

Consumer price indices in March 2020

15.04.2020

 **4.6%**

an increase compared with
the corresponding month
of the previous year

Consumer prices in March 2020 compared with the corresponding month of the previous year increased by 4,6% (with an increase of prices of services – by 6,5% and goods – by 3,8%). As related to the previous month consumer prices increased by 0,2% (with an increase of prices of services – by 0,3% and goods by 0,2%).

As a result of restrictions on trade and the movement of people, introduced gradually in the past weeks to prevent the coronavirus from spreading, many shops and points providing personal services were closed. The organization of cultural and sporting events was suspended. Travel and accommodation services have been significantly reduced. These changes strongly affected the possibility of collecting retail price data.

Major problems concern the data collection in the field. In March of the current year, however, it was possible to collect a large share of the information on prices during the period when sales took place under unchanged conditions. The missing data was completed by the price collectors primarily in a remote way – by e-mail, telephone, through websites. Prices that could not be collected using these methods were estimated according to current methodological procedures and Eurostat guidelines in this regard. The largest share of missing observations requiring imputation was recorded in the case of recreation and culture, especially for package international holidays, transport, health, clothing and footwear as well as for some products in the food and non-alcoholic beverages division.

If the restrictions on retail trade continue it is expected that the number of missing price recordings in April will be significantly higher than in March of the current year. The increase in the share of missing observations will require a special approach for estimating the prices of goods and services. The calculations will apply the rules developed by Eurostat in cooperation with EU countries for calculating consumer price indices during the crisis related to COVID-19.^a

^a Document 'Guidance on the compilation of the HICP in the context of the COVID-19 crisis' was published by Eurostat under the link https://ec.europa.eu/eurostat/documents/10186/10693286/HICP_guidance.pdf

The guidelines recommended by Eurostat concerning consumer price indices are also presented in Polish under the link <https://stat.gov.pl/obszary-tematyczne/ceny-handel/wskazniki-cen/wytyczne-dotyczace-operowania-hicp-w-kontekscie-kryzysu-zwiazanego-z-covid-19,19,1.html>

Miscellaneous goods and services	102,6	100,0	100,2	102,1	100,6	0,01

Contribution of price changes to the total consumer price index

In March of the current year, compared with the previous month, the highest contribution to the total consumer price index came from higher prices of Food (by 0,9%), Clothing and footwear (by 2,5%) and Dwelling (by 0,4%), which increased the index by 0,20 pp, 0,12 pp and 0,09 pp, respectively. Lower prices related to Transport (by 2,5%) and Recreation and culture (by 0,9%) decreased the index by 0,24 pp and 0,06 pp, respectively.

Compared with the corresponding month of the previous year, higher prices of Food (by 8,6%) and related to Dwelling (by 5,9%) increased the index by 1,97 pp and 1,42 pp, respectively. Lower prices related to Transport (by 1,4%) and Clothing and Footwear (by 1,7%) lowered the index by 0,14 pp and 0,09 pp, respectively.
