Statistics Poland

Terms used in official statistics

Passenger carrying capacity

Definition:
Number of seats and/or berths and standing places (in the case of urban transport) available in the vehicle (i.e. road motor vehicle or railway vehicle or aircraft), when it is performing the service for which it is primarily intended.

In railway transport seats in dining coaches and buffet compartment places are excluded.
In road transport the driver's seat is included.

Low-level terms:

- Air passenger seats available
