Protection of nature

Definition:

Nature protection consists of preservation, sustainable use, and restoration of resources, formations and elements of nature.

Resources, formations and elements of nature include:

- wild plants, animals, and fungi; species of plants, animals, and fungi under species protection
- migratory animals;
- nature habitats;
- habitats of endangered, rare and protected species of plants, animals and fungi;
- features of animate and inanimate nature as well as remnants of fossil plants and animals;
- landscape;
- rural and urban green lands;
- trees and shrubs outside the forest.
