Preliminary assessment of overwintering of crops in 2026

Field studies indicate that in the current year, winter crops overwintered somewhat worse than in the previous year. The main cause of the damage was significant drops in near-ground temperatures recorded in January and February (in some areas down to -25°C and below), accompanied by drying winds. Insufficient snow cover or its absence further limited the natural protection of plants against frost.

29 Report on the socio-economic situation of Wielkopolskie Voivodship 2026
Statistical Office in Poznan
Apr

The Statistical Office in Poznań presents the 15th edition of the Report on the socio-economic situation of the Wielkopolskie voivodship, which includes a wide range of the latest statistics about the level of development of our voivodship related to environment, society, economy and growth management. In this year's edition, data on the use of EU funds under the 2021-2027 financial perspective have been included for the first time, covering both the value of agreements and realized payments broken down by program, along with the share of committed European funds. The analysis enables the evaluation of the progress of works within the voivodship, as well as on a national scale. The topics in this Report are presented based on data covering a period since 2015, enabling analysis and assessment of changes occurring over the past decade. Moreover, to provide a broader context for analysis and evaluation, selected statistical data are also presented in the context of Poland and other voivodships. The analytical commentary is enriched with tables and graphical presentations in the form of maps and charts, facilitating the perception of statistical information and its spatial relationships.
