### A study of the conditions and directions of spatial management of the commune

#### Definition:

Planning document defining the spatial policy of a commune. The study is to harmonize the provisions of the local spatial management plans. The study provides for the conditions in particular with regard to: the current use, management and allotment of land, protected sites and areas, the natural and cultural environment, land ownership, life quality of inhabitants, tasks in conjunction with the implementation of supra-local objectives. The study defines in particular: environmental values and threats, protection forms, areas already built-up, areas excluded from building activities, or designated for building activities including their functional features, current conditions and development directions of technical and service infrastructure, areas for which a local spatial management plan is to be prepared, and areas reserved for the implementation of supra-local tasks and programmes. The study does not have the status of a bye-law and may not be used as a basis for decisions on conditions of development and spatial management.
