

Terms used in official statistics

Surface water

Definition:

Meand inland waters, except groundwater (all standing or flowing water on the surface of the land); transitional waters and coastal waters, except in respect of chemical status for which it shall also include territorial waters.

The inland surface waters are divided into:

1. flowing

- in natural watercourses, canals and springs, where these flowing waters begin,
- in lakes or other natural reservoirs with continuous or periodical natural inflow or outflow of surface water,
- in artificial reservoirs situated on flowing waters;

2. standingwater

- water in lakes and other natural water reservoirs not directly and naturally connected with surface flowing waters.
