Sale of construction and assembly production

The value of sold construction and assembly works performed using own resources (without subcontractors) for outside clients. This value is expressed in actual sales prices - taking into account all discounts, rebates and deductions - excluding value added tax (VAT). Construction and assembly works include activity consisting in construction of buildings and structures, starting from site preparation, through various scope earthworks, foundation works (zero state), constructing load bearing elements, building partitions, construction and covering of roofs (raw state), ending with assembly, installation and completion work.

The scope of construction and assembly works includes general construction and specialized works in the field of building constructions, which involve the erection, reconstruction, addition, alteration, renovation, demolition or assembly of a construction, including assembly of prefabricated elements and structures of a permanent or temporary nature. In particular, these are:

- 1) construction works related to the construction of buildings, which include the construction, addition, reconstruction, alteration, renovation of residential and non-residential buildings, as well as the assembly of buildings made of prefabricated structures of a permanent or temporary nature;
- 2) works related to the construction of civil engineering objects, which include the construction, addition, reconstruction, alteration, renovation of civil engineering objects;
- 3) specialized construction works related to the construction of buildings and civil engineering objects, carried out by contractors with specialized skills and special equipment; they include:
