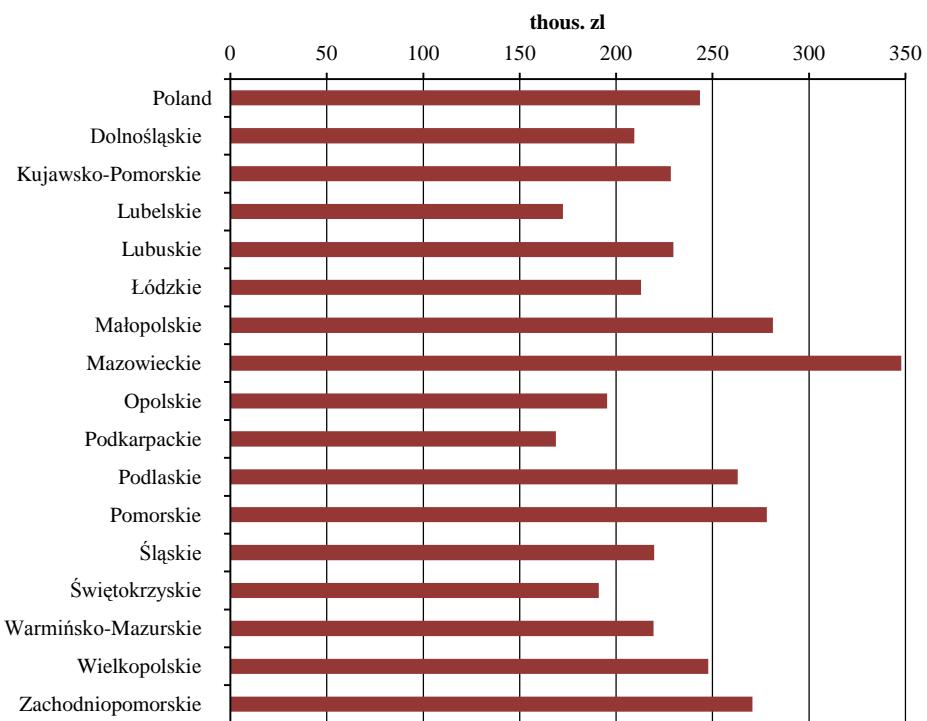

An average value of a single purchase/sale transaction of a property built up with residential buildings, concluded in 2010, amounted to 243.5 thous. zł. The corresponding value of built-up agricultural land reached 118.6 thous. zł, and that of other built-up property – 166.3 thous. zł. In the case of each of the built-up properties category under analysis, the transactions concluded in cities were more expensive than those concluded in rural areas.

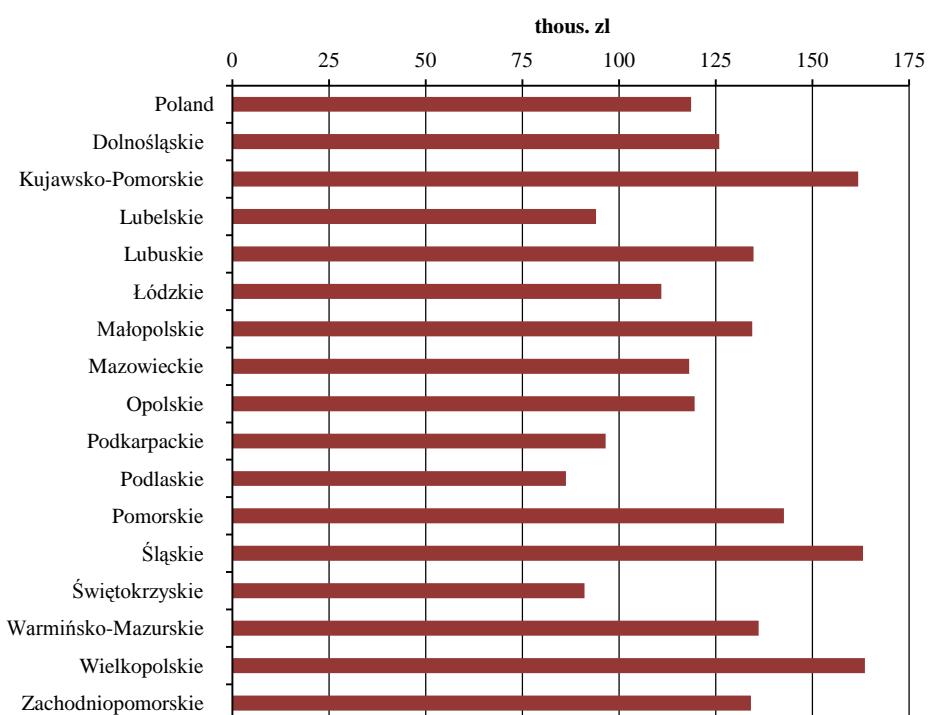

An average value of a single purchase/sale transaction of a property built up with residential buildings ranged from 168.7 thous. zł in Podkarpackie Voivodship to 347.8 thous. zł in Mazowieckie Voivodship.

Average value of single purchase/sale transaction of properties built up with residential buildings concluded on voivodship markets in 2010

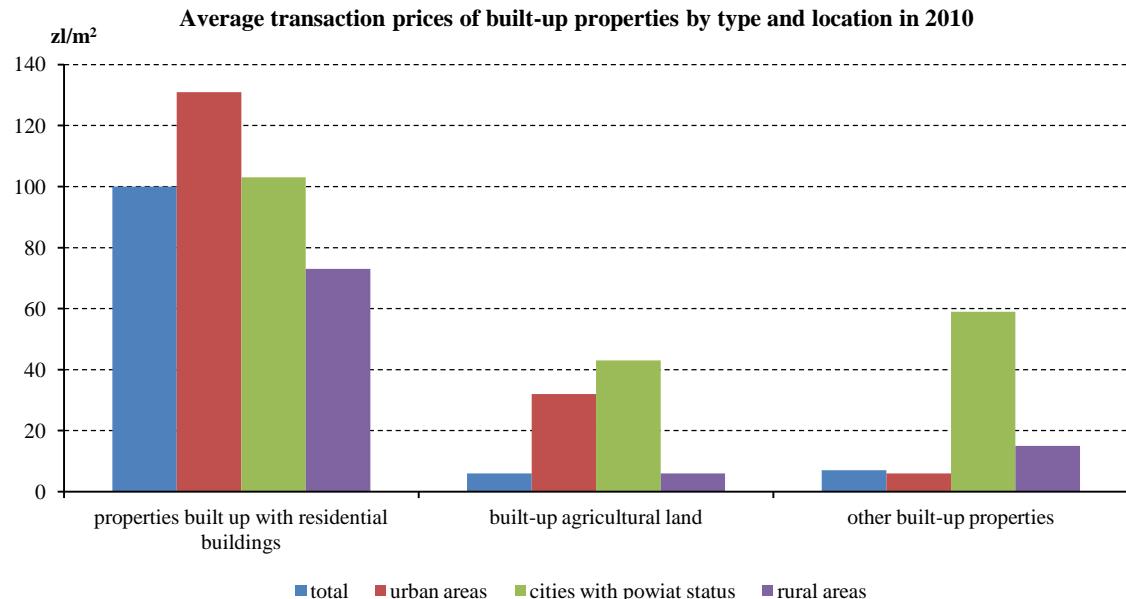

An average value of a single purchase/sale transaction of built-up agricultural land ranged from 86.3 thous. zł in Podlaskie Voivodship to more than 163 thous. zł in Śląskie and Wielkopolskie Voivodship.

Average value of single purchase/sale transaction of built-up agricultural land concluded on voivodship markets in 2010

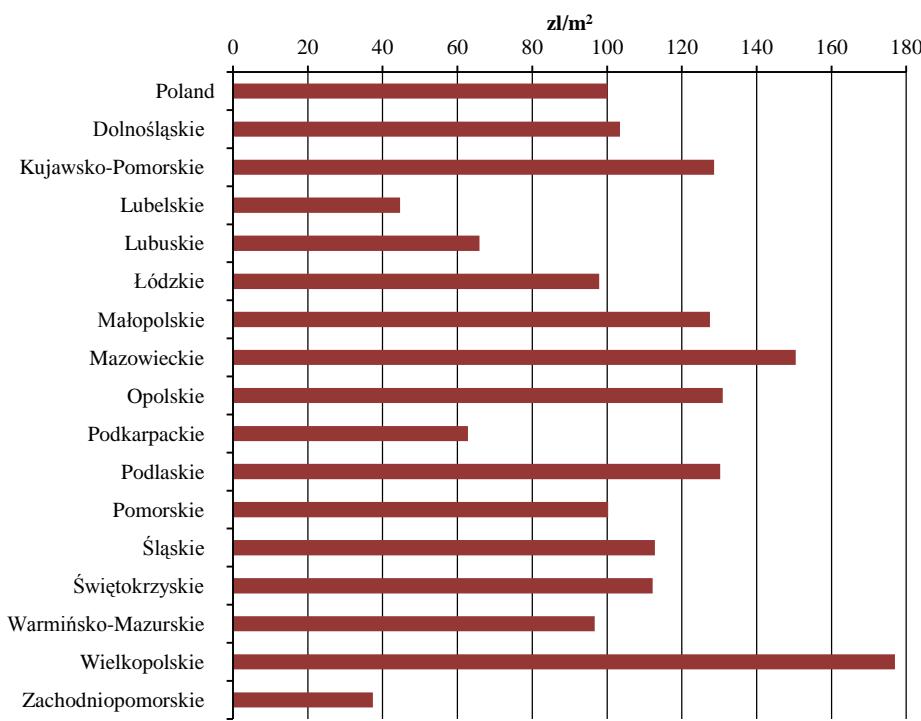

An average price for 1 m² of cadastral area of properties built up with residential buildings reached the level of 100 zł, of built-up agricultural land 6.28 zł, and of other built-up properties 7.24 zł.

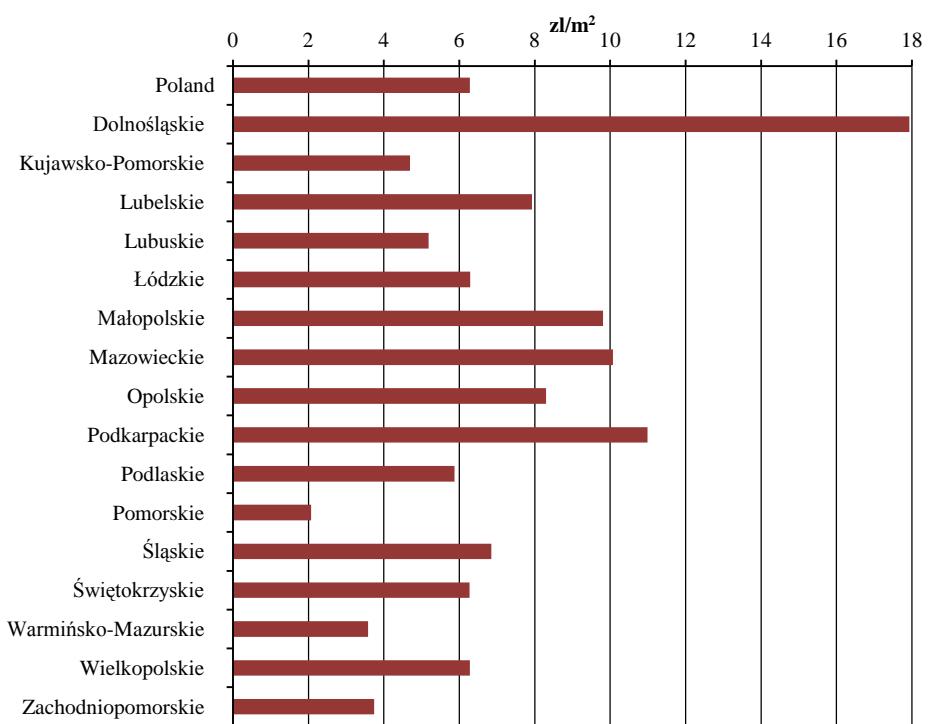

The highest average transaction price for properties built up with residential buildings was recorded in Wielkopolskie Voivodship. It amounted to 177 zl per 1 m² and was about 77% higher than the average price for Poland. The lowest average transaction price for properties built up with residential buildings was recorded in Zachodniopomorskie Voivodship – about 37 zl per 1 m².

Average transaction prices of properties built up with residential buildings on voivodship markets in 2010

The highest average transaction price for built-up agricultural land was recorded in Dolnośląskie Voivodship – about 18 zl per 1 m². The lowest average transaction price for built-up agricultural land was recorded in Pomorskie Voivodship – about 2 zl per 1 m².

Average transaction prices of built-up agricultural land on voivodship markets in 2010

V. PURCHASE/SALE TRANSACTIONS OF LAND PROPERTIES

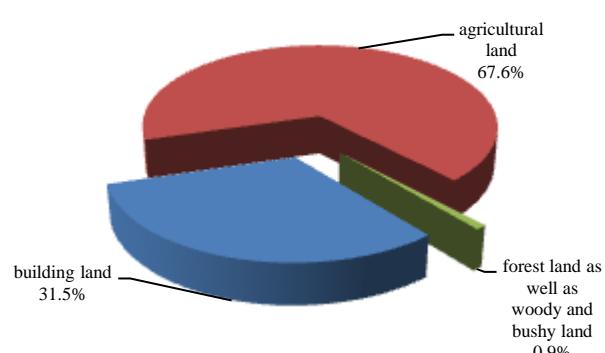

The number of purchase/sale transactions of land properties registered in 2010 amounted to 127 thous., accounting for 49.6% of all real estate transactions. The value of land properties turnover reached 9.2 bn zł, which corresponded to 27.3% of the total real estate turnover. The cadastral area of the land properties constituting the object of purchase/sale transactions amounted to about 1.7 billion m².

Among the land property transactions, the agricultural land transactions had the highest share. They constituted more than 76% of the total number of land property transactions and nearly 68% of turnover value. A large number of transactions was also recorded in the case of building land. Their number accounted for more than 22% of all land property transactions, whereas their value for about 31%. Other transactions involving land properties concerned the turnover with forest land as well as woody and bushy land. In terms of quantity these transactions constituted 1.5%, whereas in terms of value, less than 1% of all land property transactions.

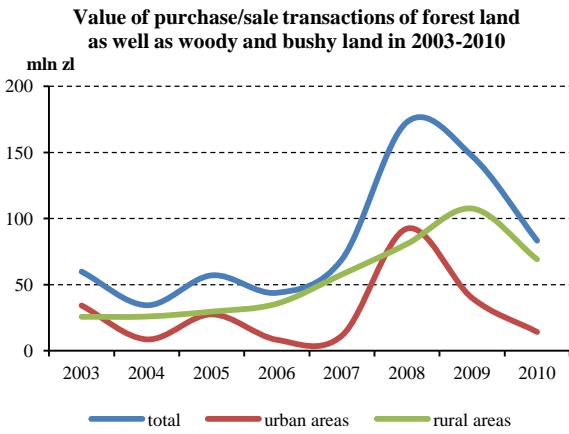

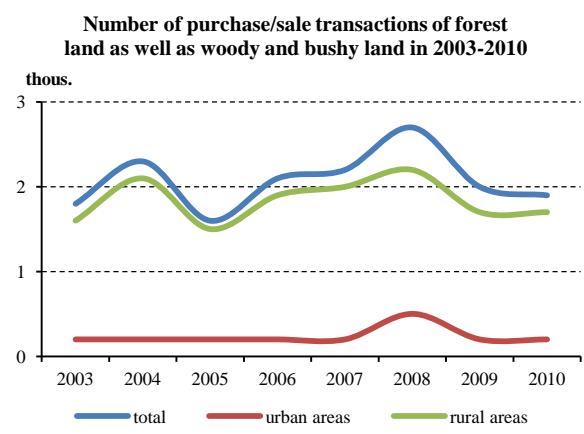

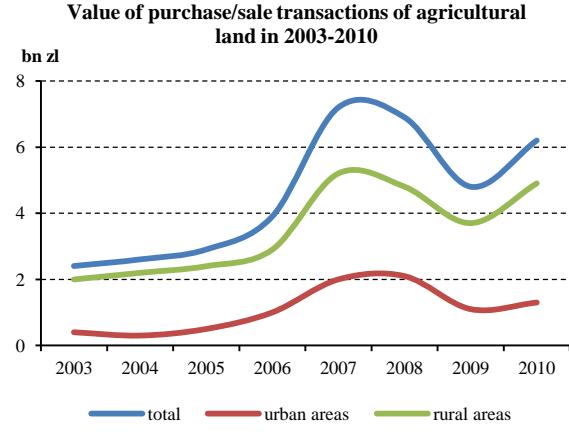

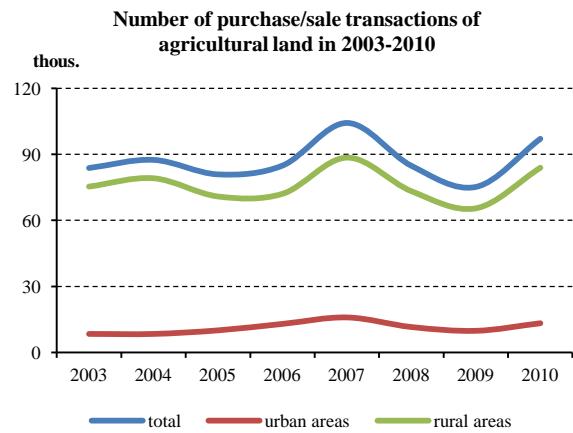

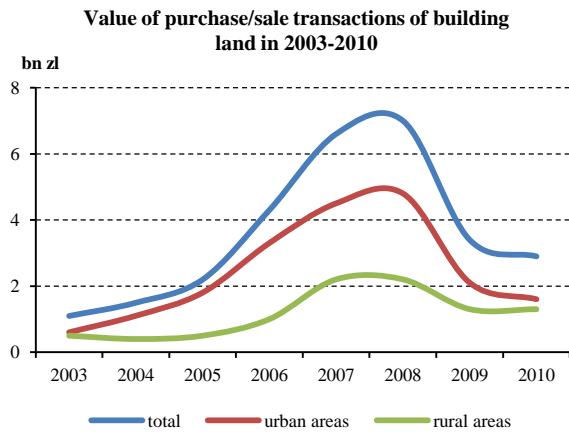

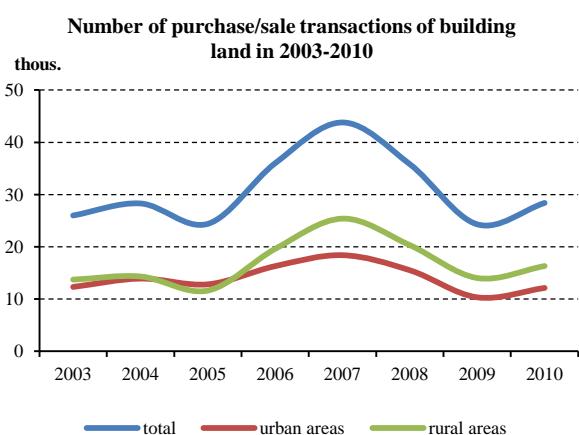

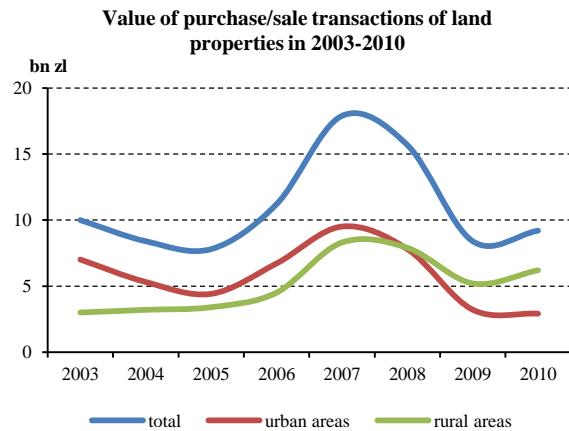

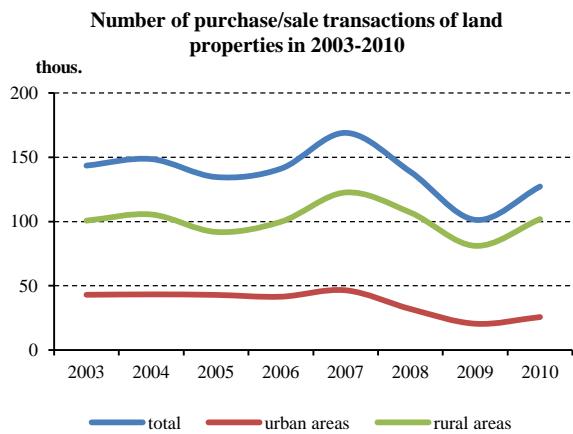

Quantity structure of purchase/sale transactions of land properties by type in 2010

Value structure of purchase/sale transactions of land properties by type in 2010

In 2010 a growth in the land property turnover was observed. The number of transactions involving land properties in 2010 was about 26% higher in relation to the preceding year, and their value rose by over 9%. The highest growth in turnover was recorded in the segment of agricultural land – by about 29%, both in terms of quantity and value. In the case of building land a growth in the number of transactions by about 17% was recorded, with simultaneous decline in their value by about 16%. Forest and woody and bushy land turnover declined by about 3% in terms of quantity and by about 44% in terms of value.

Building land

Building land constituted the second considerable group of land property transactions, preceded by agricultural land. Three types of land constituting the object of transaction can be distinguished in this group, namely residential land, industrial land, and other building land.

In 2010, in the scope of building land, the object of turnover involved mainly other building land. This category is very broad and diversified, and it covers land designated for buildings construction and other facilities related to administration, health care, trade, craft, services, education, culture and art, leisure, communications, religion, etc. In terms of quantity, transactions involving other building land constituted about 74% of building land turnover, and in terms of value – about 76%. A considerable number of transactions was also recorded in the scope of residential land. Their number accounted for 25% of all transactions involving building land, whereas their value constituted 23% of these transactions.

Quantity structure of purchase/sale transactions of building land by type in 2010

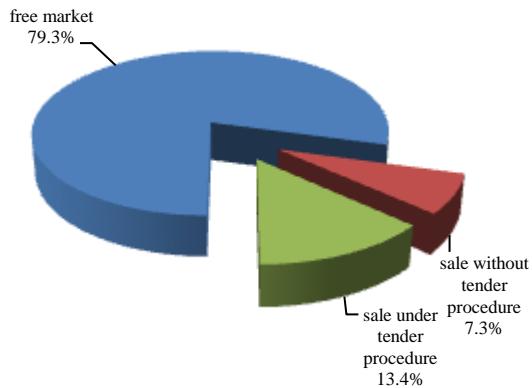

Value structure of purchase/sale transactions of building land by type in 2010

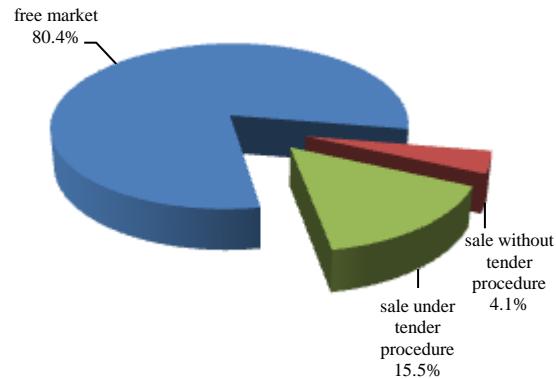

In 2010 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 79.3% and 80.4% of all transactions.

Quantity structure of purchase/sale transactions of building land by turnover form in 2010

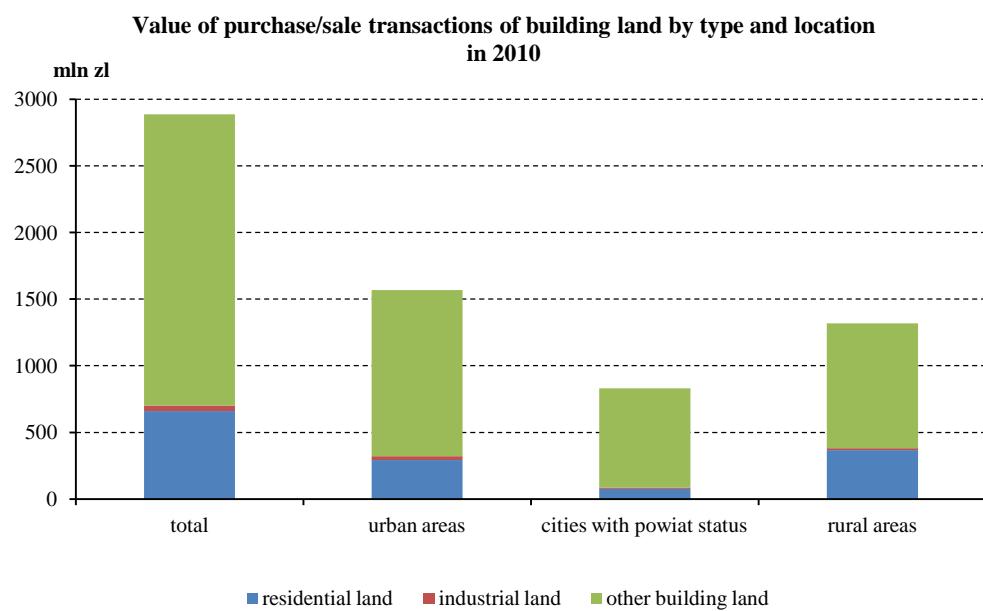

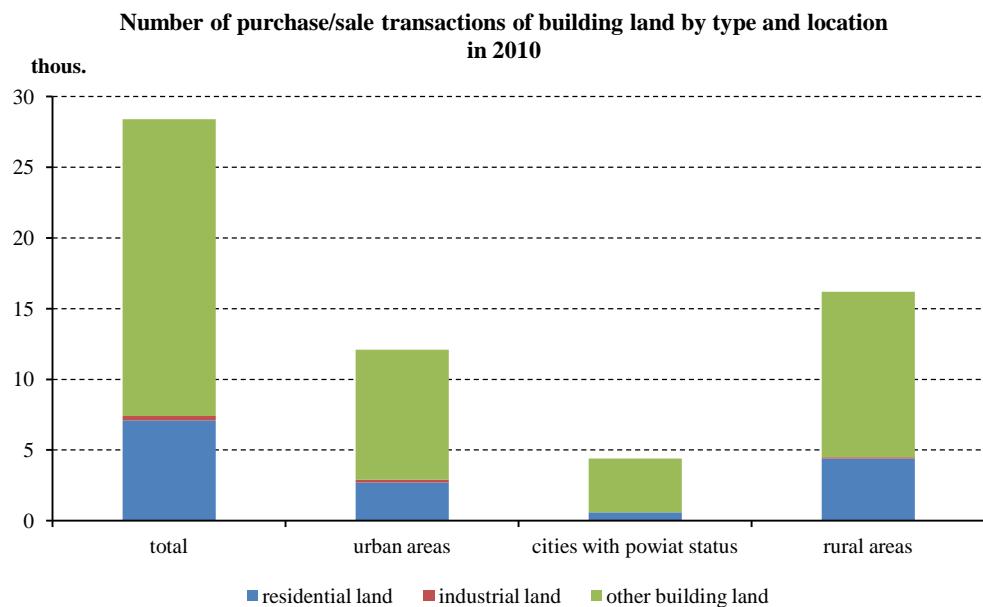

Value structure of purchase/sale transactions of building land by turnover form in 2010

Within the turnover of building land, the ownership title was the most frequently occurring type of land ownership right. Both within the structure of quantity and quality, it accounted for 99.9% of all purchase/sale transactions of building land.

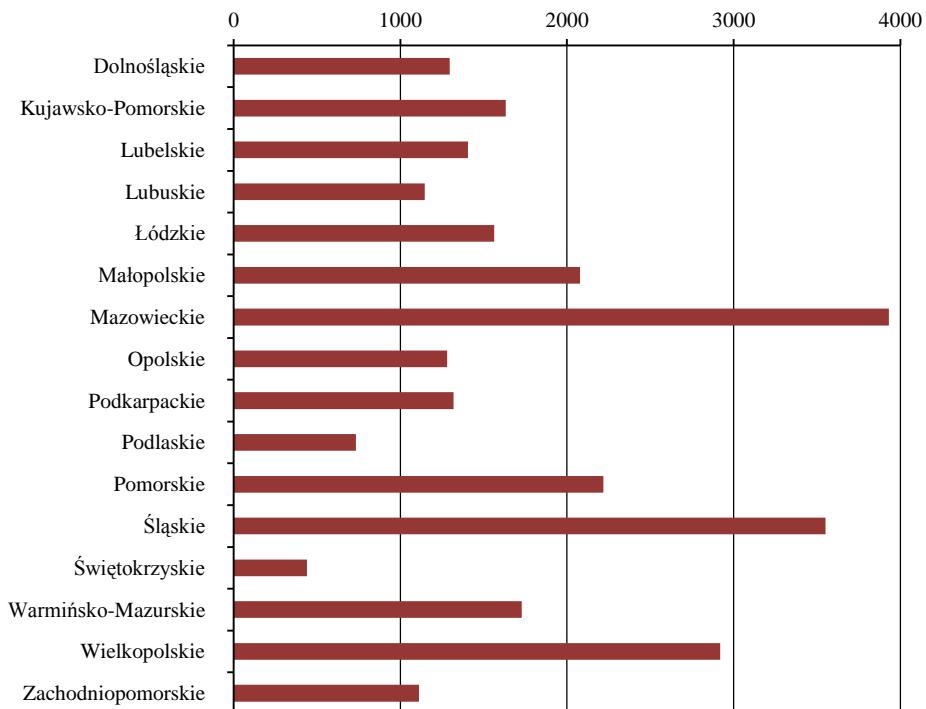

More than 57% of all transactions involving building land took place in rural areas. In terms of value, the turnover within the city borders prevailed, accounting for above 54% of all transactions involving building land.

As regards residential land and other building land, the majority of transactions took place outside the city borders. The sales of industrial land, however, mainly occurred in urban areas. In the case of industrial land and other building land, the value of transactions concluded in cities was considerably higher than the value of transactions concluded in rural areas. A reverse relation was observed in the case of residential land.

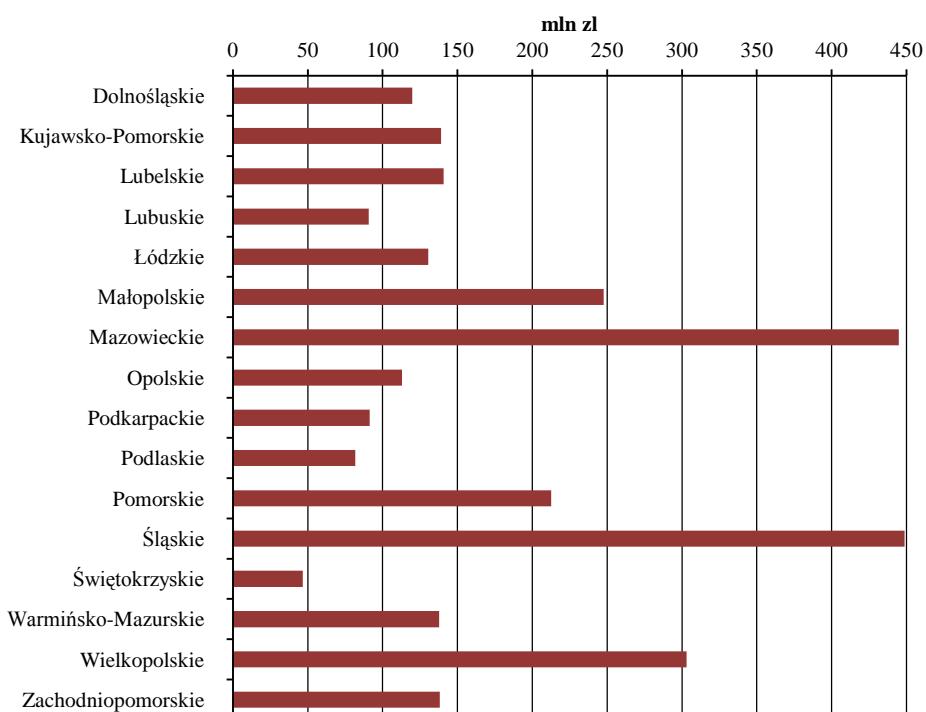

The highest turnover of building land, both in terms of quantity and value, was recorded in Mazowieckie Voivodship, followed by Śląskie and Wielkopolskie Voivodships. The transactions of building land, concluded in these three voivodships, accounted in terms of quantity for a total of about 37% of all transactions in this category of real estate in Poland, whereas in terms of value - for about 42%. The lowest number of transactions of building land was recorded in Świętokrzyskie and Podlaskie Voivodships. These were also the voivodships with the lowest value of transactions of building land concluded in 2010.

**Number of purchase/sale transactions of building land in voivodships
in 2010**

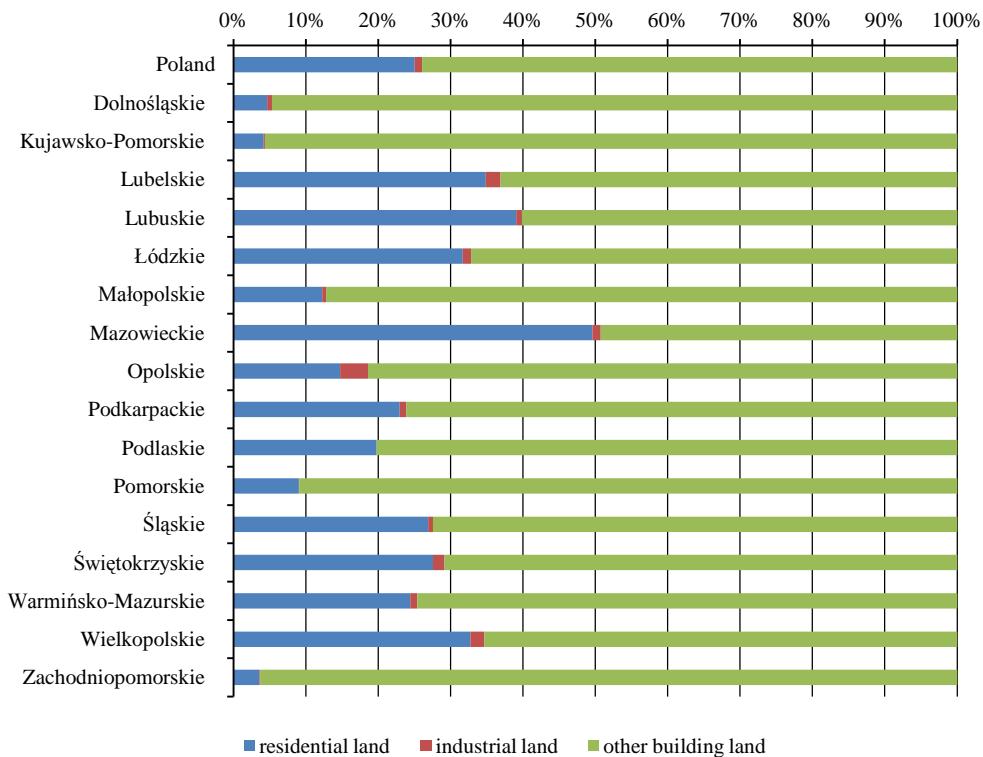

**Value of purchase/sale transactions of building land in voivodships
in 2010**

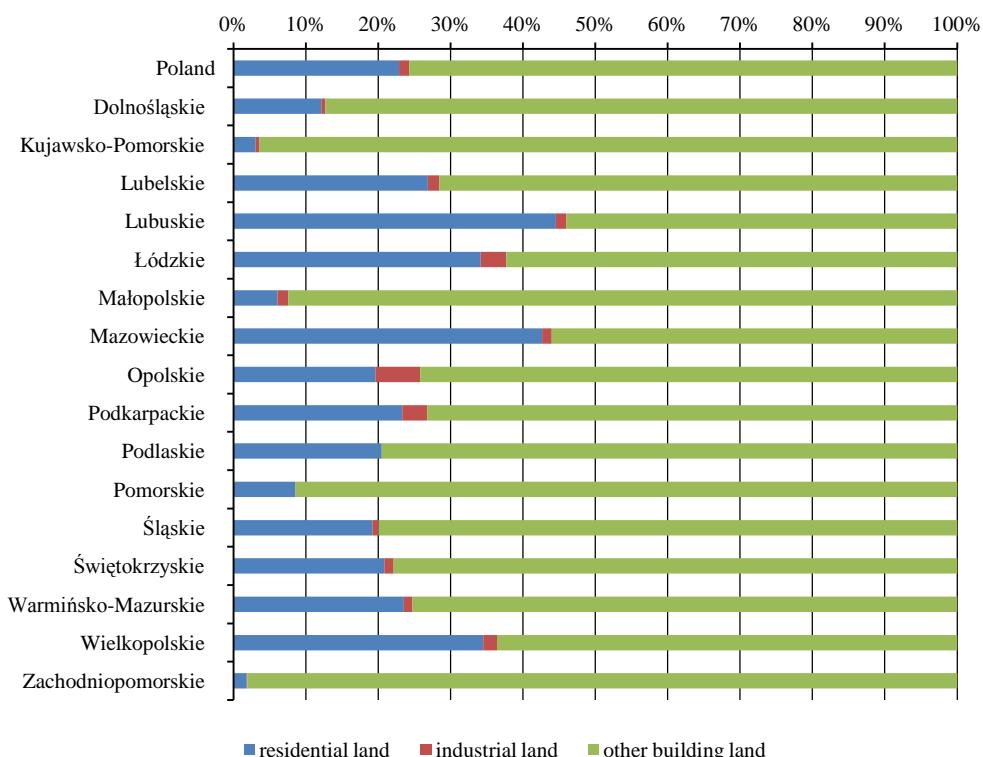

As on the national scale, also on most of the voivodship markets the sale of other building land played an especially important role. A reversed situation was only observed in Mazowieckie Voivodship, where in terms of quantity residential land had the highest share in turnover.

Quantity structure of purchase/sale transactions of building land in voivodships in 2010

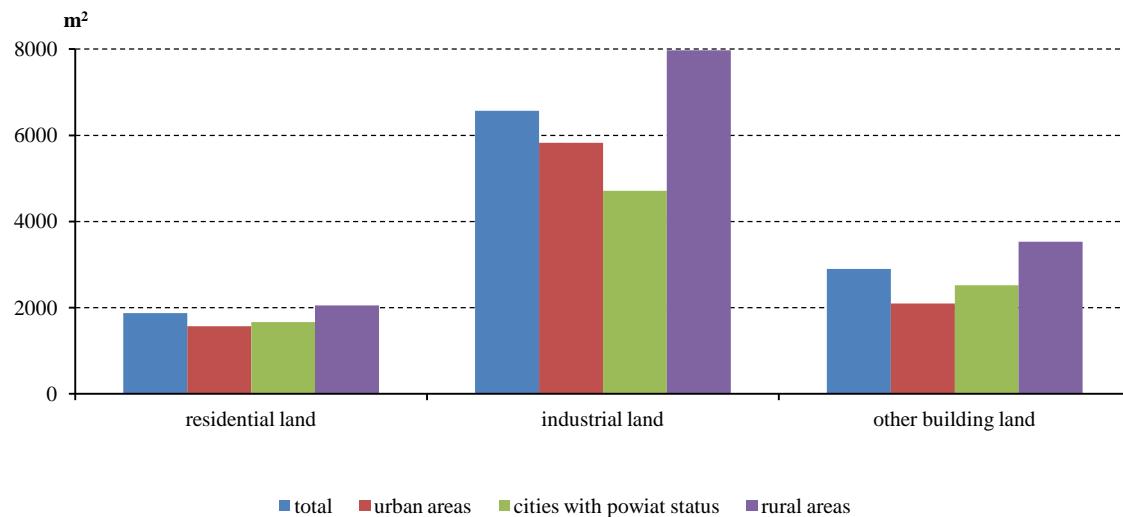

Value structure of purchase/sale transactions of building land in voivodships in 2010

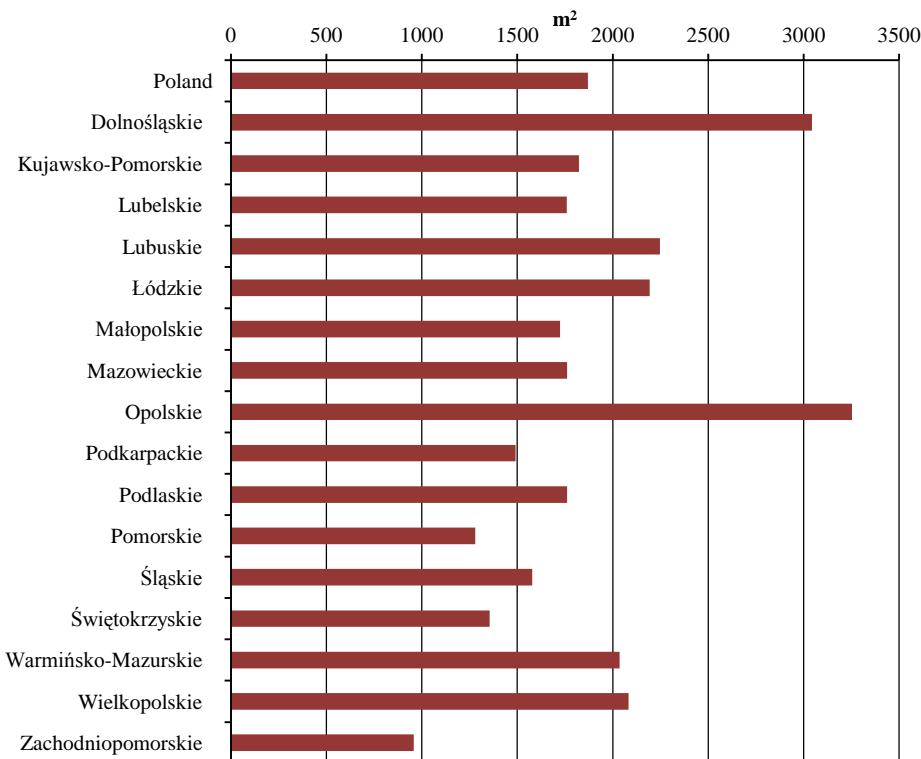

As regards the sales conducted in 2010, an average cadastral area of residential land amounted to 1,870.1 m², of industrial land 6,571.0 m², and of other building land – 2,900.5 m². Building land sold outside the city borders was usually considerably larger than those sold in urban areas.

Average cadastral area of building land sold in 2010 by type and location

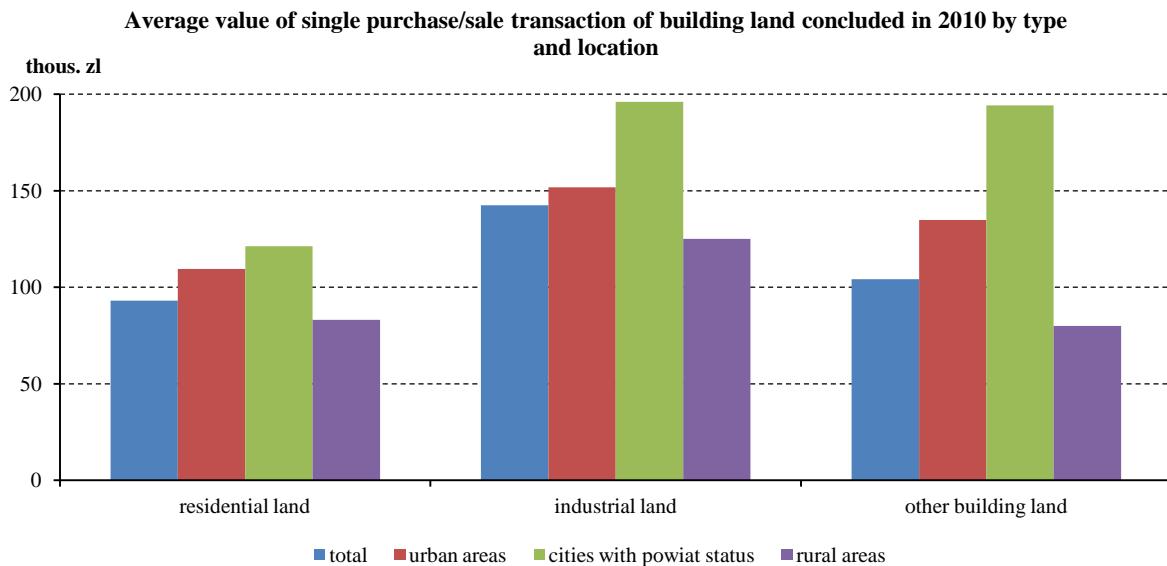

An average cadastral area of residential land, sold in a single transaction in 2010, ranged from 957.8 m² in Zachodniopomorskie Voivodship to 3,253.3 m² in Opolskie Voivodship.

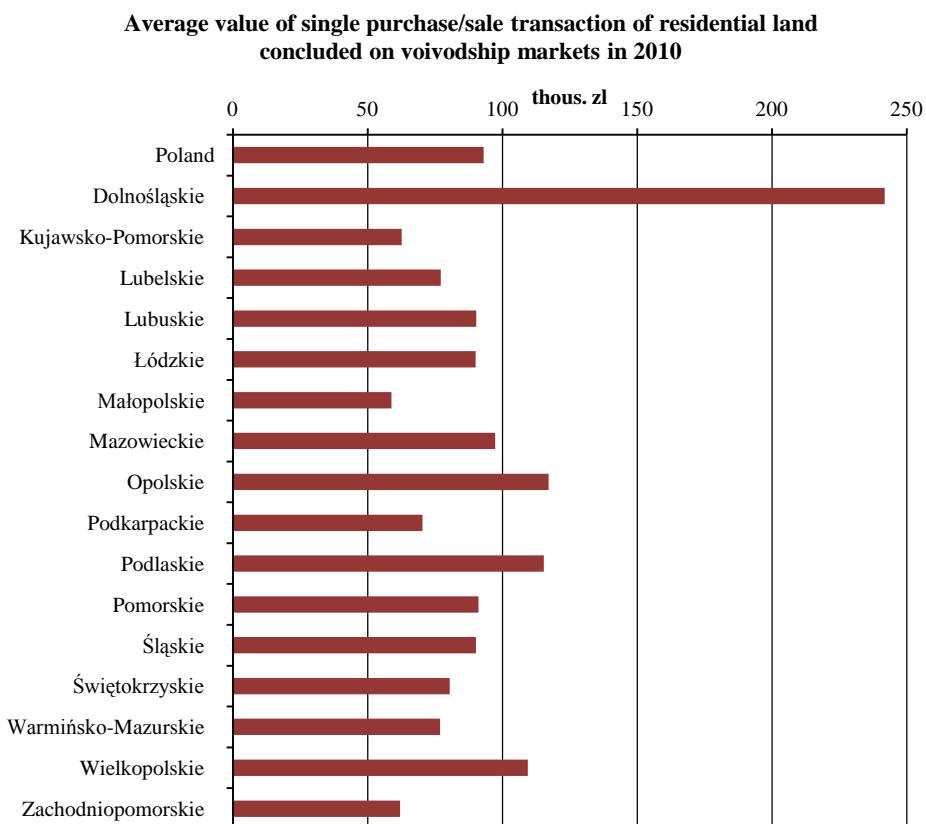

Average cadastral area of residential land sold on voivodship markets in 2010

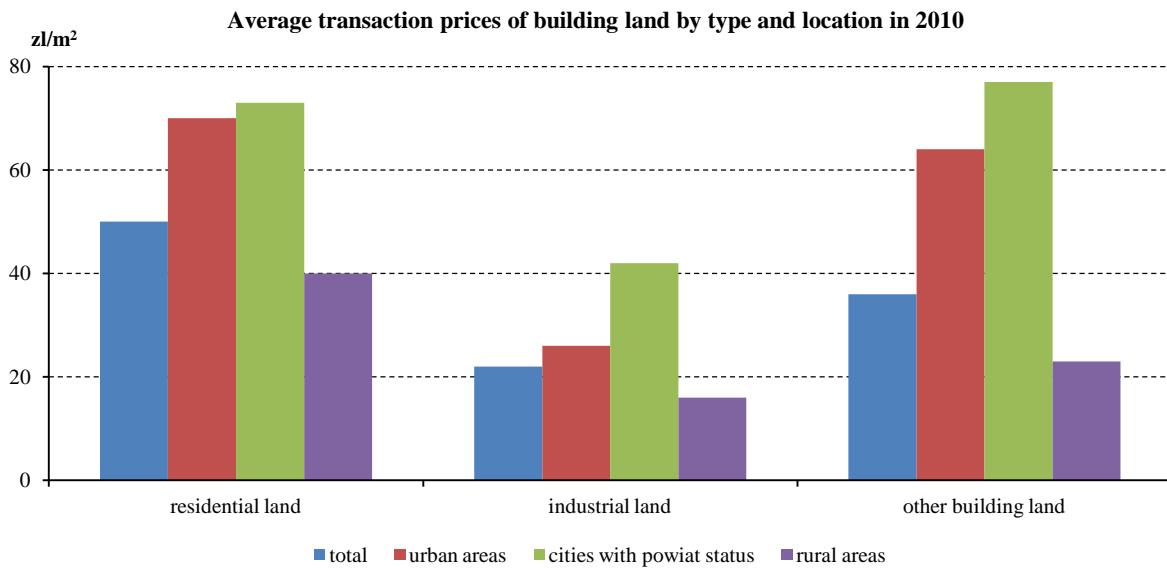

An average value of a single purchase/sale transaction of residential land, concluded in 2010, amounted to 93.0 thous. zł, of industrial land to 142.5 thous. zł, and of other building land to 104.2 thous. zł. The transactions concluded in urban areas were more expensive than those concluded in rural areas, which was influenced by relatively high prices for 1 m² of cadastral area, recorded within city borders. In the case of each of the building land category under analysis, the transactions concluded in cities were more expensive than those concluded in rural areas.

The highest average value of a single purchase/sale transaction of residential land was recorded in Dolnośląskie Voivodship, amounting to 241.8 thous. zł. The lowest average value of a single purchase/sale transaction of residential land was observed in Małopolskie Voivodship, amounting to 58.8 thous. zł.

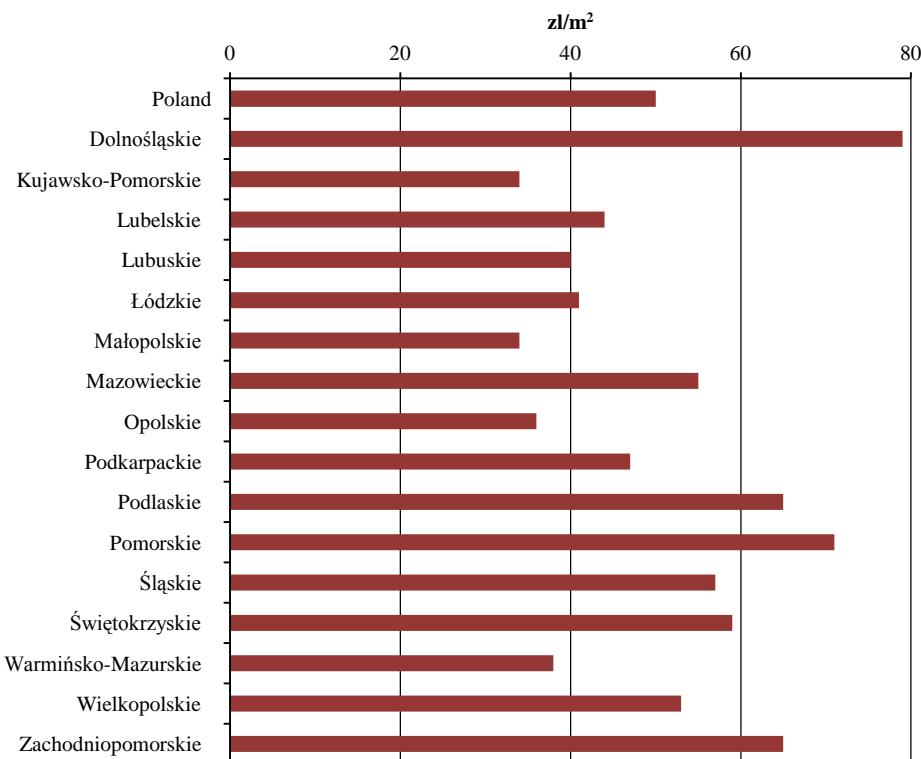

An average price for 1 m² of cadastral area of residential land reached the level of 50 zł, of industrial land about 22 zł, and of other building land – about 36 zł. A considerable impact on the prices of building land was exerted by its location. The prices of building land in urban areas were higher than for land located outside the city borders. As regards urban areas, exceptionally high prices were recorded in cities with powiat status.

The highest average transaction price for residential land was recorded in Dolnośląskie Voivodship. It amounted to over 79 zł per 1 m² and was nearly 60% higher than the average price for Poland. The lowest average transaction price for residential land was recorded in Małopolskie Voivodship – about 34 zł per 1 m².

Average transaction prices of residential land by voivodships in 2010

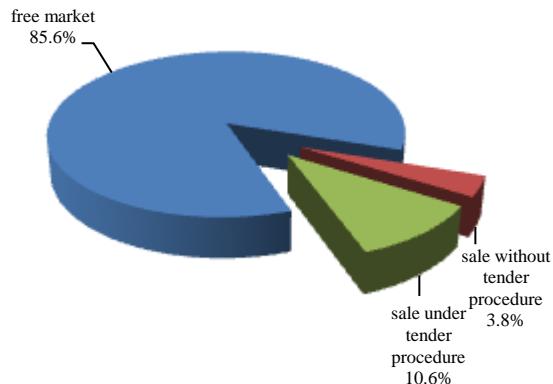

Agricultural land

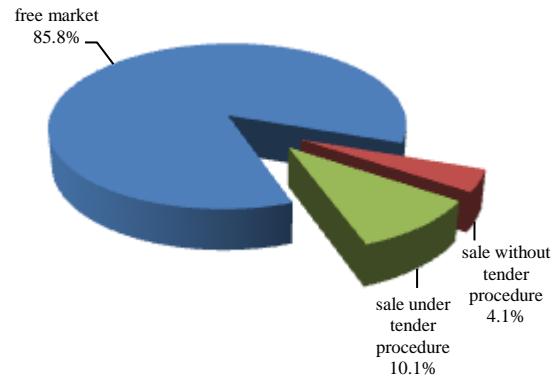

Agricultural land constituted the most prominent transaction group, as regards land property transactions.

In 2010 sales on the free market constituted the predominating form of turnover, both in terms of structure of quantity and value, accounting respectively for 85.6% and 85.8% of all transactions. Sales without tender procedure were the least frequent form of turnover. In terms of quantity, these accounted for 3.8% of the agricultural land turnover, and in terms of value for 4.1%.

Quantity structure of purchase/sale transactions of agricultural land by turnover form in 2010

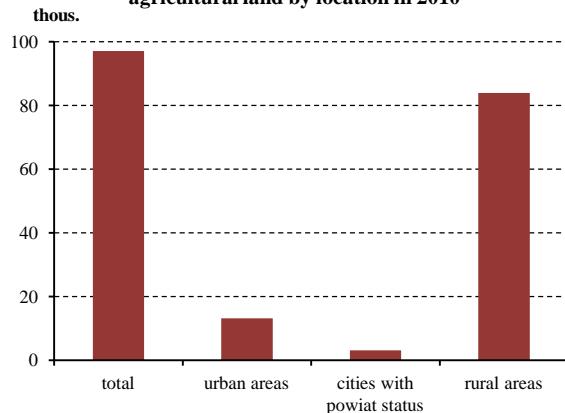

Value structure of purchase/sale transactions of agricultural land by turnover form in 2010

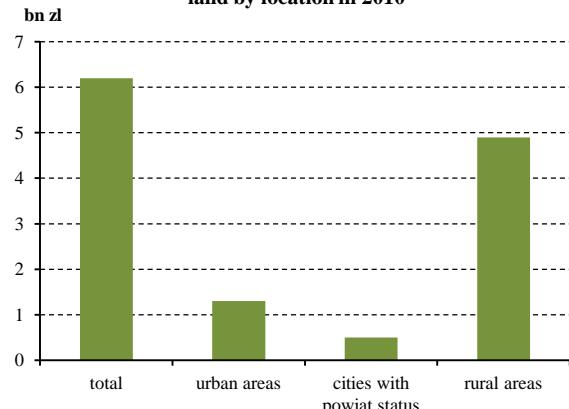

Within the agricultural land turnover, the ownership title was the most frequently occurring type of land ownership right. Perpetual usufruct constituted only 0.02% of concluded transactions number and value.

The majority of the agricultural land turnover, both in terms of quantity and value, took place outside the city borders (86.4% and 78.5%, respectively).

Number of purchase/sale transactions of agricultural land by location in 2010

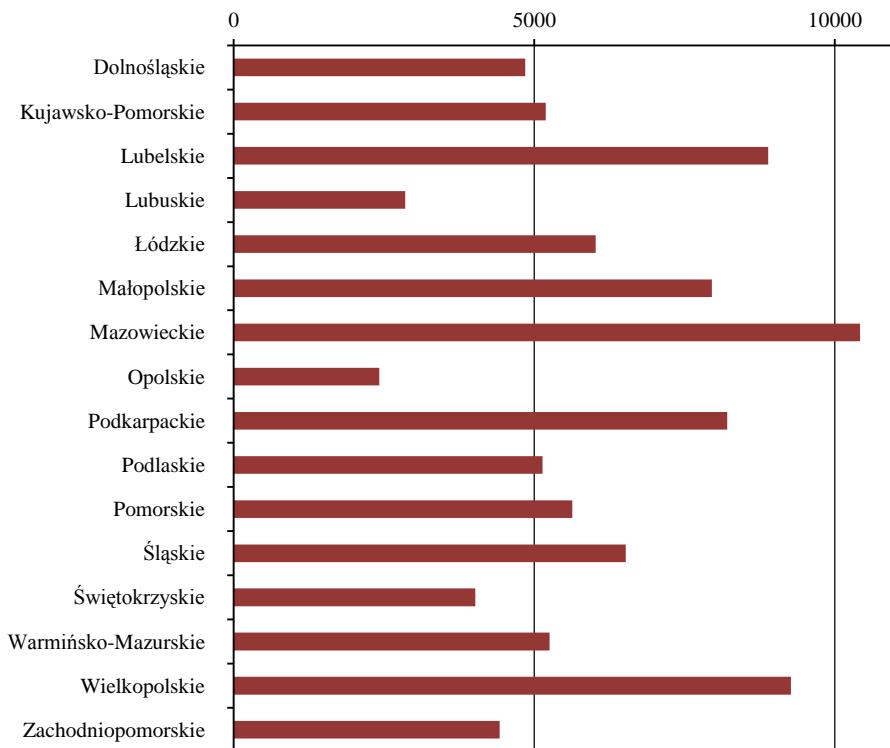

Value of purchase/sale transactions of agricultural land by location in 2010

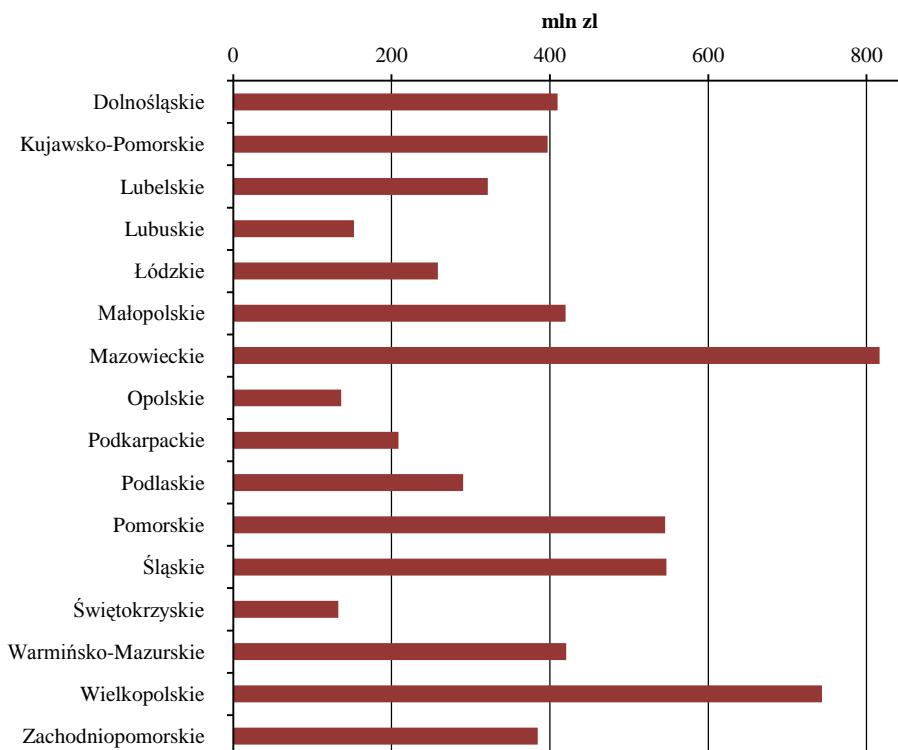

The largest number of agricultural land transactions was recorded in Mazowieckie and Wielkopolskie Voivodships, whereas the lowest number in Opolskie and Lubuskie Voivodships. In terms of value the highest agricultural land turnover was observed in Mazowieckie and Wielkopolskie Voivodships, whereas the lowest agricultural land turnover - in Świętokrzyskie, Opolskie and Lubuskie Voivodships.

**Number of purchase/sale transactions of agricultural land in voivodships
in 2010**

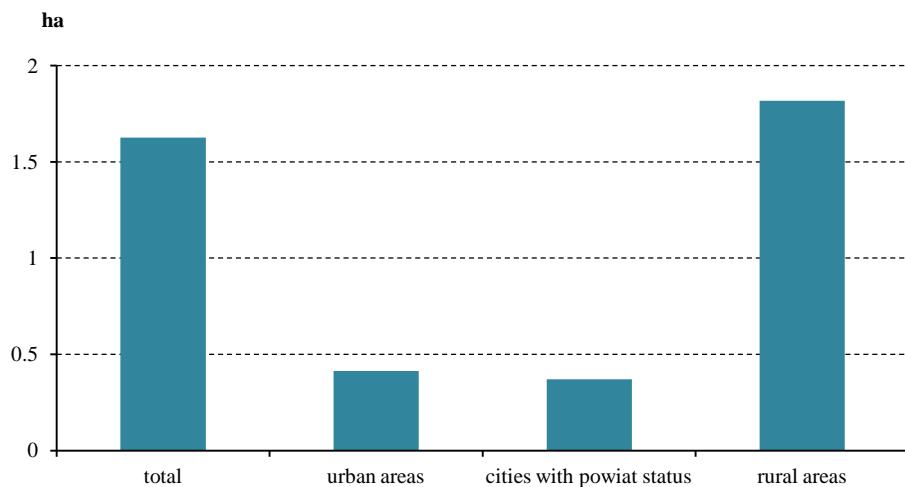

**Value of purchase/sale transactions of agricultural land in voivodships
in 2010**

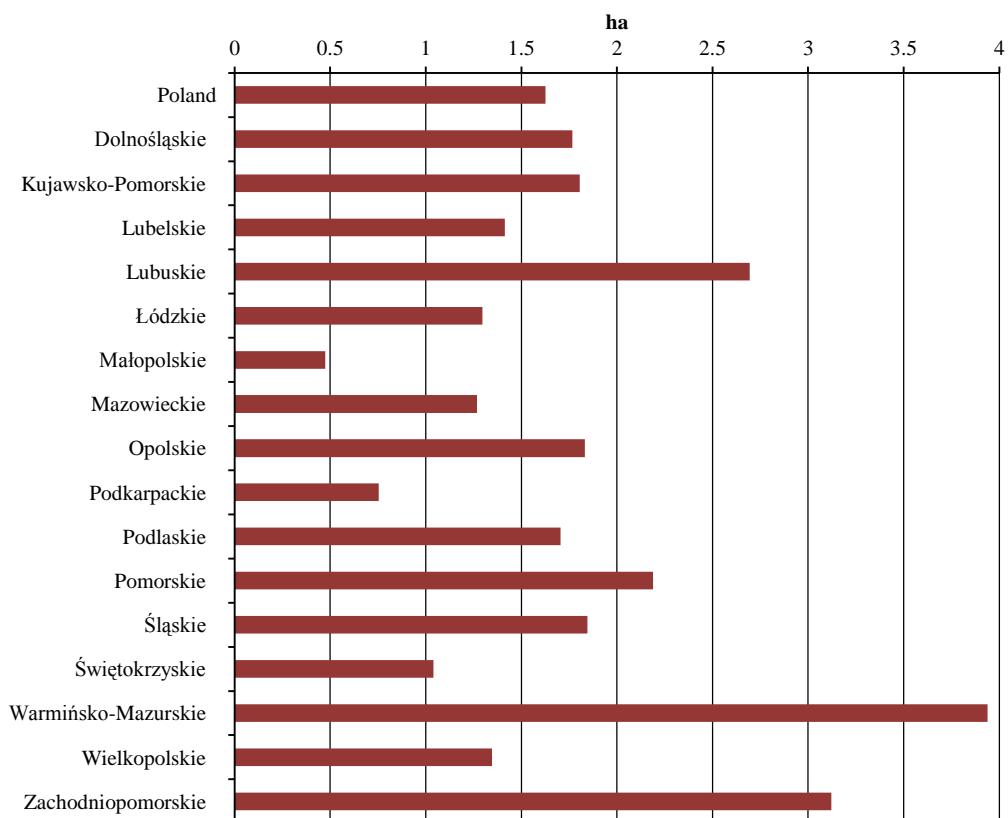

An average cadastral area of agricultural land, constituting the object of turnover in 2010, amounted to 1.63 ha. Agricultural land sold in rural areas was considerably larger than that sold within city borders.

Average cadastral area of agricultural land sold in 2010 by location

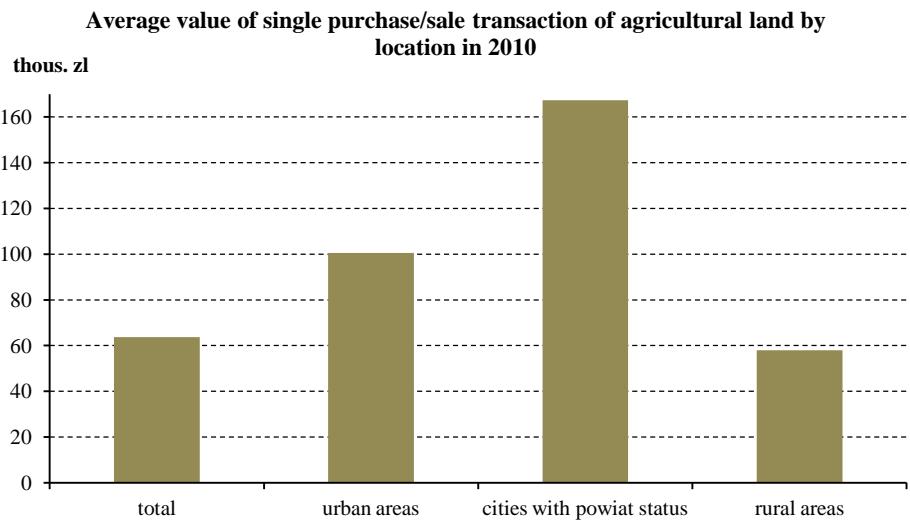

An average cadastral area of agricultural land sold in a single transaction in 2010 ranged from 0.47 ha in Małopolskie Voivodship to 3.94 ha in Warmińsko-Mazurskie Voivodship.

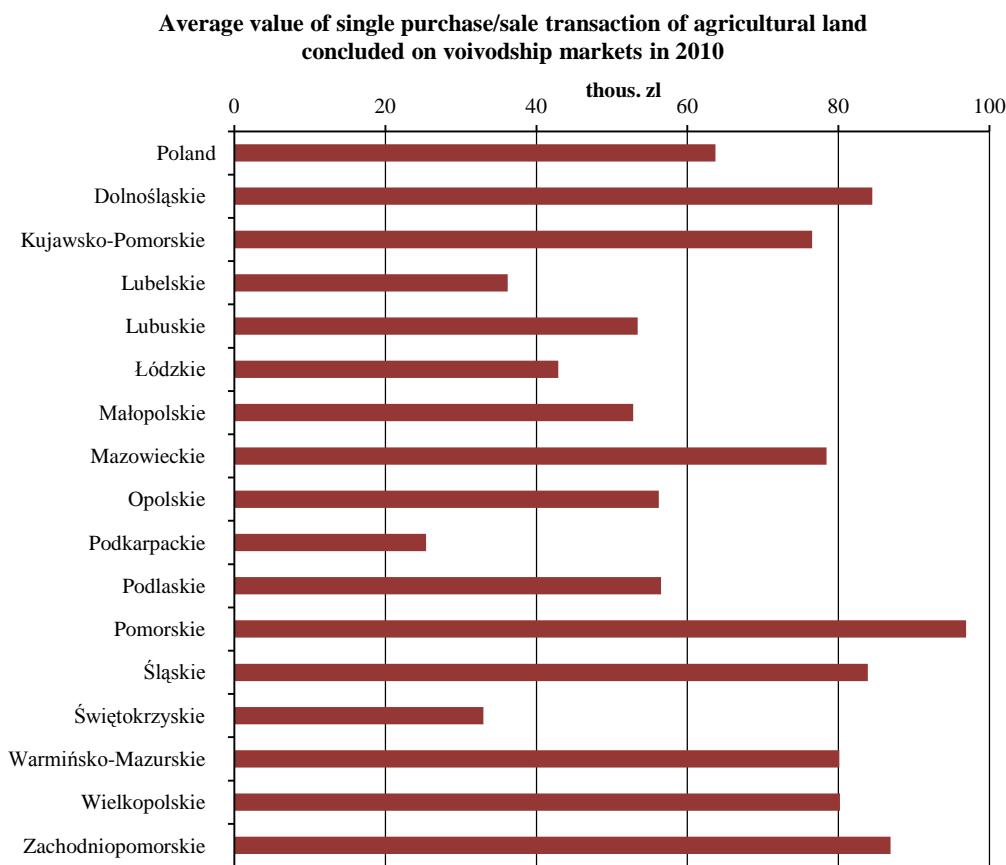

Average cadastral area of agricultural land sold on voivodship markets in 2010

An average price of agricultural land purchased in a single transaction amounted to 63.7 thous. zł. The agricultural land transactions concluded in urban areas were about 74% more expensive than those concluded in rural areas, which was influenced by relatively high prices for 1 ha of cadastral area, recorded within city borders.

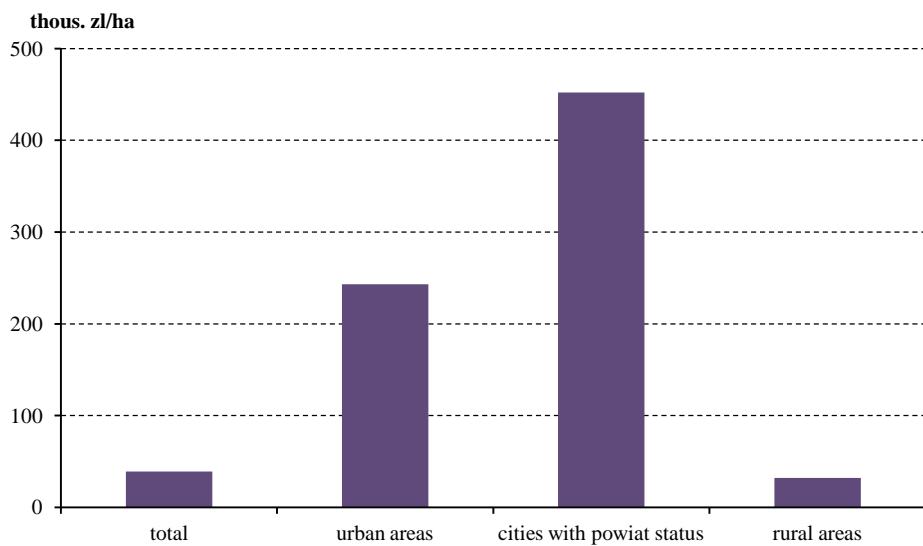

An average value of a single purchase/sale transaction of agricultural land ranged from 25.4 thous. zł in Podkarpackie Voivodship to 96.9 thous. zł in Pomorskie Voivodship.

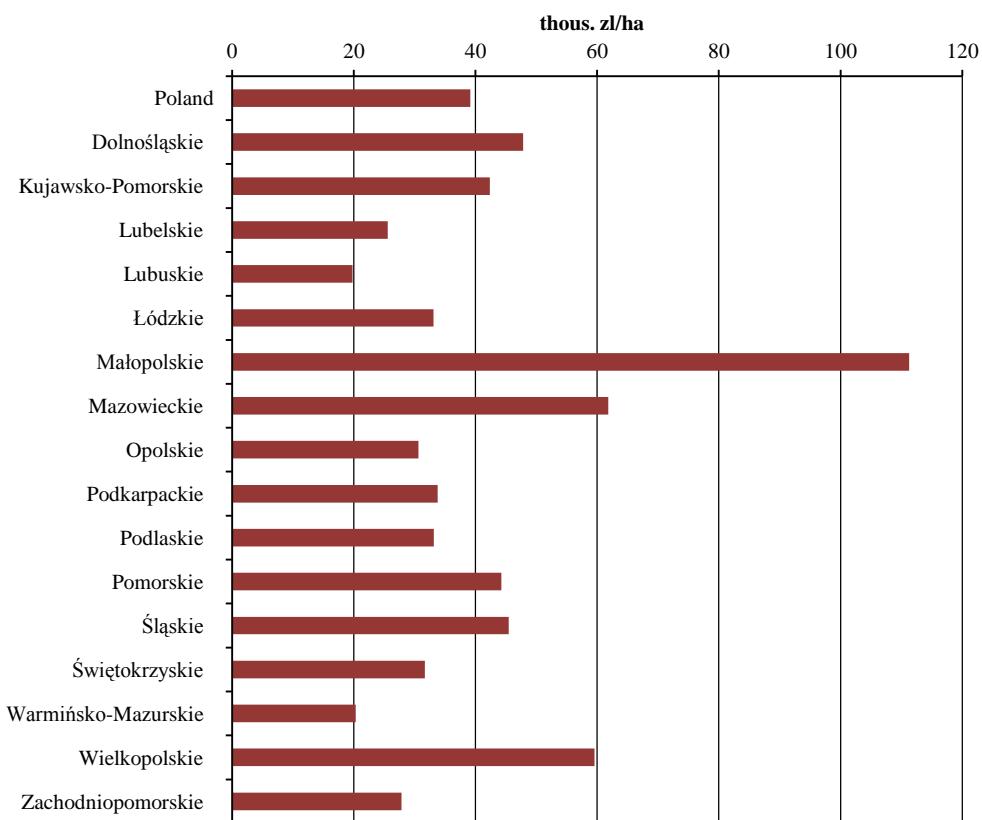

An average price for 1 ha of cadastral area of agricultural land sold in 2010 in Poland amounted to about 39 thous. zł per ha. The prices of agricultural land located in urban areas were considerably higher than the prices of land located outside city borders. Especially high prices were recorded in cities with powiat status. An average price for 1 ha of cadastral area of agricultural land sold in cities with powiat status was 11.5 times higher than an average price of this real estate category for Poland in total.

Average transaction price of agricultural land by location in 2010

The highest average transaction prices for agricultural land were recorded in Małopolskie, Mazowieckie and Wielkopolskie Voivodships. The lowest average transaction price for agricultural land was recorded in Lubuskie, and Warmińsko-Mazurskie – about 20 thous. zł per 1 ha.

Average transaction prices of agricultural land by voivodships in 2010

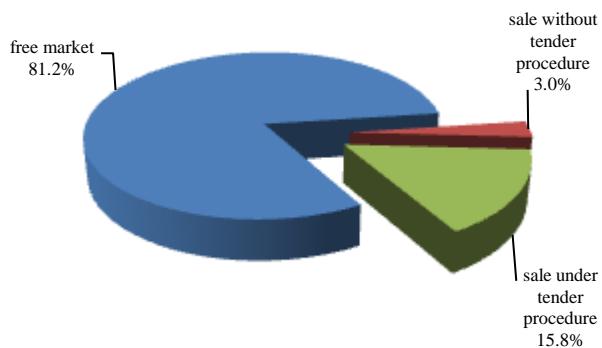

Forest land as well as woody and bushy land

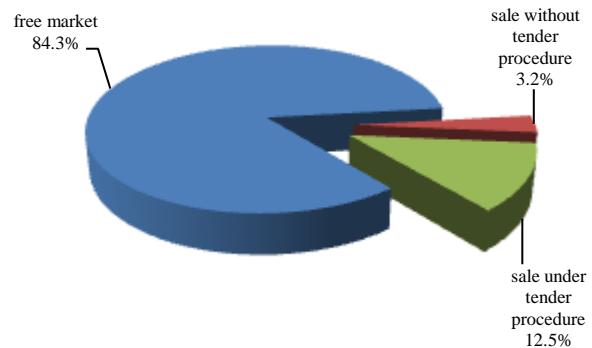

Forest land as well as woody and bushy land constituted the category of most rarely sold land properties.

In 2010 sales on the free market constituted the predominating form of turnover, both in terms of quantity and value, accounting respectively for 81.2% and 84.3% of all transactions.

Quantity structure of purchase/sale transactions of forest land as well as woody and bushy land by turnover form in 2010

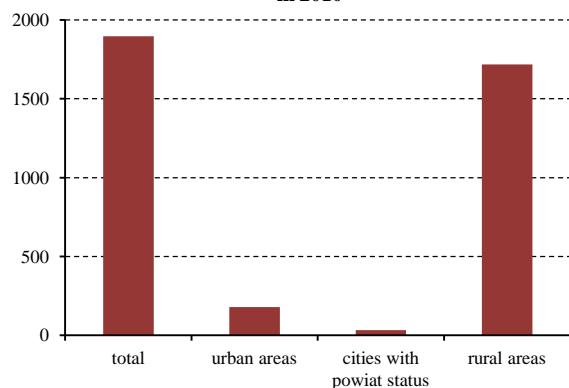

Value structure of purchase/sale transactions of forest land as well as woody and bushy land by turnover form in 2010

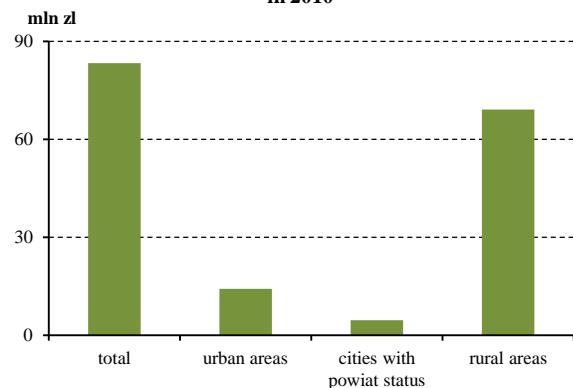

In the case of forest land as well as woody and bushy land turnover, the ownership title was the object of the whole observed turnover.

The majority of the forest land as well as woody and bushy land turnover, both in terms of quantity and value, took place outside the city borders (90.6% and 83.0%, respectively).

Number of purchase/sale transactions of forest land as well as woody and bushy land by location in 2010

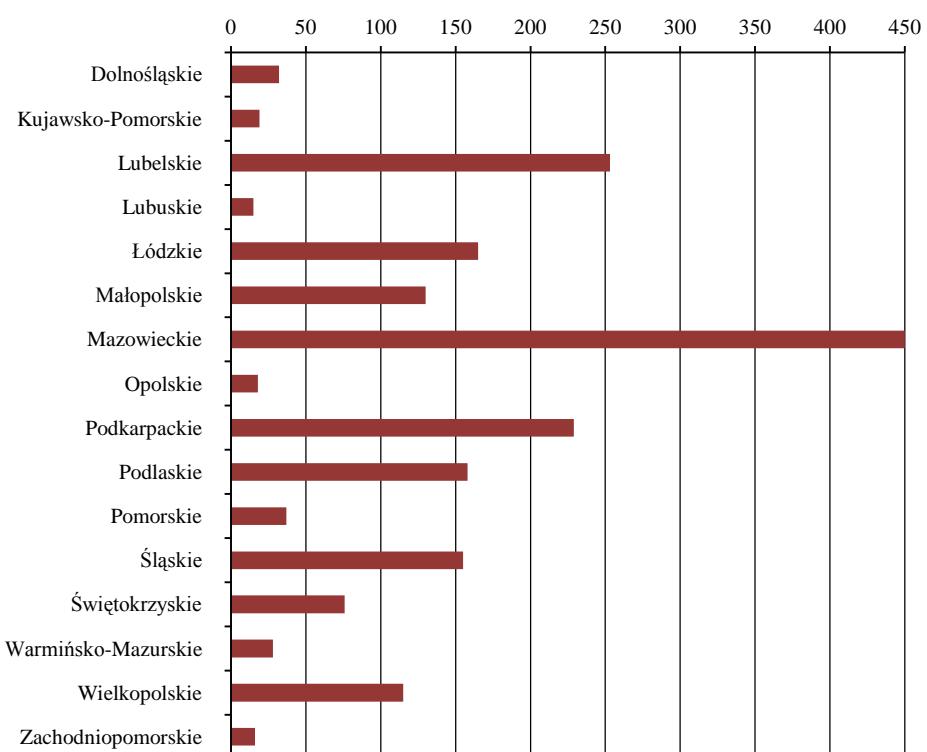

Value of purchase/sale transactions of forest land as well as woody and bushy land by location in 2010

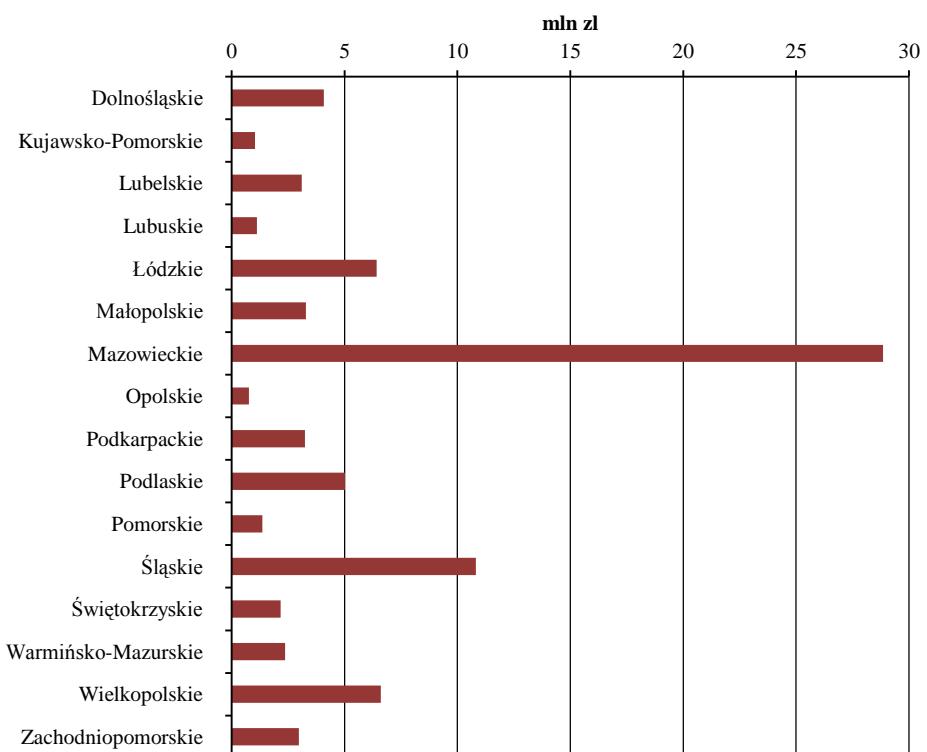

The largest number of forest land as well as woody and bushy land turnover was recorded in Mazowieckie, Lubelskie and Podkarpackie Voivodships. More than 49% of all forest land as well as woody and bushy land transactions were performed in these three voivodships combined. In turn, in terms of value the most active voivodships were Mazowieckie and Śląskie. The lowest forest land as well as woody and bushy land turnover in terms of quantity was recorded in Lubuskie, Zachodniopomorskie, Opolskie and Kujawsko-Pomorskie, whereas in terms of value – in Opolskie, Kujawsko-Pomorskie, Lubuskie and Pomorskie Voivodships.

Number of purchase/sale transactions of forest land as well as woody and bushy land in voivodships in 2010

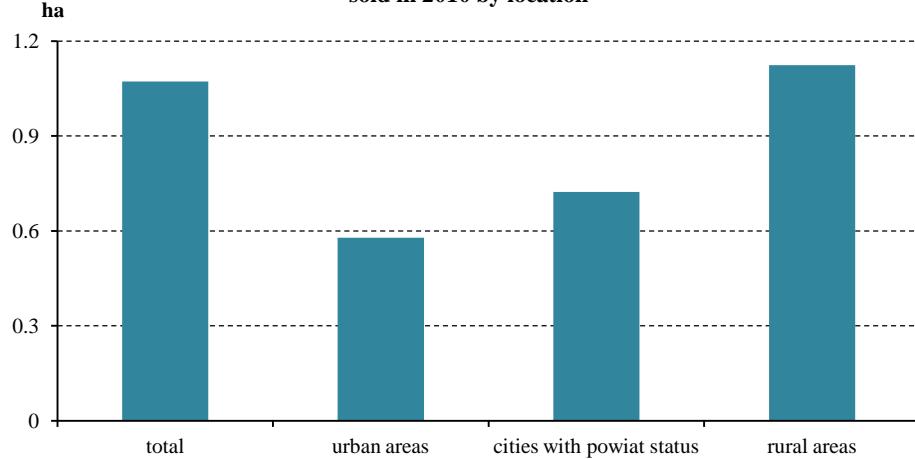

Value of purchase/sale transactions of forest land as well as woody and bushy land in voivodships in 2010

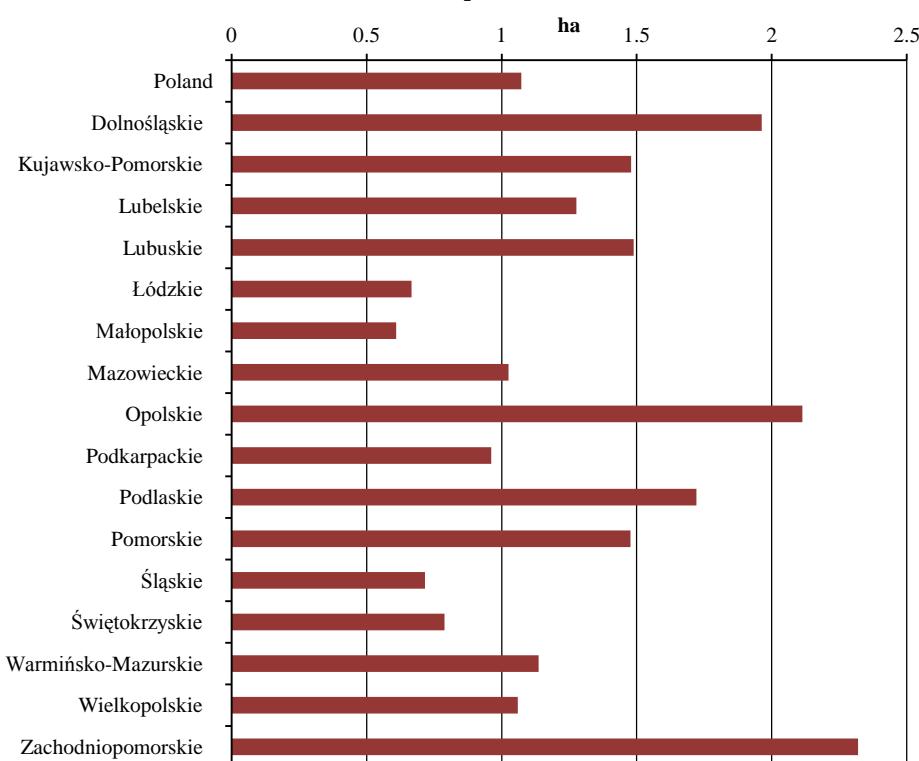

The average cadastral area of forest land as well as woody and bushy land transactions, constituting the object of turnover in 2010, averaged 1.07 ha.

Average cadastral area of forest land as well as woody and bushy land sold in 2010 by location

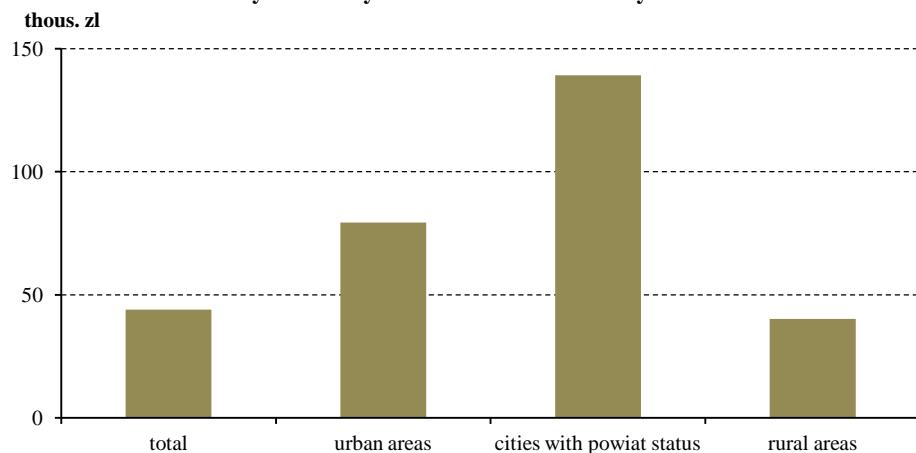

An average cadastral area of forest land as well as woody and bushy land sold in a single transaction in 2010 ranged from 0.61 ha in Małopolskie Voivodship to 2.32 ha in Zachodniopomorskie Voivodship.

Average cadastral area of forest land as well as woody and bushy land sold on voivodship markets in 2010

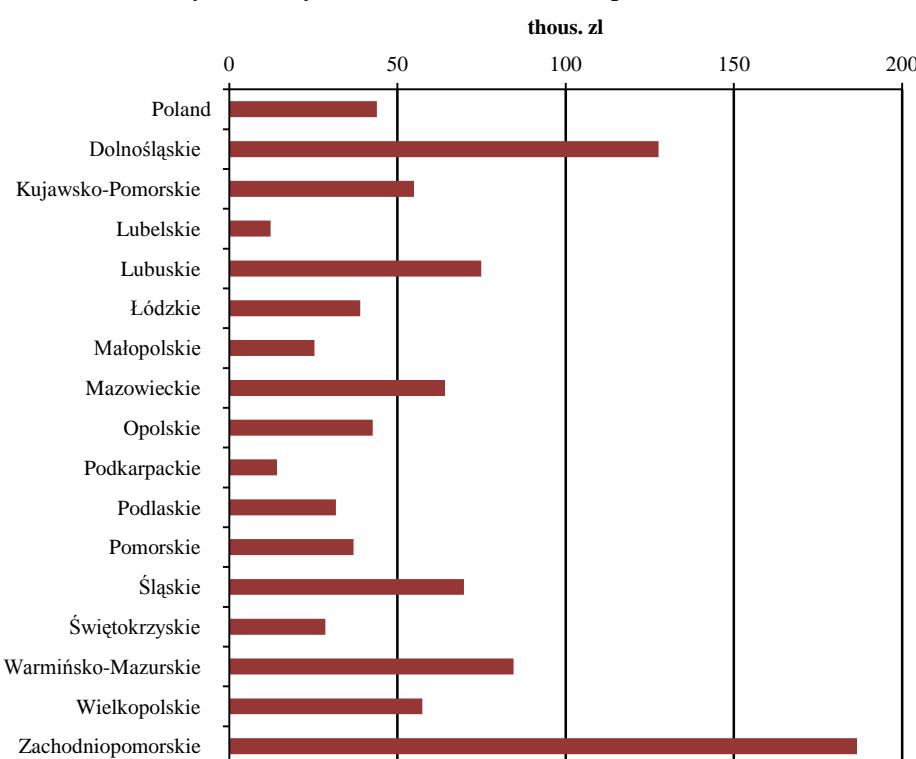

An average cost of forest land as well as woody and bushy land purchased in a single transaction amounted to 43.9 thous. zł.

Average value of single purchase/sale transaction of forest land as well as woody and bushy land concluded in 2010 by location

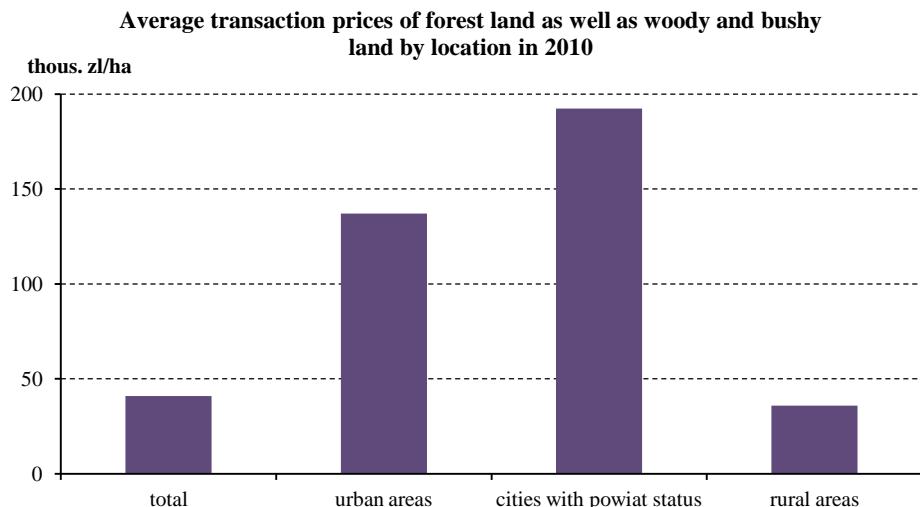

An average value of a single purchase/sale transaction of forest land as well as woody and bushy land ranged from 12.3 thous. zl in Lubelskie Voivodship to 186.6 thous. zl in Zachodniopomorskie Voivodship.

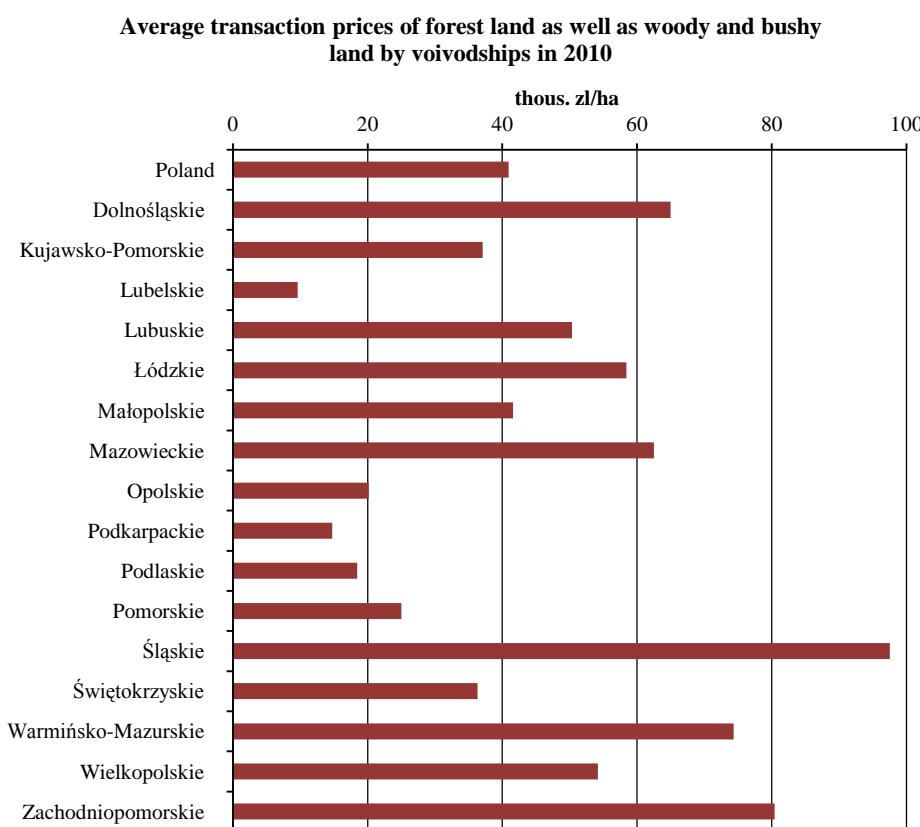

Average value of single purchase/sale transaction of forest land as well as woody and bushy land concluded on voivodship markets in 2010

An average price for 1 ha of cadastral area of forest land as well as woody and bushy land sold in 2010 in Poland amounted to about 41 thous. zl. The prices of forest land as well as woody and bushy land in urban areas were considerably higher than those outside the city borders. Especially high prices were recorded in cities with powiat status. An average price for 1 ha of cadastral area of forest land as well as woody and bushy land sold in cities with powiat status was nearly five times higher than an average price of this real estate category for Poland in total.

Average transaction prices for forest land as well as woody and bushy land ranged from about 10 thous. zł per 1 ha in Lubelskie Voivodship to about 98 thous. zł per 1 ha in Śląskie Voivodship.
