Przedmowa

W 2018 r. mija 100 lat od utworzenia Głównego Urzędu Statystycznego. Z tej okazji Urząd Statystyczny w Opolu opracował publikację „*Atlas statystyczny województwa opolskiego*”, która stanowi graficzne kompendium wiedzy o regionie. Opracowanie uwzględnia aspekty społeczne, gospodarcze i środowiskowe związane z celami polityki spójności, zorientowanej na zmniejszenie dysproporcji w układzie regionalnym i wyrównywanie szans rozwojowych.

Publikacja zawiera mapy i wykresy statystyczne prezentujące stan oraz zmiany zagadnień związanych z kapitałem ludzkim, jakością życia, gospodarką oraz środowiskiem w układzie gmin lub powiatów, województw, a także wybrane dane dla regionów NUTS 2 Unii Europejskiej. Podstawowy zakres informacji przedstawiono na mapach dla 2016 r. częściowo także w odniesieniu do 2000 lub 2010 r. W celu zobrazowania zmian wybrane zagadnienia zaprezentowano na wykresach, przeważnie w retrospekcji od 2000 r.

Głównym źródłem danych wykorzystanych w publikacji są zasoby informacyjne statystyki publicznej, natomiast dla zobrazowania zjawisk w porównaniach regionów UE – baza Eurostat; ponadto wykorzystane zostały dane Głównego Urzędu Geodezji i Kartografii, Ministerstwa Zdrowia, Ministerstwa Spraw Wewnętrznych i Administracji, Agencji Restrukturyzacji i Modernizacji Rolnictwa, Urzędu Regulacji Energetyki, Okręgowej Komisji Egzaminacyjnej we Wrocławiu.

Przekazując Państwu niniejszą publikację wyrażam nadzieję, że zawarte w „*Atlasie statystycznym województwa opolskiego*” dane okażą się cennym źródłem informacji, pozwalającym dokonać oceny procesów społecznych, gospodarczych i środowiskowych zachodzących w regionie, jak również staną się podstawą do kreowania przyszłych kierunków rozwojowych województwa.

Opole, maj 2018 r.

Preface

In 2018, 100 years have passed since the establishment of Statistics Poland. On this occasion, the Statistical Office in Opole has prepared the publication "*Statistical Atlas of Opolskie Voivodship*", which is a graphical compendium of knowledge about the region. The study takes into account social, economic and environmental aspects related to the objectives of cohesion policy, oriented at reducing disparities in the regional context and equalizing development opportunities.

The publication contains maps and statistical charts presenting the state and changes in issues related to human capital, quality of life, economy and the environment by gminas or powiats, voivodships, as well as selected data for the NUTS 2 regions of the European Union. The basic scope of information is presented in the maps for 2016, partly also in relation to 2000 or 2010. In order to illustrate changes, selected issues are presented in graphs, usually in retrospect since 2000.

The main source of data used in the publication are information resources of official statistics, while for the presentation of phenomena in comparisons of EU regions – the Eurostat database; in addition, data of the Head Office of Geodesy and Cartography, the Ministry of Health, the Ministry of the Interior and Administration, the Agency for Restructuring and Modernization of Agriculture, the Energy Regulatory Office, the District Examination Board in Wrocław were used.

Presenting the publication, I hope that the data contained in "*Statistical Atlas of Opolskie Voivodship*" will prove to be a valuable source of information allowing to assess social, economic and environmental processes taking place in the region, and will be the basis for creating future development directions of the voivodship.
