

STATISTICS IN TRANSITION new series, March 2018  
Vol. 19, No. 1, pp. 171

**The 2nd Congress of Polish Statistics** organised on the occasion of the 100th anniversary of the establishment of the Statistics Poland will be held on July 10-12, 2018 in Warsaw.

“The Congress will last three days. The framework program of the event contains a series of thematic sessions, including a jubilee panel on the history of Polish statistics, as well as sessions devoted to Polish statistics on the international arena, methodology of statistical surveys, mathematical statistics, regional statistics, population statistics, social and economic statistics, statistical data issues and, also sports and tourism statistics.

In the Congress, which will emphasise the contribution of Poles to the global treasury of statistical knowledge, representatives of foreign institutions and scientific units will participate.

We are convinced that the Congress will constitute a unique opportunity for the representatives of official statistics, research centres and other partners involved in the study of social, economic and environmental processes to meet and exchange their knowledge, views and experiences.”
