In June 2020 compared to the previous month, both average paid employment and average gross wages and salaries in enterprise sector increased

In June 2020, as in the previous month, further reduction of employment was observed in some entities (end of fixed-term contracts and not extending them and termination of employment contracts). However, due to restoring pre-pandemic full-time jobs and resuming admissions, there was a slight increase in average paid employment in enterprise sector by 0.2% compared to the May this year, when a decrease of 1.4% was observed. Compared to the same period last year, the decline continued and amounted to 3.3%.

In June this year, compared to May this year, an increase in average gross wages and salaries in enterprise sector was noted. It was caused by, among others payment of bonuses, quarterly, annual and jubilee awards and retirement severance pays (which beside the base remuneration are also included as components of wages and salaries), and in some units, restoring the salary to the level before the pandemic.

<sup>1</sup> Activities included in the enterprise sector are listed on page 2.
