

Terms used in official statistics

Private sector

Definition:

The entirety of national economy entities grouping private domestic property (natural persons and other private units), foreign property (foreign persons) and "mixed property" with the majority of the capital (property) of private sector entities.

In the case of equal share of public capital (the total share of the ownership of the State Treasury, state-owned legal persons, and local self-government units is 50%) and private (the total share of the ownership of: domestic natural persons, other domestic private units, foreign persons is 50%), a national economy entity is classified to the private sector.
