

# Gross Domestic Product in the 2nd quarter of 2022. Preliminary estimate

**31.08.2022**

**105.5**

GDP growth rate in the 2nd quarter of 2022

**Seasonally unadjusted gross domestic product (GDP) in the 2nd quarter of 2022 was higher by 5.5% year-on-year comparison against the increase of 11.3% in the corresponding quarter of 2021 (constant average prices of the previous year).**

In the 2nd quarter of 2022 seasonally adjusted GDP (constant prices, reference year 2015) was lower by 2.1% than in the previous quarter and 4.7% higher than in the 2nd quarter of the previous year.

Seasonally unadjusted GDP (constant average prices of the previous year) was higher by 5.5% than in the corresponding quarter of the previous year.

Compared to the flash estimate published on 17 August, 2022, gross domestic product at constant average prices of the previous year, seasonally unadjusted, increased by 5.5% revised up by 0.2 percentage points.

In the 2nd quarter of 2022 there was the increase of GDP which amounted to 5.5% year-on-year comparison. This was caused by the improvement of growth rate of domestic uses which was up by 7.2% than a year earlier (in the 1st quarter of 2022 the increase in domestic uses of 13.2% was recorded). It resulted mainly from the increase in gross capital formation of 16.7% (against the increase of 57.3% in the 1st quarter of 2022) and the increase in final consumption expenditure of 4.9% (against the increase of 5.1% in the 1st quarter of 2022). Consumption expenditure in the households sector was higher by 6.4% (against the increase of 6.6% in the 1st quarter of 2022). Gross fixed capital formation went up by 7.1% (against the increase of 4.3% in the 1st quarter of 2022).

As a result, the positive contribution of domestic uses to economic growth was +6.7 percentage points (in the 1st quarter of 2022 the positive influence of domestic uses of +12.3 percentage points was recorded). It came both from the positive influence of final consumption expenditure and gross capital formation. The impact of final consumption expenditure was +3.7 percentage points (against the impact of +4.0 percentage points in the 1st quarter of 2022), of which the impact of the consumption expenditure in the households sector was +3.6 percentage points and the impact of public consumption expenditure amounted to +0.1 percentage points (+3.9 percentage points and +0.1 percentage points in the 1st quarter of 2022 respectively). The impact of gross fixed capital formation amounted to +1.1 percentage points (against +0.6 percentage points in the 1st quarter of 2022). There was a considerably smaller than in the 1st quarter of 2022, positive contribution of changes in inventories which amounted to +1.9 percentage points (against +7.7 percentage points in the 1st quarter of 2022). As a consequence, the impact of gross capital formation on GDP growth amounted to +3.0 percentage points (against +8.3 percentage points in the 1st quarter of 2022). In the 2nd quarter of 2022 a negative impact of the net exports to the economic growth was noted, which amounted to -1.2 percentage points (against -3.8 percentage points in the 1st quarter of 2022).

**Chart 1. Gross domestic product volume growth rate  
(corresponding period of the previous year = 100)**

**Chart 2. Gross domestic product seasonally adjusted volume growth rate  
(the previous quarter = 100)**

**Seasonally adjusted GDP (previous quarter = 100, constant prices, reference year 2015)**

In the 2nd quarter of 2022 compared to the previous quarter seasonally adjusted GDP was 2.1% lower.

Gross value added in national economy in the 2nd quarter of 2022 decreased by 0.7%, of which:

- in construction by 1.3%,
- in trade and repair by 5.2%,
- in financial and insurance activities by 0.2%.

Gross value added increased in industry by 0.6%, in transportation and storage by 0.5%, and in public administration and defense, compulsory social security, education, human health and social work activities altogether by 0.6%.

Domestic uses in the 2nd quarter of 2022 decreased by 3.8%.

In the 2nd quarter of 2022 total consumption expenditure increased by 2.7%, in which consumption expenditure in the households sector rose by 2.1% and public consumption expenditure grew by 0.7%.

Gross capital formation in the 2nd quarter of 2022 was lower by 27.7%, of which gross fixed capital formation decreased by 6.8%.

In the attached tables 1 and 2 the real growth rates are presented in constant prices of 2015 with previous quarter=100 and corresponding quarter of the previous year=100 for GDP time series and its selected components, seasonally unadjusted, seasonally adjusted and trend.

### Seasonally unadjusted GDP (constant average prices of the previous year)

According to the preliminary estimate GDP in the 2nd quarter of 2022 was 5.5% higher than in the corresponding quarter of the previous year.

**Chart 3. GDP volume growth rate (corresponding period of the previous year = 100)**

Gross value added in national economy in the 2nd quarter of 2022 was 5.3% higher than in the corresponding quarter of 2021, of which:

- in industry by 8.8%,
- in construction by 5.3%,
- in trade and repair by 5.8%,
- in transportation and storage by 13.6%,
- in financial and insurance activities by 9.9%,
- in public administration and defense, compulsory social security, education, human health and social work activities altogether by 2.5%.

Domestic uses in the 2nd quarter of 2022 were 7.2% higher than in the corresponding quarter of the previous year.

Final consumption expenditure in the 2nd quarter of 2022 compared with the same quarter of the previous year was 4.9% higher, of which consumption expenditure in the households sector increased by 6.4% and public consumption expenditure increased by 0.8%.

Gross capital formation in the 2nd quarter of 2022 was higher by 16.7% compared to the corresponding quarter of 2021, of which gross fixed capital formation went up by 7.1%. Investment ratio (relation of gross fixed capital formation to gross domestic product at current prices) amounted to 15.1% against 14.9% in the previous year.

Detailed data for GDP time series and its components at current prices as well as volume growth rates (corresponding quarter of the previous year = 100, constant average prices of the previous year) is presented in tables 3 and 4. Table 5 includes information on contribution to GDP volume growth rate.

Seasonal adjustment procedure can cause revisions to historical GDP growth rates and GDP components when later quarterly observations become available or the past unadjusted data are revised.
