

**The CSO information on the updated 2013 – 2014 quarterly GDP estimate**

Together with "The release on general government deficit and debt in 2014", the CSO issues hereby updated 2013-2014 (annual and quarterly) GDP estimates.

The data on GDP and its elements has been revised in comparison with the previously published estimates because of:

1. making the final estimate of GDP for 2013;
2. taking into consideration more complete information about the results for the whole 2014 in terms of corporate finance, general government sector as well as foreign trade in goods and services and also others, mainly from administrative sources.

As a result some changes have occurred in values and growth rates of GDP and some of its elements.
