Unemployed persons by Census 2021

Definition:

Persons aged 15-74 years who simultaneously fulfill three conditions:

- were not employed in the reference week,
- were actively looking for work, i.e. took concrete steps to find a job in the period of one month ending on the last day of the survey,
- were available to take up work in the reference week and the following week.

The unemployed population was determined in the reference week, i.e. from 25 to 31 March 2021. The unemployed also included those who had found a job and were waiting for a job to start within 3 months and were willing to take that job.
