² Data about consumption level was compiled using balance method: production enlarged by import, reduced by export, decreases and losses of agricultural products at producers' and in turnover including changes of stocks level. Besides, production of raw materials is diminished by their usage for production purposes. Consumption per capita is based on a number of population data for 30 June.

³ Data concerns farming years i.e. period from 1 VII of the previous year to 30 VI of the given year.

⁴ Data provisional

In 2021 a significant, percentage increase in the consumption of animal edible fats, wine and mead as well as milk was recorded. While the consumption of sugar and beer dropped
