a – No data, b – No data in June 2021 due to close the marketplaces because of the state of danger of COVID-19 disease, it was not possible to obtain data on prices of agricultural products on marketplaces.

Data on procurement prices were calculated on the basis of information on value and quantity of procurement by legal persons and independent organizational entities without legal personality (without natural persons). Indices of procurement prices and prices received by farmers on marketplaces were calculated on the basis of absolute data expressed with more precision than in the tables.

<sup>2</sup> Procurement prices – excluding sowing seed.

<sup>3</sup> Procurement prices – total (of which: edible early kinds, seeds, edible late, industrial, of which starch). Marketplaces prices – edible excluding early kinds.

<sup>4</sup> Marketplaces prices – average weighted price of cattle for slaughter calculated with the adoption of the structure of procurement quantity of young cattle and cows for slaughter.
