

## Annex 3. List of variables in the ZD surveys

### ZD-2 Report on therapeutic activity of health resort facilities, inpatient rehabilitation facilities

#### General data –identification codes

1. Number of the register book (part I).
2. Indication of the authority keeping the register.
3. Location of the medical facility/organisational unit / division of the medical entity (part II – TERYT).
4. Code of the founding entity (part III).
5. Organizational and legal form (part IV).
6. Code of the organizational unit (part V).
7. Code of the type of medical activity performed in the medical facility (part VI).

#### Type of medical facility – beds

8. Number of beds as of 31 December.
9. Number of beds as of 31 December, of which those in the wards with codes of organizational division specialty 6100–6701.
10. Number of beds as of 31 December, of which those in the wards with codes of organizational division specialty 4280 and 4300–4311.
11. Average number of beds.
12. Specification: health resort hospital, health resort hospital for children, health resort sanatorium, health resort sanatorium for children, hospital / sanatorium in an underground mining excavation outpatient health resort unit, natural healing centre, inpatient rehabilitation facility.

#### Adjustments of unit to the needs of disabled persons

13. Entry ramps/platforms to facilitate entry into the building.
14. Entrance door to the building automatically open.
15. Lift/s.
16. Lift/s – of which adapted for disabled persons.
17. Rooms/rooms with bathrooms adapted for the disabled persons.
18. Bathrooms adapted for the disabled persons.
19. Adaptations for blind and visually impaired people.
20. Adaptations for deaf and hearing impaired people.
21. Anti-slip floors.
22. Others.
23. Lack of adaptations.

#### Medical and therapeutic services

24. Mineral baths.
25. CO2 baths.
26. Peat treatments.
27. Inhalation.
28. Inhalation – of which drug inhalation.
29. Massages.
30. Cryotherapy.
31. Electrotherapy.
32. Light therapy.
33. Hydrotherapy.
34. Kinesiotherapy.
35. Paraffin wax treatment.
36. Others.

37. Of which therapeutic services.
38. Total (1-4 and 6-13).

**Activities of unit**

39. Total patients: inpatients and outpatients: total, out of total women, children and young up to age 18 and number of persons age 65 and more.
40. Total patients: inpatients and outpatients – of which inpatients: total, out of total women, children and young up to age 18 and number of persons age 65 and more.
41. Total patients: inpatients and outpatients – of which inpatients – incl. foreigners: total, out of total women, children and young up to age 18 and number of persons age 65 and more.
42. Total patients: inpatients and outpatients – of which inpatients – self-pay inpatients: total, out of total women, children and young up to age 18 and number of persons age 65 and more.
43. Patients undergoing natural healing services, pointed out in section 4, points 1–4: total.
44. Number of treatment days (beddays) of inpatients: total, out of total children and young up to age 18 and number of persons age 65 and more.
45. Number of treatment days (beddays) of inpatients – of which number of inpatient-days for foreigners: total, out of total children and young up to age 18 and number of persons age 65 and more.
46. Outpatients: total, out of total women, children and young up to age 18 and number of persons age 65 and more.
47. Inpatients (from row 02) financed/subsidized by: the National Health Fund (NFZ), the Social Insurance Institution (ZUS), the Agricultural Social Insurance Fund (KRUS), the State Fund for Rehabilitation of Disabled People (PFRON), other institutions (e.g. MOPS, foundations, associations, companies): total, out of total women, children and young up to age 18 and number of persons age 65 and more.

## ZD-3 Report on outpatient health care

### General data – identification codes

1. Number of the register book of the medical entity / professional practice
2. Designation of the authority keeping the register.
3. Location of the reporting unit providing health care: voivodship, powiat, commune, type of commune (TERYT).
4. Code of the founding entity, in the case of a medical entity that is not an entrepreneur (part III of the identification codes system).
5. Code specifying the organizational and legal form of the entity providing health care (part IV of the identification codes system).
6. A identification code of an organizational unit (part V of the identification codes system).
7. Type of reporting unit: hospital outpatient department, other clinic / health centre / outpatient clinic.
8. Code of the type of professional practice.
9. Code of the profession of a doctor/dentist.

### Adjustments of unit to the needs of disabled persons

10. Entry ramps/platforms to facilitate entry into the building.
11. Entrance door to the building automatically open.
12. Lift/s.
13. Lift/s – of which adapted for disabled persons.
14. Bathrooms adapted for the disabled persons.
15. Adaptations for blind and visually impaired people.
16. Adaptations for deaf and hearing impaired people.
17. Anti-slip floors.
18. Others.
19. Lack of adaptations.

### Primary health care

20. Primary health care clinic/ doctor's office (code 0010–0015) – consultations in total: total, out of total home consultations, teleconsultations.
21. Primary health care clinic / doctor's office (code 0010–0015) – out of consultations in total – to children and young up to age 18: total, out of total home consultations, teleconsultations.
22. Primary health care clinic (code 0010–0015) – out of consultations in total – to persons aged 65 and more: total, out of total home consultations, teleconsultations.
23. Primary health care clinic (code 0010–0015) – out of consultations in total – to women: total, out of total home consultations, teleconsultations.
24. Primary health care clinic (code 0010–0015) – out of consultations in total – to women – including preventive consultations provided to pregnant women: total.

### Specialist health care

25. Number of clinics (as of 31 December).
26. Medical consultations, total.
27. Medical consultations – out of total – to children and young up to age 18.
28. Medical consultations – of the total – to persons aged 65 and more.
29. Medical consultations – out of the total – to women.
30. Medical consultations – out of total – teleconsultations.
31. Types of clinics according to identification codes: total medical, internal medicine (code 1000–1009), allergy (code 1010–1011), diabetes (code 1020–1027), endocrine (code 1030–1033), geriatric (code 1060), cardiology (code 1100–1121), nephrology (code 1130–1131), dermatology (code 1200–1203), neurological (code 1220–1223), oncology (code 1240–1251), tuberculosis and lung diseases (1270–1277), rheumatology (code 1280–1281), rehabilitation (code 1300–1309), infectious diseases (code 1340–1349), sports medicine (code 1370–1371), paediatric (code 1401–1421), gynaecological and obstetrical (code 1450– 1475), surgical – in total (code 1500–

1581, 1630–1631), of which trauma-orthopaedic surgery (code 1580–1581) and neurosurgery (code 1570–1571), ophthalmology (code 1600–1605), otolaryngology (code 1610 –1617), urology (code 1640–1641), mental health (code 1700–1711), addiction treatment clinic (code 1740–1747), other (with a different specialty not mentioned above) (code –1999).

32. Types of clinics according to identification codes: total stomatological (code 1800–1840), out of total dental (code 1800), periodontal and periodontal mucosa diseases (code 1810), orthodontic (code 1820), dental prosthetics (code 1830) , dental surgery (code 1840).

#### **Night and holiday health care**

33. Number of clinics (as of 31 December).
34. Consultations in total.
35. Consultations – out of total to children and young up to age 18.
36. Consultations – out of total to persons aged 65 and more.
37. Consultations – out of total to women.
38. Type of clinic: night and holiday health care clinic /office (code 0016–0017) – clinics / consultations in total – out of total provided in ambulatory mode, provided at the patient home, teleconsultations.

## ZD-4 Report on first aid and emergency medical services

### General data

Entity of the emergency medical service

1. Number of the register book (part I).
2. Indication of the authority keeping the register.
3. Location of the medical entity providing health care/organisational unit of the medical entity (part II – TERYT).
4. Code of the founding entity (Part III).
5. Organizational and legal form of the entity providing health care (part IV).

### General data on the entity providing health care

6. Units of the emergency medical services – emergency rescue team – specialist (code 3114, 3154).
7. Units of the emergency medical services – emergency rescue team – general (code 3112, 3152).
8. Units of the emergency medical services – medical air rescue team (code 3210) – helicopter.
9. Units of the emergency medical services – medical air rescue team (code 3210) – plane.
10. Units of the emergency medical services – hospital emergency ward (code 4902).
11. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – wards in total.
12. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – general surgery (code 4500).
13. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – multi-organ Injuries (code 4590).
14. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – orthopaedics and organ movement traumatology.
15. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – neurosurgery (code 4570).
16. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – general surgery with neuro-traumatology profile.
17. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – vascular surgery (code 4530).
18. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre – general surgery with vascular surgical profile.
19. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre for children – wards in total.
20. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre for children – children’s surgery (code 4501)
21. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre for children – neurosurgery (code 4570).
22. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre for children – orthopaedics and organ movement traumatology.
23. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – trauma centre for children – neuro-traumatology
24. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – other organisational unit of the hospital specialized in providing emergency medical services – emergency room (code 4900).
25. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – other organisational unit of the hospital specialized in providing emergency medical services – specialist ward.
26. Trauma centre / organizational units of a hospital, specialized in providing emergency medical services – other organisational unit of the hospital specialized in providing emergency medical services – others.
27. First aid units – air-sanitary transport team (code 3200) – helicopter.

28. First aid units – air-sanitary transport team (code 3200) – plane.
29. First aid units – air search and rescue group – helicopter.
30. First aid units – air search and rescue group – plane.
31. Medical transport teams (code 9250) – medical ambulance.

### **Emergency medical activities**

32. Number of calls to the occurrence places.
33. Number of persons who received health care benefits – in total.
34. Number of persons who received health care benefits – women.
35. Number of persons who received health care benefits – children and youth up to age 18.
36. Number of persons who received health care benefits – persons aged 65 and more.
37. Number of persons who received health care benefits – persons whose deaths were recorded before or during emergency activities.
38. Place of occurrence: total (sum of rows 2-6), road traffic, work, school, home, others.

### **Health care benefits provided in an admission room/ hospital emergency ward under the outpatient treatment (with no subsequent hospitalization)**

39. Number of persons who received health care benefits – in total.
40. Number of consultations.
41. Number of persons who received health care benefits – women.
42. Number of persons who received health care benefits – children and youth up to age 18.
43. Number of persons who received health care benefits – persons aged 65 and more.
44. Specification: total (sum of rows 02 to 12), services in the field of general, not qualified to the below mentioned, internal medicine, cardiology, surgery, trauma-orthopedic surgery, neurosurgery, gynaecological and obstetrical, paediatric, neurological, ophthalmology, stomatological, mental health.

### **Inpatient activity of the hospital emergency ward (code 4902)**

45. Beds, as of 31 December in total.
46. Beds, as of 31 December – for children and youth up to age 18.
47. Beds, as of 31 December – available to the clinics.
48. Patients in total.
49. Inpatient activity – patients – children and youth up to age 18.
50. Inpatient activity – patients – people aged 65 and more.
51. Inpatient activity – patients – transferred for inpatient treatment.
52. Inpatient activity – patients – persons whose deaths were recorded before or during medical treatment.

### **Inpatient activity of a trauma centre / trauma centre for children / organizational unit of a hospital specialized in providing health services necessary for medical rescue**

53. Inpatient activity – beds, as of 31 December (in total).
54. Inpatient activity – beds, as of 31 December – for children and youth up to age 18.
55. Inpatient activity – beds, as of 31 December – available to the clinics.
56. Inpatient activity – average number of beds.
57. Inpatient activity – patient in total.
58. Inpatient activity – patients – children and youth up to age 18.
59. Inpatient activity – patients – people aged 65 and more.
60. Inpatient activity – beddays.
61. Inpatient activity – persons whose deaths were recorded before or during medical treatment.
62. Specification: trauma centre, trauma centre for children, specialized ward.

**Personnel composition of selected emergency rescue entities (as of 31 December)**

63. Emergency rescue team (specialist and basic) – total number of employed persons (regardless of the form of employment and working time) – physicians of the emergency medical services.
64. Emergency rescue team (specialist and basic) – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – physicians of the emergency medical services.
65. Emergency rescue team (specialist and basic)– total number of employed persons (regardless of the form of employment and working time)– nurses of the emergency medical services.
66. Emergency rescue team (specialist and basic) – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – nurses of the emergency medical services.
67. Emergency rescue team (specialist and basic) – total number of employed persons (regardless of the form of employment and working time) – paramedics.
68. Emergency rescue team (specialist and basic) – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – paramedics.
69. Emergency rescue team (specialist and basic) – total number of employed persons (regardless of the form of employment and working time) – drivers.
70. Emergency rescue team (specialist and basic) – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – drivers.
71. Medical air rescue team – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – physicians of the emergency medical services.
72. Medical air rescue team – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – nurses of the emergency medical services.
73. Medical air rescue team – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – paramedics.
74. Medical air rescue team – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – pilots.
75. Other units – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – medical staff.
76. Voivodship office – total number of employed persons (regardless of the form of employment and working time) – voivodship coordinator of emergency medical services (physician).
77. Voivodship office – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – voivodship coordinator of medical rescue services (physician).
78. Voivodship office – total number of employed persons (regardless of the form of employment and working time) – voivodship coordinator of medical rescue services (nurse).
79. Voivodship office – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – voivodship coordinator of medical rescue services (nurse).
80. Voivodship office – total number of employed persons (regardless of the form of employment and working time) – voivodship coordinator of medical rescue services (paramedic).
81. Voivodship office – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – voivodship coordinator of medical rescue services (paramedic).
82. Medical dispatch centre – total number of employed persons (regardless of the form of employment and working time) – medical dispatcher (nurse).
83. Medical dispatch centre – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – medical dispatcher (nurse).
84. Medical dispatch centre – total number of employed persons (regardless of the form of employment and working time) – medical dispatcher (paramedic).
85. Medical dispatch centre – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – medical dispatcher (paramedic).
86. Medical dispatch centre – total number of employed persons (regardless of the form of employment and working time) – medical dispatcher (in accordance with Article 58 (3) of the Act on State Emergency Medical Services).

87. Medical dispatch centre – the number of employed persons for whom it is the main workplace (regardless of the form of employment) – medical dispatcher (in accordance with Article 58 (3) of the Act on the State Emergency Medical Services).

## ZD-5 Report on pharmacy and pharmaceutical outlet

### General data

1. Type of pharmacy.
2. The unit conducts the sales of medical products by mail order using the website.
3. The pharmacy has night duty.
4. Adjustments of unit to the needs of disabled persons.

### Employed in pharmacy, pharmaceutical outlet – by the main workplace

5. Total employees.
6. Employees – of which pharmacists.
7. Employees – of which pharmacists – including trainees.
8. Employees – of which pharmacists – women.
9. Employees – of which pharmaceutical technicians.
10. Employees – of which pharmaceutical technicians – women.
