COMMENTS TO TABLES

1. The harmonized unemployment rate seasonally adjusted (table 1) is calculated as the percentage share of the unemployed in the number of the economically active population (i.e. the sum of unemployed and employed). The harmonized unemployment rate resulted from the uniformed method of its calculation for each country applied by Eurostat. The data are calculated by Eurostat on the basis of the quarterly Labour Force Survey (LFS) results and the monthly results from the registered unemployment.
2. Tables 12, 24 and 31 sections were shifted upward, e.g. in the section 3-6 persons remaining unemployed from 3 months and 1- day to full 6 months were included.
3. Tables 13 sections were shifted upward, e.g. in the section 1-5 persons who worked 1 year and 1 day to full 5 years were included.
