

Consumer tendency – May 2023

24.05.2023

 **2.3 p. p.**

Change in current consumer confidence indicator

In May 2023, there was an improvement in both current and future consumer sentiment moods compared to the previous month. The current consumer confidence indicator, synthetically describing the current trends in individual consumption, was -29.9^a which was by 2.3 p.p. higher in relation to last month.

Current consumer confidence indicator in May 2023

All components of the indicator obtained values higher than a month ago. The largest increases were recorded in evaluations of the current economic situation of the country, and future economic situation of the country (increases by 3.8 and 3.2 percentage points, respectively). For the other components of the indicator, the increases were as follows: by 2.7 percentage points in the evaluation of the current financial situation of a household by 1.9 percentage points in the evaluation of the future financial situation of a household and by 0.2 percentage points in the evaluation of the current possibility of making important purchases.

Referring to May 2022, the current value of current consumer confidence indicator is higher by 8.5 percentage points.

Leading consumer confidence indicator in May 2023

The leading consumer confidence indicator, synthetically describing trends in individual consumption that are expected in the coming months, increased by 4.4 percentage points in relation to the previous month, and was at the level of -15.3^a.

The increase of the value of the indicator was affected by all of its components. The largest increase was recorded in the evaluation of the possibility of future money saving (by 7.5 percentage points). For the other components of the indicator, the increases were as follows: by 5.0 percentage points in evaluation of the future level of unemployment, by 3.2 percentage points in the evaluation of the future economic situation of the country and by 1.9 percentage points in the evaluation of the future financial situation of a household.

In May this year leading consumer confidence indicator reached a value higher by 12.6 percentage points than in the corresponding month of 2022.

Answers to additional questions in connection with the current situation on the territory of Ukraine are presented in the annex.

Current consumer confidence indicator is higher by 2.3 percentage points compared to the previous month

Leading consumer confidence indicator increased by 4.4 percentage points compared to the previous month

^a Both consumer confidence indicators receive values between -100 and +100. A positive value means dominance of consumers with optimistic attitude over consumers with pessimistic attitude, while negative value means dominance of consumers with pessimistic attitude over consumers with optimistic attitude. In the period of 08-17.05.2023, 1525 interviews were conducted.
