Economically inactive population by Census 2021

Definition:

The economically inactive population comprises persons aged 15 years or more who were not classified as employed or unemployed, i.e. persons who during reference week:

- did not work, neither had a job nor were seeking work,
- were seeking a job, albeit not in an active way or were actively seeking work but were not ready (available) to start work within the two weeks following the reference week,
- neither worked nor were seeking work, as they had already found a job and were waiting to start work during the period:
 - a) longer than 3 months,
 - b) up to 3 months, albeit they were not available for this work.

The economically inactive population was determined in the reference week, i.e. from 25 to 31 March 2021. This population remains outside the labour market.
