

## Terms used in official statistics

### Shop

A space for commercial purposes whose interior is accessible for all consumers.

A shop can be located in a separate building or in other buildings e.g. residential buildings. If in a big store (e.g. department store, shopping centre), part of space is leased by another legal or physical person conducting on this part retail sale of goods on own account - then this space is a separate shop.

#### Retail sales outlets

Trade store

Department store

Hypermarket

Universalstore

Specialised store

Supermarket
